Chemistry 516: Synthesis, Reactivity and Mechaism in Inorganic and Organometallic Chemistry 4 units

Prof. Megan Fieser Fall 2020 (Lecture = 9:00-9:50 MWF, Online)

CHEM 516 is a graduate level course in Organometallic Chemistry. The intent of this course is to provide you with tools, generalizations and trends that allow you to better understand the literature and your research. At the end of this course you should be able to use these principles to predict synthesis, structure and stability/reactivity of transition metal organometallic compounds. Additionally, you will be able to read, follow and propose catalytic cycles. If there is time, we will also cover tools to analyze organometallic reactions (both catalytic and stoichiometric).

Required Texts:	Hartwig, Organotransition Metal Chemistry: From Bonding to Catalysis	
Supplemental Texts:	Crabtree, The Organometallic Chemistry of the Transition Metals (6 th ed.) (optional)

Academic Conduct:

Plagiarism – presenting someone else's ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Part B, Section 11, "Behavior Violating University Standards" <u>https://policy.usc.edu/scampus-part-b/</u>. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <u>http://policy.usc.edu/scientific-misconduct</u>.

Learning Experience Evaluations will be conducted on date TBA This will be your opportunity to provide feedback about your learning experience in the class. This feedback helps the instructor determine whether students are having the intended learning experiences for the class. It is important to remember that the learning process is collaborative and requires significant effort from the instructor, individual students, and the class as a whole. Students should provide a thoughtful assessment of their experience, as well as of their own effort, with comments focused on specific aspects of instruction or the course. Comments on personal characteristics of the instructor are not appropriate and will not be considered. For this feedback to be as comprehensive as possible, all students should complete the evaluation.
