DESIGN PROJECT

1. Project Objective

The purpose of the class project is to practice the fundamentals for the design of wastewater treatment plant. A design team that is consisted of 2 students will provide preliminary design services for improvements to the existing wastewater treatment facility. The preliminary design report should describe how the upgraded plant will produce a plant effluent that will meet the regulatory requirements.

2. Project Timeline

- Week 6: Design Project Overview 1
- Week 7: Identifying Team Members
- Week 10: Design Project Overview 2
- Week 11: 60% Preliminary Design Report Due
- Week 13: Design Project Overview 3
- Week 15: 100% Preliminary Design Report Due
