USC School of Pharmacy

RXRS 304: Mysterious Deaths: Toxicology, Poisons, Literature and History

Instructors:  Martine Culty, PhD
             Associate Professor, Department of Pharmacology and Pharmaceutical Sciences
             University of Southern California
             culty@usc.edu
             (323) 865-1677
             MCA-9121
             Office: PSC 702

             Daryl L. Davies, PhD
             Professor, Department of Clinical Pharmacy
             University of Southern California
             ddavies@usc.edu
             (323) 442-1427
             MCA-9121
             Office Location: HSC campus PSC 506; Office Hours (by appt).

             Mary Ellen Cosenza, PhD
             Adjunct Faculty, Department of Regulatory and Quality Sciences
             mecosenza@gmail.com

Course Weight:  4 Units (course meets 3 hours per week, one hour outside education)

Days/Time/Location:  Friday 2:00- 4:50 VKC 201

Course catalogue description (25 words or less): Poisons as described in classical literature where they helped shape, modify or change history. Presented in the context of pharmacological/toxicological principles of drug action.

Introduction
This course introduces the student to pharmacological and toxicological principles as well as biological mechanisms of action in the setting of the use of poisons in literature and history. By the end of the course, the students will understand principles related to hazard and risk assessment, the influence of dose, route and formulation on health outcomes as well as how molecules of different origins have been used for the benefit (medicines) and detriment (poisons) in humans. The course will also introduce the student to the history of forensic analysis and how this field has evolved. Techniques used in modern day forensics to demonstrate evidence of the use of poisons will be presented. Using historical events taken from the literature, scientific principles linked to toxicology and poisonings will be presented in a unique illustrative context.

Objectives
The course is designed for undergraduates of both scientific and non-scientific majors with an interest in understanding the principles and concepts underlying toxicology, pharmacology and biological mechanisms. Chapters from the required textbook will be supplemented with a
variety of source materials including articles from scientific journals and public websites. Selected cases studies will be critically reviewed and emerging “hot” topics discussed.

**Upon successful completion of this course a student should be able to:**
- Understand and discuss the influence of dose and route on hazard
- Understand and discuss the basic pharmacological and toxicological principles underlying the use of molecules to modify biological processes
- Understand and discuss what determines the toxicity of a molecule
- Know the history of the development of forensic toxicology as a discipline to provide evidence of exposure to poisons
- Have a working knowledge and be able to discuss the mechanism of action and the use of toxicants as poisons throughout history and literature

**Assignments and Grading:**

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Points</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class participation</td>
<td>20 pts</td>
<td>8%</td>
</tr>
<tr>
<td>4 quizzes @ 10 pts each</td>
<td>40 pts</td>
<td>16%</td>
</tr>
<tr>
<td>2 midterm exams @ 40 pts each</td>
<td>80 pts</td>
<td>32%</td>
</tr>
<tr>
<td>1 written report due on the day of the exam</td>
<td>50 pts</td>
<td>20%</td>
</tr>
<tr>
<td>1 final exam (partially cumulative):</td>
<td>60 pts</td>
<td>24%</td>
</tr>
<tr>
<td><strong>Total:</strong></td>
<td>250 pts</td>
<td></td>
</tr>
</tbody>
</table>

Class Participation and Attendance (20 pts): On a scale of 10, 0-indicating no participation, 10-indicating best participation. You can therefore increase the probability of getting a higher mark by being proactive in terms of asking (relevant) questions in class and/or contributing to discussions.

Attendance at all classes is expected. Participation will include asking and answering questions and being actively involved in the discussion. It is expected that the students read the assigned papers prior to the lecture and be prepared to discuss background, current understanding, treatments, and gaps in knowledge for the topic in each lecture.

Class Deliverable (written report): The class deliverable will be a 5 page write up from one of the extra class sources of information based on a toxin or poison of choice. On a scale of 50, 0-no deliverable turned in, 50-an excellent synopsis of the extracurricular source of information. It is expected that the students will engaged one of the extracurricular sources of information (one of the cited videos of 45 minutes or longer, reading of one of the recommended or suggested sources, or reading of one of the reviewed pieces of literature [e.g. a book by Agatha Christie]) of a subject of interest.

The midterms (40 points each) will include multiple choice questions, and T/F questions and fill-in the blank or short answer questions.

The final exam (60 points) will be similar format as the midterms. The final exam will be cumulative, but will emphasize material covered after the 2nd midterm.
There are no make-up exams. If exceptional circumstances prevent you from attending an exam, your reason for missing it must be accompanied by a written statement from a third party (e.g. a note from a medical doctor).

Notes, books, calculators, electronic dictionaries, regular dictionaries, cell phones or any other aids are not allowed during exams.

Students will be asked to complete an anonymous critical evaluation of the course at its completion.

**Required Text:**
**The Poisoner's Handbook: Murder and the Birth of Forensic Medicine in Jazz Age New York**
Deborah Blum  
ISBN-10: 014311882X  
Available on Amazon for ~ $9.00 - $15.00

We will supplement the reading with several “MOVIE NIGHTS” where classic movies depicting a famous poisoning event will be screened. We will provide pizza, drinks, popcorn, etc. IT WILL BE FUN. WE will work with the class to find several evenings that will work. One of the MOVIE nights may end up be during class.

**Course Readings**

**Required Readings (selected, short, easy to read chapters)**

Although not mandatory, it is strongly suggested that the students purchase these books for this course as it will provide a resource to reinforce and supplement the lectures on the use of poisons throughout literature and history. The students will be able to use identified chapters in the text to support their learning process throughout the semester.

Holzman, RS. The Legacy of Atropos, the Fate Who Cut the Thread of Life. 89:241-249, 1998.  

Other course materials including but not limited to the syllabus, supplemental reading assignments and additional handouts will be posted on http://blackboard.usc.edu/. Students are encouraged to use the online discussions among students via Blackboard.

Recommended

Course Outline

This course will be in the format of a directed seminar/lecture under the guidance of the instructor for the specific session. During each weekly session the instructor will engage the students with questions and draw comments or interpretations primarily based on the assigned reading. Students are expected to ask questions and participate in an interactive fashion.

Course schedule is as follows:

Statement on Academic Conduct and Support Systems

Academic Conduct
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Section 11, Behavior Violating University Standards https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct.

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity http://equity.usc.edu or to the Department of Public Safety http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us. This is important for the safety of the whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men http://www.usc.edu/student-affairs/cwm/ provides 24/7 confidential support, and the sexual assault resource center webpage http://sarc.usc.edu describes reporting options and other resources.

Support Systems
A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute http://dornsife.usc.edu/ali, which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information http://emergency.usc.edu will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

RXRS 304-FINAL Final Exam May 7th 2:00 – 4:00 VKC 101
In case of emergency, and travel to campus is difficult, USC executive leadership will announce an electronic way for instructors to teach students in their residence halls or homes using a combination of Blackboard, teleconferencing, and other technologies. Instructors should be prepared to assign students a "Plan B" project that can be completed at a distance. For additional information about maintaining your classes in an emergency please access:
http://cst.usc.edu/services/emergencyprep.html
