Course Description
Cooperation between species has played a fundamental role in the evolution and diversification of life on this planet, from fleeting facultative interactions to fully integrated organelles, like mitochondria and chloroplasts within eukaryotic cells. This seminar course will introduce students to the concept of symbiosis, explore mechanisms underpinning the ecology and evolution of these relationships, and synthesize key concepts in contemporary symbiosis research.

Prerequisites: Admission to the MBBO or Ocean Sciences graduate programs or permission from the instructor.

Learning Objective
By the end of this course, students should be able to:

1. Differentiate mutualism and symbiosis
2. Understand factors contributing to the evolution of symbiotic relationships
3. Explain how symbiosis has shaped evolution across kingdoms of life
4. Present and summarize the primary literature

Tentative schedule of lecture topics. Note that the schedule is subject to change. Any schedule changes will be discussed in class and posted on Blackboard.

Student-led discussions
Four of the discussions will be based on student selected papers. Depending on enrollment students may present individually or in groups. They will be charged with identifying the paper or papers in an area of interest and leading the group discussion for that class period.

Course Policies
COMMUNICATION: Email is the preferred form of communication with the instructor outside of class. Responses can be expected within 24-48 hours, though there may be an additional delay over weekends/holidays. If an in-person meeting is desired, please email a request to set up a meeting time.

ONLINE COURSE BEHAVIORAL NORMS AND NETIQUETTE (if needed):
Behavioral norms
- Treat everyone with respect and dignity.
- Criticize ideas, not individuals.
- Always be mindful of the following: would you say it to the individual in person?
- Be courteous and refrain from interrupting others.
- Don’t dominate conversations- ensure everyone has a chance to contribute.
- Ask questions, especially when you don’t understand something.
- Support your statements with evidence and explain your rationale.

Course netiquette (live sessions)
- Mute your microphone if you are not speaking
- Chat will only be used to make comments to the entire class (private chat will be disabled).
- Please use the “raise hand” function in Zoom to request clarification or ask questions. This will reduce interruptions.
- Your video doesn’t have to be on but be present and participate if you are attending the live sessions.
- If you have technical issues, please email the instructor (ckenkel@usc.edu)

GRADES: Any document associated with grading may be photocopied by the instructional staff. The final letter grade will be determined by the total number of points as follows.

PLANNED ABSENCES: Requests for absences should be made by email to the Instructor at least 2 weeks in advance and preferably as early in the semester as possible. If the absence is approved a reasonable accommodation will be provided, which may include coordinating remote participation or a make-up assignment.
Statement on Academic Conduct and Support Systems

Academic Conduct:

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, policy.usc.edu/scientific-misconduct.
