SSCI 383L, Geographic Information Science: Geospatial Modeling and Customization

Syllabus

Units: 4

Term Day Time: Spring, 2022
Lecture: Tuesdays and Thursdays, 2-3:20 pm PT
Lab: See schedule of classes.

Location: Lecture: CPA 158
Lab: HED 103 & SOS B38

Instructor: Jennifer N Swift, Ph.D. GISP
Office: AHF B57D
Regular Office Hours: Tues and Wed 4-5 pm PT. Also available most days and times by appointment via email.
Contact Info: jswift@usc.edu
Zoom: Provided via Blackboard

Library Help: Andy Rutkowski
Office: VKC 36B
Office Hours: Thu 10 am-12 pm PT
Contact Info: arutkows@usc.edu
Zoom: Provided via Blackboard

IT Help: Richard Tsung
Office: AHF 145D
Office Hours: By appointment
Contact Info: spatial_support@usc.edu, 213-821-4415
Course Scope and Purpose

The spatial sciences now require professionals with GIS modeling and customization skills, an essential part of the career portfolio. This course provides the fundamentals of spatial modeling and how to use GIS customization and programming, or scripting, to streamline complex spatial analysis and modeling workflows. An understanding of GIS modeling and how to create and implement customized tools are needed to successfully solve many of the critical societal and environmental challenges we face in today's ever-changing world. Learning to program facilitates understanding of one's use of GIS and how to interact with others who use GIS software. Familiarity with a GIS programming language and how it is implemented also provides in-depth insight into how other programmers create and use these tools. Helping you become comfortable with creating, coding and documenting GIS modeling workflows is a fundamental goal of this course.

Examples will be used throughout the course to illustrate how spatial modeling helps us to understand spatial phenomena through expressions of how the natural and built environments work and the profound influence we have on our environment. The combination of class and laboratory sessions will show how, for example, effective spatial modeling combined with creative coding requires an informed and intelligent user in addition to the appropriate computer hardware and software tools.

This course is designed to serve several student audiences given its role as a required course in the B.S. in GeoDesign, B.S. in Global Geodesign, B.S. in Human Security and Geospatial Intelligence, the GIS and Sustainability Science minor, and Spatial Sciences Minor. Each audience is encouraged to utilize the laboratory experience and research projects to investigate diverse geospatial resources such as spatial modeling, computer programming, and 2D and 3D data visualization to advance their own academic and professional goals.

Learning Objectives

Students who excel in SSCI 383L should be able to:

- Describe fundamental spatial science concepts in the context of spatial modeling;
- Explain how spatial models can be used to solve and understand real-world problems from an interdisciplinary viewpoint;
- Program small-scale GIS-based models in Python, integrated within ArcGIS or some other geospatial software ecosystem;
- Streamline complex workflows using GIS customization techniques;
- Communicate how many of the complex global challenges we face today can be addressed by combining spatial modeling and customization using GIS.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.
Prerequisite(s): SSCI 301L, SSCI 382L, or Instructor Permission
Co-Requisite(s): None
Concurrent Enrollment: None
Recommended Preparation: SSCI 381

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours)

COVID-19 policy -- Students are expected to comply with all aspects of USC’s COVID-19 policy including, but not limited to, vaccination, indoor mask mandate, and daily Trojan Check. Failure to do so may result in removal from the class and referral to Student Judicial Affairs and Community Standards. Students are recommended to keep safe physical distancing, whenever possible, to prevent any possible transmission. Please contact your instructor if you have any safety concerns.

Course Structure

This course is organized into learning modules that build upon core principles of geographic information science by delving into topics including spatial modeling and GIS customization, and the software systems used to explore these topics. The weekly meetings and projects are designed to broaden your practical experience and deepen your understanding of the concepts and tools of spatial science inquiry, and to enhance your problem-solving skills within the framework of the scientific method. The lecture and laboratory meetings complement each are and are designed to provide you with sound theoretical reasoning and the technical skills to investigate various physical and social processes. It is required that you register for both the lecture and one laboratory session for this course. Course material and assignments will be posted on the course Blackboard; assignments will be graded and returned via Blackboard.

Technological and Communications Requirements

ArcGIS and other necessary software are provided online via the Spatial Sciences Virtual Machine (SSI VM); hence, you do not need to install it on your own computer. In addition to the SSI computing resources, every student must have the following technology requirements:
• A computer with a fast Internet connection.
• An up-to-date web browser to access the SSI Server.

If a student does not have access to the requirements noted above, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here: https://keepteaching.usc.edu/students/student-toolkit/

SSI Server and Tech Support – This course utilizes the SSI Server, which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at ssi_support@usc.edu, making sure to copy (cc) me on the email.

Communications – All materials to be handed in will be submitted via Blackboard. It is each student’s responsibility to stay informed about what is going on in our course. In addition to email about time-sensitive topics, any important announcements will be posted on the Announcement page in Blackboard. Be sure to check these each time you log onto Blackboard.

I will send via email through Blackboard any notices that are time-sensitive. Please be sure that you read as soon as possible all email sent from Blackboard or from me. Do not ignore course email until the day before assignments are due. Also, double-check to be sure that email sent from the USC blackboard account does not go into your junk mail!

I will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay. In the rare case when I expect to be off-line for more than 72 hours, I will post an announcement on the Blackboard site.

Required Readings and Supplementary Materials

The required textbook for this course is:

Supplementary readings will be posted to Blackboard and assigned from various sources, including but not limited to:

In addition, three online courses are supplied with this course:

• Tyagi, Harshit. 2021. SQL Data Science Code Challenges.

**Description and Assessment of Assignments**

**Weekly Assignments**

Your grade in this class will be determined on the basis of several different assessments as follows:

*Discussion Assignments – 3 worth 15 points:* Students will be expected to complete three discussion assignments focused on assigned readings, engagement in lectures, sharing and discussion of course assignments, and in-class "worksheets," among other forms of active engagement in the course.

*Projects – 4 worth 60 points.* This course includes a laboratory component where each week, students work on projects to develop technical competency with geospatial software platforms and analytic tools. Students will be expected to draw upon course lectures, discussions, readings, and outside sources to complete the projects. The deliverables will be final written summaries of the students' goals, methods, data, and results for each project. Though the lab meets weekly, there will be a total of four project submissions over the course of the semester.

*Mid-term Exam – 1 worth 10 points.* The mid-term exam will consist of multiple-choice, short answer, and simple problem questions. Students will be expected to take the exam at the indicated time.

*Final Exam – 1 worth 15 points.* The final exam will consist of multiple-choice, short answer, advanced problem questions, and a short essay. Students will be expected to take the exam at the indicated time.

Assignment Submission Policy

Students are expected to attend and participate in every class session and unless otherwise noted, assignments must be submitted via Blackboard by the due dates specified in the Course Schedule below and on the assignment instructions. Project components have different due dates as indicated on the Course Schedule below. Your attention to on-time assignment submission is essential if I am to meet my goal to return comments on your submitted assignments before the next one is due. I will post a notice on anticipated delays if needed.

Strict penalties apply for late assignments as follows:

- Late work will be assessed a penalty of 10% per day and zero grades will be assigned for work that is more than seven days late.
- Additionally, no written work will be accepted for grading after 5 pm PT on the last day of classes.

**Module 2: 3D Spatial Modeling**

| Week 3 | 1/25                                      | 3D Visualization
Investigation of core concepts in creating 3D geographic representations of the real world to facilitate understanding our world. | Longley et al. (2015) Ch. 12, pp. 266-276 Project 1 | Discussion Assignment 2: Comparison of different types of spatial models Tuesday, 1/25 |
|        | 1/27                                      | 3D Modeling Fundamentals
Building 3D models for design applications, such as urban, suburban and rural communities. |                                        |                                        |

| Week 4 | 2/1                                      | 3D Modeling for Design
Visualization using different projections, 3D libraries, materials application and texture mapping. | Longley et al. (2015) Ch. 12, pp. 277-288 | Project 1, Part 1: 3D Visualization using Esri City Engine Tuesday, 2/1 |
|        | 2/3                                      | 3D Modeling in GIS
Creating and editing 3D GIS data, 3D geospatial data collection and storage. |                                        |                                        |

| Week 5 | 2/8                                      | 3D Model Integration
Converting 3D geospatial data to multiple formats, i.e. conversion, importing, exporting and sharing, to exchange 3D data between different software. | Longley et al. (2015) Ch. 14, pp. 319-326 Li et al. 2020 | Project 1, Part 2: 3D Modeling in GIS using Esri City Engine Tuesday, 2/8 |
|        | 2/10                                     | 3D Smart Cities
Understanding, describing, and modeling the geometry and behavior of cities using data collected from IoT sensors. |                                        |                                        |
| Module 3: Geospatial Simulations & Customization |
|------------------------|---------------------|---------------------|
| **Week 6**             | **Week 7**          | **Module 4: Fundamentals of Geospatial Programming** |
| **2/15**               | 2/17                | **Week 9**          |
| **2/15**               | **2/22**            | 3/8                 |
| **2/17**               | **2/24**            | **3/10**            |
| **2/22**               | **2/24**            | **3/14**            |
| **2/24**               | *Monday, 2/21 is university holiday** | *3/13-3/20 is Spring Recess** |

**Statement on Academic Conduct and Support Systems**

**Academic Conduct**

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” [policy.usc.edu/scampus-part-b](http://policy.usc.edu/scampus-part-b). Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on Research and Scholarship Misconduct.
**Students and Disability Accommodations**

USC welcomes students with disabilities into all of the University’s educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at [osas.usc.edu](osas.usc.edu). You may contact OSAS at (213) 740-0776 or via email at [osasfrontdesk@usc.edu](osasfrontdesk@usc.edu)

**Support Systems**

*Counseling and Mental Health* - (213) 740-9355 – 24/7 on call
[studenthealth.usc.edu/counseling](studenthealth.usc.edu/counseling)
Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

*National Suicide Prevention Lifeline* - 1 (800) 273-8255 – 24/7 on call
[suicidepreventionlifeline.org](suicidepreventionlifeline.org)
Free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week.

*Relationship and Sexual Violence Prevention Services (RSVP)* - (213) 740-9355(WELL), press “0” after hours – 24/7 on call
[studenthealth.usc.edu/sexual-assault](studenthealth.usc.edu/sexual-assault)
Free and confidential therapy services, workshops, and training for situations related to gender-based harm.

*Office for Equity, Equal Opportunity, and Title IX (EEO-TIX)* - (213) 740-5086
[eerotix.usc.edu](eerotix.usc.edu)
Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

*Reporting Incidents of Bias or Harassment* - (213) 740-5086 or (213) 821-8298
[usc-advocate.symplicity.com/care_report](usc-advocate.symplicity.com/care_report)
Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.
The Office of Student Accessibility Services (OSAS) - (213) 740-0776
osas.usc.edu
OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

USC Campus Support and Intervention - (213) 821-4710
campussupport.usc.edu
Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity, Equity, and Inclusion - (213) 740-2101
diversity.usc.edu
Information on events, programs and training, the Provost’s Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call
dps.usc.edu, emergency.usc.edu
Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety - UPC: (213) 740-6000, HSC: (323) 442-120 – 24/7 on call
dps.usc.edu
Non-emergency assistance or information.

Office of the Ombuds - (213) 821-9556 (UPC) / (323-442-0382 (HSC)
ombuds.usc.edu
A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

Occupational Therapy Faculty Practice - (323) 442-3340 or otpf@med.usc.edu
chan.usc.edu/otfp
Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.
