### Objective
This course provides students with the advanced knowledge they will need to succeed as a professional C++ developer. By semester's end, students will:

1. Become familiar with advanced C++ language idioms.
2. Gain exposure to common libraries used professionally today.
3. Understand how to write efficient and high-quality C++ code.

### Concepts
- Code Generation
- Memory layout
- Templates
- STL
- Optimization
- Exceptions
- RTTI
- Design Patterns
- Metaprogramming
- Lambda Expressions
- Boost
- Custom Memory Allocators
- C++11
- Compilers

### Prerequisites
- CSCI 104 or ITP 365x

### Instructor
- Sanjay Madhav

### Contact
- Students in the course should post their questions on Piazza.
- Email: madhav@usc.edu (Only for non-course questions or prospective students).

### Office Hours
- TBD

### Graders/TAs
- TBD

### Lecture
- Tuesday and Thursday, 2:00 – 3:20PM in KAP 160

### Course Structure
The topics covered during class meetings will be applied to the seven programming assignments spread out through the semester. All programming assignments must be completed individually.

Here's an example of what the assignments were in spring 2017. They may vary in fall 2017.

1. RLE Compression/Decompression
2. Password Cracker
3. Paint/Smart Art Program
4. DNA Amino Acid Histogram + Sequence Alignment
5. Zombie Apocalypse Simulator
6. Zombie-C Compiler
7. Travelling Trojan

There are two exams that are comprehensive of all topics covered.

### Textbooks
- **Required:**

- **Recommended:**

### Grading
The course is graded with the following weights:

- Programming Assignments (7% each) 49%
- Midterm Exam 21%
- Final Exam 25%
- Class Participation 5%
- TOTAL POSSIBLE 100%
Grading Scale

Letter grades will be assigned according to the following scale:

- 93%+   A
- 90-92%  A-
- 87-89%  B+
- 83-86%  B
- 80-82%  B-
- 77-79%  C+
- 73-76%  C
- 70-72%  C-
- 69     D+
- 67-68  D
- 66     D-
- 65 and below F

Half percentage points will be rounded up to the next whole percentage. So for instance, 89.5% is an A-, but 89.4% is a B+.

There is no curving. Students will receive the grade they earn. Extra credit is generally not offered.

Policies

- **Make-up policy for exams:** To make up for a missed exam, the student must provide a satisfactory reason (as determined by the instructor) along with proper documentation. Make-up exams are only allowed under extraordinary circumstances.

- **Late Assignments:** Late assignments will be accepted one day late for a 15% penalty and two days late for a 30% penalty. An assignment submitted later than this will be given a grade of 0, unless there is an extraordinary and documented reason as to why it was late.

Students will be able to setup their own PC or Mac for use in the class, as all software is free either in general or specifically for students enrolled in Viterbi courses. All projects natively build on both PC and Mac, assuming the appropriate software is installed. Linux should work as well, but no technical support will be provided for students who wish to use Linux.

Alternatively, ITP offers Open Lab use for all students enrolled in ITP classes. These open labs are held beginning the second week of classes through the last week of classes. Please contact your instructor for specific times and days for the current semester.
Statement on Academic Conduct

Academic Conduct
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Section 11, Behavior Violating University Standards https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct/.

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity http://equity.usc.edu/ or to the Department of Public Safety http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us. This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men http://www.usc.edu/student-affairs/cwm/ provides 24/7 confidential support, and the sexual assault resource center webpage sarc.usc.edu describes reporting options and other resources.

Support Systems
A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute http://dornsife.usc.edu/ali, which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information http://emergency.usc.edu/ will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

A Further Note on Plagiarism
In this class, all programming assignment submissions will be compared with current, previous, and future students’ submissions using MOSS, which is a code plagiarism identification program. If your code significantly matches another student’s submission, you will be reported to SJACS with the recommended penalty of an F in the course.

It is okay to discuss solutions to specific problems with other students, but it is not okay to look through another student’s code. It does not matter if this code is online or from a student you know, it is cheating. Do not share your code with anyone else in this or a future section of the course, as allowing someone else to copy your code carries the same penalty as you copying the code yourself.
## Course Outline

(Note: The dates/ordering of topics have not been updated for Spring 2018 yet, but this should give you an idea of the topics we cover).

<table>
<thead>
<tr>
<th>W</th>
<th>Date</th>
