

USC VITERBI SCHOOL OF ENGINEERING – DATA SCIENCE PROGRAM

Data Science 454: Data Visualization and User Interface Design - 4 units

Spring 2021 (32405D) Syllabus

Monday/Wednesday 12:00pm - 1:50pm – ONLINE

Professor Jaime Levy
jaime@jaimelevy.com

This course requires synchronous attendance to all class meetings in order to participate in class discussions, breakout room exercises, your own live presentations with feedback from the professor and students, and so on.

The only exception is for USC seniors worldwide who are required to take this specific course in order to graduate in the Spring of 2021. We will make special arrangements for you so that you take it asynchronously and fulfill the weekly participation requirements.

Catalogue Description

Understand and apply interaction design and data visualization principles and techniques to conceive, design and test responsive websites and dashboards.
