SSCI 576, Remote Sensing Applications and Emerging Technologies

Syllabus

Units: 4

Term — Day — Time: Fall, 2020 - Online

Location: Online
Instructor: Andrew J. Marx, Ph.D.
Office: Remote
Office Hours: Tuesday and Thursday 1-2 pm PT via Zoom – please contact me in advance to ensure I will be online. Also available most days and times by appointment via email.
Contact Info: marxa@usc.edu, https://usc.zoom.us/j/2023004000

Library Help: Andy Rutkowski
Office: VKC 36B
Office Hours: Tue 10 am-12 pm and Thu 4:30-5:30 pm PT
Contact Info: arutkows@usc.edu, 213-740-6390

IT Help: Richard Tsung
Office: AHF 145D
Office Hours: By appointment
Contact Info: spatial_support@usc.edu, 213-821-4415
Course Scope and Purpose
This course is a required course for the Spatial Data Collection and Integration Graduate Certificate and an elective course for the Geographic Information Science & Technology (GIST), Geospatial Intelligence, and Geospatial Leadership Graduate Certificates as well as the GIST M.S. degree programs. This course explores some of the ways in which remote sensing systems provide geospatial information that is relevant, accurate, timely, accessible, available in an appropriate format, and cost-effective. Recent developments in Earth observation such as imaging radar, LiDAR, hyperspectral sensors, SmallSats, and UASs are increasing the wealth of information that can be generated from remotely sensed data sources. As a consequence, numerous new GIS applications that rely on advanced remotely sensed data sources have emerged at local, regional and global scales.

This a graduate level course, so you should expect this class to be both academically robust and intellectually challenging. As graduate students you are expected to engage with the information you are learning and to explore the heady cauldron of ideas, opinion, and analysis that describe our collective effort to thoroughly interrogate the subject at hand. Learning arises from active engagement with the knowledge found in our reading materials and with one another. As in any graduate-level class, the instructor’s role is that of a guide who keeps you on this path of discovery and you will find that you will learn much from your fellow classmates. The challenge for us is to replicate such an academic experience within the milieu of “online learning”.

All course materials will be organized through Blackboard. The main theoretical concepts will be provided through course notes and assigned readings. Hands-on practical exercises will use various software products accessible over the Internet. Assignments will give students an opportunity to internalize and apply the concepts and theory learned from readings. Some assignments require student interaction, all will benefit from it.

Learning Objectives
When you have completed this course, you will be able to:

• Explain the principles of remote sensing and the technical characteristics and constraints of Earth Observation missions.
• Generate geographical information by processing digital remotely sensed data and critically evaluate its use for human security and/or environmental applications.
• Specify and critically evaluate some of the opportunities and available methods for integrating remote sensing and GIS.

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for
coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

**Prerequisite(s): None  Co-Requsite(s): None  Concurrent Enrollment: None  Recommended Preparation:** SSCI 581: Concepts for Spatial Thinking

**Technological Proficiency and Hardware/Software Required**

We have several technologies that will facilitate our course work and our interactions, despite our dispersed locations. These include:

Blackboard – All course materials and correspondence will be posted on the course Blackboard site. As a registered student, you will find this course will show up in your available classes no later than 12:00 noon, PST on the first day of classes. It is here that the day-to-day flow of the course will be recorded.

**Discussion boards** – On the Blackboard site, we will post a number of discussion threads related to various course topics. These threads are very important in terms of providing support to each other while working on class exercises to share hints and helpful tips, as you would do in a classroom setting. I will check the discussion threads periodically and offer occasional comments. Please send your course instructor an email directly if you have a question or concern that requires my immediate attention.

**Live meetings and presentations** – We will use a browser-based service called Zoom to create synchronous, interactive sessions. With voice and webcam capabilities, Zoom can be used to share presentations and even our desktops between two or more people.

**Individual meetings** – We generally use Zoom for individual meetings.

**SSI server and tech support** – This course will utilize the SSI Servers to provide you with your own virtual desktop. If you are unable to connect to the server or experience any type of technical issues, send an email to SSI Tech Support at spatial_support@usc.edu and make sure to copy (cc) me on the email. SSI Tech Support is available Monday through Friday, 9:00 a.m. to 5:00 p.m. PST. A variety of geospatial software platforms (ArcGIS, e-Cognition, Idrisi, etc.) are provided online via the SSI Server; hence, you do not need to install it on your own computer.

**Technical Requirements** - Every student must satisfy the following technology requirements: (1) a computer with a fast Internet connection; (2) a functional webcam
and a microphone for use whenever a presentation or meeting is scheduled; and (3) a modern web browser.

**Required Readings and Supplementary Materials**

**Textbooks** – There are three required texts for this course. The first book by Campbell can be purchased from the USC Bookstore or online outlets such as Amazon. The second and third books by Esri Press can be purchased from online outlets such as Amazon or accessed via VitalSource.com.

These textbooks will be supplemented with Course Notes and a mixture of readings from academic journals, professional reports, and authoritative websites.

**Readings** – The following book chapters and journal articles will be posted to Blackboard under Course Documents (additional articles will be added as the semester progresses):

Description and Assessment of Assignments

Your grade in this course will be determined based on several different assessment tools:

• Resume Assignment (2%) – We require all current students to post and maintain a public resume, short biography and recent photo on our shared GIST Student Community Blackboard site. With your permission, your photo and resume will be posted to the Spatial Sciences Institute website and your resume will be included in the GIST Resume Book. The latter is compiled annually and along with our web
presence used to promote our programs and more importantly, your skills, experience, and professional aspirations.

- Reading Assignments (21%) – Each student is required to complete all reading assignments for this class. The reading assignments will focus on the theory portion of the course as presented in the weekly readings. The objective of the reading is to help you evaluate and integrate the information you have acquired from the course readings. Some of these will involve discussions and collaborative work and some will be individual efforts.

- Exercises (36%) – These will be scheduled throughout the semester and will require you to work through various individual exercises during the weeks they are assigned. To demonstrate that you have completed all parts of the exercises, you will have specific deliverables which you will turn in as a digital output or brief text response.

- Presentation (11%) – This assignment will require some independent thought and synthesis and allow you to explore a case study of your choice. The results will be presented via Zoom during the final exam period of the course via PowerPoint.

- Research Reports (30%) – The first report (10 points) will provide you with an opportunity to describe the data capture options and challenges for a project of your choice from a list of projects spanning a variety of domains. The second report (20 points) will build on the data capture part of the course by providing students an opportunity to integrate all that they have learned in the semester by executing a specific remote sensing chain of analysis with professional deliverable.

### Grading Breakdown

Careful planning and a serious, consistent commitment will be required for you to successfully navigate the various deliverables in this and other GIST courses. The table below summarizes the SSCI 576 course assignments and their point distribution:

<table>
<thead>
<tr>
<th>Assignments</th>
<th>Number</th>
<th>Points Per Assignment</th>
<th>Total Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weekly Assignments</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Exercises</td>
<td>9</td>
<td>4</td>
<td>36</td>
</tr>
<tr>
<td>Reading/Forum Assignments</td>
<td>7</td>
<td>3</td>
<td>21</td>
</tr>
<tr>
<td>Resume Assignment</td>
<td>1</td>
<td>2</td>
<td>2</td>
</tr>
<tr>
<td>Project Components</td>
<td></td>

<td>10</td>
<td>11</td>
</tr>
<tr>
<td><strong>Totals</strong></td>
<td><strong>19</strong></td>
<td><strong>-</strong></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>
It is important to note from the outset that: (1) you are expected to complete and upload all assignments before the deadlines detailed on Blackboard; (2) late postings and assignments will be docked one grade and no grade will be given for postings or assignments turned in more than one week late; and (3) no written work will be accepted for grading after 5:00 p.m. PT on the last day of classes. Any exceptions to these turn-in assignments are only made by me in coordination with individual students. An example of an exception would be a student’s illness or injury that reasonably prohibits course involvement/participation.

**Assignment Submission Policy**

Assignments will be submitted for grading via Blackboard using the due dates specified in the Course Schedule below.

**Additional Policies**

**Communications** – This is a distance learning course, so most of our interactions will be asynchronous (not at the same time). All materials to be handed in will be submitted via the Blackboard Assessment link. I will also create multiple Blackboard discussion forums throughout the semester that we will use for the aforementioned assignments and so we can discuss issues and comments on the course assignments, exercises and projects as the need arises.

In addition, I will send via e-mail through Blackboard any notices that are time sensitive. Please be sure that you read as soon as possible all e-mail sent from Blackboard or from me. Check now to make sure that mail sent from both the USC blackboard accounts and my private domain does not go into your junk mail!

While I am usually online and will probably respond to e-mails from students relatively quickly, I will endeavor to respond to all e-mail within 24 hours of receipt, aiming for no more than 48 hours delay. In the rare case when I expect to be offline for more than 60 hours, I will post an announcement on the Blackboard site.

That said, it is each student’s responsibility to stay informed about what is going on in our course. In addition to e-mail about time-sensitive topics, any important announcements will be posted on the Announcement page in Blackboard. Be sure to check these each time you log onto Blackboard.

**Workload** – This is a four credit, one semester course. Students should expect to spend 12-15 hours per week completing the work in this course.
## Course Schedule: A Weekly Breakdown

<table>
<thead>
<tr>
<th>Week 1 8/24</th>
<th>Topic</th>
<th>Readings and Assignments</th>
<th>Deliverables</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Discovering Imagery, Part I:</strong></td>
<td>Discovering Imagery, Part I: Introduction to Imagery and Thinking About the Possibilities.</td>
<td>Campbell 1, 2; Green 1, 2; Selected Readings</td>

<th>Week 7 10/5</th>
<th>Topic</th>
<th>Readings and Assignments</th>
<th>Deliverables</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LIDAR:</strong></td>
<td>LIDAR: Processing LIDAR Image Data; Digital Elevation Models</td>
<td>Campbell 8; Green 8</td>
<td>Exercise 6</td>
</tr>
<tr>
<td><strong>Hyperspectral and Advanced LIDAR:</strong></td>
<td>Hyperspectral and Advanced LIDAR: Spectral Libraries; Slope and Aspect</td>
<td>Campbell 15; Selected Readings</td>
<td>Reading Assignment 4; Exercise 7</td>
</tr>
</tbody>
</table>

*9/8*; 9/7 is a university holiday

*10/15-10/16 is a university holiday
| Week 9 10/19 | **Point Clouds:** Unmanned Aerial Systems (drones); 3D Object Classification | Selected Readings | Exercise 8 |
| Week 10 10/26 | **SpatioTemporal Data:** High-Cadence Earth Observatories (SmallSats); Time-Series and On-the-Fly Analysis | Campbell 16; Selected Readings | Reading Assignment 5; Exercise 9 |

### Module 4: Emerging Applications in Remote Sensing

| Week 11 11/2 | **Applications – Part I:** Plant Sciences; Ecological Forecasting; Agriculture and Food Security | Campbell 17 | Report 1 |
| Week 12 11/9 | **Applications – Part II:** Earth Sciences; Energy | Campbell 18 | Reading Assignment 6 |
| Week 13 11/16 | **Applications – Part III and IV:** Hydrospheric Sciences; Water Resources and Atmospheric Sciences; Land Use and Land Cover | Campbell 19, 20 | Reading Assignment 7 |
| Week 14 11/24* 11/25 - 11/27 is a university holiday | **Applications – Part V:** Global Remote Sensing; Disasters | Campbell 21 | Report 2 |
| Exam Week 12/2 – 12/9 | **Final Course Project Presentation** | None | Final Project Presentation |
Statement on Academic Conduct and Support Systems

Academic Conduct
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct.

Support Systems

Counseling and Mental Health— (213) 740-9355 – 24/7 on call engemannshc.usc.edu/counseling
Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

National Suicide Prevention Lifeline – 1 (800) 273-8255 – 24/7 on call www.suicidepreventionlifeline.org
Free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week.

Relationship and Sexual Violence Prevention Services (RSVP) – (213) 740-9355(WELL), press “0” after hours – 24/7 on call studenthealth.usc.edu/sexual-assault
Free and confidential therapy services, workshops, and training for situations related to gender-based harm.

Office of Equity and Diversity (OED) – (213) 740-5086 | Title IX Compliance – (213) 821-8298 equity.usc.edu, titleix.usc.edu
Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

Reporting Incidents of Bias or Harassment— (213) 740-5086 or (213) 821-8298 usc-advocate.symplicity.com/care_report
Avenue to report incidents of bias, hate crimes, and microaggressions to the Office of Equity and Diversity | Title IX for appropriate investigation, supportive measures, and response.

The Office of Disability Services and Programs – (213) 740-0776
dsp.usc.edu
Support and accommodations for students with disabilities. Services include assistance in providing readers/notetakers/interpreters, special accommodations for test taking needs, assistance with architectural barriers, assistive technology, and support for individual needs.
USC Campus Support and Intervention – (213) 821-4710
uscsa.usc.edu
Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity at USC – (213) 740-2101
diversity.usc.edu
Information on events, programs and training, the Provost’s Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call
dps.usc.edu, emergency.usc.edu
Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety – UPC: (213) 740-6000, HSC: (323) 442-120 – 24/7 on call
dps.usc.edu
Non-emergency assistance or information.

Resources for Online Students
The Course Blackboard page and the GIST Community Blackboard page have many resources available for distance students enrolled in our graduate programs. In addition, all registered students can access electronic library resources through the link https://libraries.usc.edu/. Also, the USC Libraries have many important resources available for distance students through the link: https://libraries.usc.edu/faculty-students/distance-learners. These include instructional videos, remote access to university resources, and other key contact information for distance students.
