

AME 516: Thermal and Biological Transport Phenomena

Units: 4 Spring 2022 – MW 09:00-10:50 am

Location: OHE 100B

Instructor: Satwindar Singh Sadhal Office: OHE 412A Office Hours: MW 11:00am-12:00pm, 1:00-2:00pm Contact Info: sadhal@usc.edu, 213-740-0492

Course Description

The main theme of the course is for the students to learn the analytical techniques for solving convective heat and mass transfer problems in a variety of practical situations. Problem-solving techniques in this course are applied to heat/mass transfer biological tissues. However, the transport phenomena in this course are also applicable to traditional industrial applications. Specifically, the following topics will be included (new topics are shown in blue):

- 1. Fundamentals: Physics of heat and mass transfer.
- 2. Fourier law, Fick's law. Review of fluid dynamics, momentum conservation
- 3. Equations of energy conservation and mass transport.
- 4. Pennes equation for biotransport.
- 5. Darcy flow for bioporous media.
- 6. Laminar two-dimensional flow. Boundary layer theory for energy and mass transfer.
- 7. Flow through channels. Couette flow.
- 8. Flow through pipes with heat transfer. Graetz problems.
- 9. Mass transfer through tubes; application to blood flow
- 10. Darcy flow through bioporous media with mass transfer.
- 11. Flow past cylinders with heat transfer.
- 12. Laminar to turbulent flow transition.
- 13. Turbulent heat transfer in parallel flow
- 14. Turbulent heat transfer in ducts.
- 15. Mass transfer with fluid flow biochemical reactions.
- 16. Application to drug delivery.

Catalogue Description: Analytical techniques for solving convective heat and mass transfer problems; applications include heat/mass transfer in biological systems as well as traditional industrial settings.

Learning Objectives

It is expected that when exiting AME 516, students will be able to:

- mathematically model thermal and solute transport in fluid systems and biporous media;
- set up relevant heat and mass conservation differential equations;
- obtain analytical solutions to many varieties of convective heat and mass transfer problems in a wide array of important applications, including biotransport and industrial systems;
- translate and quantify mathematical formulations to physically meaningful results;
- apply the skills acquired to real-life situations such as, e.g., cardiovascular flow, drug delivery, power-plant heat transfer, pollutant dispersion in water and the atmosphere.

Prerequisite: AME 525

Recommended Preparation: Undergraduate courses on differential equations, fluid dynamics, thermodynamics and heat transfer; AME 526

Other Details

Grading Type: Letter Grade. The course will be available on DEN (Distance Education Network)

Technological Proficiency and Hardware/Software Required: MATLAB proficiency.

Textbook: "Transport Phenomena in Biological Systems," by Truskey, Yuan & Katz, Pearson Prentice Hall. ISBN-13: 978-0130422040, ISBN-10: 0130422045

Recommended Readings and Supplementary Materials

For further insights, the following additional materials are recommended:

- 1. "Convective Heat Transfer," by Louis C. Burmeister, Wiley Interscience, ISBN: 0-471-09141-3
- 2. "Transport Phenomena," by Bird, Stewart & Lightfoot, Wiley. ISBN-13: 978-0470115398, ISBN-10: 0470115394

Description and Assessment of Assignments

There will be thirteen homework problem assignments which will account for 20% of the final grade. These assignments will be provided by the instructor and due one week from the date they are assigned. Students should expect that the reading and homework assignments will require roughly eight hours/week outside class.

Grading Breakdown

Scheme:	Homework Mid-Term Examination (7 th week) Final Examination (as per schedule of classes)	
	TOTAL	100%

Assignment Submission Policy

Homework assignments will be due one week after assignment at the end of the of the Thursday lecture. Submit assignment online every week by the posted due date. All students will submit assignments through the DEN system.

Additional Policies

- Final grade will depend entirely on the performance on the above grading breakdown and will be independent of the financial support requirements (e.g., minimum grade requirement for tuition reimbursement).
- Work-related travel should be scheduled during time periods outside of the mid-term and final exams. Accommodation to take exams on different dates will be made only for family emergencies and documented illness or health-related emergencies. Other exceptions will be considered on a case-by-case basis.
- Homework will not be accepted after the due date. Exceptions due to documented medical or family emergencies will be considered on a case-by-case basis.

Week/Dates	Schedule: Weekly Breakdown (New topics are indicated in blue) TOPICS	Homework
1	1. FUNDAMENTALS	HW1
1	1.1 Review of fluid mechanics. Conservation of mass and momentum	11 ** 1
	1.2 Scaling and nondimensionalization.	
	1.3 Boundary conditions	
2	2. ENERGY CONSERVATION	HW2
2	2.1 The energy equation. Diffusion, convection, dissipation.	11 vv 2
	2.2 Energy from chemical, biochemical and nuclear reactions	
3	3. MASS CONSERVATION (SOLUTES)	HW3
5	3.1 Convective and diffusive mass transfer	11 •• 5
4	4. TWO-DIMENSIONAL PROBLEMS	HW4
+	4.1 Thermal and momentum boundary layers on flat plates	11 ** 4
	4.2 Karman-Pohlhausen boundary layer theory	
5	4.3 Couette flow in channels.	HW5
5 6 7		HWO
	4.2 Thermal entrance length in two-dimensional channels. Graetz Problem.5. PROBLEMS IN CYLINDRICAL GEOMETRY	LINIC
		HW6
	5.1 Heat transfer in pipes. Graetz problem for circular channels.	
	5.2 Pulsating flow in tubes. Application to blood flow.	Dura fau
/	5.3 Flow around tubes and tube bundles.	Prep for Mid-term
	Mid Town Enomination (during along namiad)	Mid-term
0	Mid-Term Examination (during class period) 6. BUOYANCY-DRIVEN CONVECTION	HW7
8		п w /
9	6.1 Density variation as a driving force.	HW8
9	6.2 Dimensionless scaling, Grashof and Rayleigh numbers	пพо
10	6.3 Buoyant convection from a vertical flat plate6.4 Buoyant convection between two parallel plates. Critical Rayleigh numbers for onset	HW9
10	of convection.	пмя
11	6.5 Convective transport due to density stratification in isothermal systems.8. TURBULENT HEAT AND MASS TRANFER	HW10
11	8.1 Laminar to turbulent transition	ПW10
	8.2 Turbulent boundary layers $k - \varepsilon$ models	
12	8.3 Application to flat plates and tubes7. PROBLEMS IN SPHERICAL GEOMETRY	HW11
12		ПW11
	7.1 Classical problems with drops, bubbles and particles.7.2 Evaporation of aerosols. Spherically symmetric problems.	
	7.3 Evaporation with translation of drops.	
10		11110
13	9. PENNES BIO-HEAT EQUATION	HW12
	9.1 Blood perfusion as a heat-removal/addition mechanism.	
	9.2 Application to mammalian tissue.	
1.4	9.3 Tumors, and radiation therapy. Thermal analysis.	1111/10
14	10. POROUS AND BIOPOROUS MEDIA	HW13
	10.1 Darcy equation for momentum conservation.	
	10.2 Convective heat and mass transfer in porous media	
15	10.3 Application to targeted drug delivery.	N. 1137
15	11. SPECIAL TOPICS	No HW
	11.1 Topics of current interest	
	11.3 Biotransport issues relevant to Covid-19 transmission	
	11.4 Fluid dynamics and transport phenomena with aerosols	
	FINAL EXAMINATION (See the Schedule of Classes for the exact day/time)	

Course Schedule: Weekly Breakdown (New topics are indicated in blue)

Academic Conduct:

Plagiarism – presenting someone else's ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, "Behavior Violating University Standards" <u>policy.usc.edu/scampus-part-b</u>. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, <u>policy.usc.edu/scientific-misconduct</u>.

Support Systems:

Counseling and Mental Health - (213) 740-9355 – 24/7 on call

studenthealth.usc.edu/counseling

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

National Suicide Prevention Lifeline - 1 (800) 273-8255 – 24/7 on call

suicidepreventionlifeline.org

Free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week. Relationship and Sexual Violence Prevention Services (RSVP) - (213) 740-9355(WELL), press "0" after hours – 24/7 on call studenthealth.usc.edu/sexual-assault

Free and confidential therapy services, workshops, and training for situations related to gender-based harm.

Office of Equity and Diversity (OED) - (213) 740-5086 | Title IX – (213) 821-8298

equity.usc.edu, titleix.usc.edu

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

Reporting Incidents of Bias or Harassment - (213) 740-5086 or (213) 821-8298

usc-advocate.symplicity.com/care_report

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office of Equity and Diversity |Title IX for appropriate investigation, supportive measures, and response.

The Office of Disability Services and Programs - (213) 740-0776

dsp.usc.edu

Support and accommodations for students with disabilities. Services include assistance in providing readers/notetakers/interpreters, special accommodations for test taking needs, assistance with architectural barriers, assistive technology, and support for individual needs.

USC Campus Support and Intervention - (213) 821-4710

campussupport.usc.edu

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity at USC - (213) 740-2101

diversity.usc.edu

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 - 24/7 on call

dps.usc.edu, emergency.usc.edu

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety - UPC: (213) 740-6000, HSC: (323) 442-120 – 24/7 on call dps.usc.edu Non-emergency assistance or information.
