

Essentials of Business Data Analytics Using R DSO 458

USC Marshall School of Business

R - the most popular open-source programming languages for data and business analytics

Learn how to use R to download real-world data, manipulate data sets from various sources, manage the information, produce high quality charts, summaries, and apps

Complete projects and create programs that are practical to business applications outside the class

Professor: I. Maslova
Spring 2023 | 4 units
