

CTCS 503: Survey of American Sound Cinema

Professor Courtney White

Tuesdays 10:00 AM-1:50PM in Norris Cinema Theatre

Survey history of the United States film from 1927 to the present, with emphasis upon film as an art form, an economic institution, a series of technological developments, and a cultural product. While our focus will be on mainstream Hollywood productions in the classical, postwar, and New American Cinema periods, we will also consider various documentary and independent films.
