

USC Viterbi School of Engineering

INF 553: Foundations and Applications of Data Mining

Units: 4

Term—Day—Time:

Fall 2017 – W – 5:00-8:20pm (section 32444D)

Location: THH 210

Instructor: Dr. Matthew Michelson

Office: THH 210

Office Hours: Wed. after class (or before, by appointment)

Contact Info: michelso@usc.edu

Course Producers: Yi Zhao / Priyambada Jain

Office: Leavey Library lower level / TBD

Office Hours: Fri 10:00-12:00pm / TBD

Contact Info: zhao102@usc.edu / priyambj@usc.edu

Grader: Sovan Rath

Contact Info: sovanrat@usc.edu

Catalogue Course Description

Data mining and machine learning algorithms for analyzing very large data sets. Emphasis on Map Reduce. Case studies, and guest lectures about real-world applications if and when available.

Expanded Course Description

Data mining is a foundational piece of the data analytics skill set. At a high level, it allows the analyst to discover patterns in data, and transform it into a usable product. The course will teach data mining algorithms for analyzing very large data sets. It will have an applied focus, in that it is meant for preparing students to utilize topics in data mining to solve real world problems.

Recommended Preparation: INF 550, INF 551 and INF 552. Knowledge of probability, linear algebra, basic programming, and machine learning.

A basic understanding engineering principles is required, including basic programming skills; familiarity with the Python language is desirable. Most assignments are designed for the Unix environment; basic Unix skills will make programming assignments much easier. Students will need sufficient mathematical background, including probability, statistics, and linear algebra. Some knowledge of machine learning is helpful, but not required.

Course Notes

The course will be run as a lecture class with student participation strongly encouraged. There are weekly readings and students are encouraged to do the readings prior to the discussion in class. All of the course materials, including the readings, lecture slides, home works will be posted online

Technological Proficiency and Hardware/Software Required

Students are expected to know how to program in a language such as Python or Scala. Students are also expected to have their own laptop or desktop computer where they can install and run software to do the weekly homework assignments.

Required Readings and Supplementary Materials

- Rajaraman, J. Leskovec and J. D. Ullman, *Mining of Massive Datasets*
 - Cambridge University Press, 2012.
 - Available free at: <http://infolab.stanford.edu/~ullman/mmds.html>

In addition to the textbook, students may be given additional reading materials such as research papers. Students are responsible for all assigned reading assignments.

Description and Assessment of Assignments

Homework Assignments

There will be 5 homework assignments. The assignments must be done individually. Each assignment is graded on a scale of 0-100 and the specific rubric for each assignment is given in the assignment.

Grading Breakdown

Quizzes: There will be weekly quizzes based on the material from the week before. There is no mid-term for this class.

Homework: There will be 5 homeworks based on the topics of the class each week.

Comprehensive Exam: There is a final exam at the end of the semester covering all of the material covered in the class.

Grading Schema:

Quizzes	30%
Homework	45%
Comprehensive Exam:	25%
<hr/>	
Total	100%

Grades will range from A through F. The following is the breakdown for grading:

94 – 100 = A	74 – 76 = C
90 – 93 = A-	70 – 73 = C-
87 – 89 = B+	67 – 69 = D+
84 – 86 = B	64 – 66 = D
80 – 83 = B-	60 – 63 = D-
77 – 79 = C+	Below 60 is an F

Assignment Submission Policy

Homework assignments are due at 11:59pm on the due date and should be submitted in Blackboard. You can submit homework up to one week late, but you will lose 20% of the possible points for the assignment. After one week, the assignment cannot be submitted.

Course Schedule: A Weekly Breakdown

Week (date of class)	Topic	Readings	Homework
1 (8/23)	Introduction to Data Mining, MapReduce	Ch1: Data Mining and Ch2: Large-Scale File Systems and Map-Reduce	
2 (8/30)	MapReduce (cont.)	Ch2: Large-Scale File Systems and Map-Reduce	
3 (9/6)	Frequent itemsets and Association rules	Ch6: Frequent itemsets, Ch3: Finding Similar Items (section 3.5: Distance Measures)	Homework 1 assigned
4 (9/13)	Frequent itemsets and Association rules	Ch6: Frequent itemsets	
5 (9/20)	Shingling, Minhashing, Locality Sensitive Hashing	Ch3: Finding Similar Items	Homework 1 due, Homework 2 assigned
6 (9/27)	Shingling, Minhashing, Locality Sensitive Hashing	Ch3: Finding Similar Items	
7 (10/4)	Recommendation Systems: Content-based and Collaborative Filtering	Ch9: Recommendation systems, additional readings	
8 (10/11)	Recommendation Systems: Content-based and Collaborative Filtering	Ch9: Recommendation systems	Homework 2 due, Homework 3 assigned
9 (10/18)	Clustering	Ch7: Clustering	
10 (10/25)	Link Analysis: PageRank, Web spam and TrustRank, Random Walks with Restarts	Ch5: Link Analysis	Homework 3 due, Homework 4 assigned
11 (11/1)	Analysis of Massive Graphs (Social Networks)	Ch10: Analysis of Social Networks	
12 (11/8)	Analysis of Massive Graphs (Social Networks)	Ch10: Analysis of Social Networks	Homework 4 due, Homework 5 assigned
13 (11/15)	Web Advertising	Ch8: Advertising on the Web	
14 (11/22)	Mining data streams NO CLASS! Read Ch. 4	Ch4: Mining data streams	Homework 5 due
15 (11/29)	Mining data streams		
(12/6)	Comprehensive Final	Location/time/date to be finalized	

Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Section 11, *Behavior Violating University Standards* <https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions>. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <http://policy.usc.edu/scientific-misconduct>.

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the *Office of Equity and Diversity* <http://equity.usc.edu> or to the *Department of Public Safety* <http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us>. This is important for the safety of the whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. *The Center for Women and Men* <http://www.usc.edu/student-affairs/cwm/> provides 24/7 confidential support, and the sexual assault resource center webpage <http://sarc.usc.edu> describes reporting options and other resources.

Support Systems

A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the *American Language Institute* <http://dornsife.usc.edu/ali>, which sponsors courses and workshops specifically for international graduate students. *The Office of Disability Services and Programs* http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, *USC Emergency Information* <http://emergency.usc.edu> will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.
