ITP 435 – Professional C++
Units: 4
Fall 2021

Location:
32027 – M/W 4:30-6:20pm in THH 208
32042 – T/Th 2-3:50pm in KAP 160

Remote Attendance:
The general expectation of the University is that students will attend in-person unless they have an approved accommodation, are stuck overseas, or are currently experiencing symptoms and should isolate. Contact VASE (viterbi.studentservices@usc.edu) for any further questions.

Instructors:
Sanjay Madhav (T/Th)
Arash Saifhashemi (M/W)

Office: Online
Office Hours: TBD
Contact Info: All general course/assignments questions should be asked on Piazza (every student will receive an invitation at the start of the semester).
Personal questions and questions from prospective students should be directed via email to madhav@usc.edu or saifhash@usc.edu.

Teaching Assistants: TBD
Office: TBD
Office Hours: TBD
Contact Info: Via Piazza.
Course Description
This course teaches students how to use C++ as a professional developer in industry would. We will explore several different areas and applications where C++ sees significant use. We will learn applications of advanced concepts including lambda expressions, templates, secure coding, parallel programming, writing performant code, CMake, and continuous integration.

Learning Objectives
• Write C++ code for programming assignments in several different real-life applications
• Refine student’s ability to design and write high-quality C++ code
• Learn how to improve the performance of C++ code
• Learn how to apply new programming paradigms (such as functional and data-oriented programming)
• Learn new ways to apply previously-known C++ language constructs
• Learn how the C++ language has evolved in the C++11, 14, and 17 standards, and how to utilize these new features

Prerequisite(s): CSCI 104L or ITP 365

Course Notes
Lecture slides and assignments will all be posted on Blackboard. Course discussions will occur on Piazza. Assignments will be submitted through GitHub.

Technological Proficiency and Hardware/Software Required
Students should have access to their own computer running either Windows, MacOS, or Linux, and should be familiar with the basic operation of their computer.

Required Readings and Supplementary Materials

Additional readings such as excerpts from other books or online articles will be provided on Blackboard.

Description and Assessment of Assignments
There are seven different programming assignments in this course, and students will have approximately two weeks per assignment. Each assignment combines specific C++ skills with an industrial application of C++. Students are expected to complete these programming assignments individually. Each assignment’s instructions include a grading rubric for that assignment.

Here’s an example of what the seven programming assignments have been in prior semesters. They may vary this semester:
1. RLE compression
2. Genetic Algorithms and Functional Programming
3. DNA global sequence alignment
4. Parallelization
5. Virtual Machine
6. Basic Compiler
7. REST server
Exams
There is a midterm and final exam. The final exam is cumulative.

Grading Breakdown

<table>
<thead>
<tr>
<th>Item</th>
<th>% of Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments (8% each)</td>
<td>56</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>22</td>
</tr>
<tr>
<td>Final Exam</td>
<td>22</td>
</tr>
<tr>
<td>Total</td>
<td>100</td>
</tr>
</tbody>
</table>

Grading Scale
Course final grades are determined by the following scale
A      93-100
A-     90-92
B+     87-89
B      83-86
B-     80-82
C+     77-79
C      73-76
C-     70-72
D+     69
D      67-69
D-     66
F      65 and below

Half percentage points will be rounded up to the next whole percentage. So for instance, 89.5% is an A-, but 89.4% is a B+.

Depending on the overall class average at the end of the semester, the above grading scale may be relaxed. Extra credit is generally not offered.

Assignment Submission Policy
Programming assignments must be submitted to student’s GitHub repositories by 11:59PM of the deadline date or will be considered late. Programming assignments that do not compile on the Travis CI continuous integration system will receive a 0. Information about Travis CI is provided in the first week of class.

Grading Timeline
Students will receive grades on programming assignments within one week after the due date.

Late Policy
Programming assignments will be accepted up to three days late, with a 15% deduction per day late. This means an assignment late by one day can receive a grade no higher than 85%, two days no higher than 70%, and three days no higher than 55%.

Extensions are only provided in the event of a documented reason satisfactory to the instructor, such as an illness or family emergency.
Make-up Policy for Exams
To make up for a missed exam, the student must provide a satisfactory reason (as determined by the instructor) along with documentation. Make-up exams are only allowed under extraordinary circumstances.

Grading Issues
Students will have two weeks after graded feedback is given to contest scores (e.g. assignments and exams). After two weeks, scores will not be changed.

Plagiarism and Individual Work Policy
In this class, programming assignments are expected to represent the individual effort of each student. All programming assignment submissions will be compared with current, previous, and future students’ submissions using MOSS, which is a code plagiarism identification program. If your code significantly matches another student’s submission, you will be referred to SJACS with a recommended penalty of an F in the course.

It is okay to discuss solutions to specific problems with other students, but it is not okay to look through another student’s code. It does not matter if this code is online or from a student you know, it is cheating. Do not share your code with anyone else in this or a future section of the course, as allowing someone else to copy your code carries the same penalty as copying the code yourself.

Course Material Policy
Do not reproduce, distribute, or post any lecture material, assignments, assignment solutions, or exams publicly without written consent of the instructor. You may take notes and make copies of course materials for your own use. You may not post course materials on sites like CourseHero. Doing so is a copyright violation and in some cases may also be an academic integrity violation that will be dealt with accordingly.

“Effective” refers to Effective C++ while “Modern” refers to Effective Modern C++. For these texts, the numbers are not page numbers, but rather the item numbers referenced in the table of contents.

Assigned readings in quotes will be available either directly or via link on Blackboard.

*Although these holidays only coincide with one class’ meeting, to be consistent between the two sections we will observe the holidays in both sections.*
Statement on Academic Conduct and Support Systems

Academic Conduct
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” https://policy.usc.edu/scampus-part-b/. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct.

Support Systems
Student Counseling Services (SCS) - (213) 740-7711 – 24/7 on call
Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention. https://engemannshc.usc.edu/counseling/

National Suicide Prevention Lifeline - 1-800-273-8255
Provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week. http://www.suicidepreventionlifeline.org

Relationship and Sexual Violence Prevention Services (RSVP) - (213) 740-4900 - 24/7 on call
Free and confidential therapy services, workshops, and training for situations related to gender-based harm. https://engemannshc.usc.edu/rsvp/

Sexual Assault Resource Center
For more information about how to get help or help a survivor, rights, reporting options, and additional resources, visit the website: http://sarc.usc.edu/

Office of Equity and Diversity (OED)/Title IX Compliance – (213) 740-5086
Works with faculty, staff, visitors, applicants, and students around issues of protected class. https://equity.usc.edu/

Bias Assessment Response and Support
Incidents of bias, hate crimes and microaggressions need to be reported allowing for appropriate investigation and response. https://studentaffairs.usc.edu/bias-assessment-response-support/

The Office of Disability Services and Programs
Provides certification for students with disabilities and helps arrange relevant accommodations. http://dsp.usc.edu

Student Support and Advocacy – (213) 821-4710
Assists students and families in resolving complex issues adversely affecting their success as a student EX: personal, financial, and academic. https://studentaffairs.usc.edu/ssa/

Diversity at USC
Information on events, programs and training, the Diversity Task Force (including representatives for each school), chronology, participation, and various resources for students. https://diversity.usc.edu/

USC Emergency Information
Provides safety and other updates, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible, http://emergency.usc.edu

USC Department of Public Safety – 213-740-4321 (UPC) and 323-442-1000 (HSC) for 24-hour emergency assistance or to report a crime.
Provides overall safety to USC community. http://dps.usc.edu
