Course Goals
It is the goal of this course that each student—upon successful completion—gains a theoretical and practical understanding of intermediate electronic synthesizer and sampling techniques. These will include a working knowledge of electronic synthesizers, effect processors and the components of the synthesis process. To reach this goal, each student must successfully accomplish the objectives described below.

Course Objectives
• Using contemporary production techniques, demonstrate proficiency of fundamental concepts in sound theory by applying them to practical real-world examples
• Create original presets, patches and recorded audio sound-sets using electronic synthesis including: subtractive, additive, physical modeling, frequency modulation, sample-based, wavetable and granular
• Synthesize, process and catalog sounds for personal music libraries
• Describe, explain, and demonstrate the process of making musical sounds with electronic synthesizers and various additional tools and technology
• Create and produce musical compositions and arrangements with synthesized and processed sounds

Requirements, Exams and Grading Information
Student assessment in MTEC 474b will consist of in-class participation, exercises, a mid-term and a final project. Unless otherwise noted, all exercises are due one week from the date assigned.

It’s extremely important that students attend class meetings and keep up with the weekly reading assignments before the next class session.

All assignments are to be turned in to the class DropBox, accessed through Blackboard, and must carefully follow file naming conventions, file management and format guidelines.

***Assignments must also be brought to class each week and available for in-class demonstrations and collaborative exercises***

Sharing of course materials outside of the learning environment
USC has a policy that prohibits sharing of any synchronous and asynchronous course content outside of the learning environment. Please do not share or otherwise distribute class materials, music scores or recordings produced by me or any students in the conduct of this course without expressed permission.

SCampus Section 11.12(B)

Distribution or use of notes or recordings based on university classes or lectures without the express permission of the instructor for purposes other than individual or group study is a violation of the USC Student Conduct Code. This includes, but is not limited to, providing materials for distribution by services publishing class notes. This restriction on unauthorized use also applies to all information, which had been distributed to students or in any way had been displayed for use in relationship to the class, whether obtained in class, via email, on the Internet or via any other media. (See Section C.1 Class Notes Policy).
