# Sculpture 2

Spring 2020

4 Units Prerequisite: ART 140  
Instructor: Ruben Ochoa  
T/Th 12-2:40 pm

This studio course is an interdisciplinary approach to sculpture. Led by class lectures, readings, and critiques, students will work in materials familiar to them from Sculpture 1, but also understand how objects have the potential to engage beyond volumetric space, architecture and begin to encompass site. The class also focuses on advanced construction skills: introduction to welding, advanced woodwork- ing demos, and mold-making. This course is based around the production of objects and class critiques.
