SSCI 574  Spatial Econometrics

Syllabus

Units: 4

Term – Day – Time: Spring 2021, Mondays 12 noon – 1:50 p.m. and Wednesdays 12 noon – 1:50 p.m. Pacific Time

Location: CPA 161 and Online (See the Blackboard course site for the Zoom link)

Instructor: An-Min Wu, PhD
Office: AHF B55B
Office Hours: Tuesdays, 11:30 a.m. – 12:30 p.m. and Thursday, 3 - 4 p.m. Pacific Time via zoom – please contact me via email in advance to ensure I will be online. Also available most days between 9 a.m. – 6 p.m. by appointment via email. A secured zoom meeting link will be sent to you via email when I confirm the appointment date/time.
Contact Info: anminwu@usc.edu

Library Help: Andy Rutkowski
Office: VKC B36B
Office Hours: By appointment
Contact Info: arutkows@usc.edu, 213-740-6390 (office), http://bit.ly/andyhangout

IT Help: Richard Tsung
Office: AHF B57E
Regular Office Hours: By appointment
Contact Info: ctsung@usc.edu
Course Description

This course explores the theoretical foundations, methods, techniques, and software systems for spatial econometrics. The course aims to provide students with the knowledge and skills necessary to investigate socioeconomic problems, with the consideration of the effects of spatial dependence and spatial heterogeneity. Essential concepts of spatial econometrics are presented, including the fundamental spatial concepts, spatial autocorrelation, and the core components of regression and spatial regression models for both cross-sectional and panel data. The latest research in a variety of topics using spatial econometric models is also examined. Students will gain an in-depth understanding and hands-on experience to explore a variety of applications through a combination of lectures, discussions, presentations, and projects. Students will learn about the variety of geospatial data and techniques available for solving socioeconomic challenges and problems.

This course serves as a required course for the Spatial Economics and Data Analysis M.S. Program and an elective course in the Geographic Information Science and Technology M.S. and Graduate Certificate Programs. Anyone wishing to pursue a career in solving social and built environment problems using spatial data analysis should gain an understanding of spatial statistics and spatial regression and therefore will be benefiting from this course. This course will be offered in a hybrid format. Lectures will be streamed for remote access at the beginning of the semester and will be also offered in person when in-person meetings are allowed on campus.

Learning Objectives

When you have completed this course, you will be able to:

- Articulate the key theoretical concepts of spatial econometrics and how spatial concepts can be used to produce new and better inferences in economics
- Describe the roles played by spatial dependence and spatial heterogeneity in solving social and economic problems.
- Analyze cross-sectional data using spatial regression methods in ArcGIS Pro, the GeoDa and R software environments.
- Enhance written and oral communication skills that are essential for today’s workforce.

Prerequisite(s): SSCI 583 or by permission of the instructor
Co-Requisite(s): None

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal
information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours)

Course Structure

This is a four-credit course that meets twice per week. The course will be delivered using multiple methods, including lectures, class presentations, discussion and hands-on practice. Exercises utilize unpublished and published materials using ArcGIS Pro, GeoDa, and R, with a focus in R, and project-based homework assignments allow students to demonstrate their ability to apply spatial statistical and econometric methods in an appropriate, informed manner. Student participation is encouraged through reading discussions, hands-on practices, homework assignments, and class presentations.

This is a graduate-level course, so you should expect this class to be intellectually challenging. As this is a four-credit course, students should expect to spend 10-15 hours per week completing the work in this course. As a graduate student, you are expected to engage with the information you are learning and to explore the ideas, opinion, and analysis that describe our collective effort to thoroughly interrogate the subject at hand. Learning arises from active engagement with the knowledge found in our reading materials and with one another. As in any graduate class, the instructor’s role is that of a guide who keeps you on this path of discovery.

Technological Requirements

The course will be focused on using R as well as ArcGIS Pro and GeoDa for course assignments and hands-on practices in class. Both R and GeoDa are free, open-source software. The hands-on practices in class will be using R and RStudio (an integrated development environment for R), and therefore the installation of the software in your computer (PC or Mac) is preferred. All three of these software platforms can also be accessed via VMWare in the remote SSI Server. For weekly zoom class meetings and online access to SSI Server, every student must have the following:

- A computer with a fast Internet connection.
- A functional webcam and a microphone for use whenever a presentation or meeting is scheduled.

If a student does not have access to any of these, please speak with the instructor at the start of the semester to establish a workaround.

If you are unable to connect to the SSI Server or experience any type of technical issues relating to the server, send an email using your USC account to Tech Support at spatial_support@usc.edu; make sure to copy (c.c.) your instructor on the email. Questions pertaining to specific assignments should be directed to your instructor.

Communications – All course materials and correspondence will be posted on the course Blackboard website. Your quizzes, exam, and assignments will be graded and returned via Blackboard. In addition to email about time-sensitive topics, announcements will be posted on the Blackboard Announcement page. It is each student's responsibility to stay informed as to
course activities and updates. All students are in charge of ensuring that email sent from the USC Blackboard account is not directed to junk mail.

The instructor will endeavor to respond to email within 24 hours of receipt, aiming for no more than a 72-hour delay. An announcement will be posted in the rare instance when an instructor is offline for 72 hours or more.

**Required Readings and Supplementary Materials**

The required textbook for this course is:

Supplementary readings will be assigned from various sources including:

- Harris, Nancy L., Elizabeth Goldman, Christopher Gabris, Jon Nordling, Susan Minnemeyer, Stephen Ansari, Michael Lippmann et al. 2017. Using spatial statistics to

**Description and Assessment of Assignments**

Your grade in this course will be determined based on the basis of several different assessments: 

*Resume Assignment – 2 worth a total of 4 points.* We require all current students to post and maintain a public resume, short biography and recent photo on our shared SSI Student
Community Blackboard site. Please prepare your resume in the SSI template that will be provided to you. Unless you opt out, your resume will be included in the Spatial Sciences Institute Graduate Programs Resume Book. This resume book is compiled annually and, along with our web presence, is used to promote our programs, and more importantly, your skills, experience and professional aspirations.

A second resume assignment is planned toward the end of the course so you can add the skills learned from this course to enhance your resume.

**Lead Class Discussion – 1 worth a total of 10 points.** These will focus on the theory portion of the course as presented in the weekly readings. Each student will be responsible for leading one class discussion on the assigned readings. The objective is to promote the students to evaluate and integrate the information from the course readings and enhance public presentation skills. Each student should plan for a 20-25-minute presentation and leading for class discussion with 2-3 questions from the presentation material following the presentation.

**In-Class Work / Discussion - a total of 8 points.** An in-class engagement grade for the semester will be assigned based upon student engagement for in-class activities. Students unable to join classes synchronously will be able to obtain the grades by joining the online discussion forum in the same week. The activities of in-class engagement can be, but not limited to, one-minute writing, group discussion, or hands-on practices. Failure to participate in in-class engagement activities will receive no grade for that week.

**Quizzes – 5 worth a total of 20 points.** There would be quizzes on the lectures and readings from the previous weeks. The top 5 score would be counted toward the final grade. There is no mid-term exam, so the quizzes are the assessment of how well the students have learned the material during the semester.

**Projects – 4 worth a total of 28 points.** Students will be assigned 4 project-based homework assignments during the course. The assignments include one research plan and four hands-on practices on spatial techniques explored in theory in the texts. The last project is to develop a Story Map with a case study of spatial statistics and spatial econometrics using the methods learned throughout the course. Students will present the last project’s Story Map in the final presentation (see below).

**Final Presentation – 1 worth a total of 10 points.** A final presentation of the project Story Map will be delivered in the final week during the class session.

**Final Exam – 1 worth a total of 20 points.** A comprehensive final exam will be conducted during the final exam week following the university exam schedule.

**Assignment Submission Policy**

Assignments must be submitted via Blackboard by the due dates specified in the Course Schedule below and on the assignment instructions. Unless otherwise noted, all assignments are due by **11:59 pm Pacific Time (PT) on the due dates**. Your attention to on-time assignment submission is essential.

If you are physically located in a different time zones and have difficulty to join the live zoom sessions, please make sure to contact me in advance so I can arrange quizzes asynchronously.

Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are
equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct.

**Support Systems**

*Counseling and Mental Health*– (213) 740-9355 – 24/7 on call
engemannshc.usc.edu/counseling
Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

*National Suicide Prevention Lifeline* – 1 (800) 273-8255 – 24/7 on call
www.suicidepreventionlifeline.org
Free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week.

*Relationship and Sexual Violence Prevention Services (RSVP)* – (213) 740-9355(WELL), press “0” after hours – 24/7 on call
studenthealth.usc.edu/sexual-assault
Free and confidential therapy services, workshops, and training for situations related to gender-based harm.

*Office of Equity and Diversity (OED)* – (213) 740-5086 |*Title IX Compliance* – (213) 821-8298
equity.usc.edu, titleix.usc.edu
Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

*Reporting Incidents of Bias or Harassment*– (213) 740-5086 or (213) 821-8298
usc-advocate.simplicity.com/care_report
Avenue to report incidents of bias, hate crimes, and microaggressions to the Office of Equity and Diversity | Title IX for appropriate investigation, supportive measures, and response.

*The Office of Disability Services and Programs* – (213) 740-0776
dsp.usc.edu
Support and accommodations for students with disabilities. Services include assistance in providing readers/notetakers/interpreters, special accommodations for test taking needs, assistance with architectural barriers, assistive technology, and support for individual needs.

*USC Campus Support and Intervention* – (213) 821-4710
uscsa.usc.edu
Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

*Diversity at USC* – (213) 740-2101
diversity.usc.edu
Information on events, programs and training, the Provost’s Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

**USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call**
dps.usc.edu, emergency.usc.edu
Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

**USC Department of Public Safety – - UPC: (213) 740-6000, HSC: (323) 442-120 – 24/7 on call**
dps.usc.edu
Non-emergency assistance or information.

**Resources for Online Students**

The Course Blackboard page and the GIST Community Blackboard page have many resources available for distance students enrolled in our graduate programs. In addition, all registered students can access electronic library resources through the link https://libraries.usc.edu/. Also, the USC Libraries have many important resources available for distance students through the link: https://libraries.usc.edu/faculty-students/distance-learners. These include instructional videos, remote access to university resources, and other key contact information for distance students.
