

## SOWK 651 Academic Year 2018-2019

## Clinical Psychopharmacology for Social Workers

## **Three Units**

Instructor: Dr. Finney

E-Mail: Kfinney@usc.edu Course Day: Thursday

Office: MRF Course Time: 1:00-3:50

Course Location: MRF

Office Hours: Thursday 12:12:50

## I. COURSE PREREQUISITES

**SOWK 506** 

### II. CATALOGUE DESCRIPTION

This course addresses the neurobiological bases of major psychoactive drugs used in treatment of psychological and behavioral disorders in both a behavioral and primary care medical setting. Theoretical and practical approaches to treatment of depression, anxiety, insomnia, attention deficit, psychosis, and trauma-related stress disorders are examined with the goal of advancing students' knowledge of best practices that complement current evidence-based interventions.

### III. COURSE DESCRIPTION

Social work students will be prepared to facilitate clients' needs in an interdisciplinary system that supplies a range of interventions within a biopsychosocial framework. Key tenets of this framework involve neurobiology, psychiatric disorders, mental wellness, and psychosocial advocacy. Students learn to identify these concerns along with the risk and benefits associated with psychotropic medications. Students will learn about laboratory testing and disease

markers in the context of evidence-based medical models and evidence-based psychosocial intervention models. Students will increase their awareness and understanding of other disciplines while navigating services for clients in an inpatient or outpatient medical setting.

Special consideration is given to the integration of psychotropic drugs, evidence-based therapies, the identification of drug—drug interactions, and empirical evidence regarding the effectiveness of psychotropic drug therapies. This is achieved through the lens of social work with emphasis on the effectiveness of an interprofessional approach in patient care and case management.

Attention will be paid to issues of diversity (gender, race, sexual orientation, and culture) including specific issues relevant in working with culturally diverse client groups. Addressing stigma and barriers to service will help students establish alliances with their clients effectively. Finally, students will learn to use the range of practice models in a phase-oriented approach that values the therapeutic relationship, cultural responsiveness, and theoretical grounding.

## IV. COURSE OBJECTIVES

Clinical Psychopharmacology for Social Workers course (SOWK 651):

Objective #	Objectives
1	Understand the role of psychopharmacology in the diagnosis and treatment of mental health behaviors
2	Promote understanding of psychopharmacology in an interdisciplinary practice while providing psychosocial support and advocacy
3	Facilitate identification of risk and benefits associated with the use of psychotropic medications
4	Explain complex biological, psychopharmacology, and cultural factors (age, gender, and race) germane to assessment, treatment, and case management of clients receiving psychotropic interventions
5	Promote professional social work identity through self-reflection and the practice of social work in working with clients who are receiving psychotropic therapy; reevaluation of traditions and biases that influence practice while using an interdisciplinary lens

### V. COURSE FORMAT/INSTRUCTIONAL METHOD

Modes of instruction will consist of a combination of didactic lecture, in-class discussion, student clinical case presentations, experiential exercise, analysis of video recordings, and online teaching and learning environments.

## VI. STUDENT LEARNING OUTCOMES

The following table lists the nine Social Work core competencies as defined by the Council on Social Work Education's 2015 Educational Policy and Accreditation Standards:

Soci	al Work Core Competencies
1	Demonstrate Ethical and Professional
	Behavior *
2	Engage in Diversity and Difference in
	Practice
3	Advance Human Rights and Social,
	Economic, and Environmental Justice
	*
4	Engage in Practice-informed
	Research and Research-informed
	Practice *
5	Engage in Policy Practice *
6	Engage with Individuals, Families,
	Groups, Organizations, and
	Communities *
7	Assess Individuals, Families, Groups,
	Organizations, and Communities
8	Intervene with Individuals, Families,
	Groups, Organizations, and
	Communities
9	Evaluate Practice with Individuals,
	Families, Groups, Organizations and
	Communities *

## \* Highlighted in this course

The following table shows the competencies highlighted in this course, the related course objectives, student learning outcomes, and dimensions of each competency measured. The final column provides the location of course content related to the competency.

Competency	Objectives		Dimensions	Content
Competency 2: Engage Diversity and Difference in	Explain complex	2b. Evaluate	Exercise of	Unit 2: Structure and
Practice	biological,	the strengths	judgment	Functions of the
Using research, social workers understand how	psychopharmacology,	and weaknesses		Nervous System
diversity and difference characterize and shape the	and cultural factors	of multiple		
human experience and are critical to the formation of	(age, gender, and	theoretical		In-class multiple choice

ability, ethnicity, gender, gender identity and	psychotropic			
expression, immigration status, marital status,	interventions.			
political ideology, race, religion/spirituality, sex,				
sexual orientation, and tribal sovereign status. Social				
workers understand that, as a consequence of				
difference, a person's life experiences may include				
oppression, poverty, marginalization, and alienation				
as well as privilege, power and acclaim. Social				
workers also understand the forms and mechanisms				
of oppression and discrimination and recognize the				
extent which a culture's structures and values,				
including social, economic, political and cultural				
exclusions may oppress, marginalize, and/or alienate				
adults and older adults or create privilege and power.				
Social workers through self-reflection, continue to				
assess and address their ageist values, building				
knowledge to dispel myths regarding aging and				
stereotyping of older persons. Social workers are able				
to consistently identify and use practitioner/client				
differences from a strengths perspective. Social				
workers view themselves as learners and engage				
those with whom they work as informants.				

Competency	Objectives	Behaviors	<b>Dimensions</b>	Content
Competency 4: Engage In Practice-	Understand the role of	4b. Gather, translate	Skills	Unit 8:
informed Research and Research-	psychopharmacology	and utilize existing		Psychopharmacology

behavioral health, and integrated care	health behaviors.	between research and		
settings understand quantitative and		practice.		Grand Rounds Presentation
qualitative research methods and their				
respective roles in advancing a science				
of social work and in evaluating their				
practice. Social workers know the				
principles of logic, scientific inquiry,				
and culturally informed and ethical				
approaches to building knowledge.				
Social workers understand that evidence				
that informs practice derives from multi-				
disciplinary sources and multiple ways				
of knowing. Social workers use the				
evidence-based practice process in				
clinical assessment and intervention with				
clients. Social workers use research				
methodology to evaluate practice				
effectiveness and/or outcomes. They				
also understand the processes for				
translating research findings into				
effective practice and participate in the				
generation of new clinical knowledge				
through research and practice.				

## VII. COURSE ASSIGNMENTS, DUE DATES, AND GRADING

Assignment	<b>Due Date</b>	% of Final Grade
Assignment 1: In-Class Exam	Week 5	20 %
Assignment 2: In-Class Exam	Week 7	20%
Assignment 3: Grand Rounds	Weeks 8– 14	20%
Assignment 4:	Due last week of class	20%
Weekly Quiz		15%
Class Participation	Ongoing	5%

Each of the major assignments is described below.

## Assignment 1: Exam (20%)

This exam will include information from lectures, readings, and class discussions that address neurobiology, brain anatomy and physiology, neuron function, neurotransmitters, mental health disorders, and basic pharmacology concepts. This method of student evaluation is based on exams used for licensing. In addition, this material is taught based on the learning principle of scaffolding and an accurate instructional assessment of the student's learning.

## **Grading Criteria**

Instructors will be testing recall, comprehension, and application of the materials. Exam will be graded using the grid below:

93–100	A
90–92	A-
87–89	B+
83–86	В
80–82	В-
77–79	C+
73–76	С
70–72	C-

## **Due: Week 5 (administered in class)**

This assignment relates to student learning outcomes 1, 2, 3, and 9.

## **Assignment 2: (20%)**

This exam will include information from lectures, readings, and class discussions that address psychopharmacology and mental health disorders, side effects, adverse reactions, and mechanism of actions.

### **Grading Criteria**

Instructors will be testing recall, comprehension, and application of the materials. Exam will be graded using the grid below:

93–100	A
90–92	A–
87–89	B+
83–86	В
80–82	В-
77–79	C+
73–76	С
70–72	C-

Due: Week 7 (administered in class)

This assignment relates to student learning outcomes 1, 2, 3, and 9.

## **Assignment 3: Clinical Case and Medication Grand Rounds (20%)**

This assignment is designed on a clinical platform where case presentations are common for interdisciplinary/interprofessional treatment team interventions.

Students will work individually to present in a Grand Rounds Case format and presentation, in addition each instructor will provide the student an outline checklist to use in preparation of this assignment:

- Students will select a child or an adult journal article: the journal article must be a peer-reviewed and evidenced-based article on a medication used for the treatment of a specific adult or child mental disorder/symptoms.
- In addition, students will present a clinical case from a field or work-related experience that has symptoms that is or can be treatable with the medication discussed in the article and integrate neurobiology/biological/medical issues/lab results and pharmacology interventions into the case with considerations on race, gender, and socioeconomic contextual issues. The selected case does not have to be one where medication was used or that laboratory results were ordered.

## However, the student must discuss a retrospective view regarding medication and lab testing use.

- Students will provide a copy of the article and case for the instructor. Students will also provide a copy of the article for each student in the class.
- Make sure that all identifiable information has been removed from the case before presentation is delivered. Discussion on topic will be discussed in class.
- All drug topics selected must be approved by the instructor, prior to presenting.
- Once topic is approved, students will select a date to present and document it on a sign-up sheet that the instructor will provide.
- Presentations will start on Week 9 and continue through Week 15.

## Presentations should be between 10 and 15 minutes. Any presentation longer than 15 minutes will have points deducted.

## **Grading Criteria**

- 1. Demonstrate working knowledge of neurobiology and psychopharmacology theories used to describe the selected case and medication used in the treatment of a specific mental illness. Pharmacodynamics and pharmacokinectics, mechanism of action must also be included and discussed during presentation. FDA indications of use, off-label use, dosing, side effects and severe adverse reaction should be discussed. (30%)
- 2. Thoughtful discussion of your clinical assessment and diagnosis to include possible diagnosis and limitations of medication (i.e., race, confounding disease states: for example, hepatic insufficiency). (25%)
- 3. Thoughtful discussion of your recommendations and case management within an interdisciplinary treatment team. Include the application of lab findings and cultural inhibitions toward treatment and management as applicable. (15%)
- 4. Willingness to be self-reflective (e.g., countertransference) and the role of social workers in managing clients within the context of a medical model and interdisciplinary team. (15%)
- 5. Discussion of race, gender, sexual orientation, spirituality, etc. considerations as appropriate when selecting biopsychosocial interventions and providing supportive maintenance to selected patient/client populations. Lastly, prepare a discussion question for the class and present it at the end of the presentation. (15%)

## Due: Weeks 9-14

*This assignment relates to student learning outcomes 2, 3, 4, 5, and 9.* 

## Assignment 4: Clinical Case Analysis (20%)

Students will be given a clinical case to critically analyze and submit a comprehensive analysis. Integrate the diagnosis, labs, secondary referrals, and medications as they relate to management of the selected case.

In the conclusion section, discuss your role as a social worker in bridging the difference that will serve as a liaison for clients/patients. Use a dimensional clinical professional lens when designing and writing this paper. The assignment should be double-spaced with 12-point font, APA format, and approximately 5-6 pages in length (not including title and reference page). It should be written as a clinical analysis to include treatment summary with referral recommendations. Students will have two weeks to complete this assignment and use at least 6 references.

#### **Due: Last week of class**

This assignment relates to student learning outcomes 3, 6, 9, and 10.

## **Grading Criteria**

- 1. Demonstrate working knowledge of neurobiology and psychopharmacology theories used to describe the selected case and medication used in the treatment of the mental illness in the case. Discuss the mechanism of action for the selected medication and related side effects. (35%)
- 2. Thoughtful discussion of your clinical assessment and diagnosis to include possible diagnosis and limitations. Required or recommended laboratory testing and referrals. Evaluate the strengths and weaknesses of the patient/client in terms of psychosocial factors. (25%)
- 3. Explain the importance of an interdisciplinary approach to clinical case management. Discuss how an interdisciplinary approach fits into a bigger context (or not) of clinical practice of social work. (25%)
- 4. Willingness to be self-reflective (e.g., countertransference) and ability to articulate the role of social workers in managing clients within the context of a medical model. Discussion of race, gender, sexual orientation, spirituality, etc. considerations as appropriate when selecting biopsychosocial interventions and providing support to these populations. (15%)

## Due: Week 15

This assignment relates to student learning outcomes 4, 5, 6, 8, and 10.

#### **Weekly Assignments**

Students will have weekly questions or case discussions that must be completed prior to online class sessions. This assignment is 15% of grade: Students will earn 1% each week for assignment

completion. This assignment is graded based on accuracy.

## **Class Participation**

This is 5% of class grade. This grade will be based on the student's ability to demonstrate professional courtesy, support to peers, and active participation during discussions and presentations of fellow classmates. Students are also expected to ask appropriate questions and participate in class discussions. Cell phone usage (texting) and recreational computer use are not permitted during class time.

#### Grades

Grades in the School of Social Work are determined based on the following standards that have been established by the faculty of the school:

**Grades of A or A**— are reserved for student work that not only demonstrates strong mastery of content but which also shows that the student has undertaken a complex task, has applied critical thinking skills to the assignment, and/or has demonstrated creativity in his or her approach to the assignment. The difference between these two grades would be determined by the degree to which these skills have been demonstrated by the student.

A grade of B+ will be given to work that is judged to be very good and demonstrates a more-than-competent understanding of the material being tested in the assignment.

A grade of B will be given to student work that meets the basic requirements of the assignment and demonstrates work that meets course expectations at an adequate level.

**A grade of B**— will indicate that a student's performance was less than adequate on an assignment and reflects only moderate grasp of content and/or expectations.

**A grade of C** will reflect a minimal grasp of the assignments, poor organization of ideas, and/or several areas requiring improvement.

**Grades between C- and F** will denote a failure to meet minimum standards, reflecting serious deficiencies in all aspects of a student's performance on the assignment.

Class grades will be based on the following:

Class Grades	Final Grade
3.85–4.00 A	93–100 A
3.60–3.84 A–	90–92 A–
3.25–3.59 B+	87–89 B+
2.90–3.24 B	83–86 B
2.60–2.89 B–	80–82 B–
2.25–2.59 C+	77–79 C+
1.90–2.24 C	73–76 C

# VIII. REQUIRED AND SUPPLEMENTARY INSTRUCTIONAL MATERIALS AND RESOURCES

## **Required Textbook:**

- 1. Preston, J. D., O'Neal, J. H., & Talaga, M. C. (2017). *Handbook of clinical sychopharmacology for therapists* (8th ed.). Oakland, CA: New Harbinger.
- 2. Basic Psychopharmacology Principles: A Quick Guide for Mental Health Professionals (First Edition, 2018), is published and distributed by Cognella Academic Publishing it can also be purchased at USC book store.

### **Recommended Books to Consider:**

- 1. Maunder, R. (2011). *Understanding laboratory tests: A quick reference*. San Diego, CA: Elsevier.
- 2. Harvey, R. A. (2015). *Lippincott's illustrated reviews: Pharmacology* (6<sup>th</sup> ed). Baltimore, MD: Lippincott Williams & Wilkins.

Note: Additional required and recommended readings may be assigned by the instructor throughout the course.

## **Course Overview**

Unit	Topics	Assignments
1	Introduction to Pharmacology	
2	Structure and Functions of the Nervous System	
3	Basic Psychopharmacology Principles	
4	Adrenergic and Cholinergic Systems	
5	Diagnostic and Laboratory Tests / Medication Monitoring	Assignment 1
6	Medication Management	
7	Psychotropic Medications and Depression	Assignment 2
8	• Case 1:	
9	Psychotropic Medications and Psychosis	Assignment 3
10	Psychotropic Medications and Anxiety	
11	Psychotropic Medications Insomnia/Alertness/Attention	
12	Psychopharmacology Trauma and Case Management	
13	Case 2: Management Coordination and Drug-Drug Interaction	Assignment 4
14	Misuse of Prescriptions, Illegal Drugs, and Medications in Children and in Elders	
15	Grand Round Completions and Interdisciplinary Treatment with Medications	

## **Course Schedule—Detailed Description**

## **Unit 1: Introduction to Pharmacology**

## **Topics**

- Role of social work in a medical model
- Pharmacodynamics and pharmacokinetics
- Pharmacology and psychopharmacology working model
- Introduction to the brain and body
- How and where do we treat?
  - Treatment settings:
    - Inpatient setting
    - Treatment considerations
    - Referrals and follow-ups
    - Support services

This unit relates to course objectives 1 and 2.

## **Required Reading**

- 1. Carlson, N. R. (2017). Structure and function of cells of the nervous system. In *Foundations of behavioral neuroscience* 8<sup>th</sup> ed (pp. 19-47). Boston, MA: Pearson. (Found in ARES)
- 2. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 1)
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Neurobiology. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp.29-43)

## **Unit 2:** Structure and Functions of the Nervous System

### **Topics**

- Agonist and antagonist neuron firing
- Labeling and defining presynaptic and postsynaptic neurons
- Cell membrane and action potential
- Inhibitory and excitatory neurons

This unit relates to course objectives 1, 2, and 3.

## **Required Reading**

1. Carlson, N. R. (2017). Structure of cells of the nervous system. In *Foundations of Behavioral Neuroscience* 8<sup>th</sup> (pp 48-75) Boston, MA: Pearson. (Found in ARES)

2. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 2)

## **Unit 3:** Basic Psychopharmacology Prinicples

### **Topics**

- Command and control: sympathetic and parasympathetic system and neurons
- CNS: postganglionic and preganglionic system
- Stress and the environment on the nervous system

This unit relates to course objectives 1 and 4.

## **Required Reading**

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book (Chapter 3)
- 2. Preston, J. D., O'Neal, J. H., & Talaga, M. C. (2017). Pharmacology. In *Handbook of clinical psychopharmacology for therapists* 8<sup>th</sup> (pp. 45-61). Oakland, CA: New Harbinger. (Found in ARES)

## **Unit 4:** Adrenergic and Cholinergic

### **Topics**

- Disorders impacting sympathetic arousal and dysregulation
  - Prescription of beta blockers
  - Prescription of alpha blockers
- Diagnosing co-occurring conditions

This unit relates to course objectives 1, 3, and 4.

### **Required Reading**

1. Finney, K (Basic Psychopharmacology Principles Book, (Chapter 4)

## **Recommended Reading**

- 2. Harvey, R. A. (2015). Pharmacokinetics. In *Lippincott's illustrated reviews: Pharmacology* (pp. 1–5). Baltimore, MD: Lippincott Williams & Wilkins.
- 3. Harvey, R. A. (2015). Cholinergic Agonists. In *Lippincott's illustrated reviews: Pharmacology* (pp. 51-63). Baltimore, MD: Lippincott Williams & Wilkins
- 4. Harvey, R. A. (2015). Cholinergic Antagonists. In *Lippincott's illustrated reviews: Pharmacology* (pp. 65-76). Baltimore, MD: Lippincott Williams & Wilkins.
- 5. Harvey, R. A. (2015). Adrenergic Agonist In *Lippincott's illustrated reviews: Pharmacology* (pp. 77–94). Baltimore, MD: Lippincott Williams & Wilkins.

6. Harvey, R. A. (2015). Adrenergic Antagonists. In *Lippincott's illustrated reviews: Pharmacology* (pp. 95-104). Baltimore, MD: Lippincott Williams & Wilkins.

# Unit 5: Diagnostic and Laboratory Tests / Medication Monitoring

## **Topics**

- Introduction to laboratory testing
- Blood and urine testing results (biological systems analysis)
- Anemia and psychological disorders
- Electrolytes, liver function, and kidney function
- Normal lab values and using existing measures to guide monitoring

This unit relates to course objectives 1, 2, 3, and 4.

## **Required Reading**

1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 5)

## **Unit 6:** Medication Management

## **Topics**

- Helping the client with medication issues
- Serving as a liaison and advocate with health care providers
- Evidence-based practices and other interventions
- Advocating in medication management
- Decision making and problem solving

This unit relates to course objectives 3 and 4.

## **Required Reading**

1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 6)

## **Unit 7:** Psychotropic Medications and Depression

## **Topics**

- Depression criteria and monoamine theory
- Applying the biopsychosocial assessment
  - Differential assessment and treatment options
  - Addressing ongoing assessment of safety, risks, self-care, suicidal ideation, and danger to self and others
  - Using standardized assessment tools: depression and anxiety symptom checklists
  - Assessing for psychosocial and psychopharmacology factors

This unit relates to course objectives 1, 2, 3, and 4.

## **Required Reading**

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (chapter 7)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Depressive Disorders. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. 77-93.
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Antidepressive Medications. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp.175-200)

## **Unit 8:** Case 1: Psychosis Theory Introduction

### **Topics**

- Define mechanism of action in psychosis using Bioamine Theory
- Applying the biopsychosocial assessment
  - Differential assessment and treatment options
  - Addressing ongoing assessment of safety, risks, self-care, suicidal ideation, and danger to self and others
  - Using standardized assessment tools: depression and anxiety symptom checklists
  - Assessing for psychosocial and psychopharmacology factors

This unit relates to course objectives 1, 2, 3, and 4.

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 7)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Depressive Disorders. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. 77-93.

## **Unit 9:** Psychotropic Medication and Psychosis Theory

## **Topics**

- Psychosis and neurobiology theory
- Pharmacology and psychosis
- Treatment options

This unit relates to course objectives 1, 2, 3, and 4.

## **Required Reading**

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 8)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Bipolar Disorder. In *Handbook of Psychopharmacology for Therapists*. 8th, ed. Oakland CA: New Harbinger Publications, Inc. (pp 95-106)

## **Unit 10:** Psychotropic Medications and Anxiety

### **Topics**

- Anxiety criteria and monoamine theory
- Insomnia and psychotropic medications
- Applying the biopsychosocial assessment
  - Differential assessment and treatment options
  - Assessing for psychosocial and psychopharmacology factors

This unit relates to course objectives 1, 2, 3, and 5.

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 9)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Anxiety Disorders. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp.107-127)
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Antianxiety Medications. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 217-226)

## Unit 11: Psychotropic Medications and Alertness

### **Topics**

- Coping with insomnia/alertness and concentration deficits
- Psychopharmacology and sleep medications
- Caffeine assessment
- Sleep hygiene assessment

This unit relates to course objectives 1, 3, and 4.

## **Required Reading**

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 10)
- 2. Man, K. K., Chan, E. W., Ip, P., Coghill, D., Simonoff, E., Chan, P. K., ... & Wong, I. C. (2017). Prenatal antidepressant use and risk of attention-deficit/hyperactivity disorder in offspring: population based cohort study. *Bmj*, *357*, j2350
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Substance Related Disorders. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp.153-171)

## **Unit 12:** Psychotropic Medications and Trauma

## **Topics**

- Overview of trauma and assault
- Brain function and trauma
- Treatment considerations
- The theory and application of psychopharmacology for trauma
- Psychosocial and spiritual interventions

This unit relates to course objectives 1, 3, 4, and 5.

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 11)
- 2. Raskind, M. A., Peterson, K., & William, T. (2013). A trial of prazosin for combat trauma PTSD with nightmares in active duty soldiers returned from Iraq and Afghanistan.. *American Journal of Psychiatry*, 170(9), 1003–1010.
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Posttraumatic Stress Disorder. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 139-151)

## Unit 13: Case Management and Drug-Drug Interaction and Warnings

## **Topics**

- Overview of drug–drug interaction—cytochrome p450
- Birth defects associated with psychotropic medications
- Genetics and psychopharmacology
- Misuse of prescription drugs and illegal drug use
- Black-box warnings and FDA
- Culture and diversity

This unit relates to course objectives 1, 3, 4, and 5.

## **Required Reading**

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 12)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Medication Discontinuation. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 243-245)
- 3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Over the counter supplements. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 239-242)

# Unit 14: Misue of Prescriptions, Illegal Drugs and Medications in Children and Elders

## **Topics**

- Family of origin
- Gender and race impacting medication metabolism
- The role of the primary care manager in social work
- Services provided by care management in social work
  - Ongoing assessment of risk and safety
  - Care coordination and collaboration among multiple providers
  - Advocacy and brokering with stakeholders

This unit relates to course objectives 1, 2, 3, 4, and 5.

- 1. Finney, K (2018) Basic Psychopharmacology Principles Book, (Chapter 13)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Medication Safety. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc.(Appendix D)

3. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Child and Adolescent Psychopharmacology. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 255-276)

## Unit 15: Ground Round Completions and Interdisciplinary Treatments with Medication

## **Topics**

- Future directions in psychopharmacology implications for social workers
- Prescribers in a primary care setting and social work advocacy
- Interdisciplinary treatment team meetings
  - Providers/clients/patients
  - Nursing
  - Social workers
  - Psychologists/psychiatrists
  - Case managers
  - Occupational therapists
- Social work and the integration of services and follow-up

This unit relates to course objectives 2, 3, 4, and 5.

- 1. Psychopharmacology Principles Book (2018), (chapter 14)
- 2. Preston, J.D. O'Neal, J.H.& Talaga, M.C (2017). Red Flags: when to reevaluate. In *Handbook of Psychopharmacology for Therapists*.8<sup>th</sup>, ed. Oakland CA: New Harbinger Publications, Inc. (pp. 247-250)

## **University Policies and Guidelines**

### IX. ATTENDANCE POLICY

Students are expected to attend every class and to remain in class for the duration of the unit. Failure to attend class or arriving late may impact your ability to achieve course objectives which could affect your course grade. Students are expected to notify the instructor by email (<a href="mailto:kfinney@usc.edu">kfinney@usc.edu</a>) of any anticipated absence or reason for tardiness.

University of Southern California policy permits students to be excused from class for the observance of religious holy days. This policy also covers scheduled final examinations which conflict with students' observance of a holy day. Students must make arrangements *in advance* to complete class work which will be missed, or to reschedule an examination, due to holy days observance.

Please refer to Scampus and to the USC School of Social Work Student Handbook for additional information on attendance policies.

### X. ACADEMIC CONDUCT

Plagiarism – presenting someone else's ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Part B, Section 11, "Behavior Violating University Standards" <a href="https://policy.usc.edu/scampus-part-b/">https://policy.usc.edu/scampus-part-b/</a>. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <a href="http://policy.usc.edu/scientific-misconduct">http://policy.usc.edu/scientific-misconduct</a>.

### XI. SUPPORT SYSTEMS

Student Counseling Services (SCS) – (213) 740-7711 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention. <a href="mailto:engemannshc.usc.edu/counseling">engemannshc.usc.edu/counseling</a>

National Suicide Prevention Lifeline – 1 (800) 273-8255

Provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week. <a href="https://www.suicidepreventionlifeline.org">www.suicidepreventionlifeline.org</a>

Relationship and Sexual Violence Prevention Services (RSVP) – (213) 740-4900 – 24/7 on call Free and confidential therapy services, workshops, and training for situations related to gender-based harm. <a href="mailto:engemannshc.usc.edu/rsvp">engemannshc.usc.edu/rsvp</a>

Sexual Assault Resource Center

For more information about how to get help or help a survivor, rights, reporting options, and additional resources, visit the website: sarc.usc.edu

Office of Equity and Diversity (OED)/Title IX Compliance – (213) 740-5086
Works with faculty, staff, visitors, applicants, and students around issues of protected class. equity.usc.edu

Bias Assessment Response and Support

Incidents of bias, hate crimes and micro aggressions need to be reported allowing for appropriate investigation and response. <a href="mailto:studentaffairs.usc.edu/bias-assessment-response-support">studentaffairs.usc.edu/bias-assessment-response-support</a>

The Office of Disability Services and Programs

Provides certification for students with disabilities and helps arrange relevant accommodations. dsp.usc.edu

#### USC Support and Advocacy (USCSA) - (213) 821-4710

Assists students and families in resolving complex issues adversely affecting their success as a student EX: personal, financial, and academic. <a href="mailto:studentaffairs.usc.edu/ssa">studentaffairs.usc.edu/ssa</a>

#### Diversity at USC

Information on events, programs and training, the Diversity Task Force (including representatives for each school), chronology, participation, and various resources for students. diversity.usc.edu

#### USC Emergency Information

Provides safety and other updates, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible. emergency.usc.edu

USC Department of Public Safety – UPC: (213) 740-4321 – HSC: (323) 442-1000 – 24-hour emergency or to report a crime. Provides overall safety to USC community. dps.usc.edu

#### XII. ADDITIONAL RESOURCES

Students enrolled in the Virtual Academic Center can access support services for themselves and their families by contacting Perspectives, Ltd., an independent student assistance program offering crisis services, short-term counseling, and referral 24/7. To access Perspectives, Ltd., call 800-456-6327.

#### XIII. STATEMENT ABOUT INCOMPLETES

The Grade of Incomplete (IN) can be assigned only if there is work not completed because of a documented illness or some other emergency occurring after the 12th week of the semester. Students must NOT assume that the instructor will agree to the grade of IN. Removal of the grade of IN must be instituted by the student and agreed to be the instructor and reported on the official "Incomplete Completion Form."

#### XIV. POLICY ON LATE OR MAKE-UP WORK

Papers are due on the day and time specified. Extensions will be granted only for extenuating circumstances. If the paper is late without permission, the grade will be affected.

#### XV. POLICY ON CHANGES TO THE SYLLABUS AND/OR COURSE REQUIREMENTS

It may be necessary to make some adjustments in the syllabus during the semester in order to respond to unforeseen or extenuating circumstances. Adjustments that are made will be communicated to students both verbally and in writing.

### XVI. CODE OF ETHICS OF THE NATIONAL ASSOCIATION OF SOCIAL WORKERS (OPTIONAL)

Approved by the 1996 NASW Delegate Assembly and revised by the 2017 NASW Delegate Assembly https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English

#### **Preamble**

The primary mission of the social work profession is to enhance human well-being and help meet the basic human needs of all people, with particular attention to the needs and empowerment of people who are vulnerable, oppressed, and living in poverty. A historic and defining feature of social work is the profession's focus on individual well-being in a social context and the well-being of society. Fundamental to social work is attention to the environmental forces that create, contribute to, and address problems in living.

Social workers promote social justice and social change with and on behalf of clients. "Clients" is used inclusively to refer to individuals, families, groups, organizations, and communities. .Social workers are

sensitive to cultural and ethnic diversity and strive to end discrimination, oppression, poverty, and other forms of social injustice. These activities may be in the form of direct practice, community organizing, supervision, consultation, administration, advocacy, social and political action, policy development and implementation, education, and research and evaluation. Social workers seek to enhance the capacity of people to address their own needs. Social workers also seek to promote the responsiveness of organizations, communities, and other social institutions to individuals' needs and social problems.

The mission of the social work profession is rooted in a set of core values. These core values, embraced by social workers throughout the profession's history, are the foundation of social work's unique purpose and perspective:

Service
Social justice
Dignity and worth of the person
Importance of human relationships
Integrity
Competence

This constellation of core values reflects what is unique to the social work profession. Core values, and the principles that flow from them, must be balanced within the context and complexity of the human experience.

#### XVII. ACADEMIC DISHONESTY SANCTION GUIDELINES

Some lecture slides, notes, or exercises used in this course may be the property of the textbook publisher or other third parties. All other course material, including but not limited to slides developed by the instructor(s), the syllabus, assignments, course notes, course recordings (whether audio or video) and examinations or quizzes are the property of the University or of the individual instructor who developed them. Students are free to use this material for study and learning, and for discussion with others, including those who may not be in this class, unless the instructor imposes more stringent requirements. Republishing or redistributing this material, including uploading it to web sites or linking to it through services like iTunes, violates the rights of the copyright holder and is prohibited. There are civil and criminal penalties for copyright violation. Publishing or redistributing this material in a way that might give others an unfair advantage in this or future courses may subject you to penalties for academic misconduct.

#### XVIII. COMPLAINTS

If you have a complaint or concern about the course or the instructor, please discuss it first with the instructor. If you feel cannot discuss it with the instructor, contact the chair of the [xxx]. If you do not receive a satisfactory response or solution, contact your advisor and/or Associate Dean and MSW Chair Dr. Leslie Wind for further guidance.

#### XIX. Tips for Maximizing Your Learning Experience in this Course (Optional)

Be mindful of getting proper nutrition, exercise, rest and sleep!

Come to class.

Complete required readings and assignments BEFORE coming to class.

BEFORE coming to class, review the materials from the previous Unit AND the current Unit, AND scan the topics to be covered in the next Unit.

Come to class prepared to ask any questions you might have.

Participate in class discussions.

AFTER you leave class, review the materials assigned for that Unit again, along with your notes from that Unit.

If you don't understand something, ask questions! Ask questions in class, during office hours, and/or through email!

Keep up with the assigned readings.

Don't procrastinate or postpone working on assignments.
