

SSCI 201, Principles of Geodesign

Syllabus

Units: 4

Term — Day — Time: Fall 2019 — Mondays and Wednesdays — 12:00 - 1:50 p.m.

Location: THH 213

Instructor: Leilei Duan, Ph.D.

Office: AHF B57E

Office Hours: TBD, and by appointment via email.

Contact Info: leileidu@usc.edu, 213-740-0739

Library Help: Andy Rutkowski

Office: VKC 36B

Office Hours: Tuesdays, 10:00 a.m.-12:00 p.m. and Thursdays, 4:30-5:30 p.m. PT

Contact Info: arutkows@usc.edu, 213-740-6390,
<http://bit.ly/andyhangout>

IT Help: Richard Tsung

Office: AHF 145D

Office Hours: By appointment

Contact Info: ctsung@usc.edu, 213-821-4415 (office)

Course Description

Geodesign is a relatively new and emerging interdisciplinary field that draws key concepts and ideas from the fields of architecture, planning and the spatial sciences, and links and integrates them in new and exciting ways in hopes of improving the world around us by executing one project at a time. The field stresses engagement (including policymakers, experts, and the people of the place for example) and focuses on outcomes that may help us to solve some of the Earth's most difficult and enduring problems, such as population growth, lack of access to clean water, malnutrition, urbanization, ecosystem destruction and global warming, among others. These national and in many instances, global threats, can be tackled in numerous ways and the particular focus and value that geodesign affords is the ability to work at identifying and building solutions in an iterative fashion from the bottom up (i.e. the local and regional scales).

This course starts by tracing the foundations and guiding principles of geodesign and how the practice of geodesign can be invoked and deployed to improve the functioning of the Earth, with the engagement of the people of the place that would be affected. Three sets of concepts and ideas are reviewed next. The first set focuses on the role of space and time scales and place-making in society. The second set focuses on the role of observation and mapping in learning about the world around us and the role of storytelling and maps in communicating this knowledge across diverse audiences. The third and final set looks at how the past informs the present and future and how many of the drivers and processes that shape our everyday lives span multiple spatiotemporal scales.

The class then moves to an in-depth exploration of the framework for geodesign that Carl Steinitz published in 2012. The role of architecture and landscape architecture as the traditional home for place-making and design, of planning as a framework for combining collective and individual action across the Earth, and of the spatial sciences as a framework for acquiring, organizing, analyzing, modeling and communicating location-based information are emphasized. This framework is helpful in classifying the variations in values attributed to environmental amenities and conditions (by different stakeholders) or variations in disciplinary perspectives (by different scientific domains). This framework, in the broadest sense, envisages changing geography by design.

The class finishes up by reviewing several geodesign case studies from around the globe, and by doing so, lays out the foundation on which the upper division classes from architecture, planning and spatial sciences that comprise the Geodesign major are based.

Learning Objectives

On completion of this course students will be able to:

- Synthesize the myriad ways in which places can be constructed, interpreted, and experienced by different people.
- Synthesize the principles of geodesign and how these can be used as a force for good in building healthy, livable, and sustainable communities.

- Analyze how urban and regional planning provides a framework for promoting civic engagement and collective action.
- Analyze how geographically referenced data can be gathered and organized to support a large number and variety of collaborative projects.
- Analyze how geospatial data can be analyzed, modeled and visualized to inform design and planning; and by doing so, support public participation and urban development.
- Analyze how form and function co-exist and evolve in urban and rural settings and how globalization connects near- and far-away places and actions.
- Synthesize how to integrate the content and research methods from architecture, urban and regional planning, spatial sciences, and other disciplines relevant to a particular situation.
- Synthesize the broader context in which the research issues and the practice of geodesign are positioned.

Prerequisite(s): None

Co-Requisite(s): None

Required Readings and Supplementary Materials

Please acquire the texts listed below. All are available at the USC Bookstore. All other supplementary reading listed in the syllabus are available as electronic resources in USC Libraries or under the tab marked “Readings” on the course Blackboard.

The required textbooks for this course are:

- Benyus, J. 2002. *Biomimicry: Innovation Inspired by Nature*. New York, NY: Random Books.
- Duany, A., Plater-Zyberk, E., & Speck, J. 2000. *Suburban Nation: The Rise of Sprawl and the Decline of the American Dream*. New York, NY: North Point Press.
- Hise, G., & Deverell, W. 2000. *Eden by Design: The 1930 Olmsted-Bartholomew Plan for the Los Angeles Region*. Berkeley, CA: University of California Press.
- Jacobs, J. 1961. *The Death and Life of Great American Cities*. New York, NY: Random House (Vintage Books edition, 1992).
- Leopold, A. 1949. *A Sand County Almanac: And Sketches Here and There*. New York, NY: Oxford University Press.
- McElvaney, S. 2012. *Geodesign: Case Studies in Regional and Urban Planning*. Redlands, CA: Esri Press.
- McHarg, I. 1969. *Design with Nature*. New York, NY: Doubleday Books.
- Speck, J. 2012. *Walkable City*. New York, NY: North Point Press.
- Steinitz, C. 2012. *A Framework for Geodesign: Changing Geography by Design*. Redlands, CA: Esri Press.

Supplementary readings for this course are:

- Bandarin, F., & van Oers R. (Eds.) 2014. *Reconnecting the City: The Historic Urban Landscape Approach and the Future of Urban Heritage*. Oxford, UK: Wiley-Blackwell.
- Bassett, T.J., & Fogelman, C. 2013. Déjà vu or something new? The adaptation concept in the climate change literature. *Geoforum*, 48, 42-53.
- Forman, R. 1996. *Land Mosaics*. Cambridge, MA: Harvard University Press.
- Goodchild, M.F. 2010. Towards Geodesign: Repurposing Cartography and GIS? *Cartographic Perspectives*, 66, 7-22.
- Kim, M. 2017. Teaching coastal resilience using geodesign: A study of Virginia Beach. *Journal of Digital Landscape Architecture*, 279-286.
- Reisner, M. 1986. *Cadillac Desert*. New York, NY: Viking Press.
- Saunders, W. 2012. *Designed Ecologies: The Landscape Architecture of Kongjian Yu*. Berlin, Germany: Birkhäuser.
- Sterman, J.D. 2002. All models are wrong: Reflections on becoming a systems scientist. *System Dynamics Review*, 18(4), 501-531.
- Waltham, T., & Sholji, I. 2001. The demise of the Aral Sea: An environmental disaster. *Geology Today*, 17(6), 218-228

Description and Assessment of Assignments

Students must attend all regularly scheduled lectures/in-class exercises, write book summaries, write a policy essay, sit for a final examination, and produce and present a final project called a “story map.”

Exercises

In addition to regular attendance and class participation, there is a set of four in-class exercises spread across the semester. These exercises will use pencils and (tracing) paper and will be designed to introduce you to the concepts and tools of geodesign as well as to give you practical experience in implementing these concepts and tools to explore various problems (and solutions) within the framework of geodesign. The primary goal of the exercises is to enable students to understand the value of spatial knowledge, maps, and the spatial representation of natural and human phenomena in design.

Reports

Throughout the semester, students will also produce six summaries of books or articles on foundations of geodesign used in class and how the readings have influenced their view of the role that planning, science and design might play in solving some of the Earth’s most serious and enduring challenges. Students should use these short writing assignments strategically to explore existing interests and build background knowledge for the story map project.

Story Map

The final project in this course is a story map. Story maps tell about places, issues, and trends by enriching digital maps with content like various kinds of graphs, text, photographs, video, and audio. The underlying data often depict the coupling of social and natural systems. These may be things like wetland areas, land cover, and census data, and may also include live data streams such as temperature, precipitation, and traffic. They often present scientific data and analysis, but they are mainly designed for the general public and do not require their users to have special knowledge or skills with the use of Geographic Information Systems (GIS) for example.

Story maps are increasingly used in geodesign and are an important tool to describe the challenges faced in various parts of the world and pathways toward sustainability and improved human well-being. For example, you can see an interactive story map that describes land use footprints of megacities here: <http://storymaps.esri.com/stories/2014/growth-of-cities/>. This story map was created as part of the Smithsonian's series on *Living in the Anthropocene: The Age of Humans*. Another example shows the warming of European cities as predicted in global climate models (see: <http://storymaps.esri.com/stories/2012/warming-cities/>).

In this course, you will create a story map that is focused on one of the geodesign case studies in McElvaney (2012). Students will be divided into small teams (2-4 students per team) and these teams will prepare presentations that offer a critical review of the workflow and the spatial concepts and tools that were used to synthesize scientific understanding on the one hand and to prepare and communicate one or more plans or designs for addressing the problem or challenge on the other hand. These story maps will be expected to integrate data on social and natural systems around the chosen geodesign case study. These story maps will also integrate scientific data like the examples above but their primary focus will be the use of geodesign as a force for good at local or regional scales.

Please note as well that some of the story maps you may see on the web are simply a montage of geotagged photographs and that your story map will be much more than this. It may have maps or photos for context, but it must be primarily an analytical report that includes writing in pop-up windows and sidebars. It will use visualization of data or models, like in the examples linked above, to communicate the underlying principles of geodesign and how they were brought together and used in an attempt to solve the problem at hand.

Exams and Other Policies

The final exam is closed book and will include content learned in course readings, lectures, in-class exercises, and online discussions sessions. **No make-up opportunities will be offered for missed exams or in-class exercises**, so mark the appropriate dates on your calendars! If you have a legitimate conflict, speak with the instructor as soon as possible. Also, note that there is **no credit for late assignments**.

Absences from class sessions must be requested by sending an email to the instructor. Excused absences from class sessions will be granted only for valid reasons; please notify us of the reason for your absence in your email.

Grading Breakdown

The following table shows the breakdown of the assignments and their contributions to the final grade. The emphasis is on regularly completing a number of short assignments as well as solid performance on the story map presentation and the final examination. Assignments must be submitted as noted, typically on the course Blackboard (Bb) site.

Assessment	Number	Points Each	Total Points (% of Grade)
Exercises (Submit in class & on Bb)	4	6	24
Reports (Submit in class & on Bb)	6	6	36
Final Project: Story Map (Submit URL to Bb) and give oral report	1	10	10
Final Exam (Closed Book)	1	30	30
Total	12	-	100

Course Schedule: A Weekly Breakdown

	Topic	Readings and Assignments	Deliverables/Due Dates
Week 1			
8/26	Introduction to Course		
8/28	Sketching the Natural and Human World	Leopold (1949), Jacobs (1961)	
Week 2			
*9/2	Labor Day – no class		
9/4	Fusing Form and Function: Watersheds and Cities	Duany et al. (2000)	Report #1 is due in Bb by 12:00 p.m. on Wednesday, 9/4
Week 3			
9/9	Maps and Map Overlay	Goodchild (2011), McHarg (1969)	
9/11	Landscape Metrics	Forman (1996)	Report #2 is due in Bb by 12:00 p.m. on Wednesday, 9/11
Week 4			
9/16	Los Angeles Mass Transit Map Overlay Exercise (#1)		

	Topic	Readings and Assignments	Deliverables/Due Dates
9/18	Models	Sterman (2002), Bassett & Fogelman (2013)	Exercise #1 is due in Bb by 12:00 p.m. on Wednesday, 9/18
Week 5			
9/23	Looking Forward and Backward: The Role of Culture, History, and Heritage	Bandarin & van Oers (2014)	
9/25	The Importance of Scale and Multiscalar Interactions	Waltham & Sholji (2001)	Exercise #2 is due in Bb by 12:00 p.m. on Wednesday, 9/25
Week 6			
9/30	Role of Collaboration, Geography, and Questions and Iterations in the Practice of Geodesign	Steinitz (2012, Ch. 1, 2, & 3)	
10/2	Geodesign applications and the utility of alternative scenarios	Kim (2017)	Report #3 is due in Bb by 12:00 p.m. on Wednesday, 10/2
Week 7			
10/7	Part 1, Scoping the Geodesign Study	Steinitz (2012, Ch. 4)	
10/9	Part 2, Designing the Study Methodology: Role of Decision, and Impact Models	Steinitz (2012, Ch. 5, pp. 45-53)	
Week 8			
10/14	Case Studies: Geodesign with Certainty and Uncertainty	Steinitz (2012, Ch. 7, 8, & 9)	
10/16	Role of Change, Evaluation, Process and Representation Models	Steinitz (2012, Ch. 5, pp. 54-81)	Report #4 is due in Bb by 12:00 p.m. on Wednesday, 10/16
Week 9			
10/21	Quantitative Impact Modeling vs. Qualitative Assessment	TBD	

	Topic	Readings and Assignments	Deliverables/Due Dates
10/23	Carrying Out the Geodesign Study	Steinitz (2012, Ch. 6)	Story Map Proposal due in Bb by 12:00 p.m. on Wednesday, 10/23
Week 10			
10/28	Geodesign Exercise (#3) Stakeholder Engagement		
10/30	Geodesign Exercise (#4) Negotiations in Geodesign		Exercise #3 due in Bb by 12:00 p.m. on Wednesday, 10/30
Week 11			
11/4	Guest Speaker: The Practice of Geospatial Science	TBD	
11/6	Guest Speaker: The Practice of Design	TBD	Exercise #4 due in Bb by 12:00 p.m. on Wednesday, 11/6
Week 12			
11/11	Los Angeles Perspectives: Cadillac Desert	Reisner (1986)	
11/13	Los Angeles Perspectives: Eden by Design	Hise and Deverell (2000)	
Week 13			
11/18	Designed Ecologies	Saunders (2012)	Report #5 is due in Bb by 12:00 p.m. on Wednesday, 11/18
11/20	Biomimicry: Innovation Inspired by Nature	Benyus (2002)	
Week 14			
11/25	The Walkable City	Speck (2012)	Report #6 is due in Bb by 12:00 p.m. on Wednesday, 11/25
11/27	Field trip to Downtown LA		
Week 15			

	Topic	Readings and Assignments	Deliverables/Due Dates
12/2	Student Story Map Presentations		Story Map Due at Class and Submit to Bb by 12:00 p.m. on Monday, 12/2
12/4	Student Story Map Presentations		
Week 16			
12/13	Final Examination (11 a.m. - 1 p.m.) (Closed Book at our Regular Classroom)		

Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <http://policy.usc.edu/scientific-misconduct>.

Support Systems

Student Counseling Services (SCS) – (213) 740-7711 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention. engemannshc.usc.edu/counseling

National Suicide Prevention Lifeline – 1 (800) 273-8255

Provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week. www.suicidepreventionlifeline.org

Relationship and Sexual Violence Prevention Services (RSVP) – (213) 740-4900 – 24/7 on call

Free and confidential therapy services, workshops, and training for situations related to gender-based harm. engemannshc.usc.edu/rsvp

Sexual Assault Resource Center

For more information about how to get help or help a survivor, rights, reporting options, and additional resources, visit the website: sarc.usc.edu

Office of Equity and Diversity (OED)/Title IX Compliance – (213) 740-5086

Works with faculty, staff, visitors, applicants, and students around issues of protected class.
equity.usc.edu

Bias Assessment Response and Support

Incidents of bias, hate crimes and microaggressions need to be reported allowing for appropriate investigation and response. studentaffairs.usc.edu/bias-assessment-response-support

The Office of Disability Services and Programs

Provides certification for students with disabilities and helps arrange relevant accommodations.
dsp.usc.edu

Student Support and Advocacy – (213) 821-4710

Assists students and families in resolving complex issues adversely affecting their success as a student EX: personal, financial, and academic. studentaffairs.usc.edu/ssa

Diversity at USC

Information on events, programs and training, the Diversity Task Force (including representatives for each school), chronology, participation, and various resources for students.
diversity.usc.edu

USC Emergency Information

Provides safety and other updates, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible. emergency.usc.edu

USC Department of Public Safety – UPC: (213) 740-4321 – HSC: (323) 442-1000 – 24-hour emergency or to report a crime.

Provides overall safety to USC community. dps.usc.edu

Academic Accommodations

Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP and it should be delivered to me early in the semester. DSP is located in STU 301 and is open from 8:30am to 5:00pm, Monday through Friday (213-740-0776; study@usc.edu).
