Hello and welcome to CTPR 507. There is no better way to learn how to tell a story than actually going through the process of doing it. Be patient and open to new ideas as you embark and this creative and personal journey of discovery. Relax and have fun. This is just the beginning...

Overview
Production I is about ideas and your ability to communicate effectively through the language of cinema. It combines introductions to the five major disciplines within the cinematic arts: producing, directing, editing, cinematography, and sound — with guided opportunities to create individual and small group projects. Students will make two short HD projects as part of an exploration of visual storytelling, as well as a directing exercise in the Fundamentals of Directing lab (production students only). The core focus of the class is to communicate ideas, feelings, moods and emotions through the design of visual and aural environments. All approaches to cinema will be introduced including non-fiction, abstract, and experimental and narrative fiction. CTPR 507 is the beginning of an educational process which we hope will awaken your instincts as a filmmaker. In the MFA program participation in this course is mandatory, unexcused absences are not permitted. The goal of this class is for each student to learn how to express themselves and reach a place where they can be self-critical of their own work and critique the other students’ work in a helpful way as well.

Course Goals:
- Discover the basic elements of character and story.
- Learn how to tell a story effectively through the use of sound and image that enhances the story.
- Explore a range of forms and genres—documentary, narrative, personal essay, etc.
- Deliver and receive cogent and constructive critiques of works in progress and completed works, by both faculty and fellow students.
- Establish ethical standards for filmmaking and critiquing.
- Develop fundamental skills in the areas of producing, directing, cinematography, editing, production sound, and sound design.
- Highlight the fundamental relationship between form and content.
- Become aware of the cultural impact of cinema.

CTPR 507 will cover introductions to these skill-sets:

Producing: the art and craft of producing from pitch to delivery; the role of producer, assistant director and unit production manager. Including: script breakdown, location and scheduling concerns.
Directing: developing a comprehensive aesthetic approach to the goal, central idea, and theme of a project; including: story beats, character arc, and behavior that reveals character.
Cinematography: eight weeks that will cover: composition, use of space, production design, color temperature, depth of field, hard and soft light, available light, key, fill, backlight and negative fill. Instruction in how to light for day interior, night interior and
day exteriors.

**Editing:** The aesthetics behind the art of telling a story with moving visual images. Learning the AVID Tools and Editorial techniques in story shaping, continuity, parallel editing, montage, Visual Effects; non-linear editing; media management.

**Sound:** Concepts of sound design and using sound as a creative element in cinematic storytelling. Introduction to production sound recording, sound editing, use of music and effects, and sound mixing.

**PROJECTS:**

Students will complete two, five minute (maximum) projects in HD:

**PROJECT 1:** Each student must perform key production roles and edit themselves. Location sound mandatory (effects, room tone, etc.) All editing must be done in USC’s post facilities.

**Suggestions:**

Narrative:
1. Beat change within a scene
2. Behavior which reveals character
3. Give a character a dilemma; resolve it

Documentary:
1. Portrait of a person
2. Capture a process
3. Explore the complexity and nuance of a place

Experimental:
1. Use montage to express an emotion or mood
2. Explore the qualities of light and darkness
3. Explore shape, line, time and/or space

**PROJECT 2:** Student Choice Project (must be crewed) use location sync-sound; five minutes. Emphasis on story structure; building tension, character development; mandatory production recordingDialogue; faculty supervise production from pre-prod through dailies, cuts, and sound design crew is from 507. All editing must be done in USC’s post facilities.

**Credit/Roles on Films:**

Students may not act in their own films. The goal is to place directing and working with actors as a priority in this course. Shooting on location is encouraged. Production sound must always be recorded.
No proprietary credits are allowed (i.e.: A film by) on films. All works must display:

© 2016 University of Southern California

Works must include complete credits for all key positions, which must be performed by the students themselves. In Project One, all key roles must be performed by one student, with help from other 507 students—but not in key positions. In Project Two, all key roles must be performed by students in your 507 section. (Speak with your professor about working with students from other sections.) Key roles are defined as Producing, Directing, Editing, Cinematography, and Sound.

No professional Electricians, Grips, Sound or Camera personnel may be used on these productions. You must operate the camera and Direct the Photography of Project 1. On Project 2 your crew should be primarily “keyed” by members of your class. Additional labor and work may be done by other students currently enrolled in 507 only, after discussion with your faculty.

Films must be edited in AVID in the SCA Post-Prodction facility.

Outside vendors can be used for make-up, additional approved grip and lighting gear, and approved visual and special effects.

COPYRIGHT:

Because the School provides equipment and facilities, the copyright to all 507 films resides with the University. However, the student retains ownership of the underlying intellectual property rights to their work.

Posting links on the internet of work produced at SCA must be for private viewing only and password protected.

In all cases, copy written material must be credited. For works to be screened outside of SCA, material must be cleared, and a complete production book with rights, releases, and permissions must be submitted to Prod/Dir faculty, Archives, and Student-Industry Relations.

EQUIPMENT/RESOURCES:

Only production equipment supplied by the school may be used on projects. Special visual effects, such as Adobe After Effects, are not supported in the first year. Green screen is not allowed in 507. Dollies and other equipment are subject to faculty approval. Moving vehicle shots are prohibited. Stationary vehicles on campus may be used with faculty approval; off-campus, vehicles are prohibited.
Use of any equipment outside of what is available at USC (including your own) is subject to faculty approval.

**USC and Non-USC Equipment for CTPR 507**

Students will be issued a Sony XDCAM EX 1 camera package for the semester and may check out a lighting kit from USC on a weekly basis. If a student wants to use non-USC camera support equipment, like a slider, small portable dolly, shoulder mount, or a glidecam, etc. he/she must discuss this first with the producing and or directing faculty (whoever is the instructor of record). If that instructor thinks the proposed equipment is appropriate for the listed shots, the student will be directed to speak with the cinematography instructor who will discuss if this is the right tool and then discuss the proper and safe use of the equipment. The student is responsible to email both the cinematography instructor and instructor of record with the list of shots and equipment under consideration. This will insure the student and faculty are in agreement about both the equipment and shots using that equipment. The instructor of record will have final approval on this decision.

The Sony XDCAM EX is presently the only camera/file format/codec supported for CTPR 507 classes. Everything else is considered unsupported. Students working in unsupported file formats or codecs are not to ask staff, student workers or SA’s for assistance in post. A guide to unsupported formats is available on the KnowledgeBase.

Even if approved, the student assumes responsibility for the post workflow of the unsupported footage and understands that it may never make it into their final film. Screening due dates will be adhered to and no extension requests will be granted for post workflow problems or issues related to unsupported file formats or codecs.

**CTPR 507 Crew**

Professional electricians, grips, sound or camera personnel may not be used on CTPR 507 productions. Students must produce, direct, operate the camera and direct the photography on Project 1. On Project 2 the crew should be primarily “keyed” by members of your class. Other students currently enrolled in other sections of CTPR 507 may supplement the crew if needed.

**GRADES:**

Each student must complete both films and all exercises in order to receive a grade. Grades will be based on both subjective and objective judgments; essentially we look for intelligence, clarity, craftsmanship and emotional depth indicative of a growing mastery of the art form. Success is necessarily predicated on an energetic and ongoing interaction between all members of the class. So, late projects, tardiness and unexcused absences will have a negative impact on your grade. Late projects will be docked 10 percent per day. If you must miss class, call your instructor or SA as soon as possible and always before class begins.
Grading Weights:
Sound: 5 points
Editing: 10 points
  Criteria for above: participation in exercises
Cinematography: 20 points
  Criteria: class exercises: 10 points
  P1 Cinematography: 4 points
  P2: Cinematography: 6 points
Fund of Dir: 10 points
  Criteria: scene exercises
Producing/Directing (overall): 25 points
Prod/Dir Proj 1: 10 points
Prod/Dir Proj 2: 20 points

MIDSEMESTER CONFERENCES: (between weeks 8-12 w/Prod/Dir faculty)

These conferences allow you to get a sense of your overall progress, areas for improvement and an estimated grade at mid-point in the semester. If you are in danger of failing, you will be alerted in writing and in a conference; we will outline together what steps must be taken in order for you to pass. It is the student’s responsibility to be aware of USC’s add/drop and withdrawal deadlines.

COURSE GUIDELINES:

The limit on project running time (5 minutes max with credits) is invariable and there are no exceptions.

All students are expected to understand and abide by the USC School of Cinematic Arts guidelines. All students are equally responsible at all times for production safety.

FOR SAFETY RULES: See student Production Handbook

PRODUCTION SAFETY GUIDELINES, The Student Handbook, and the Pre-Production Hazardous Shooting Forms and other valuable documents are available at: http://scacommmunity.usc.edu

Faculty Sign-Off sheets are required for all Hazardous shooting conditions prior to production, including shoots with minors and studio teachers. Not permitted: guns of any kind, squibs, car mounts or shooting from a moving vehicle.

Statement on Academic Conduct and Support Systems

Academic Conduct
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Section 11, Behavior Violating University Standards https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct/.

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity http://equity.usc.edu/ or to the Department of Public Safety http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us. This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men http://www.usc.edu/student-affairs/cwm/ provides 24/7 confidential support, and the sexual assault resource center webpage sarc@usc.edu describes reporting options and other resources.

Support Systems
A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute http://dornsife.usc.edu/ali, which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information http://emergency.usc.edu/ will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

Disruptive Student Behavior:
Behavior that persistently or grossly interferes with classroom activities is considered disruptive behavior and may be subject to disciplinary action. Such behavior inhibits other students’ ability to learn and an instructor’s ability to teach. A student responsible for disruptive behavior may be required to leave class pending discussion and resolution of the problem and may be reported to the Office of Student Judicial Affairs for disciplinary action.
