Course Goals

It is the goal of this course that each student—upon successful completion—gains a theoretical and practical understanding of intermediate electronic synthesizer and sampling techniques. These will include a working knowledge of electronic synthesizers, effect processors and the components of the synthesis process. To reach this goal, each student must successfully accomplish the objectives described below.

Course Objectives

- Using contemporary production techniques, demonstrate proficiency of fundamental concepts in sound theory by applying them to practical real-world examples
- Create original presets, patches and recorded audio sound-sets using electronic synthesis including: subtractive, additive, physical modeling, frequency modulation, sample-based, wavetable and granular
- Synthesize, process and catalog sounds for personal music libraries
- Describe, explain, and demonstrate the process of making musical sounds with electronic synthesizers and various additional tools and technology
- Create and produce musical compositions and arrangements with synthesized and processed sounds

Requirements, Exams and Grading Information

Student assessment in MTEC 474b will consist of in-class participation, exercises, a mid-term and a final project. Unless otherwise noted, all exercises are due one week from the date assigned.

It's extremely important that students attend class meetings and keep up with the weekly reading assignments before the next class session.

All assignments are to be turned in to the class DropBox, accessed through Blackboard, and must carefully follow file naming conventions, file management and format guidelines.

Assignments must also be brought to class each week and available for in-class demonstrations and collaborative exercises

Grading Summary

Participation	30%
Assignments	25%
Mid-term Project	20%
Final Project	25%

Grading Scale:

92 – 100 = A	90 – <92 = A-	88 – <90 = B+
82 – <88 = B	80 – <82 = B-	78 – <80 = C+
72 – <78 = C	70 – <72 = C-	68 – <70 = D+
62 – <68 = D	60 – <62 = D-	<60 = F

In general **Assignments** are due by the beginning of the following class period. Assignments turned in after the deadline will be marked late and penalized. Allow for slow Internet connections and server upload time so that your files are completely uploaded before the deadline.

The Final Project may not be submitted late. Final projects not turned in by the deadline will receive a grade of zero.

Throughout the semester, questions regarding instructor expectations, assignments, grades and/or anything else unclear should be addressed immediately

Notes

Each class will contain both theoretical and practical experiences. Should the needs of the class so dictate, I reserve the right to change the course outline. You will be notified of any substantive schedule changes.
