Core 103—The Process of Change in Science—is a science General Education Course in USC's Thematic Option Honors Program examining critical problems in the development of scientific thought, studied as vehicles for understanding the content and structure of the sciences. Specific subject matter in selected scientific disciplines is presented.

Course Goals of "Human Speech" as a Core 103 offering

- To place human language in the context of cognitive science
- To begin to think about spoken language in a dynamic & ecological context
- To understand how the sounds of the world’s languages are articulated and coordinated
- To have an elementary understanding of the acoustics of speech
- To understand fundamental properties of speech perception
- To become familiar with the acquisition of speech and the forms of its breakdown in various speech and hearing disorders
- To see implications of this knowledge for spoken language technologies

Learning Objectives

- Demonstrate learning related to course goals through question-answer assessment
- Quantify and analyze original data in mini datasets
- Peruse, assess and select original research articles from library journal collections
- Synthesize accurately primary research literature in speech science
- Explain in written and oral form experimental and/or quantitative data and findings related to human spoken language
- Develop a functional understanding of healthy and disordered spoken language that can be drawn on to make informed life decisions.

Book

Other readings will be assigned and posted as downloadable pdfs.
**Work**
- Reading in preparation for class
- Attendance and participation in class and section
- Assigned independent work
- Three exams

**Grades**
- Test 1: 20%
- Test 2: 20%
- Test 3: 20% (not cumulative but in the final exam timeslot May 13 2-4pm)
- Four homeworks: 18% (lowest score dropped; no late assignments accepted)
- Two short papers (a written lab report and a written research synopsis with oral presentation); no late assignments accepted: 22%
- Participation: For course grades that are computed to be 'on the bubble,' engagement and participation (including test bank contributions) may be taken into account in tipping a grade upward or not.

The course will be graded on a curve (applied to final grades). The curve will not however move grades down.

Tests cannot be 'made up' or taken early unless arrangements with the instructor are made in advance and are due to documented unavoidable circumstances (aka an emergency).

Assignments: Some assignments will involve the use of a computer; some will be writing and/or analysis oriented. Assignments will be released at least one week prior to their due date. Assignments are to be turned in beginning of class on the day that they are due or to the instructor’s hand personally ahead of time if absolutely necessary. **Audacity** sound editing software will be used and is downloadable. Phonetics fonts are available from the **International Phonetic Association**; they are not however required.

Late assignments are not accepted. Note, however, the lowest (of 4) homework scores will be dropped. (Both of the short papers will however be counted.)
All assignments are to be done **independently**, not in teams, not with partners, not in collaboration. Copying or collaborating on homework assignments (or exams) will be considered a violation of Academic Integrity and will be reported to the Office of Student Judicial Affairs and Community Standards and cause sanctions (SCampus Appendix A) to be imposed.

Go to => Detailed Course Schedule with Readings and Assignments by Week

**Topic Outline**

| Week 1 (Jan 14, 16) | Introduction and Course Overview  
The Speech Chain; Vocal Tract Anatomy  
English Sounds  
Transcription  
Speech Acoustics: Waveforms  
Week 2 | Speech Acoustics: Source Filter Theory  
Formants and Vowels  
Week 3 | Spectrograms; Sounds of the World’s Languages: Consonants  
Sounds of the World’s Languages: Airstream Mechanism  
Week 4 | Sounds of the World’s Languages: Phonation Type & Tone  
Dialects of English  
Week 5 | Test 1 (material weeks 1-5)  
Qualities of the Speech Signal: Lack of Invariance & Lack of Segmentability  
Week 6 | Sine Wave Speech, McGurk Effect, and Word Segmentation  
Speech Perception: Categorical Perception  
Week 7 | Speech Perception (cont.): Categorical Perception and Infant Language Acquisition  
Duplex Perception and Theories of Speech Perception  
Week 8 | *Guest Lecture*: Babbling & Early Speech  
Test 2 (material weeks 6-9)  
Week 9 | Phonology  
Speech Errors  
Bilingualism  
Cont. and ASL  
Week 10 | Hearing & Deafness  
Hearing Aids and Cochlear Implants  
Week 11 |
Communication and Policy Information

In addition to the utility of Blackboard, it would be useful if we can communicate with each other using email. In this way, you can be advised of changes, and I can be advised of any problems that you encounter. Please know that for this class I will expect you to check your email. In case you are unfamiliar with email, communications should be respectful and grammatical.

Statement on Academic Conduct—"Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct."

I expect that all students will uphold the USC Student Conduct Code. Because violations of the code harm every other student in the class, the instructor will aggressively prosecute any student who cheats on an exam or homework or who allows others to cheat on an exam or homework.

Please also note: SCampus under Academic Policies: “Notes or recordings made by students based on a university class or lecture may only be made for purposes of individual or group study, or for other usual non-commercial purposes that reasonably arise from the student’s membership in the class or attendance at the university. This restriction also applies to any information distributed, disseminated or in any way displayed for use in relationship to the class, whether obtained in class, via email or otherwise on the internet, or via any other medium. Actions in violation of this policy constitute a violation of the Student Conduct Code, and may subject an individual or entity to university discipline and/or legal proceedings.”

Students with Disabilities—“Any student requesting academic accommodations based on a disability is required to register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to the instructor as
early in the semester as possible. DSP is located in STU 301 and is open 8:30 a.m. – 5:00 p.m., Monday through Friday. The phone number for DSP is (213) 740-0776. ” (213) 740-6948 (TDD only), ability@usc.edu.

**Final Exam Notice**—Note that USC requires that: “No deviations from the published examination period are permitted for courses scheduled in a standard session during the fall and spring semesters, unless faculty have authorization in advance from the Committee on Academic Policies and Procedures (CAPP). CAPP will not consider any faculty request for rescheduling a final examination without unanimous written consent of all students in the class… No student is permitted to omit or take early a final examination and no instructor is authorized to permit a student to do so.”

**Learning Experience Evaluations** —“Learning Experience Evaluations will be conducted on [or near] the last day of class. This will be your opportunity to provide feedback about your learning experience in the class. This feedback helps the instructor determine whether students are having the intended learning experiences for the class. It is important to remember that the learning process is collaborative and requires significant effort from the instructor, individual students, and the class as a whole. Students should provide a thoughtful assessment of their experience, as well as of their own effort, with comments focused on specific aspects of instruction or the course. Comments on personal characteristics of the instructor are not appropriate and will not be considered. For this feedback to be as comprehensive as possible, all students should complete the evaluation.”

**Emergency Preparedness/Course Continuity in a Crisis**—Please ensure that you are signed up with TrojanAlerts. “In case of a declared emergency if travel to campus is not feasible, USC executive leadership will announce an electronic way for instructors to teach students in their residence halls or homes using a combination of Blackboard, teleconferencing, and other technologies. See the university’s site on Campus Safety and Emergency Preparedness. ”
