Advanced Games Project Spring 2022

CTIN 291 - Section 18394
CTIN 491 - Section 18427
CTIN 591 - Section 18431
CSCI 491a - Section 30310
CSCI 529a - Section 30311
CTIN 491 Directors - Sections 18368, 18384

Units: 2
Spring Semester 2022: Thursdays from 2:00pm-5:30pm
Location:
USC Games Studios aka
EGG Building @ 746 West Adams, Los Angeles, CA 90089
(students will be notified in advance if there is a change of class location)

Instructors:
Contact Info: agp-faculty-2021-2022@googlegroups.com

Lead Instructors:
Jim Huntley (Faculty Lead + Marketing)
Office: SCI 201
Office Hours: Tuesdays and Wednesdays 1:30pm-3:30
Contact Info: jim.huntley@usc.edu, (818) 971-9871
To Schedule Time, Please Contact My Exec Assistant: Arleen – arleen@neolition.com

Scott Easley (Art)
Office: EGG 207
Office Hours: Tuesdays 11:00 - 2:30
Contact Info: seasley@usc.edu, (310) 351-7509

Matt Whiting (Engineering)
Office: OHE 530E
Office Hours: Mon 10-11:30am Wed 10-11:30am, 2-3:00 pm
Contact Info: whitingm@usc.edu, (310) 795-0533

AGP Instructors w/their Functional Roles:
Danny Bilson (Narrative) bilson@usc.edu
Kyle Ackerman (QA Mgmt) kyleacke@usc.edu
Tracy Fullerton (Directors) tfullert@usc.edu
Chevon Hicks (User Interface Design) chevonhi@usc.edu
Lesley Mathieson (Design) tryfan@gmail.com- USC Email Pending
Jesse Vigil (Audio) jvigil@cinema.usc.edu
David White (Production) dgmason@usc.edu
Dennis Wixon (Usability) wixon@cinema.usc.edu
Class Student Assistants:
Abigail Sullivan  adsulliv@usc.edu
Olivia Morales  oamorale@usc.edu

IT Help: John Ng
Contact Info: johnng@usc.edu  (213) 740 6200

Course Description
This class is where final-year students are exposed to working on teams needing both technical skill as well as the emotional maturity to work within a collaborative group. CTIN 491 intentionally models the world of professional game development- the post-graduate workplace we are preparing students for.

The most important feature of this class is that it empowers students to work as a team to execute on a collaborative creative vision and have fun in the process.

Advanced Games Projects (AGP) is a capstone class where undergraduates and graduates from Cinema IMGD and Viterbi collaborate on large-team games projects, working with students from departments across the University, including—but not limited to—Thornton, Marshall, Annenberg, and Roski. AGP also partners with complementary Art Schools around the US, with a focus on schools in Southern California to facilitate teams in-person meetings and instruction.

This class is where 3rd and 4th-year students will need both technical skill as well as the emotional maturity to work within a collaborative group. CTIN 491 intentionally models the world of professional game development- the post-graduate workplace we are preparing students for. The finished product is often used as a key portfolio piece for job seekers.

Prior to taking the class, students will have learned the core principles of game design, can work in-engine and have collaborated on smaller teams on projects. In AGP, students will take those skills to the next level, bringing their individual talents into a comparatively large team which will operate like a small development studio. Members of a team will work collaboratively on one large project, for an extended period of time and incorporating faculty (aka "publishing") feedback and direction as needed. The full production course covers two semesters from Fall through Spring.

The selection of the slate of AGP projects is made in the year prior, through a rigorous pitch process. Key roles on these teams must be staffed by registered class members. Team Leads work closely with instructors and mentors to learn to manage their teams and contribute to a large project, while individual team members participate regularly in workshops to learn about their functional roles and actively work on challenges they are facing in the course of development of their games.

Teams learn to work through sprints and defined goals to meet a larger schedule, regularly presenting their work in class for feedback from their fellow students, instructors and external industry experts, while working in a professionally modeled production environment. The class culminates with a final exam where the final build and work will be shown. Those teams who are interested in showing at the subsequent USC Games Expo will be featured as the centerpiece of the annual show at the end of the Spring semester, where students showcase
and represent their work to a large community of industry professionals.

Teams will be given odd and even numbering so that we will review odds and evens on alternate weeks to allow enough time for quality feedback.

In addition, there will be the following weekly meetings:
  ● Game Directors will meet on Thursdays, 10am-1120am to discuss topics the director role, with a focus on creative process management, team leadership
  ● Game Directors & Lead Producers will meet on Wednesdays, 830am-10am to discuss project issues and blockers and faculty requests

**Learning Objectives**
The ultimate goal of the course is for students to work as a team over the course of a school year to design and develop a fully polished, playable 10-30-minute game demo, ready for professional demonstration, prepared for consumer play and faculty evaluation by the end of the school year. This demo will encompass a segment of the game which highlights its core design pillars, has polished art and animation, is fun, intuitive, and fully playable with minimal bugs by the time they achieve “gold master” in May.

AGP offers students a window into their future careers, as it provides the closest academic experience of working in the Games industry. Prior to taking the class, students will have learned the key principles of game design, can work in-engine and have collaborated on smaller teams on projects. In AGP, students will take those skills and operate as a “small studio,” working collaboratively on one large project, for an extended period of time and incorporating faculty direction as needed. The finished product is often used as a key portfolio piece for job seekers.

Focused feedback on both process and product from instructors provides a solid foundation to facilitate project-based learning. Lectures and hands-on guidance on project management, design, production, research and publishing, gives students a taste of the “real world” that they’ll experience as they embark on their careers as professional game creators. Students working in specific “functional areas” will have focused sessions with instructors to learn the skills of their position and troubleshoot the inevitable problems that arise during development. The class will teach all students a better understanding of their roles on larger teams, what each individual does, and how to collaborate as part of a game development process from concept to “ship.”
Working Hours
The standard formula of two hours of work outside class per unit per week is the minimum expectation for hours put into an AGP project. Students are expected to perform at the high levels needed to build quality interactive experiences. Dedication to the team and its shared goals is expected.

Key Milestones and Deliverables (minimum requirements)

Alpha Build - Description [here](#).

Beta Build - Description [here](#).

All other Milestones delineated in [Integrated Milestone Calendar](#).

Prerequisite(s): CTIN 484, CTIN 489
Co-Requisite(s): None
Concurrent Enrollment: None
Recommended Preparation: CTIN 458, CTIN 497

Course Notes: Letter Grade

Description and Assessment of Assignments
Assignments are laid out in an [Integrated Milestone Calendar](#) which provides general direction on deliverables and due dates. The “Key Milestones” listed above are the priority, but other assignments are due throughout the school year. The Milestone Calendar is regularly updated, as each project has its own unique velocity and faculty will adjust dates as necessary.

IMPORTANT: the due dates for non-Key Milestone projects are not rigid or meant to be a “one-size-fits-all” process. Each project is different and has its own production flow. If teams need more time, support, direction, they can notify the Lead Instructor(s) and appropriate Functional-Specific Faculty.

Zipped project on server
We expect your game to be delivered in a zip file and weekly builds posted on Perforce.

Project Properly Organized on Server Directory
We expect proper organization and version control of your project on Perforce, following best practices outlined by faculty at the beginning of the year.

Marketing Deliverables:

Marketing Content can be developed in a variety of different ways/formats, but the final elements used will be based on consumer feedback/preference determined via research.

Key Art / Game Poster
We expect each team to produce a marketing-style game poster that tells the story and promotes the game.
**5-10 Screenshots: Focusing on different stages or features**
Focusing on different stages or features Show off the key features of the game
These shots can be used for your website or personal portfolio.

**Gameplay Video - edited, 2-5 minutes in length**
We expect you to make a polished video showing off the game, usable to market to festivals, individuals, and others.

**Game Microsite/Website**
We expect each team to create a marketing website or microsite for your game that incorporates all of the materials described above

*All teams are encouraged to present demo at USC Games Expo at the end of school year. Teams that commit to participating in Expo by the deadline outlined on the Milestone Calendar cannot opt out of showing at a later date without written approval from Marketing faculty.*

**Grading Breakdown**

<table>
<thead>
<tr>
<th>Assignment</th>
<th>% of Grade</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project</td>
<td>50</td>
<td>Key Milestone Deliverables including Alpha + Beta</td>
</tr>
<tr>
<td>Functional Group</td>
<td>25</td>
<td>Functional Milestone Deliverables</td>
</tr>
<tr>
<td>Individual</td>
<td>25</td>
<td>Weekly Task Sheets</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td><strong>100</strong></td>
<td><strong>100</strong></td>
</tr>
</tbody>
</table>

Similar to a professional industry environment, performance will be measured by a mix of 1) overall project development and deliverable, 2) functional group-specific deliverables, and 3) individual contribution. For grading purposes, all projects start out as a “B+” and move up or down based on final result and development processes used along the way. Evaluation will be based on how well a project realizes the goals the team has set out for itself and the project. Ultimately, this course exists to empower students to work collectively to put an engaging, unique experience into the hands of players.

*“Key Milestone Deliverables” are outlined in an earlier section. For each Key Milestone Deliverable, a grade will be provided to the team, and grades aggregated at the end of the semester to determine the Project grade, aka 50% of the individual student’s grade. Much like the professional world, the most important evaluator will be the quality of the experience you help build.*

*“Functional Milestone Deliverables” are deliverables underlined in the Integrated Milestone Calendar and each functional group has 2 due per semester. If there are multiple people in a functional group, they will share the same grade for these deliverables.*

For example, if a Usability group on a team consists of one person, that one person will receive the score for the two scored Fall Usability Deliverables (*"Final Usability Testing Plan*
(RITE)” due on 9/30/21 and “Review Usability Results to Date” due on 11/11).

Comparatively, if there are three Engineers on a team, each member of the Engineering group on the team will get the same grade on their two scored Fall projects, "Risk of Technical Challenges" due on 10/21 and "TDD Revision" due on 12/9.

"Individual" will be determined by the Weekly Task Sheet that Producers are primarily responsible to fill out. The specific methodology will be outlined in the first class and the sheet is reviewed weekly, then scored at the end of the semester.

Because of the unique needs of each project, it is impossible to dictate a structure that applies to each so exactly that we have a mathematical category for attitude, help, efficacy of code, importance within the project, foresight, insight, honesty, collaborative spirit and many other amorphous qualities that are crucial to working within a team but divorced from coding. Nonetheless, those are invaluable traits that will directly contribute to the success of your project.

**Important: The faculty of USC IMGD reserves the right to cancel any AGP production due to lack of team performance and reassign the team members to another project.**

**Assignment Submission Policy**

During class, each team must be ready to present the current state of the game when called upon, and individuals on each team must be prepared to discuss his/her work from the previous week. Some weeks, there will be presentations, which require the teams to be ready to present the game or an aspect of the game or its production process to the class and instructors. However EVERY week, each team must have a playable build, even if it’s the prior week’s build as backup.

Other assignments are the sprints teams determine for themselves, and area leads are responsible for assigning tasks to their team members as a part of the sprint.

Team members are expected to put in time in the advanced games laboratory to work on their tasks for each sprint.

Team members and leaders are expected to bring the results of sprints and active development problems to the workshop meetings with instructors.

**Missing an Assignment Deadline, Incompletes:**
The only acceptable excuses for missing a Key Assignment deadline or taking an incomplete in the course are personal illness or a family emergency. Students must inform the instructor **before the assignment due date** and present verifiable evidence in order for a deadline extension to be granted. Students who wish to take incompletes must also present documentation of the problem to the instructor or student assistant before final grades are due.

For assignments turned in after the assignment deadline without prior permission from the instructor, a penalty will be imposed equal to 10% of the total available points for the assignment, for each day or part of a day that the assignment is late, up to a maximum of
seven days.

**Attendance Policy:**
Punctual attendance at all classes is mandatory. Students arriving more than five minutes late to three classes, more than ten minutes late to a single class, or leaving early, will be marked as having an unexcused absence from class, unless prior permission has been obtained from the instructor. The following guidelines are from the Interactive Media & Games Division handbook regarding absences and grading and apply to all students.

Guidelines for absences affecting grading
- Two unexcused absences: lowers grade one full grade point (for example, from A to B)
- Three unexcused absences: lowers grade two full grade points
- Four or more unexcused absences: request to withdraw from course (instructor’s discretion)

Excused absences are:
- Illness (with a doctor’s verification)
- Family or personal emergency (with verification)

Social media, including text messaging and internet messaging, are not allowed to be used during class unless explicitly permitted by the instructor. A 0.5% grade reduction will result from each occurrence of a student being found using them.

**Diversity**
In making games and interactive media in a professional and ethical way, it is important that you consider diversity. When looking at your projects, you should consider who is depicted and how this work will impact others. What kinds of individuals and communities are represented in your work? What point of view does your work express? This class may assist you in learning how to make work that includes diverse viewpoints, and may discuss racial, religious, gender and sexual orientation issues in the context of games and interactive media.

**Additional Policies**
Add any additional policies that students should be aware of: late assignments, missed classes, attendance expectations, use of technology in the classroom, etc.

**Course Schedule: A Weekly Breakdown**
Current incarnation of schedule is below, but is subject to change - Please always check the most-recent [Integrated Milestone Calendar](#) for a week-by-week breakdown)
Statement on Academic Conduct and Support Systems

Academic Conduct

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Section 11, Behavior Violating University Standards https://scampus.usc.edu/1100-behavior-violating-university-standards-and-appropriate-sanctions/. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct/.
Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the Office of Equity and Diversity http://equity.usc.edu/ or to the Department of Public Safety http://capsnet.usc.edu/department/department-public-safety/online-forms/contact-us. This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. The Center for Women and Men http://www.usc.edu/student-affairs/cwm/ provides 24/7 confidential support, and the sexual assault resource center webpage sarc@usc.edu describes reporting options and other resources.

Support Systems
A number of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the American Language Institute http://dornsife.usc.edu/ali, which sponsors courses and workshops specifically for international graduate students. The Office of Disability Services and Programs http://sait.usc.edu/academicsupport/centerprograms/dsp/home_index.html provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, USC Emergency Information http://emergency.usc.edu/ will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

Disruptive Student Behavior:
Behavior that persistently or grossly interferes with classroom activities is considered disruptive behavior and may be subject to disciplinary action. Such behavior inhibits other students’ ability to learn and an instructor’s ability to teach. A student responsible for disruptive behavior may be required to leave class pending discussion and resolution of the problem and may be reported to the Office of Student Judicial Affairs for disciplinary action.

Safer Spaces:
In this class, we make a commitment to foster a welcoming and supportive environment where students of all identities and backgrounds can flourish. This means that we will issue content warnings as appropriate, use preferred pronouns, and respect self-identifications. While debate and discussion are welcome, please remain aware of the implications of your
words and the images that you include in your work. If the instructor or another student points out that something you have said or shared with the group might be offensive, avoid being defensive; this is a valuable opportunity for us to grow and learn together. If you have a concern about any aspect of the class, you are encouraged to speak with the instructor. If you feel uncomfortable speaking with the instructor, you are also welcome to speak with either the undergraduate or graduate advisor for the division, who can discuss the issue with you directly or point you toward other on- and off-campus resources for addressing your concern.

**Syllabus Updates:**
This syllabus is subject to change up to the beginning of class and possibly over the semester. Please check the posted syllabus and Integrated Milestone Calendar regularly, and note all changes that are shared by the instructor in class.
