SYLLABUS

QBIO 105: Introduction to Quantitative Biology Seminar

This course is a required course for students majoring in Quantitative Biology (http://qbio.usc.edu) and can only be taken by QBIO students.

Spring 2019

Time and Location: Mondays, 3:30-5:10 pm in RRI 421

Course Instructors: Dr. Remo Rohs (rohs@usc.edu, RRI 413H; 213-740-0552)
Professor of Biological Sciences, Chemistry, Physics &
Astronomy, and Computer Science
http://rohslab.cmb.usc.edu

Dr. Michael Waterman (msw@usc.edu, RRI 403E; 213-740-2408)
University Professor of Biological Sciences, Mathematics, and
Computer Science
https://dornsife.usc.edu/labs/msw/

Teaching Assistant: Brendon Cooper (bhcooper@usc.edu, RRI 413K and MCB 494)
Graduate Student in Computational Biology and Bioinformatics

Introduction (from the USC catalogue):

This course is the introductory seminar for students taking the QBIO major. It is ideally taken as freshman but it can be taken after a student’s transfer into the QBIO program. The instructors will introduce the general field of Quantitative Biology, its definition and role within the Biological Sciences, and its relationship with Chemistry, Computer Science, Engineering, Mathematics, Medicine, and Physics. The curriculum will include introductory lectures by the instructors, guest lectures, discussions, and student presentations.

Schedule:

1/07 Remo Rohs and Michael Waterman
Course Instructors
Brief Introduction to the Course

Yang Chai
Professor of Craniofacial Biology
Director, Center for Craniofacial Molecular Biology, Herman Ostrow School of Dentistry
Bioinformatics in Craniofacial Development and Tissue Regeneration

1/14 Maja Mataric
Professor of Computer Science, Neuroscience, and Pediatrics
Vice Dean for Research, Viterbi School of Engineering
Socially Assistive Robotics: The Future of Work and Robots That Care

1/21 MLK Day – no class

1/28 Craig Stanford
Professor of Biological Sciences and Anthropology
Chimpanzee Biology and the Origins of Human Behavior
2/4  Naomi Levine  
Assistant Professor of Biological Sciences (Marine Biology) and Earth Sciences  
*Hitting a Moving Target: Marine Microbial Plasticity, Adaptation, and Evolution in a Dynamic and Changing World*

2/11  Scott Fraser  
Provost Professor of Biological Sciences and Biomedical Engineering  
Director of Science Initiatives  
*Quantitative Intravital Imaging*

2/18  President's Day – no class

2/25  Hao Li  
CEO and Co-Founder, Pinscreen, Inc. and Assistant Professor of Computer Science  
Director, Visions and Graphics Lab, USC Institute for Creative Technologies  
*Photorealistic Human Digitization and Rendering using Deep Learning*

3/4  Stacey Finley  
Assistant Professor of Bioengineering, Chemical Engineering and Materials Science  
*Applying Systems Biology Models to Gain Insight into Cancer Signaling Dynamics*

3/11  Spring Break – no class

3/18  Arthur Toga  
Provost Professor of Ophthalmology, Neurology, Psychiatry, and Biological Sciences  
Director, USC Mark and Mary Stevens Neuroimaging and Informatics Institute  
*Neuroimaging, Neuroinformatics and Neurononsense*

3/25  Keith Camoosa  
Senior Vice President, Data Intelligence, Warner Bros. Entertainment, Inc.  
*Big Data Engineering and Data Science at Warner Brothers*

4/1  Pinchas Cohen  
Professor of Gerontology, Medicine and Biological Sciences  
Dean, USC Leonard Davis School of Gerontology  
*Systems Biology of the Mitochondria*

4/8  David Agus  
Professor of Medicine and Engineering  
Director, Lawrence J. Ellison Institute for Transformative Medicine of USC  
*Can Data Help You Live Longer and Be Used to Treat Cancer?*

4/15  Andrew McMahon  
Provost Professor of Stem Cell Biology, Regenerative Medicine, and Biological Sciences  
Director, Eli & Edythe Broad Center for Regenerative Medicine and Stem Cell Research  
*Developmental Modeling of the Human Kidney*

4/22  Steve Kay  
Provost Professor of Neurology, Biomedical Engineering, and Biological Sciences  
Director, Michelson Center for Convergent Bioscience  
*Systems Approaches to Understanding Circadian Networks*
Weekly Reports (10 points each; 120 points total): Reports should be no more than one page in length and should contain a maximum of one page with up to 500 words. Reports must be typed and printed. No electronic submissions will be accepted. Late reports will receive a maximum of 5 points. There are 12 weekly reports starting with the second lecture. Each weekly report must contain the following components: name of lecturer, date of lecture, and title of the lecture. List the main points raised during the lecture and discuss the meaning of each. The writing should consist of complete and grammatically correct sentences.

Grading: Your final letter grade in this course will be based upon all of your written reports, participation and discussion. Since there are no exams in this course, active participation and attendance are important components. The grade will consist of 120 points for weekly reports, and 30 points for participation and active discussion (150 points will be 100%).

Statement for Observance of Religious Holidays: USC’s policy grants students excused absences from class to observe religious holidays: http://orl.usc.edu/life/calendar/absences/ In this case, please contact your instructor in advance to agree on alternative course requirements.

Statement for Students with Disabilities: Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to me (or to TA) as early in the semester as possible. DSP is located in STU 301 and is open 8:30 a.m.–5:00 p.m., Monday through Friday. The phone number for DSP is (213) 740-0776.

Statement on Academic Integrity: USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one’s own academic work from misuse by others as well as to avoid using another’s work as one’s own. All students are expected to understand and abide by these principles. Scampus, the Student Guidebook, contains the Student Conduct Code in Section 11.00, while the recommended sanctions are located in Appendix A: Students will be referred to the Office of Student Judicial Affairs and Community Standards for further review, should there be any suspicion of academic dishonesty. The Review process can be found at: http://www.usc.edu/student-affairs/SJACS/.
