

SSCI 214g, Human Populations and Natural Hazards

Syllabus

Units: 4

Term Day Time: Fall 2021

Lecture: Tues/Thurs 2-3:20 pm PT

Discussions: See schedule.

Location: THH 102

Instructor: Laura C Loyola, PhD

Office: B55

Regular Office Hours: Tue 4 am-5 pm; Wed 11 am-12 pm PT. Also available most days and times by appointment via email.

Contact Info: loyola@usc.edu, 213-740-5612

Discussion Co-Instructor: TBD

Office:

Regular Office Hours: TBD

Discussion Co-Instructor: TBD

Office:

Regular Office Hours: TBD

Contact Info:

Library Help: Andy Rutkowski

Office: VKC 36B

Office Hours: Tuesdays 10 a.m.-12 p.m. PT

Contact Info: arutkows@usc.edu

IT Help: Richard Tsung

Office: AHF 145D

Office Hours: By appointment

Contact Info: spatial_support@usc.edu, 213-821-4415

Course Scope and Purpose

Human populations and natural hazards (earthquakes, hurricanes, floods, drought) are increasingly in conflict throughout the world, as witnessed with the effects of rainfall variability on agriculture in semi-arid lands, or the destructive forces of hurricanes on coastal cities. While natural hazards represent ongoing processes and functions of the Earth as a living organism, they can also be human-induced processes or events. Problems arise when people live in regions of the world where hazards exist with the potential to cause loss (i.e., life, injury, property, or other). As the global population approaches eight billion inhabitants, increased competition for land and resources has driven people to live in more remote environments and higher density areas than ever before, resulting in increased human exposure and vulnerability to the risk of environmental hazards. While some individuals or communities are resilient, meaning they possess a high capacity to absorb impacts and recover from a hazardous event, others, such as poor residents living in inner-city slums or rural dwellers located on marginal land, struggle to cope, recover, or rebuild from a disaster.

This course examines the complex and coupled relationship between human development (population growth, urbanization) and environmental hazards by exploring a range of topics, such as: What do hazard, risk, vulnerability, and disaster mean, and how are these terms measured? What do hazards have to do with human values? How is exposure to environmental hazards different in developing and industrialized countries? And, what responsibility does the government have to protect individuals from risk? Students will utilize quantitative and qualitative methods – including geospatial technologies – to gain insight into these questions – where and why hazards occur – and the subsequent impacts disaster events have on the social world (such as mortality, displacement, property damage, or other losses). Students will reflect on how society evaluates and confronts the dangers posed by natural hazards, and how political, economic, and/or cultural settings can serve to attenuate or exacerbate human vulnerability before, during, or after a disaster occurs.

SSCI 214g fulfills the requirements of the USC General Education program, Social Analysis (Category C) and is designed to serve students of diverse backgrounds and academic interests (e.g., anthropology, earth sciences, environmental studies, human health, international relations, public policy, and spatial sciences, among others). It is appropriate for students with or without an extensive background in science.

Learning Outcomes

Students who excel in SSCI 214g will be able to:

- Discuss human populations and societies in the context of geographic location and exposure to the earth's natural hazards.
- Describe the underlying processes that give rise to natural hazards such as earthquakes, volcanic eruptions, hurricanes, landslides, and how these affect human populations.
- Explain how society evaluates and confronts the dangers posed by natural hazards from political, social, and ethical perspectives.

- Utilize geospatial technologies to visualize the locations and dangers of natural hazards to human populations.
- Discuss the consequences and outcomes of environmental hazards for human populations.
- Compare and contrast technological innovations used to monitor, predict, and warn society about natural hazards and impending disasters.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

Prerequisite(s): None

Co-Requisite(s): None

Concurrent Enrollment: None

Recommended Preparation: None

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and non-binary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

Course Structure

This course aims to engage students in the dynamic processes underlying earth systems and natural hazards as well as the impacts that disaster events present to human populations. Student learning experiences are achieved through a combination of lectures, assignments, discussions, and course readings. Lectures, complemented by readings, will present core concepts, provide detailed explanations of assignments, and include activities such as individual and collaborative problem definition and problem solving experiences. Discussions will complement lectures with opportunities to interactively explore lecture topics in greater depth. For example, in discussions students will be encouraged to ask questions and participate in group conversations that will allow a broader and deeper understanding of natural hazards and disasters to emerge. No make-up dates will be offered for missed quizzes or exams, so mark the appropriate dates on your calendars. If there is a legitimate conflict, speak with a course instructor as soon as possible so we can make alternative arrangements.

Technology Requirements

Students will be introduced to geospatial technologies by utilizing Esri services and products. This course will use ArcGIS Online (AGOL) to investigate human populations and natural hazards whereby students will locate and explore various spatial datasets that offer unique and innovative insights in hazards research. The modeling software and geospatial data required for course assignments will be accessed using computing resources provided by the Spatial Sciences Institute.

Required Readings and Supplementary Materials

The required textbooks for this course are:

- Flannery, Tim. 2005. *The Weather Makers*. NY, NY: Grove Press, 368 pp.
- Smith, Keith. 2013. *Environmental Hazards: Assessing Risk and Reducing Disaster*, 6th Edition. NY, NY: Routledge, 504 pp.

Description of Assessments

Your grade in this class will be determined on the basis of several different assessments:

Homework Assignments (24%): Students will be required to complete eight homework assignments comprised of quantitative and/or qualitative analysis to gain insight on the physical processes underlying natural hazards and disasters as well as examine the impact these events have on human populations.

Hazard & Disaster Log (16%): Students will be required to keep a journal of three significant natural hazard and/or disaster events that happened over the course of the semester that made media headlines. Working in pairs, students will report the Hazard & Disaster Log in the form of a digital Story Map (available through AGOL) and will be presented in class at the end of the semester. This assignment will require students to locate and evaluate technical information from online agency sites such as the U.S. Geological Survey and the National Oceanic and Atmospheric Administration (NOAA).

Discussions (13%): Structured weekly discussion sections are highly interactive and will focus on combinations of theory and practice to promote deeper learning of core concepts. Every student must participate in discussions about each week's assignments. Discussions will include activities such as addressing outstanding questions that emerge from lectures, assignments, group activities, and group and individual presentations.

Mid-term Exam (15%): The mid-term exam will consist of multiple choice, short answer, and simple problem questions, and a short essay. Students will be expected to take the exam at the indicated time.

After Action Report (16%): Students will complete an After Action Report on one specific disaster event of their choice. The report will draw upon course lectures, discussions, readings, and outside sources to organize and deliver a summary of the disaster event and its associated impacts on the affected human population. The report is limited to 5 pages in length (with 12-

point font, 1 inch margins, single-spacing for text) and must include appropriate maps, tables, and/or other graphics as well as a list of references.

Final Exam (16%): The mid-term exam will consist of multiple choice, short answer, and simple problem questions, and a short essay. Students will be expected to take the exam at the indicated time.

Grading Breakdown

Assessment	Number	Points Each	Total Points
Homework Assignments	6	4	24
Hazard & Disaster Log	1	16	16
Discussions	13	1	13
Midterm	1	15	15
After Action Report	1	15	16
Final Exam	1	15	16
Total	42	-	100 points

Assignment Submission Policy

Assignments will be submitted for grading via Blackboard by the due dates specified in the Course Schedule below. Late work will be assessed a penalty of 10% per day and zero grades will be assigned for work that is more than seven days late.

Additional Policies

Students are expected to attend and participate in two lecture sessions and one discussion section per week,

Schedule

	Topic	Readings and Assignments	Deliverables/Due Dates
Module 1: The Nature of Human Populations			
Week 1 8/23	Introduction to Human Populations, Natural Hazards and Disasters Lectures: Introduction to human populations and the associated impacts of natural hazards; Human life, tracking past and present migration patterns, and the evolution of environmental hazard paradigm perspectives. Discussion: Discussions Sections do not meet	Reading: Smith (2013) Ch. 1	No deliverables.

	Topic	Readings and Assignments	Deliverables/Due Dates
Week 2 8/30	Human Dimensions Lectures: Spatial patterns in the context of impacts on human populations; human-environment interactions and anthropogenic factors to hazards. Discussion: What do hazards have to do with human habitation, culture and values? What do hazard, risk, vulnerability, and disaster mean? How are these terms measured?	Reading: Smith (2013) Ch. 2; Flannery (2005) Ch. 1-2 Homework Assignment 1	No deliverables
Week 3 9/7* *9/6 is a university holiday	Complexity Science, Sustainability Science, and Human Vulnerability Lectures: Global links - complexity science and sustainability science - between physical and socio economic systems; introduction to GIS for measuring human vulnerability. Discussion: How do maps allow us to illustrate disaster outcomes as interactions between humans natural system? How can we use maps to visualize and understand complexity science, human vulnerability, and sustainability?	Reading: Smith (2013) Ch. 3; Flannery (2005) Ch. 3-4 Homework Assignment 2	Homework Assignment 1
Week 4 9/13	Risk Assessment and Management Lectures: Human risk perception; mitigating risk with geospatial data and GIS infrastructures. Discussion: Why is perception important to human populations and what factors influence perception? How is risk different from hazard and vulnerability?	Reading: Smith (2013) Ch. 4; Flannery (2005) Ch. 5-6 Homework Assignment 3	Homework Assignment 2
Week 5 9/20	Reducing the Impacts of Climate Change Lectures: Mitigation and adaptation strategies to reduce the impacts of disasters induced by climate change. Discussion: What is climate change? What are the arguments for and against? What is meant by “coping” and how is coping related to livelihoods? Why is the sequence of coping strategies important for disaster management?	Reading: Smith (2013) Ch. 5; Flannery (2005) Ch. 7-8 Homework Assignment 4	Homework Assignment 3
Module 2: Natural Hazards and Impacts on Humans			
Week 6 9/27	Tectonic Hazards: Earthquakes and Tsunamis Lectures: Plate tectonics and the impacts of earthquakes and tsunamis. Discussion: To what extent is earthquake preparedness a public or private concern? How does the frequency and magnitude of earthquake damage affect risk perceptions, behavior, and policy?	Reading: Smith (2013) Ch. 6; Flannery (2005) Ch. 9-13 Hazard & Disaster Log	Mid-Term Exam

	Topic	Readings and Assignments	Deliverables/Due Dates
Week 7 10/4	Tectonic Hazards: Volcanoes and Mass Movement Hazards Lectures: The processes that produce volcanoes and how volcanoes impact society; landslide and avalanche hazards; the increasing number of people affected by them, and reasons for this increase. Discussion: What are the phases of disaster reconstruction and how long does each phase take? What are the different ways societies adjust to risk?	Reading: Smith (2013) Ch. 7 & 8; Flannery (2005) Ch. 14-19 Homework Assignment 5	No deliverables
Week 8 10/12* *10/14-10/15 is a university holiday	Severe Storm Hazards and Weather Extremes Lectures: Tropical cyclones – formation, classification, human populations at risk, and mitigating resulting storm damage; introduction to extreme weather events and related outcomes. Discussion: Practice Building Story Maps in the context of the impact of natural hazards on human populations.	Reading: Smith (2013) Ch. 9; Flannery (2005) Ch. 20-24 Homework Assignment 6 After Action Report	Homework Assignment 4
Week 9 10/18	Disease Epidemics and Human Rights Lectures: An introduction on disease epidemics and human rights through the lens of spatial data Discussion: What social processes and modern human migration patterns impact disease epidemics? How are human rights intertwined and impacted by epidemic outbreaks.	Reading: Smith (2013) Ch. 10; Flannery (2005) Ch. 25-30	Homework Assignment 5
Week 10 10/25	Floods and Wildfires Lectures: An introduction to thunderstorms and the feedback loop between human development and flooding; wildfires and the WUI. 10/20 – Guest Lecture: Dr. Kenan Li, Population Impacts of Coastal Sea Level Rise Discussion: What is the wildland-urban interface (WUI)? How does the WUI make controlling fire hazards particularly difficult? How is vulnerability to wildfire related to human values and desires?	Flannery (2005) Ch. 31-35	Homework Assignment 6

	Topic	Readings and Assignments	Deliverables/Due Dates
Week 11 11/1	Droughts Lectures: Drivers and impacts of drought; drought as related to floods. Discussion: Why does the definition of a drought vary according to geography and economic activity? What are some direct and indirect impacts of drought hazards?	Reading: Smith (2013) Ch. 11;	No deliverables
Week 12 11/8	Technological Hazards Lectures: “Man-made accidents”, the third industrial revolution, case studies showing societal impacts, and options for the future. Discussion: What people are particularly vulnerable to technological hazards and why? What can we learn from current research to help address the third industrial revolution challenges?	Reading: Smith (2013) Ch. 12	Submit After Action Report: 11/9
Week 13 11/15	Environmental Hazards Lectures: The third industrial revolution and the impact on the environment. Discussion: Present Hazard and Disaster Logs. Reflective Discussion Post	Reading: Smith (2013) Ch. 13	No deliverables
Week 14 11/22* *11/24-11/28 is a university holiday	The Future of our World Lecture: Case studies showing societal impacts and options for the future. Discussion: I Present Hazard and Disaster Logs. Reflective Discussion Post	Reading: Smith (2013) Ch. 14	Hazard & Disaster Logs – Presentation in Discussion Sections
Week 15 11/29	Hazard & Disaster Log Lectures: Final exam review. Discussion: Present Hazard and Disaster Logs. Reflective Discussion Post		Hazard & Disaster Logs – Presentation in Discussion Sections
Final Exams	Final Exam, TBD		

Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in *SCampus* in Part B, Section 11, “Behavior Violating University Standards” <https://policy.usc.edu/files/2020/07/SCampus-Part-B-1.pdf>. Other forms of academic dishonesty are equally unacceptable. See additional information in *SCampus* and university policies on scientific misconduct, <http://policy.usc.edu/scientific-misconduct>.

Support Systems

Counseling and Mental Health– (213) 740-9355 – 24/7 on call

engemannshc.usc.edu/counseling

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

National Suicide Prevention Lifeline – 1 (800) 273-8255 – 24/7 on call

www.suicidepreventionlifeline.org

Free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week.

Relationship and Sexual Violence Prevention Services (RSVP) – (213) 740-9355(WELL), press “0” after hours – 24/7 on call

studenthealth.usc.edu/sexual-assault

Free and confidential therapy services, workshops, and training for situations related to gender-based harm.

Office of Equity and Diversity (OED) – (213) 740-5086 | *Title IX Compliance* – (213) 821-8298

equity.usc.edu, titleix.usc.edu

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

Reporting Incidents of Bias or Harassment– (213) 740-5086 or (213) 821-8298

usc-advocate.symplicity.com/care_report

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office of Equity and Diversity | Title IX for appropriate investigation, supportive measures, and response.

The Office of Disability Services and Programs – (213) 740-0776

dsp.usc.edu

Support and accommodations for students with disabilities. Services include assistance in providing readers/notetakers/interpreters, special accommodations for test taking needs, assistance with architectural barriers, assistive technology, and support for individual needs.

USC Campus Support and Intervention – (213) 821-4710

campussupport.usc.edu

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity at USC – (213) 740-2101

diversity.usc.edu

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call

dps.usc.edu, emergency.usc.edu

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety – - UPC: (213) 740-6000, HSC: (323) 442-120 – 24/7 on call

dps.usc.edu

Non-emergency assistance or information.
