

**Units:** 4

**Instructor:** Mohammad Reza Rajati, PhD  
PHE 414

[rajati@usc.edu](mailto:rajati@usc.edu) – Include INF 552 in subject

**Office Hours:** Monday 1:00 –3:00

**TA:** TBD

[@usc.edu](mailto:@usc.edu) – Include INF 552 in subject

**Office Hours:** TBD

**Grader:** Haoze Yang

[haozeyan@usc.edu](mailto:haozeyan@usc.edu) – Include INF 552 in subject

**Lecture:** Tuesday, Thursday, 8-10 am in SOS B44

**Webpages:** [Piazza Class Page](#) for everything except grades  
and [USC Blackboard Class Page](#) for grades

– All HWs, handouts, solutions will be posted in PDF format  
with some codes.

– *Student has the responsibility to stay current with webpage material*

**Prereq:** Prior courses in multivariate calculus, linear algebra, probability, and statistics.  
– This course is a prerequisite to INF 558.

**Other Requirements:** Computer programming skills (e.g., R, Matlab, Python, etc.).

**Tentative Grading:** Assignments 30%  
Midterm Exam 15%  
Course Project 35%  
Final Exam 20%  
Participation on Piazza\* 5%

**Letter Grade Distribution:**

$\geq 93.00$	A	73.00 - 76.99	C
90.00 - 92.99	A-	70.00 - 72.99	C-
87.00 - 89.99	B+	67.00 - 69.99	D+
83.00 - 86.99	B	63.00 - 66.99	D
80.00 - 82.99	B-	60.00 - 62.99	D-
77.00 - 79.99	C+	$\leq 59.99$	F

**Disclaimer:** Although the instructor does not expect this syllabus to drastically change, he reserves every right to change this syllabus any time in the semester.

**Note on e-mail vs. Piazza:** If you have a question about the material or logistics of the class and wish to ask it electronically, please post it on the piazza page (not e-mail). You may post it anonymously if you wish. Often times, if one student has a question/comment, other also have a similar question/comment. Use e-mail with the professor, TA, graders only for issues that are specific to your individually (e.g., a scheduling issue or grade issue).

**Catalogue Description:** Practical applications of machine learning techniques to real-world problems. Uses in data mining and recommendation systems and for building adaptive user interfaces.

**Course Description:** This is a foundational course with the primary application to data analytics, but is intended to be accessible both to students from technical backgrounds such as computer science, computer engineering, electrical engineering, or mathematics; and to students from less technical backgrounds such as business administration, communication, accounting, various medical specializations including preventative medicine and personalized medicine, genomics, and management information systems. A basic understanding of engineering and/or technology principles is needed, as well as basic programming skills, sufficient mathematical background in probability, statistics, and linear algebra.

**Course Objectives:** Upon successful completion of this course a student will

- Broadly understand major algorithms used in machine learning.
- Understand supervised and unsupervised learning techniques.
- Understand regression methods.
- Understand resampling methods, including cross-validation and bootstrap.
- Understand decision trees, dimensionality reduction, regularization, clustering, and kernel methods.
- Understand hidden Markov models and graphical models.
- Understand feedforward and recurrent neural networks and deep learning.

**Exam Dates:**

- **Midterm Exam:** Tuesday March 1, 8-9:50 AM.
- **Final Exam:** Wednesday, May 9, 8:00 - 10 AM as **set by the university**

**Textbooks:**

- **Required Textbook:**

1. Gareth James, Daniela Witten, Trevor Hastie, and Robert Tibshirani, *An Introduction to Statistical Learning with Applications in R*, Springer, 2013. (ISLR)

- **Recommended Textbooks:**

1. Trevor Hastie, Robert Tibshirani, and Jerome Friedman, *The Elements of Statistical Learning: Data Mining, Inference, and Prediction*, Second Edition, Springer, 2008. (ESL)
2. Ian Goodfellow, Yoshua Bengio, and Aaron Courville, *Deep Learning*, MIT Press, 2016. (DL)
3. Ethem Alpaydin, *Introduction to Machine Learning*, Second Edition, MIT Press, 2010. (AL)

### Grading Policies:

- The letter grade distribution table guarantees the *minimum* grade each student will receive based on their final score. When appropriate, relative performance measures will be used to assign the final grade, at the discretion of the instructor.
  - Final grades are non-negotiable and are assigned at the discretion of the instructor. If you cannot accept this condition, you should not enroll in this course.
- One of your lowest homework grades will be dropped from the final grade.
- \*Participation on Piazza has up to 5% extra credit, which is granted on a competitive basis at the discretion of the instructor.

- **Homework Policy**

- Homework is assigned on a biweekly basis. *Absolutely no late homework will be accepted. A late assignment results in a zero grade.*
- Homework solutions and simulation results should be typed or *scanned* using scanners or mobile scanner applications like CamScan and uploaded on blackboard (photos taken by cell-phone cameras and in formats other than pdf will NOT be accepted). Programs and simulation results have to be uploaded on blackboard as well.
- Students are encouraged to discuss homework problems with one another, but each student must do their own work and submit individual solutions written/ coded in their own hand. Copying the solutions or submitting identical homework sets is written evidence of cheating. The penalty ranges from F on the homework or exam, to an F in the course, to recommended expulsion.
- Posting the homework assignments and their solutions to online forums or sharing them with other students is strictly prohibited and infringes the copyright of the instructor. Instances will be reported to USC officials as academic dishonesty for disciplinary action.

- **Exam Policy**

- **Make-up Exams:** No make-up exams will be given. If you cannot make the above dates due to a class schedule conflict or personal matter, you must drop the class. In the case of a required business trip or a medical emergency, a signed letter from your manager or physician has to be submitted. This letter must include the contact of your physician or manager.

- Midterm and final exams will be closed book and notes. No calculators are allowed nor are computers and cell-phones or any devices that have internet capability. One letter size cheat sheet (back and front) is allowed for the midterm. Two letter size cheat sheets (back and front) are allowed for the final.
- All exams are cumulative, with an emphasis on material presented since the last exam.

- **Projects**

- The purpose of the class project is for you to acquire the hands-on experience of identifying a data problem and applying machine learning approaches to solve it. Students are encouraged to identify unique applications for machine learning and develop novel approaches.
- Projects are strongly encouraged to be large enough for teams of 3 students.
- Project Timeline:
  - \* Draft Proposal Due (team members, topics, and milestones): **2/1/2018**
  - \* Proposal Due: **2/15/2018**
  - \* Presentations: **4/17/2018-4/26/2018**
  - \* Final Reports Due (task & model description, major discovery, lessons learned): **4/28/2018**
- Grading breakdown of the course project:
  - \* Proposal: 15%
  - \* Final Report: 45%
  - \* Presentation: 40%

- **Attendance:**

- Students are required to attend all the lectures and discussion sessions and actively participate in class discussions. Use of cellphones and laptops is prohibited in the classroom. If you need your electronic devices to take notes, you should discuss with the instructor at the beginning of the semester.

**Important Notes:**

- Textbooks are secondary to the lecture notes and homework assignments.
- Handouts and course material will be distributed.
- Please use your USC email to register on Piazza and to contact the instructor and TAs.

## Tentative Course Outline

TUESDAY		THURSDAY	
Jan 9th	1	11th	2
<b>Introduction to Statistical Learning</b> (ISLR Chs.1,2, ESL Chs.1,2) Supervised vs. Unsupervised Learning		<b>Introduction to Statistical Learning</b> (ISLR Chs.1,2, ESL Chs.1,2) Model Assessment, The Vapnik-Chervonenkis Dimension	
16th	3	18th	4
<b>Linear Regression</b> (ISLR Ch.3, ESL Ch. 3) Estimating Coefficients Estimating the Accuracy of Coefficients		<b>Linear Regression</b> (ISLR Ch.3, ESL Ch. 3) Qualitative Variables Comparison with K-Nearest Neighbors	
23rd	5	25th	6
<b>Classification</b> (ISLR Ch. 4, ESL Ch. 4) Logistic Regression Linear Discriminant Analysis		<b>Classification</b> (ISLR Ch. 4, ESL Ch. 4) Perceptron Quadratic Discriminant Analysis* Comparison with K-Nearest Neighbors	
30th	7	Feb 1st	8
<b>Resampling Methods</b> (ISLR Ch. 5, ESL Ch. 7) Cross-Validation The Bootstrap		<b>Linear Model Selection and Regularization</b> (ISLR Ch.6, ESL Ch. 3) Subset Selection Shrinkage Methods	
6th	9	8th	10
<b>Linear Model Selection and Regularization</b> (ISLR Ch.6, ESL Ch. 3) Dimension Reduction Methods* Considerations in High Dimensions*		<b>Tree-based Methods</b> (ISLR Ch. 8, ESL Chs. 9, 10) Regression and Classification Trees	
13th	11	15th	12
<b>Tree-based Methods</b> (ISLR Ch. 8, ESL Chs. 9, 10) Bagging, Boosting, and Random Forests		<b>Support Vector Machines</b> (ISLR Ch. 9, ESL Ch. 12) Maximal Margin Classifier Support Vector Classifiers Support Vector Machines	
20th	13	22nd	14
<b>Support Vector Machines</b> (ISLR Ch. 9, ESL Ch. 12) The Kernel Trick L1 Regularized SVMs Multi-class and Multilabel Classification Support Vector Regression*		<b>User Study Setup and Evaluation*</b>	
27th	15	Mar 1st	16
<b>User Study Setup and Evaluation*</b>		<b>Midterm</b>	

TUESDAY		THURSDAY	
6th	17	8th	18
<b>Unsupervised Learning</b> (ISLR Ch. 10, ESL Ch. 14) Principal Component Analysis K-Means Clustering Hierarchical Clustering Competitive Learning and Self-Organizing Maps		<b>Unsupervised Learning</b> (ISLR Ch. 10, ESL Ch. 14) Semi-Supervised Learning Practical Issues in Clustering Association Rules* Gaussian Mixtures and Soft K-Means*	
13th		15th	
Spring Break		Spring Break	
20th	19	22nd	20
<b>Graphical Models</b> (ESL Ch. 17, AL Ch. 14) Markov Graphs and Their Properties Bayesian Networks		<b>Graphical Models</b> (ESL Ch. 17, AL Ch. 14) Belief propagation* Restricted Boltzmann Machines	
27th	21	29th	22
<b>Hidden Markov Models</b> (AL Ch. 15) Principles The Viterbi Algorithm		<b>Hidden Markov Models</b> (AL Ch. 15) Applications of HMMs	
Apr 3rd	23	5th	24
<b>Neural Networks and Deep Learning</b> (ESL Ch. 11, DL Ch. 6) Feedforward Neural Networks Backpropagation and Gradient Descent Overfitting		<b>Neural Networks and Deep Learning</b> (DL Chs. 6, 7) Autoencoders and Deep Feedforward Neural Networks Regularization Early Stopping and Dropout Adversarial Training*	
10th	25	12th	26
<b>Neural Networks and Deep Learning</b> (DL Chs. 9, 10) Convolutional Neural Networks Sequence Modeling Recurrent Neural Networks		<b>Neural Networks and Deep Learning</b> (DL Ch. 10) Sequence-to-Sequence Modeling* Long Short Term Memory (LSTM) Neural Networks	
17th	27	19th	28
<b>Ensemble Learning*</b> (ESL Ch. 16) Boosting and Regularization Paths Learning Ensembles		<b>Ensemble Learning*</b> (ESL Ch. 16) Combination Methods	
24th	29	26th	30
<b>Presentations*</b>		<b>Presentations*</b>	

**Notes:**

- Items marked by \* will be covered only if time permits.

**Statement on Academic Integrity:** USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one's own academic work from misuse by others as well as to avoid using another's work as one's own. All students are expected to understand and abide by these principles. SCampus, the Student Guidebook, contains the University Student Conduct Code (see University Governance, Section 11.00), while the recommended sanctions are located in Appendix A. See: <http://scampus.usc.edu>.

**Emergency Preparedness/Course Continuity in a Crisis** In case of a declared emergency if travel to campus is not feasible, USC executive leadership will announce an electronic way for instructors to teach students in their residence halls or homes using a combination of Blackboard, teleconferencing, and other technologies. See the university's site on Campus Safety and Emergency Preparedness: <http://preparedness.usc.edu>

**Statement for Students with Disabilities:** Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to me (or to TA) as early in the semester as possible. DSP is located in STU 301 and is open 8:30 a.m.5:00 p.m., Monday through Friday.
