## **Course Description**

This course teaches students how to create dynamic data-driven web applications. Students will learn how to design and implement databases to store website content. The course also covers creating website back-end and connecting it to different database management systems to create live web applications. Students will also explore different tools, libraries, and frameworks used in back-end web development.

## **Learning Objectives**

- Design and implement databases to store website content.
- Create web back-ends to connect with database management systems.
- Integrate third-party APIs into web applications.
- Explore back-end frameworks currently used in the industry.

**Prerequisite(s):** ITP 301 or intermediate knowledge of HTML, CSS, and JavaScript.

## **Technological Proficiency and Hardware/Software Required**

Students should have access to their own computers running either Windows, MacOS, or Linux, and should be familiar with the basic operation of their computers.

## Grading Breakdown

Attendance & Participation	5%

## **Asynchronous Learning**

All lectures will be recorded and made available to students for asynchronous learning. This course can be taken and completed asynchronously.

## **Exams**

No make-up exams will be offered. Failure to submit an exam on time or submitting blank work will result in a 0% for the exam grade.

## **Attendance**

Lecture attendance is mandatory; each student can miss one (1) lecture without losing attendance credit.

Students participating asynchronously may answer a prompt question given during each lecture in order to receive full attendance credit.

## **Late Assignments**

A 10% per day penalty is applied to late assignments. No submissions are accepted after five (5) days beyond the due date. To receive a grade, students must notify the grader once the late assignment is submitted.

## **Late Labs**

No late lab submissions are accepted.

## **Grade Corrections**

Any questions or concerns regarding grades must be addressed within seven (7) days after grades are posted on Blackboard. No changes to any grades will be made after seven (7) days.

## **Academic Integrity**

All coursework is expected to represent each student's individual effort. Students may not collaborate, share, or look at other students' code.

## **Course Material**

All lectures will be recorded and made available to students enrolled in the course. These class recordings are made available only for access by students in this class for educational purposes only and shall not be disclosed to any other party for any purpose.

Students may not reproduce, distribute, or post any course material, including notes, assignments, labs, and tests, without the instructor's written consent. Refer to *SCampus* in Part B, Section 11.12 for more information <https://policy.usc.edu/scampus/>.

## Statement on Academic Conduct and Support Systems

### Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Part B, Section 11, “Behavior Violating University Standards” <https://policy.usc.edu/scampus-part-b/>. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <http://policy.usc.edu/scientific-misconduct>.
