

In a Word

Time: T/TH: 2:00-3:20

Location: On-line

Instructor: Hajime Hoji
Office hours: By appointment
(hoji@usc.edu)

Teaching Assistants:

Jun Lyu
(junlyu@usc.edu)
(Monday 12:00-1:20 and Friday 10:00-11:20)
Office hours: By appointment

Charlie O'Hara
(charleso@usc.edu)
(Monday 8:30-9:50 and 10-11:20)
Office hours: By appointment

The members of the human species are able to produce and comprehend the language to which they are exposed once they have reached a certain maturational stage, barring any serious impairment. One of the most fundamental working hypotheses adopted in the research program initiated by Noam Chomsky over half a century ago is that underlying this ability of ours is what is called the *language faculty*. Chomsky has maintained that we should approach the *language faculty* just as natural scientists approach their subject matters.

The specific goal of this course is two-fold. On the one hand, it aims to introduce systematic aspects of language, with regard to how words are formed, how sounds are put together to form a word, how words are combined to form a larger expression, such as a sentence, and how some aspects of the "meanings" are computed, among other issues. The other aim of the course is to introduce to the students, building on the discussion and activities pertaining to the first goal, how the *language faculty* can be studied *scientifically*.

The latter aim is directly related to how we understand the term "scientifically." We can understand the term as more or less equivalent to "systematically," in the sense of making observations, coming up with a generalization based on the observations, testing the validity of the generalization against additional observations, and stating the generalization in terms of certain concepts and relations. The activities in the first three parts of the course are intended to be *scientific* in this sense.

One can also understand the sense of *scientifically* in a somewhat different way, by focusing on what hypotheses lead to what predictions, and how the predictions can be tested experimentally. As noted above, it is hypothesized by Chomsky and others that all members of the human species, barring any serious impairment, share the core properties of the *language faculty*. Every adult speaker of a human language then must *share* crucial properties of the *language faculty*. One can therefore ask: What kind of *hypotheses* can we put forth about properties of the *language faculty*? What kind of *predictions* do we make based on such *hypotheses*? What kind of *experiments* can we conduct to test our *predictions*? How should we interpret the result of our experiment?

During the course of the semester, you will be asked to participate in on-line experiments. The participation is meant to provide some preliminaries for understanding our answers to the above-mentioned questions, in relation to your own *language faculty*. To help you understand the nature of our experiment, we discuss a couple of things that do not seem to be related to our experiment: (i) the viewing of a 3-D image out of a (random-dot) stereogram and (ii) the detection of the gravitational waves. You will learn, to your surprise, that it is possible to study the *language faculty* in a way very close to physics.

The lectures, the Lab activities, assignments, etc. are all meant to help you understand what is intended by the preceding remarks. As a concrete "measuring stick" for your understanding, Chomsky's essay "[The Galilean Challenge](#)" is included in the readings. At the beginning of the semester, you will most likely have only a very vague understanding of the content of the essay. But your understanding will improve as the semester goes by. By the end of the semester, you should have a fairly good understanding of the main point(s) of the essay and more.

The course is designed to help you:

- Gain a *scientific* understanding of human language as a system of complex mental computation.
- Appreciate how much you know, tacitly and unconsciously, as a native speaker of a human language.
- Understand the universal aspects of what underlies our ability to relate linguistic sounds/signs to meaning.

As a most important general point of the course, I would like to emphasize the importance of rational/scientific reasoning, which is of critical importance in order for an individual to live a life that they feel is meaningful, worthwhile, etc., and for an individual to contribute to the survival and the advancement of the human species, especially under what we are currently facing globally.

*Course materials, assignments, and other content, including the due dates for some of the assignments, if not mentioned on the syllabus, will be posted on Blackboard. **It is your responsibility to check Blackboard regularly. You must make sure to receive email notification from Blackboard.***

Lectures and TA Sections

All lectures and TA sections will be conducted by Zoom, and they will be recorded and will be made available at Blackboard.

Readings

Reading assignments for each week are listed in the schedule given below. The relevant reading materials will be available in advance on Blackboard (Content>Readings).

Course requirements and Grades

- Four Tests. Tests 1 and 4 each count 18 points for the course grade. Tests 2 and 3 each count 16 points for the course grade. Total: 68 points.
- Four Assignments. These assignments correspond to the four Tests and they serve a review purpose for each Test. Each assignment counts 4 points for the course grade. *The assignments are due 11am on the day of the Review Session (9/10, 9/29, 10/15, 11/12) for each Test.* You must submit your answers at Bb by the deadline. *Having written down the answers elsewhere by the deadline will not earn you points for the assignment. The scores for each assignment will be visible shortly after the review session.* Total: 16 points.
- You will be required to participate twice in the on-line Experiments. The FULL participation each time will count 4 points for the course grade. If you do not follow the instructions fully, regarding the experiment-registration and when *not to* participate in the on-line experiments, you will not get the full points. (You *should not participate in the on-line experiments during the time period of the lecture or the lab session* unless otherwise instructed. *Participating in the on-line experiments during the time period for the lecture or the lab session may result in getting no points for the Experiment-Participation.*) The first Experiment-participation assignment is due 11:59 pm on 9/12; the second Experiment-participation assignment is due 11:59 pm on 10/17. *When you register for the Experiments, make sure to use your name as it appears at Blackboard (i.e., your name that appears at the top-right corner of your screen).* Total: 8 points.
- Four Mini Homework (Mini HW), each of which counts for 1.5 points for the course grade. They are due at 11:59pm on: Mini HW1: 9/24; Mini HW2: 10/11; Mini HW3: 10/13; Mini HW4; 11/10. Total: 6 points.
- One syllabus-based quiz to test your familiarity with the content of the syllabus. They are due at 11:59pm on 9/11. Total 1 point.
- Two trial tests (one on 9/9 and the other on 11/15) to make sure that we do not encounter technical issues with Tests. Completing each trial test will earn you 0.5 points for the course grade. The details to be announced later. Total 1 point.

$$68+16+8+6+1+1=100$$

- The due dates/time are by the Pacific Standard Time.
- If you are in a different time zone and need to take the Test at a time different from the regular class time, you must let the instructor know 24 hours before the regular start time of the Test.
- For the Assignments, make sure that you press the 'Submit' button when you are ready to submit your answers . If you do not see the page with the 'Submit' button, you must contact your TA immediately. For each Assignment, but not the Experiment-participation assignments, and for the syllabus-based quiz, you will see your score shortly after their due date. If you do not see your score by the end of the following day, and if you think that is an error, you should contact your TA. If you do not receive our reply to your email, assume that your email has not reached us, and you should try to contact us again.
- For Mini assignments, you will see your score at Blackboard once you have entered your answers. If you do not see your score, that means your answers have not been received by the Blackboard.
- If the Blackboard does not receive your answers for an assignment as required, your score will be zero for that assignment.
- There will be a posting at Bb which tells you how to check your Experiment-participation record. You will not be able to do that, however, after the deadline for each Experiment-participation assignment. Make sure to check your participation record before the deadline is over.
- Toward the end of the semester, you will be given the chance to submit to your TA questions you may have about your scores at Blackboard. This will be announced at Blackboard, and you should submit your inquires, if you have any, to your TA by the date specified in that announcement.
- Toward the end of the semester, you will begin to see your interim % score for the course by clicking “All” (instead of “Graded”) at “My Grades.” The information that you see by clicking “All” at “My Grades” *may* contain information from previous semesters. If that happens, you should just check the interim score that is accompanied by the correct information about LING110 this semester.

Course grades will be determined based on the following scale.

- A 94 or higher
 - A- 90 or higher and lower than 94
 - B+ 87 or higher and lower than 90
 - B 84 or higher and lower than 87
 - B- 80 or higher and lower than 84
 - C+ 77 or higher and lower than 80
 - C 74 or higher and lower than 77
 - C- 70 or higher and lower than 74
 - D+ 67 or higher and lower than 70
 - D 64 or higher and lower than 67
 - D- 60 or higher and lower than 64
 - F 59 and below
- C- or higher counts as Pass for Pass/Non Pass.

Important Clarification regarding what you see under Grade Center at Blackboard:

The figure given under "**Possible Points**" for each column at the Grade Center at Blackboard is **not necessarily the same** as the percentage point given above for each task. For example, the percentage points for each Review Assignment is 4 points for the course grade, but you may see a different figure under "**Possible Points**" for the column for a Review Assignment. Suppose that "**Possible**

Points for "Review-HW-1 is 11. This means that the maximum points you can get for the first Review-Assignment is 11, which would translate to 4 points for the course grade. If you get 8 out of 11 in the first Review-Assignment, you will get $4 \times (8/11) = 2.91$ points for the course grade. When you begin to see an interim course grade in the middle of the semester, the figure is based on the points for the course grade, not based on the "actual points" you got in various tasks. You sometimes have to convert the "actual points" to the percentage points for the course grade, as explained above.

Discussion/Lab Sections

Discussion/Lab sections meet weekly at the time specified in your class schedule. They are mostly devoted to various Lab activities that will supplement the lectures. But, the main points of the entire course will be emphasized throughout the semester in the Discussion/Lab sections.

The first Lab section will be on August 21 (Fri) if your Lab meets on Fridays. If your Lab meets on Mondays, your first Lab will be the following Monday.

Homework and Assignments

All of the Assignments, Mini Homework, syllabus-based quiz, and Experiment-Participation must be turned in or completed by the due date/time. All the due dates/time are specified in the syllabus except for two trial tests. **Late assignments are not accepted without a very good reason (e.g. demonstrable illness or a life-changing event).** Your reason for the late submission must be accepted by the instructor as a very good reason.

Important: If you know that you need to turn in or complete your assignment late or if you know you will have to miss a Test, you must talk to the instructor **well ahead of time** and obtain the permission to complete the relevant task (including the taking of a Test) later than the scheduled date/time. **You must have a very good reason for this (e.g. demonstrable illness or a life-changing event).** Your reason for the late submission must be accepted by the instructor as a very good reason.

Your continuing to be registered for the course will be regarded as indicating that you have read this syllabus **carefully** and **have agreed to the policies** stated above regarding grading, make-ups, etc.

Academic Integrity

We expect that all students will uphold the USC Student Conduct Code. Because violations of the code harm every other student in the class, the instructors will aggressively prosecute any student who cheats on a test/quiz or homework/assignment or who allows others to cheat on a test/quiz or homework/assignment.

- Please Note: SCampus 2019-2020 ("Class Notes Policy" under "Academic Policies"): "Notes or recordings made by students based on a university class or lecture may only be made for purposes of individual or group study, or for other usual non-commercial purposes that reasonably arise from the student's membership in the class or attendance at the university. This restriction also applies to any information distributed, disseminated or in any way displayed for use in relationship to the class, whether obtained in class, via email or otherwise on the internet, or via any other medium. Actions in violation of this policy constitute a violation of the Student Conduct Code, and may subject an individual or entity to university discipline and/or legal proceedings."

Students with Disabilities

Students who need to request accommodations based on a disability are **required to register each semester** with the Disability Services and Programs. In addition, a letter of verification to the instructor from Disability Services and Programs is needed. Please make sure that the letter is delivered to me or the TA **as early in the semester as possible**. The phone number for DSP is (213) 740-0776.

Your continuing to be registered for the course will be regarded as indicating that you have read this syllabus **carefully and **have agreed to the policies** stated above regarding grading, make-ups, etc.**

Schedule¹

Week	Date	Lecture and Readings
Week 1	8/18	Course introduction: syllabus and the main points of the course Reading: <i>Introducing Chomsky</i> , pp. 3-19; Chomsky, " The Galilean Challenge "
	8/20	An Introduction to language faculty science Readings: <i>Introducing Chomsky</i> , pp. 3-19; <i>The Language Instinct</i> , pp. 15-24; Chomsky, " The Galilean Challenge "
Week 2	8/25	Film "Colorless Green Ideas" Reading: <i>Introducing Chomsky</i> , pp. 3-19; <i>The Language Instinct</i> , pp. 15-24; Chomsky, " The Galilean Challenge "
	8/27	Morphology (I): Word-internal structure, derivational morphology: <i>unlockable</i> and <i>unhappiness</i> ; Table 4.11 of the reading; the notion of "head"; roots and stems; bound and free morphemes; affixes, suffixes, prefixes. Reading: "Morphology: The Study of Word Structure," ODA Ch. 4, pp. 111-136, 143-146.
Week 3	9/1	Morphology (II): Inflectional morphology: allophones, productivity. Reading: "Morphology: The Study of Word Structure," ODA Ch. 4, pp. 111-136, 143-146.
	9/3	Morphology (III): Compounds: productivity, compounds vs. phrases. Reading: "Morphology: The Study of Word Structure," ODA Ch. 4, pp. 111-136, 143-146.
Week 4	9/8	Morphology (IV): Content words and function words, language acquisition Reading: "Morphology: The Study of Word Structure," ODA Ch. 4, pp. 111-136, 143-146.
	9/10	Review (First Assignment Due: 11am)
	9/12	Deadline for First Experiment-Participation: 11:59pm

¹ I reserve the right to make necessary changes to this schedule. Changes will be announced in class and/or on Blackboard.

Week 5	9/15	Test 1 (18%)
	9/17	[You must come to class with your fingers clean or with something that you can clean your fingers with. You will be asked to put your fingers in your mouth.] The Sound of Words: Phonetics/Phonology I: the six speech organs, phonemes, contrastive sounds, non-contrastive sounds, allophones, minimal pairs, phonemic inventory, voicing, aspiration, oral cavity, pharyngeal cavity Reading: Relevant Linguistics, pp.13-24 and Ch. 3 pp. 37-42 and 46-47."
Week 6	9/22	The Sound of Words: Phonetics/Phonology II: phonological features, place of articulation (bi-labial, labio-dental, interdental, alveolar, palatal, velar), manner of articulation (stops, fricatives, affricates, nasals), voicing, distinct dimensions of vowel articulation (tongue height, frontness, lip roundedness, tenseness) Reading: Relevant Linguistics, pp.13-24 and Ch. 3 pp. 37-42 and 46-47."
	9/24	The Sound of Words: Phonetics/Phonology III: natural class, phonological rule, voicing assimilation, the schwa-insertion, underlying form, surface form, vowel lengthening Reading: Relevant Linguistics, pp.13-24 and Ch. 3 pp. 37-42 and 46-47."
Week 7	9/29	Review (Second Assignment Due: 11 am)
	10/1	Test 2 (16%)
Week 8	10/6	The Meaning of Words (I): Semantic competence and semantic relations Reading: Fromkin et al. (Ch. 7 pp.371-379) (The site will be open for the Second Experiment-Participation.)
	10/8	The Meaning of Words (II): Entailments, Quantifiers and Set Theory Reading: Fromkin et al. (Ch. 7 pp.371-379)
Week 9	10/13	The Meaning of Words (III): Meanings of Pronouns
	10/15	Review (Third Assignment Due: 11 am)
	10/17	Deadline for Second Experiment-Participation: 11:59pm
Week 10	10/20	Test 3 (16%)

	10/22	What is behind the Experiments: Merge and the significance of the sentences of the OSV order. Readings: Chomsky “The Galilean Challenge,” Hoji “Galileo’s Other Challenge” Optional reading: Lasnik 1990, Syntax, pp. 5-17
Week 11 ²	10/27	How to read the result graphs. Readings: Feynman <i>The character of physical law</i> (pp. 150-153), Experimental results.
	10/29	Experimental results: Correlations of judgments Readings: Experimental results.
Week 12	11/3	Sub-Experiments Readings: Feynman <i>The character of physical law</i> (pp. 150-153), Feynman <i>The Pleasure of Finding Things Out</i> (pp. 22-23), Einstein 1967. Foreword, pp. xvii-xix.
	11/5	Predictions and experimental replication in language faculty science, experiments in other languages.
Week 13	11/10	Language faculty science and the brain. The detection of gravitational waves. Optional readings: Hoji “Galileo’s Other Challenge,” Hoji 2015 <i>Language Faculty Science</i> , pp. 313-318.
	11/12	Review (Fourth Non-Lab Assignment Due: 11am)
Week 14	11/17	Test 4 (18%)

Mini HW1-4 (due: 11:59 on 9/24, 10/11, 10/ 13, and 11/10)

Syllabus Quiz (due 11:59 on 9/11)

Trial Tests (on 9/8 and 11/15) (The details to be announced later.)

The due dates/time are by the Pacific Standard Time.
