COMM 305 — Understanding Social Science Research

Professor Lian Jian

ljian@usc.edu

Class meets: TuTh 12:30-1:50p, ANN L105A

Teaching Assistants

Course Description

The value of science can only be realized if it is understood by people and put into practice. This course guides you to evaluate scholarly publications of social scientific research, and to apply the results of social science in daily practices.

In order to truly appreciate scientific research, we need to understand the principles of research methods. This learning process is best facilitated by a combination of lectures, problem sets, and exams. In addition, there will be assignments in which you are required to summarize and critically evaluate a series of research articles in the field of communication. Evaluation of these assignments will be based on whether you have summarized the main findings in the assigned articles, and more important, whether you have identified their main flaws.

There is no prerequisite for this course.

Course materials

Requirements and Evaluation

Evaluation will be on the following basis:
Exam 1 25%
Exam 2 25%
Assignments 25%
Final Report 15%
Participation 10%

There will be five assignments, each worth 5%.
This course uses the following grading scheme:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>93% or higher</td>
</tr>
<tr>
<td>A-</td>
<td>90%-92%</td>
</tr>
<tr>
<td>B+</td>
<td>87%-89%</td>
</tr>
<tr>
<td>B</td>
<td>83%-86%</td>
</tr>
<tr>
<td>B-</td>
<td>80%-82%</td>
</tr>
<tr>
<td>C+</td>
<td>77%-79%</td>
</tr>
<tr>
<td>C</td>
<td>73%-76%</td>
</tr>
<tr>
<td>C-</td>
<td>70%-72%</td>
</tr>
<tr>
<td>D+</td>
<td>67%-69%</td>
</tr>
<tr>
<td>D</td>
<td>63%-66%</td>
</tr>
<tr>
<td>D-</td>
<td>60%-62%</td>
</tr>
<tr>
<td>F</td>
<td>59% or lower</td>
</tr>
</tbody>
</table>

Examinations

There will be two examinations for this course, and they generally hold the following format: 8 to 15 multiple choice questions (20-30% of the examinations points); 5 to 8 fill in the blanks or short answer questions (10-30% of the points); 4 to 6 analysis questions (40-50% of the points).

These two exams are non-cumulative.

The examinations require significant effort and resources to design and conduct. Holding make-up examinations demands even more, which may not be possible or reasonable. So, make every effort to take the examinations on their scheduled dates. Check the course calendar below.

Requests to take examinations on other dates will be considered only for unexpected, justifiable and documentable reasons. For example, if you missed the scheduled examination to attend to a friend’s sudden illness, the instructors will ask for formal documentation from the medical authorities.

Assignments

Each assignment will contain multiple choices, conceptual questions, critiquing research articles, or problems sets on statistical techniques. You are required to complete the assignments INDEPENDENTLY. No group discussion or any study groups are allowed before the submission of assignments.

Assignments will be submitted in hardcopies at the start of the class on the day indicated in the syllabus. Late assignments will not be graded. All assignments must
be the original work of the student and not used for any other course. Violation of this policy is an Academic Integrity Violation.

Questions about grades should be addressed in a timely manner. There is a 24-hour “wait period” after receiving a grade, but then you should address questions within the next 10 days. Requests for grade changes must be written and include justification. A re-grade could lead to either higher or lower points.

Final Report
The instructor team will provide a list of scientific research papers after Exam 1. You are required to select one from the list (if you want to pick a paper outside of our list, you need to obtain instructors’ approval first), and write a report and a critique based on it. Your report should include the following:

- A one-page (double spaced) summary of the paper in your own words. Summarize the main findings of the paper, the method used, and the practical implications of the results.

- A 3-5 page (double spaced, in addition to the one-page summary) critique of the research. Your critique should include comments on both the strengths and weaknesses of the paper. For the weaknesses you point out, suggest improvements.

Participation
There are assigned readings before each lecture. You are required to complete these readings and come to class prepared to discuss the material. 4% of the participation score is based on the instructors’ general impressions about your constructive inputs in the class discussion.

You are allowed three unexcused absences during the semester without penalty. Thereafter, each unexcused absence costs 1% of the total grade. By “excused” absences we mean absences with approved documentations, such as a doctor’s note or your coach’s note for games or competitions etc. Having four unexcused absences costs 4% of the final score (i.e., a 90% drops to 86%). Absences beyond the sixth open the possibility that you may fail the course. Arriving past five minutes late to class will incur a penalty (half that of absences).

Students who are instant messaging, web surfing, or involved in other similar activities during class will be marked as absent.

Extra Credit
You can earn extra credit (2 points max per student) by being an effective scientific research/reporting police.

- This is a team project. Each team should have 3 people.
- To earn 2 extra points, find a misleading report of a scientific study in a newspaper (e.g., LA Times, USA Today) or a magazine (e.g., The Economist), and identify the original research article. The assignment is to read both articles and write a critical report about the news article. Submit the news article, the original research article, a short summary of the study in your own words, and explain why you think the report is misleading. Again the instructors will evaluate your submission and decide if you get the extra credit.

- Each team needs to give a mini presentation (no slides required, approximately 5 minutes depending on scheduling) in class, to cover the main points. The presentation is not graded but required.

**Religious Holy Days**

You may arrange to take an exam on an alternative date if the exam falls on a religious holy day. Notify the instructor at least two weeks in advance of the holy day. Do not expect to be excused from taking the exam on the assigned date if you fail to notify your instructor two weeks in advance of the holy day. The same policy applies to assignments: you need to ask for an extension two weeks in advance otherwise it will be treated as a late assignment.

1 **Statement on Academic Conduct and Support Systems**

1.1 **Academic Conduct**

Plagiarism presenting someone else’s ideas as your own, either verbatim or recast in your own words is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Section 11, Behavior Violating University Standards [https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/](https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/). Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct [http://policy.usc.edu/scientific-misconduct/](http://policy.usc.edu/scientific-misconduct/).

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity [http://equity.usc.edu/](http://equity.usc.edu/) or to the Department of Public Safety [http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us](http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us). This is important for the safety whole USC community. Another member of the university community such as a friend, classmate, advisor, or faculty member can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men [http://www.usc.edu/student-affairs/cwm/](http://www.usc.edu/student-affairs/cwm/) provides 24/7 confidential support, and the sexual assault resource center webpage sarc@usc.edu describes reporting options and other resources.
1.2 Support Systems

A number of USC's schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute [http://dornsife.usc.edu/ali](http://dornsife.usc.edu/ali) which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs [http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html](http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html) provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information [http://emergency.usc.edu/](http://emergency.usc.edu/) will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

Schedule

Week 1  Jan 12 ~ 16, 2015

Session A — Introduction

Session B — Deduction versus induction; falsifiability

- [On Blackboard].

Week 2  Jan 19 ~ 23, 2015

Session A — Social science and hypotheses

Session B — What’s in a research paper?

- [On Blackboard].

Week 3  Jan 26 ~ 30, 2015

Session A — Descriptive statistics

- Ch 3 of Rowntree book.
- Ch 2 and 5 of Huff book
Session B — Measurement

- Ch 4 of Huff book

Week 4  Feb 2 ~ 6, 2015

Session A — Discussing Measurement
- Reading will be handed out in class.
- [Assignment 1 due.]

Session B — Probability and distributions
- Rowntree book, p38-64.

Week 5  Feb 9 ~ 13, 2015

Session A — Introducing Normal distribution

Session B — Sampling
- Ch 1 of Huff book

Week 6  Feb 16 ~ 20, 2015

Session A — Discussing sampling
- [Assignment 2 due.]

Session B — Inferences: from sample to population
- Ch 5 of Rowntree book
- Ch 3 of Huff book

Week 7  Feb 23 ~ 27, 2015

Session A — Two-sample t tests
Session B — Discussing two-sample t tests
- [On Blackboard].

Week 8 Mar 2 ~ 6, 2015

Session A — Correlations and regressions
- [Assignment 3 due.]

Session B — Review for exam 1

Week 9 Mar 9 ~ 13, 2015

Session A — Correlation, causation, and third variables
- Ch 8 of Huff book

Session B — Exam 1

Week 10 Mar 16 ~ 20, 2015 Spring Break

Week 11 Mar 23 ~ 27, 2015

Session A — Content analysis
- [On Blackboard].

Session B — Survey research: biases and reliability
- [On Blackboard].
- Today is the last day for signing up for extra credit projects.

Week 12 Mar 30 ~ Apr 3, 2015

Session A — Experiments: treatment and control
- [Assignment 4 due.]

**Session B — Experiments continued**

- Handouts will be distributed in class.

**Week 13  Apr 6 ~ 10, 2015**

**Session A — One-way ANOVA**

**Session B — Please read the reading below for two-way ANOVA**

- [On Blackboard] .

**Week 14  Apr 13 ~ 17, 2015**

**Session A — Discussing One-way and Two-Way ANOVA**

- [On Blackboard] .

- [Assignment 5 due.]

**Session B — Ethics in research**

- Ch 10 of Huff book.

**Week 15  Apr 20 ~ 24, 2015**

**Session A — Review for Exam 2**

**Session B — Extra credit presentations**

**Week 16  Apr 27 ~ May 1, 2015**

**Session A — Extra credit presentations**

**Session B — Exam 2**

**Week 17  11am Friday, May 8, 2015**

- Extra Credit Report Due at 11am for Submission on Blackboard
- Final Report Due at 11am for Submission on Blackboard
