Course Description

Few managers operating in today’s global business environment would dispute that this is a very exciting
time to be engaged in almost any aspect of international management. Fast-changing global developments
have opened up boundless new opportunities for business including the opportunity to reach new
customers, tap low-cost resources and access new sources of information and knowledge. Yet, with all these
new opportunities come the complex management challenges of developing the strategy, building the
organization, and managing the operations of a multinational enterprise (MNE).

MOR542, Strategic Issues for Global Business, consists of four key modules that address four of the most
important strategic challenges faced by global managers today. These include:

Module 1. How to manage worldwide innovation and learning?
The basis for competition among many leading MNEs today is worldwide innovation: the ability to sense
a new consumer trend in one nation, connect it to a new capability or technology in another, build a creative
new product or service in a third then diffuse that innovation promptly around the world. Module 1 covers
traditional and emerging models of cross-border innovation and identifies their strengths, limitations and
the organizational capabilities required to make them effective.

Module 2. How to manage cross-border collaboration?
Few companies today have all the resources and capabilities they need to succeed in today’s highly
competitive global environment. They must therefore increasingly collaborate with suppliers, distributors,
customers and even competitors and build the capabilities needed to manage these relationships effectively.
Module 2 provides fundamental principles for forming and managing strategic alliances that create value
both at the individual level and at the alliance portfolio level.

Module 3. The new competitive advantage: how to create shared value?
The past decades have seen a growing awareness of economic, social and environmental problems. This
has led leading MNEs such as GE, Walmart, Nestlé, Johnson & Johnson, and Unilever to rethink their
products, markets, strategy and operations in search of innovative ways to achieve a competitive edge while
simultaneously addressing pressing issues in their communities. In doing so, many MNEs have realized
that adding a social dimension to their strategy can be a powerful source of innovation and a more
sustainable source of competitive advantage than traditional cost and quality advantages. Module 3 focuses
on how MNEs can identify and successfully exploit opportunities to achieve a competitive advantage while
also creating value for society.

Module 4. How to win in emerging markets?
In the race to achieve global growth, emerging markets are a must-win area for MNEs. Their growth
potential is huge yet the risks and uncertainties are significant. The winners are the companies that can
build dedicated emerging-market capabilities that enable them to select the right markets to enter and to
carefully develop and execute the right strategies in light of the different conditions in these markets.
Module 4 provides concepts, tools and frameworks for assessing emerging markets’ potential and for
crafting and executing strategies for succeeding in those markets.
More generally, the course is designed to provide students with the knowledge, analyses, skills, business judgement and sensitivity to create, maintain, and renew competitive advantage within a global environment.

Our dominant perspective in the course is that of the general manager in a multinational enterprise, whether that is the CEO, the global business VP or the country manager. Such a position may well be one of the most challenging positions to which a manager could be assigned. By adopting this perspective, however, we do not ignore the vital and legitimate perspectives of other key stakeholders both inside and outside the company e.g. employees, suppliers, local communities and governments. We consider the influence of these and other important actors from the perspective of the MNE general manager, however, and focus on understanding how they shape the strategic, organizational and operational decisions that the general manager must make.

The course is designed for graduate students who seek to work in, or with, firms that operate in many different countries, or which operate outside the United States. It is also appropriate for students pursuing strategic positions in local firms that compete with large multinational enterprises.

**Learning Objectives**

The course is composed of four main modules that build on each other. Upon successful completion of the modules below, students will be able to:

**Module 1. How to manage worldwide innovation and learning?**
1. Identify and describe traditional and emerging models of cross-border innovation.
2. Identify the strengths and limitations of each model.
3. Explain the organizational capabilities required to make each model effective.

**Module 2. How to manage cross-border collaboration?**
1. Identify the motivations driving the formation of cross-border strategic alliances.
2. Explain the costs and risks of cross-border collaboration.
3. Provide recommendations for designing and managing individual cross-border alliances in order to achieve alliance success.
4. Provide recommendations for designing and managing a portfolio of strategic alliances.

**Module 3. The new competitive advantage: how to create shared value?**
1. Identify and describe four different postures that MNEs have adopted in recent decades in regards to the needs of the developing world.
2. Provide recommendations on how companies can develop and monitor an appropriate set of standards for business conduct.
3. Explain how MNEs can build successful businesses aimed at the bottom of the pyramid.
4. Explain the concept of shared value and the distinct ways companies can create shared value.

**Module 4. How to win in emerging markets?**
1. Analyze an emerging market to determine its potential.
2. Formulate a strategy and an implementation plan for succeeding in an emerging market.

The course begins with a review of the fundamentals of global strategy. The review module covers the following topics: motivation for international expansion, strategies for global value creation, location strategy, timing of entry, foreign entry modes and global organizational structures.
The course will place a special emphasis on developing your critical thinking skills. Cases will seek to develop your ability to uncover the various potential problems, challenges and opportunities faced by a multinational enterprise, select the most important, develop alternative courses of action for addressing those issues, assess the different courses of action in light of multiple criteria, select the solutions that have the potential to be the most effective and develop an effective implementation plan. The course will also place a special emphasis on developing your oral and written communication skills through presentations and reports.

**Required Materials**

**Required Textbook.** The required textbook for the course is:
It is available in hardcover and paperback and can be purchased or rented on Amazon. The textbook is also available at the USC Bookstore.

**Harvard Coursepack.** A set of additional readings and cases for this course are compiled in a digital coursepack available from Harvard Business School Publishing at the following link:
http://cb.hbsp.harvard.edu/cbmp/access/65971444
Additional readings may be distributed in class or posted to Blackboard. When necessary, I may assign additional materials for you to purchase.

**Blackboard (BB).** I will post various course materials to Blackboard including the course syllabus, powerpoints, lecture notes, case discussion questions and assignments. Please check Blackboard regularly for any new information or materials relevant to upcoming sessions.

**3x5 Index Cards.** Please bring a deck of 3x5 index cards to every class to record your oral class participation (please refer to the section on in-class participation on page 5).

**Course Format and the Case Discussion Method**

In order to achieve the objectives of the course, we will devote the majority of our class time to the analysis and discussion of selected business cases. Occasional lectures will be given to elaborate on key theoretical models and frameworks. These lectures, however, will be subordinate to the case analysis. Cases provide a natural "test-bed" for theory and provide vivid examples that aid the memory of concepts. While nothing can surpass first-hand personal industry and managerial experience as a basis for decision-making, case analysis is an indispensable proxy for the kind of knowledge that can only be gained through years of experience and research. A set of business cases has been selected on a range of companies from a variety of industry settings. Each case is intended to teach us something specific, yet each can teach us many things. We will not attempt to exhaust each case of all its learning experiences, but rather build up a "war chest" of analytical tools, skills and insights, progressively over all the selected cases.

There are other reasons for employing the case discussion method of instruction. First, it allows you to develop skills at problem definition in addition to problem solving. Cases typically do not have an obvious set of tasks whose performance will lead to mastery. Rather, they force you to sift through a mass of information, some of it irrelevant or contradictory, in order to identify the key strategic issues. Second, the case method gives you a chance to deal with ambiguity. Most cases do not have obvious "right" answers. Managers must be able to function in situations where the right answer is not known, without falling into the trap of assuming that any answer is as good as another. Some analyses and proposed strategies are clearly wrong, and some are clearly better than others are. A popular phrase in case analysis classes is "There are no right answers, but there are wrong answers."
These rationales are offered because the case method may be unfamiliar to some of you and frequently causes initial confusion. There will be many times when I will not reveal my own opinions about a particular issue, and there will be many cases that do not end up neatly packaged with an "answer." You may discover that your preparation "misses" key points of a case, especially at first. This is a normal part of the learning experience.

The quality of your learning experience during our class discussions will be directly determined by: 1) your degree of preparation, active listening, and participation, and 2) your classmates' preparation, listening, and participation. Some will not agree with you, and you may be asked to defend your argument. So long as criticism is directed at arguments and not at individuals, is relevant to the issues at hand and coherently argued, it is very much welcomed.

**Course Evaluation**

Your course grade will be determined as follows:

**Individual work (70% of total)**
- Course Contribution: 20%
- Exam I: 15%
- Exam II: 20%
- Case Analysis (2): 15%

**Group work (30% of total)**
- Team Final Project Paper: 20%
- Team Final Project Presentation: 10%

In order to pass this course successfully, a passing grade (> 50%) must be achieved in the combined average of the individual components and in the combined average of the group components. **Please note that if your individual performance in the course is unsatisfactory, it will not be brought up by a good group grade.**

Final grades represent how you perform in the class relative to other students. Three items are considered when assigning final grades:
1. Your weighted score as a percentage of the available points for all assignments (the points you receive divided by the number of points possible).
2. The overall average percentage score within the class.
3. Your ranking among all students in the class.

**Attendance Policy**

Class attendance is absolutely essential. All missed classes will be noted. The policy on missed classes is to allow each student **three (3) absences**, no questions asked, no penalty. All further absences over this limit will reduce the student's course contribution grade and final course grade, no questions asked, no excuses of any kind accepted. **Students with an excessive number of absences are at risk of failing the course.** Only official university engagements, such as officially scheduled USC Marshall sponsored case competitions and sports events, will be accepted as exceptions to this policy. Job interviews etc., are not excused, so choose your absences carefully. Habitual lateness and leaving class early, for whatever reason, will be noted as evidence of low course commitment and penalized. **Simply put, you cannot learn from our class discussions, and your classmates cannot learn from you, if you are not present.**
Course Contribution (20%)
Because this course relies heavily on case materials, your active engagement and contribution to our case discussions are required to ensure the class' success. Your individual course contribution has three key components: 1) pre-class preparation, 2) in-class participation and 3) post-class contribution. These three components account respectively for 15%, 70% and 15% of your course contribution grade.

Pre-class preparation. Your ability to learn from case discussions is directly proportional to the quality of your preparation. What you get from this course will depend on what you put in – not just in terms of your reading and analysis of the cases, but your willingness to question and to seek alternate perspectives, to be clear about your own position, and to defend your arguments. Unless you have thought about the cases, it is very hard to contribute to the case discussion and to learn from others’ questions and contributions to class. For guidelines on how best to prepare for a case discussion, please refer to the Guide to Case Preparation posted to Blackboard and bring your notes to class to aid you in the class discussion. Students can also submit case notes. Case notes are individually prepared, but brief, answers to the case discussion questions. They should be a maximum of one typed page, single-spaced, 11- point font. Bullet point form is appropriate. Case notes must be submitted to me in hard copy format prior to the beginning of class to receive credit. They will be checked with a plus, check or minus based on quality and thoroughness. **Students should turn in at least five (5) case notes during the semester.** Please note that case notes do not substitute for active oral contribution to our class discussions and cannot be submitted to make up for a class absence.

In order to test the level of student preparation for a case discussion, I may give a short case quiz at the beginning of class. The quiz will generally consist of short answer questions related to the case. Quizzes may be viewed by coming during office hours. No make-up opportunities will be given to students who are absent or late.

In-class participation. Class participation is critical in this course. Each student has a responsibility to participate in class and to enhance the learning experience of all class participants. In relative terms, a classroom is a cost-free environment for experimenting and learning to "play the game". Make use of it. In-class participation includes both oral participation in our class discussions as well as participation in various written assignments. If you are uncomfortable with oral participation, please let me know at the beginning of the semester and I will work with you to help you overcome this barrier.

In grading oral participation, I will look at both the *quantity* and *quality* of your oral contributions. To help me track oral participation, students who actively participated in the oral discussion during a class session should turn in a participation card at the end of that session. The card should list your name, the date, and a numbered list of your oral contributions during that day’s discussion. For this purpose, please purchase a package of 3x5 index cards and bring them to each class.

With regard to quality, the dimensions I look for include:  
**Relevance.** Does the comment bear on the subject at hand? Comments that do not link up with what the discussion is focusing on can actually detract from the learning experience. 
**Causal Linkage.** Are the logical antecedents or consequences of a particular argument traced out? Comments that push the implications of a fact or idea as far as possible are generally superior. 
**Responsiveness.** Does the comment react in an important way to what someone else has said? 
**Analysis.** Is the reasoning employed consistent and logical? 
**Evidence.** Have data from the case, from personal experience, from general knowledge been employed to support the assertions made? 
**Importance.** Does the contribution further our understanding of the issues at hand? Is a connection made with other cases we have analyzed?

In addition to weekly opportunities for oral participation in case discussions led by the instructor, each student will also have the opportunity to serve as a case leader, taking the lead on a specific part of a case discussion. Case leadership involves two distinct roles: case presenter and case challenger. As a case
presenter, you will analyze a specific part of a case and do a short 5-minute presentation of your analysis to the class using powerpoints. As a case challenger, you will prepare and ask questions in class that challenge our analysis of a case and demonstrate critical thinking. You will also help provide an update to the case. Detailed instructions regarding your case leadership assignment will be discussed in class and posted to Blackboard.

Post-class contribution. In a case-oriented, discussion-based class, much of the learning happens after class, as the “dust settles” and the key take-aways from each case become clear. Shortly after each class session devoted to a case discussion (preferably within a few hours, while your memory is fresh and within a maximum of 48 hours), please take some time to write down your three (3) key take-aways from the case in the form of a short note (approximately 10 lines or longer) posted on our Blackboard Discussion Board (accessible through the course Tools link in Blackboard). These postings can also include responses to other students’ postings already on the Discussion space. They may also discuss connections you see between the case and the associated readings, prior case discussions, or other real-world issues. **Students must post their take-aways for at least five (5) cases during the semester.**

I will use the following criteria to assess your post-class take-away posting on our Blackboard Discussion space:  
*Coverage.* The best take-aways synthesize the key ideas that emerged during the discussion and from the readings. Weaker take-aways focus on just a subset.  
*Insight.* Weak take-aways list the topics we addressed; the best take-aways pinpoint the lessons learned about those topics. The best take-aways also suggest new questions that are raised by these lessons.  
*Connections.* The best take-aways link the lessons of this discussion to others earlier in the course. Weaker take-aways don’t make such connections.  
*Point of View.* The best take-aways reveal how the discussion has enriched your own thinking. Weaker take-aways lack that personal engagement, or simply reiterate a pre-formed personal opinion.

**Exam I (15%) and Exam II (20%)**  
I will give two exams during the semester to test your understanding of material previously covered. Each exam will consist of 40 multiple-choice and True/False questions. Exam I accounts for 15% of your final course grade. Exam II accounts for 20% of your final course grade. No make-up opportunities are available if you are absent or late. Please refer to the course schedule for the exam dates.

**Case Analysis (2) - (15%)**  
You will prepare an individual, in-class case analysis for each of the following cases: 1) GE’s Imagination Breakthroughs: The Evo Project and 2) Brasil Foods. Each case analysis accounts for 7.5% of your final course grade. The assignment involves answering a set of 4-5 questions pertaining to the case. More detailed guidelines will be given in class and posted to Blackboard.

**Team Final Project Paper and Presentation (30%)**  
You will work with your team to draft a report in which you analyze an emerging market and advise an existing MNE not already present in that emerging market on whether they should enter a particular business sector (e.g. automobile, retail, manufacturing etc.) in that market. You will prepare your report as if you were going to present your findings to the top management team of the company. If you choose to enter, you should clearly specify the reasons and propose a detailed strategy and implementation plan to achieve success in that foreign market. If you choose not to enter, you should clearly specify the reasons. If the decision is contingent on some factors, you will need to identify those.

Three days near the end of the course are set aside for presentations of your final project. The presentation allows each team to report their analysis and recommendations to the class. The exact presentation date and time for each team will be assigned by a random drawing. Detailed instructions regarding the group project including instructions on the paper and the presentation will be discussed in class and posted to Blackboard.
Peer Evaluations. Each of you will complete a peer evaluation of the members of your team with respect to the team final project. A copy of the peer evaluation form is posted to Blackboard and is due on December 1st, 2017. Scores for individual student contributions to the team final project are assigned by me, based on my assessment of the team’s project quality, my observations of the team’s working dynamics and thoughtful consideration of the information provided through your peer evaluations.

➢ If you experience any group-related problem (e.g. conflict, free-rider etc.), please let me know immediately. Do not wait until the end of the semester. If you report this problem too late, there is not much I can do.

Course Policies

Add/Drop Process
If you are absent three or more times prior to September 1st, 2017, I may ask you to withdraw from the course by that date if you do not notify me prior to your absence. These policies maintain professionalism and ensure a system that is fair to all students.

Course Communication: Blackboard
A Blackboard website has been created for this course: https://blackboard.usc.edu. You should develop the habit of checking Blackboard on a regular basis. The course syllabus, powerpoints, lecture notes, assignment information, and additional course materials will be posted on this site throughout the semester. Since e-mails sent to the class originate from the Blackboard system, it is your responsibility to ensure that your Blackboard account settings forward your messages to your preferred email account such as your personal Gmail account.

Communication and Entertainment Devices
Personal communication and entertainment devices such as mobile phones are to be turned off and kept off throughout the class session. Receiving or sending communication and entertainment during class disrupts the learning environment and is rude to class participants. Videotaping faculty lectures is not permitted, due to copyright infringement regulations. Audiotaping may be permitted if approved by the professor. Use of any recorded or distributed material is reserved exclusively for the USC students registered in the class.

Academic Integrity and Conduct
USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one’s own academic work from misuse by others as well as to avoid using another’s work as one’s own (plagiarism). Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. All students are expected to understand and abide by the principles discussed in the SCampus, the Student Guidebook (www.usc.edu/scampus or http://scampus.usc.edu). A discussion of plagiarism appears in the University Student Conduct Code (section 11.00 and Appendix A).

Students will be referred to the Office of Student Judicial Affairs and Community Standards for further review, should there be any suspicion of academic dishonesty. The Review process can be found at: http://www.usc.edu/student-affairs/SJACS/. Failure to adhere to the academic conduct standards set forth by these guidelines and our programs will not be tolerated by the USC Marshall community and can lead to dismissal.
Support Systems
The following support systems are available to USC students.

Diversity at USC
Includes tabs for Events, Programs and Training, Task Force (including representatives from each school), Chronology, Participate, and Resources for Students.
https://diversity.usc.edu/

Office of Equity and Diversity (OED)/Title IX compliance
Works with faculty, staff, visitors, applicants, and students around issues of protected class.
https://equity.usc.edu/
(213) 740-5086

Bias Assessment Response and Support
Provides support for reporting incidents of bias, hate crimes and microaggressions allowing for appropriate investigation and response.
https://studentaffairs.usc.edu/bias-assessment-response-support/

Student Support & Advocacy
Assists students and families in resolving complex issues (personal, financial, and academic) adversely affecting their success as a student.
https://studentaffairs.usc.edu/ssa/
(213) 821-4710

Student Counseling Services (SCS)
Provides free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.
https://engemannshc.usc.edu/counseling/
(213) 740-7711 – 24/7 on call

National Suicide Prevention Lifeline
Provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week.
http://www.suicidepreventionlifeline.org
1-800-273-8255

Relationship & Sexual Violence Prevention Services (RSVP)
Provides free and confidential therapy services, workshops, and training for situations related to gender-based harm.
https://engemannshc.usc.edu/rsvp/
(213) 740-4900 - 24/7 on call

Sexual Assault Resource Center
Provides information about how to get help (or help a survivor), rights, reporting options and various additional resources.
http://sarc.usc.edu/

Students with disabilities
USC is committed to making reasonable accommodations to assist individuals with disabilities in reaching their academic potential. If you have a disability which may impact your performance, attendance, or grades in this course and require accommodations, you must first register with the Office of Disability Services and Programs (www.usc.edu/disability). DSP provides certification for students with disabilities and helps arrange the relevant accommodations. Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of
verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to your instructor as early in the semester as possible. DSP is located in GFS120 (Grace Ford Salvatori Hall) and is open 8:30 a.m.–5:00 p.m., Monday through Friday. The phone number for DSP is (213) 740-0776. Email: ability@usc.edu.

**Emergency Preparedness/Course Continuity**
In case of a declared emergency if travel to campus is not feasible, the *USC Emergency Information* web site ([http://emergency.usc.edu/](http://emergency.usc.edu/)) will provide safety and other information, including electronic means by which instructors will conduct class using a combination of USC’s Blackboard learning management system (blackboard.usc.edu), teleconferencing, and other technologies.

**Class Notes Policy**
Notes or recordings made by students based on a university class or lecture may only be made for purposes of individual or group study, or for other non-commercial purposes that reasonably arise from the student’s membership in the class or attendance at the university. This restriction also applies to any information distributed, disseminated or in any way displayed for use in relationship to the class, whether obtained in class, via email or otherwise on the Internet, or via any other medium. Actions in violation of this policy constitute a violation of the Student Conduct Code, and may subject an individual or entity to university discipline and/or legal proceedings.

No student may record any lecture, class discussion or meeting with me without my prior express written permission. I reserve all rights, including copyright, to my course syllabi, lectures, powerpoints, prior exams, answer keys, and all supplementary course materials available to the students enrolled in my class whether posted on Blackboard or otherwise. They may not be reproduced, distributed, copied, or disseminated in any media or in any form, including but not limited to all course note-sharing websites.
