Office Hours: By appointment Contact Info: bechara@usc.edu

Teaching Assistant: NA

IT Help: NA

Hours of Service: NA Contact Info: NA

Course Description

The course consists of three major sections: Overview of Neuroanatomy, Neurological Illnesses, and Neuropsychological Syndromes. These sections are delivered in the form of lectures, and clinical cases on patients with neurological lesions or diseases. The course material is interrelated throughout these forms of teaching, giving students multiple ways of learning the material.

Learning Objectives

The objectives of the course are: (1) to introduce basic concepts about the organization, structure, and function of the human central nervous system; (2) to enable students to apply these fundamental principles toward understanding nervous system function and dysfunction and toward clinical problem-solving in relation to neurological and neuropsychological disorders; (3) to provide the necessary background for correlation with related courses, for advanced study of the nervous system, and for monitoring new developments in the basic and clinical neurosciences.

Prerequisite(s): Undergraduates in junior or senior year are allowed to enroll (no specific pre-requisites).

Co-Requisite (s): none

Concurrent Enrollment: none

Recommended Preparation: PSYC 100

Course Notes

Slides used in lectures, and in class presentations, will be posted on Blackboard and accessible to registered students.

Attendance and Student Responsibilities

Students are held responsible for all material covered in class. Students are also responsible for all announcements or schedule changes that are made in class, whether or not they are in attendance. Attendance at examination is mandatory, except for illness. For other serious matters, students must receive permission in advance from the Instructor to be excused from attending an examination at the scheduled time.

Technological Proficiency and Hardware/Software Required NA

Required Readings and Supplementary Materials

No specific textbook is required for the course. Course syllabus, lecture materials, and clinical cases will be posted on Blackboard as the course progresses. All materials for midterm tests and final exam come from class and Blackboard.

Recommended for Readings: However, for additional knowledge and enrichment of neuropsychology background, additional readings are recommended from the following textbook:

John Stirling and Rebecca Elliott: Introducing Neuropsychology, 2nd Edition, Psychology Focus, 2008.

Description and Assessment of Assignments

The course will include (1) 3 midterm exams covering lectures and practical/ clinical cases, and (2) a final examination. All materials on these tests will be from the class slides and posted on Blackboard; (3) there are also assessments of participation in class discussions.

- Mid-term tests: These will have short answers format. All test/exam questions will be based on materials presented and discussed in class and not on any outside materials.
- 2. A final exam: This will have short answers format. Questions will be based on materials presented and discussed in class and not on any outside materials.
- Participation in class discussion: First, students must come first to class in order to participate in the discussion. The discussion will involve students asking any question related to the class materials, or engaging in answers or discussions brought up by the instructor. Evaluation is based on the frequency and quality of comments. High quality contributions will reflect both a depth and breadth of knowledge gained from readings of the clinical cases and lecture slides presented in class and on Blackboard. They should also be clearly stated and effectively communicated, and they also should be insightful and relevant to the issues under discussion.

Grading Breakdown

Final grades will be calculated as follows:

Midterm 1	20%
Midterm 2	20%
Midterm 3	20%
Participation in class discussion	10%
Final Exam	30%
Final Grade	100%

Course Schedule: A Weekly Breakdown

	Topics/Daily Activities	Readings	Deliverable/ Due Dates
Overview of Week 1 Jan 9 Jan 11	Neuroanatomy: 1. Course Introduction 2. CNS Blood Supply, Spinal Cord	Suggested from S and E: Chapters 1, 2, and 5	Come prepared for all slides and handouts posted on Blackboard for this week.
Week 2 Jan 16 Jan 18	3. Brainstem, Cranial Nerves 4. Cranial Nerves (cont'd); Cerebellum; Basal Ganglia	Chapter 5	Come prepared for all slides and handouts posted on Blackboard for this week.
Week 3 Jan 23 Jan 25	Thalamus; hypothalamus Cerebral Cortex	Chapter 5	Come prepared for all slides and handouts posted on Blackboard for this week.
Week 4 Jan 30 Neurological Feb 1	7. Mid term test 1 Illnesses: 8. Clinical Cases: Case Based Learning	Handout posted on Blackboard	Come prepared to discuss clinical cases in class.
Week 5 Feb 6 Feb 8	9. Neurological exam: motor and sensory, cerebellar, basal ganglia, and cranial nerves 10. Neurological exam: mental status and coma	Chapters 2, 4, and 5	Come prepared for all slides and handouts posted on Blackboard for this week.
Week 6 Feb 13 Feb 15	11. Stroke 12. Dementia	Slides posted on Blackboard	Come prepared for all slides and handouts posted on Blackboard for this week.
Week 7 Feb 20 Feb 22	13. Mid term test 2 14. Trauma, tumors, infections, epilepsy		

Week 8 Feb 27 March 1	15. Parkinson's and basal ganglia disorders16 Practical demo of some neuropsychology evaluation:(1) WASI- Wechsler Abbreviated	Slides posted on Blackboard	Come prepared to discuss clinical cases in class.
	Scale of Intelligence (2) WCST-Wisconsin Card Sorting Task (3) IGT- Iowa Gambling Task (4) Stroop		
Neuropsych	Syndromes:		
Week 9	17.Clinical Cases: Case Based	Handout	
March 6	Learning	posted on Blackboard	Come prepared for all slides and handouts posted on Blackboard for
March 8	18. Memory 1	Chapter 7	this week.
Spring	Break March 12-16		
Week 10 March 20	19. Memory 2	Chapter 7	Come prepared for all slides and
maron 20	10.1110.110.1	Chapter 1	handouts posted on Blackboard for this week.
March 22	20. Memory (cont'd)		
Week 11			
March 27	21. Frontal lobe syndromes 1	Chapter 11	Come prepared for all slides and handouts posted on Blackboard for
March 29	22. Frontal lobe syndromes 2		this week.
Week 12			
April 3	22. Emotion 1	Chapter 10	
April 5	23. Mid term test 3		

Week 13			
April 10	24. Emotion 2	Chapter 10	Come prepared for all slides and
April 12	25. Neglect	Chapter 9	handouts posted on Blackboard for this week.
Week 14			
Week 14			
April 17	26. Aphasia	Chapter 6	Come prepared for all slides and
April 19	27. Disconnection syndromes	Chapter 3	handouts posted on Blackboard for this week.
Week 15			
April 24	28. Agnosia	Chapter 8	Come prepared for all slides and handouts posted on Blackboard for
April 26	29. Apraxia		this week.
FINAL Date			Date: For the date and time of the final for this class, consult the USC Schedule of Classes at www.usc.edu/soc.

Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else's ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Section 11, *Behavior Violating University Standards*https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct/.

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the *Office of Equity and Diversity* http://equity.usc.edu/ or to the *Department of Public Safety* http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us. This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. *The Center for Women and Men* http://www.usc.edu/student-affairs/cwm/ provides 24/7 confidential support, and the sexual assault resource center webpage sarc@usc.edu describes reporting options and other resources.

Support Systems

A number of USC's schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the *American Language Institute* http://dornsife.usc.edu/ali, which sponsors courses and workshops specifically for international graduate students. *The Office of Disability Services and Programs* http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.htmlprovides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, *USC Emergency Information http://emergency.usc.edu/*will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.
