

MASC 551

Mechanical Behavior of Engineering Materials

Spring Term 2018

Lectures: OHE 136 T-Th 9:30-10:50

Lectures: Professor:

M.E. Kassner Kassner@usc.edu

Office: RTH 503 (AH) RTH 502
Office Hours: T-Th 1-2 PM (Prefer Appt.)

TA Roya Ermagan ermagan@usc.edu

Supplemental Texts:

“Mechanical Metallurgy”, G.E. Dieter
“Mechanical Behavior of Materials”, T.H. Courtney
“Deformation and Fracture of Engineering Materials”, R.W.
Herzberg
“Mechanical Behavior of Materials”, McClintock and Argon
“Fracture of Structural Materials”, Tetelman and McEvily
“Mechanical Behavior of Material”s Meyers and
Chawla, Prentice Hall, 1998
“Introduction to Dislocations” D. Hull and D.J. Bacon 5th ed.
Butterworth

Introductory Books:

"Materials Science and Engineering"
5th ed. William D. Callister
"Principles of Engineering Materials", Barrett, Nix
and Tetelman

Objectives:

This course focuses on the mechanical properties of materials. The lectures will emphasize stress and strain relationships how the macroscopic mechanical behavior is related to the structure and microstructure of the material. This course will discuss elementary dislocation theory and relate this to basic strengthening mechanisms. Physical and chemical mechanisms that alter the mechanical properties will be discussed. Crystalline metals and ceramics will be emphasized but polymers and non-crystalline materials will be discussed as well. Fatigue and fracture will also be discussed in terms of fundamental mechanisms.

Grading:

Mid-terms (3)	60%
Final Exam	40%

MASC 551 MECHANICAL PROPERTIES OF ENGINEERING MATERIALS

<u>WEEK</u>	<u>DATE</u>	<u>LECTURE TOPICS</u>
1	1/9 1/11	Introduction Elasticity I
2	1/16 1/18	Elasticity II Elasticity III
3	1/23 1/25	Basic Plasticity True Stress and Strain
4	1/30 2/1	Work Hardening Midterm #1
5	2/6 2/8	Dislocations Intro. Dislocations: Schmid's Law
6	2/13 2/15	Dislocations: Theoret. Shear Strength Dislocations: Burgers Vector

7	2/20 2/22	Dislocations: Stress fields Dislocation: Dynamics
8	2/27 3/1	Partial Dislocations Dislocation Cross-slip, Climb
9	3/6 3/8	Kinks, Jogs Midterm #2
10	3/13 3/15	Spring Break Spring Break
11	3/20 3/22	Grain Size Strengthening Strengthening by Solutes
12	3/27 3/29	Strengthening by Precipitates Annealing
13	4/3 4/5	Heat Treatment of Steels I Heat Treatment of Steels II
14	4/10 4/12	Brittle Fracture Ductile Fracture
15	4/17 4/19	Midterm #3 Fatigue
16	4/24 4/26	Strain-Rate Sensitivity Creep
17	5/8	(8-10) FINAL EXAM
