In-Memory DBMS for Real Time Analytics

Instructor: Richard W. Vawter
Office: OHE 530B
E-Mail: vawter@usc.edu
Phone: (213) 740-9541

Office Hours: M/W 10:00 - 11:50 am
1:00 - 1:50 pm (except on 1st Wed. of each month)
T/Th. 11:00 - 11:50 am

Class Web Page: https://blackboard.usc.edu/

ITP 489, Spring 2020
Location: KAP 107
Tu/Th. 2:00-3:50 p.m.

Course Description:
Multi-core processors and the availability of large amounts of main memory at low costs have made in-memory database management possible, enabling enterprises to collect and analyze vast amounts of data in real time. This course is designed to provide the student with a thorough understanding of the architecture and capabilities of in-memory database applications. Case studies on how businesses in various industries use data analytics for strategic decision making will be discussed and assignments will enable students to analyze large data sets to support their own strategic decisions.

Objectives:
At the completion of the course, students will be able to…

• Explain how various industries can use analytics to make strategic decisions
• Describe the architecture of in-memory database management systems
• Model and prepare an in-memory system for data population
• Graphically represent the data using dashboards
• Identify which analytic models are most appropriate for a particular data set
• Use various tools such as SAP Predictive Analysis and SAS to analyze data
• Make strategic business decisions based upon analytic results

Suggested Textbooks:
• SAP Hana Essentials, by Jeffrey Word, , ebook version: https://www.amazon.com/SAP-HANA-Essentials-Jeffrey-Word-ebook/dp/B0089N7BHK

| Week 1. Jan. 14 | Course Overview  
Jan. 16 | Discuss the Syllabus  
Data Analytics Simulation: Strategic Decision Making | --  
In class simulation of using data analytics to aid in making strategic business decisions. |
| Week 2. Jan. 21 | Standard DBMS Systems  
Jan. 23 | Discuss the Analytics Simulation  
Overview of standard DBMS Systems | Plattner: Introduction & Ch.1  
Word: Ch. 1 Class notes  
Assignment #1 – Overview of RDBMS, due next Tuesday before class. |
| Week 3. Jan. 28 | In-Memory DBMS Systems  
Jan. 30 | Overview of In-Memory Database Mgmt Systems and their Architecture  
Discuss Case 1 | Plattner: Ch.4.1 – Ch.4.4  
Berg: Ch. 5.6  
Word: Ch. 2  
Assignment #2 – Overview of In-Memory DBMS, due next Tuesday, before class  
Case 1 - Business Analytics in Health-care, due Thurs. before class |
| Week 4. Feb. 4 | Reporting & Basic Analytics  
Feb. 6 | Intro to Reporting and Analytics - Lumira  
Using the HANA Explorer for initial data analysis | Assignment #3 – Intro to Reporting, due next Monday, before 5:00 pm |
| Week 5. Feb. 11 | Data Provisioning  
Feb. 13 | Importing and preparing data for reporting and analysis  
Discuss Case 2 | Assignment #4 – Data Provisioning, due next Tuesday before class |
| Week 6. Feb. 18 | Data Modeling  
Feb. 20 | Data Structures & the Modeling Process  
Attribute & Analytic Views | Assignment #5 – The Data Modeler I, due next Tuesday before class |
| Week 8. Mar. 3 | Data Modeling (continued)  
Mar. 5 | Views incorporating hierarchy and calculations | Assignment #6 – The Data Modeler II, due next Tuesday before class  
Fall Break - no class |

Class Schedule:  
*Note: While the subject matter may change, dates of the exams will not!*

</table>
Lab Assignments:
- Assignments will be available via the “Assignments” section of the class web site.
- You are to turn in only the “Answer sheet” and “Summary” portion of the project write-up as one document.
- It is your responsibility to turn in the lab assignments by the deadlines indicated above (or otherwise stated) and verify that your assignment is available in the class “assignment box”.
  - If you can’t see or open your document, then neither can the grader!
- Answers to the assignments will be posted on the class web page immediately after the due date of the assignments for your review.

Late Assignments
- The “Assignments” section of the class web site “closes” after the due date and time.
  - You will no longer be able to submit your assignment and your assignment will be considered late!
- No late assignments will be accepted for credit. No excuses! So, please turn in your assignments at the beginning of lecture on the dates indicated above!

Handling Assignment Questions (in order of steps to be taken)
1. Re-read the instructions carefully.
2. Review the “Discussion Board” section of the class web site’s forum for other students’ questions and comments or post a question yourself to begin the forum.
3. And, of course, you are always welcome and encouraged to stop by my office during my office hours or to contact me and arrange for an appointment.

Please note: I do not address “assignment problems” via e-mail. I am happy to discuss the problems with you in person, and guide you to solving them yourself during my office hours; but my e-mail address is not to be used as a simple “help desk”.

Case Studies
- Three case studies will be assigned during the semester. These are simply studies of business experiences similar to the topics being discussed in class.
- Students are to read over the cases and type up a one-page analysis, double-spaced, explanation of the business situation, concerns, and possible suggested actions to take.
- Case studies are to be submitted by the beginning of the lecture on the dates indicated on the syllabus via the “Assignments” section of the class website (just as you do for submitting your Assignments).
- Again, No late case studies will be accepted for credit.

Final Project:
- The final project will require that the student take all that he/she has learned during the semester through the readings, case studies, and assignments, and apply it to a real-world company case. At minimum, the student will import data into an in-memory database system, model that data appropriately, and perform routine analytics. The student’s recommendations presented in the conclusion of the final project must be supported by their analysis of the business data.
- No late final projects will be accepted for credit.
Examinations: Exams cover material from the reading assignments, lectures, and assignments. There will be two parts: ① a closed book / closed notes exam and ② a lab portion following the closed book / closed notes exam. The questions will be of the form: multiple choice, short answer, and short problem solving. The exams will include material presented up to the date of the exam. The “Final” exam will be comprehensive and cover material presented throughout the semester, though emphasis will be placed upon the latter part of the course.

- Exam 1: Tues. Feb. 11 2:00-3:50 p.m. KAP 107
- Exam 2: Tues. Mar. 17 2:00-3:50 p.m. KAP 107
- Final Exam: Thurs. May. 7 2:00-4:00 p.m. KAP 107

Note: No make-up exams will be offered nor will there be any changes made to the Final Exam schedule as established by the University.

Grading: Grading will be on a straight scale (as opposed to a class curve/average).

<table>
<thead>
<tr>
<th>Percentage Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>94% and above</td>
<td>A</td>
</tr>
<tr>
<td>90% - 94% (not including 94%)</td>
<td>A-</td>
</tr>
<tr>
<td>87% - 90% (not including 90%)</td>
<td>B+</td>
</tr>
<tr>
<td>83% - 87% (not including 87%)</td>
<td>B</td>
</tr>
<tr>
<td>80% - 83% (not including 83%)</td>
<td>B-</td>
</tr>
<tr>
<td>77% - 80% (not including 80%)</td>
<td>C+</td>
</tr>
<tr>
<td>etc.</td>
<td></td>
</tr>
</tbody>
</table>

Final grades will be based strictly upon the total percentage earned. No exceptions! Nor, will any extra credit assignments will be offered.

Grades will be calculated by weighing the following work as described here:

- Average of Lab Assignment scores: 25%
- Case Study Write-Ups: 5%
- Exam #1: 10%
- Exam #2: 15%
- Cortex Sim Game: 5%
- Final Project: 15%
- Final Exam: 25%

100%

Students with Disabilities: Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to me (or to your lab assistant) as early in the semester as possible. DSP is located in GFS 120 and is open 8:30 a.m. - 5:00 p.m., Monday through Friday. The phone number for DSP is (213) 740-0776.
Student Conduct:

Excerpt taken from SCampus Student Guidebook:

The use of unauthorized material, communication with fellow students during an examination, attempting to benefit from the work of another student, and similar behavior that defeats the intent of an examination or other class work is unacceptable to the University. It is often difficult to distinguish between a culpable act and inadvertent behavior resulting from the nervous tension accompanying examinations. When the professor determines that a violation has occurred, appropriate action, as determined by the instructor, will be taken.

Although I encourage working together, all work claimed as yours must in fact be of your own effort. Students who plagiarize the work of other students or provide material for another student to copy, will receive zero points and will immediately be referred to the Student Judicial Affairs and Community Standards (SJACS) board for further action. If SJACS determines the student violated the ethics codes, the student will receive an F in the course as suggested by the University. This is non-negotiable!!

The School of Engineering adheres to the University's policies and procedures governing academic integrity as described in SCampus. Students are expected to be aware of and to observe the academic integrity standards described in SCampus, and to expect those standards to be enforced in this course.

All students must read, understand, and abide by the University Student Conduct Code listed in SCampus, and available at: http://www.usc.edu/student-affairs/SJACS/nonacademicreview.html

Additional excerpts taken from SCampus Student Guidebook, 2012-13:

§11.00 Behavior Violating University Standards and Appropriate Sanctions

“…individual work will be submitted [by the student], and [it’s the student’s] obligation both to protect one’s own academic work from misuse by others as well as to avoid using another’s work as one’s own.”

§11.11 Plagiarism (Definition)

“The submission of material authored by another person but represented as the student’s own work, whether that material is paraphrased or copied in verbatim or near verbatim form.”

§11.14 Plagiarism (Definition continued)

“Obtaining for oneself or providing for another person a solution to homework, a project or other assignments, or a copy of an exam or exam key without the knowledge and expressed consent of the instructor.”

Any violation will be immediately reported to the Office of Student Judicial Affairs and Community Standards. The alleged violation will then be reviewed by the board. If the student is determined to be responsible for the violation, appropriate disciplinary action will be determined and then implemented by the University.
