Course Objective

The purpose of this course is to develop the analytical skills necessary to translate theatrical text into design ideas and learning the different tools to communicate them artistically and technically in a collaborative process.

Course Overview

We will explore the design process through various communication approaches such as:

Text analysis (scene breakdown), research, sketching, drafting, model making rendering and explore working as a collaborative design team.

Since the classroom makes it difficult to fully experience the professional process, I will act as the director in each of your projects to give you some guidance. I hope from this you will learn how to take feedback and use it to revise and improve your own work.

The class will be made up of a variety of in-class working session, along with presentations and discussions.
