

From Hackers to CEOs: An Introduction to Information Security

ITP 125 (2 Units)

Fall 2015

Objective

Upon completing this course, students will:

- Understand the fundamentals of information security
- Learn the basics of securing a workstation
- Understand basic networking and security technologies
- Understand the relationship between security and management
- Have a motivation to learn and improve their awareness and understanding of computers and security

Concepts

- This course is designed to be an introductory course in information and computer security. This course starts with an analysis of threats to information integrity. Students will then get an introduction to security mechanisms and policies. Students will learn how security infrastructure will integrate with the rest of the business and IT infrastructure, through the use of hands-on projects.
- This is the gateway course for the Digital Forensics and Cyber Security Minors and Specializations at USC. As a result this is a survey course where we will touch briefly on many different topics in the information security realm.

Prerequisites

None

Office Hours

TBA

Lab Assistants

TBA

Lecture/ Lab

Mondays 5:00 – 8:00 PM, OHE 406

Required Textbooks

None

Websites

All course material will be on Blackboard (<http://blackboard.usc.edu>).

Code Academy – Python

<http://www.codecademy.com/tracks/python>

Additional Resources

Beginners Guide to Python

<http://wiki.python.org/moin/BeginnersGuide>

How to Think Like a Computer Scientist (Python 3):

<http://openbookproject.net/thinkcs/python/english3e/>

Grading

Grading will be based on percentages earned in assignments. Students will have structured labs throughout the semester, to be conducted during the scheduled lab time. In addition, students will have a programming assignment, as well as a midterm and final exam.

The following percentage breakdown will be used in determining the grade for the course.

Additionally, there will be 10 short programming assignments in python. These will be extra credit, worth up to one point each. These assignments are designed to prepare you for the final programming assignment.

Lab Assignments/News	45%
Class Participation	5%
Midterm Exam	15%
Final Exam	20%
Final Project	15%
<hr/>	
Total	100%

Grading Scale

The following shows the grading scale to be used to determine the letter grade.

93% and above	A
90% - 92%	A-
87% - 89%	B+
83% - 86%	B
80% - 82%	B-
77% - 79%	C+
73% - 76%	C
70% - 72%	C-
67% - 69%	D+
64% - 66%	D
63% and below	F

Policies

- No make-up exams will be offered nor will there be any changes made to the Final Exam schedule or assignment due dates (except for documented medical or family emergencies).
- It is your responsibility to submit your assignments on or before the due date. **It is not the responsibility of the lab assistant or the instructor.** Do **not** turn in anything to your lab assistant!
- Assignments are due on the date listed in the syllabus at the beginning of class unless otherwise changed by announcement in class or via e-mail. Any assignment turned in late will incur a 25% penalty for the first 24-hour period that it is late, an additional 50% off for the second 24-hour period that it is late, and will not be accepted after 48-hours. All assignments must be turned in either in person to the instructor or via Blackboard. Do not e-mail assignments.
- Grades will be posted on Blackboard and it is your responsibility to ensure that the grades online are accurate and to follow your progress in the class.
- You are expected to be in class, on time, and distraction free. As this class meets once a week and as it is lecture and lab any student who misses more than two classes is in danger of failing the course. Please see me immediately if you have missed that number of class meetings.

News Assignment

To promote class discussion, each student will be required to submit an article for class discussion starting February 3rd. Articles shall be posted with a hyperlink to the article and a one-paragraph summary to the class blog at <http://uscinfosecintro.blogspot.com>. If you have not used this blog before, please submit your Google user name (which is not your USC e-mail address) to the TA. Please take care not to duplicate stories that have been submitted that week.

News stories should directly pertain to topics covered in this class.

- Post a link on the blog by 6PM before class.
- Please submit a story that is no more than one week old.
- If the story is behind a pay-wall or subscription-wall or requires a login, please submit a PDF copy along with the link.

- Be prepared to give a short three-minute summary of the article and any surrounding background details to start the discussion.
- Press releases including anything from prweb.com are not valid news content
- Group 1: Last Names A-L
- Group 2: Last Names M-Z
- Each proper posting is worth 2 points which is 10 points of your lab assignments grade

Incomplete and Missing Grades

Excerpts for this section have been taken from the University Grading Handbook, located at <http://www.usc.edu/dept/ARR/grades/gradinghandbook/index.html>. Please see the link for more details on this and any other grading concerns.

A grade of Missing Grade (MG) “should only be assigned in unique or unusual situations... for those cases in which a student does not complete work for the course before the semester ends. All missing grades must be resolved by the instructor through the Correction of Grade Process. One calendar year is allowed to resolve a MG. If an MG is not resolved [within] one year the grade is changed to [Unofficial Withdrawal] UW and will be calculated into the grade point average a zero grade points.

A grade of Incomplete (IN) “is assigned when work is no completed because of documented illness or other ‘emergency’ **occurring after the twelfth week** of the semester (or 12th week equivalency for any course scheduled for less than 15 weeks).”

Academic Integrity

USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one's own academic work from misuse by others as well as to avoid using another's work as one's own. All students are expected to understand and abide by these principles. *Scampus*, the Student Guidebook, contains the Student Conduct Code in Section 11.00, while the recommended sanctions are located in Appendix A: <http://www.usc.edu/dept/publications/SCAMPUS/gov/>. Students will be referred to the Office of Student Judicial Affairs and Community Standards for further review, should there be any suspicion of academic dishonesty. The Review process can be found at: <http://www.usc.edu/student-affairs/SJACS/>.

Students with Disabilities

Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to your course instructor (or TA) as early in the semester as possible. DSP is located in STU 301 and is open from 8:30am to 5:00pm, Monday through Friday. Website and contact information for DSP http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html (213) 740-0776 (Phone), (213) 740-6948 (TDD only), (213) 740-8216 (FAX) ability@usc.edu

Emergency Preparedness/Course Continuity in a Crisis

In case of emergency, when travel to campus is difficult, if not impossible, USC executive leadership will announce a digital way for instructors to teach students in their residence halls or homes using a combination of the Blackboard LMS (Learning Management System), teleconferencing, and other technologies. Instructors should be prepared to assign students a "Plan B" project that can be completed 'at a distance.' For additional information about maintaining your classes in an emergency, please access: <http://cst.usc.edu/services/emergencyprep.html>

From Hackers to CEO:

An Introduction to Information Security

ITP 125 (2 Units)

Course Outline

Note: Schedule subject to change

Labs will be conducted in conjunction with the topics presented

Week 1 – Introduction, Computer Security, Ethics

- Course Overview
- What is a hacker?
- I'm being hacked!?!
- Hacker methodology
- Ethics and Computer Law

Week 2 – Networking I

- OSI 7-Layer model
- Overview of networked systems
- Wireless and wired networking

Week 3 – TCP/IP

- Modern Networking
- TCP Ports
- Handshaking

Week 4 – Networking II & History of Hacking

- Review of Networking I
- Network Devices
- Security Devices
- Security Topology

News

News – Group 1

Week 5 – Operating Systems

- Processes
- Multitasking
- Memory management
- OS Architecture
- Client/Server architecture

News

News – Group 2

Week 6 – Hacking, Cryptography & Authentication

- One-way hashes
- Authentication
- Message digests
- Attacks on hashes
- PKI

News

News – Group 1

Week 7 – Guest Lecture (Attendance Mandatory)

News

News – Group 2

Week 8 – Threats, Attacks & Exploits

- Basic threat vectors
- Buffer overflows
- SQL injection
- Post-exploit access

News

News – Group 1

Week 9 – Midterm

Week 10 – Social Engineering & Guest Lecture (Attendance Mandatory)

- Intro to social engineering
- Phishing
- Human behavior and psychology

News

News – Group 2

Week 11 – Lockdown & Defense

- Workstation security
- Server security
- Database security
- Perimeter defense

News

News – Group 1

Week 12 – Information Security and Policy Management

- Infosec policies
- AUPs
- Protecting the organization

News

News – Group 2

Week 13 – Incident Response

- Responding to being hacked
- Introduction to forensics
- Triage and containment

News

News – Group 1

Week 14 – Special Lab Day**Week 15 – Conclusion**

- Conclusion to the Course
- Review for the Final Exam

News

News – Group 2
