COMM 309: Communication & Technology
4 Units

Spring 2022 – Monday-Wednesday 2:00-3:20pm
Section: 20494R
Location: ANNL105A and Blackboard (occasionally on Zoom)

Instructor: François Bar (he/il/他)
Office: ANN310L
Office Hours: Wednesdays 3:30-4:30pm PST/PDT (in person or zoom, TBD; please let me know if you plan to come), or by appointment.
Contact Info: fbar@usc.edu (put “COMM309” in the subject) – 213-821-1108 – http://fbar.net

Course Description
From the catalog: Cultural, social, political, and economic dynamics of communication technologies, including internet architecture, social media, participatory cultures, privacy, surveillance, networked journalism, big data, algorithms, online activism.
(This syllabus draws heavily on previous versions of this class taught by Annenberg faculty, in particular Prof. Mike Ananny)

What are communication technologies, why and how do they matter? This is a survey course designed to give undergraduates an overview of core concepts, historical trajectories, and contemporary controversies in the design, deployment, use, and critical study of communication technologies. The first part of the course takes a broad view of communication technology and considers different historical moments to establish some fundamental concepts. It then focuses largely on contemporary, internet-based system and cultures. Students will learn about different definitions of “communication” and “technology”; examine the values and assumptions of those who make and use communication technologies; and gain insight into how communication technologies are created, deployed, used, regulated, and remade through an ever changing set of economic, social and cultural dynamics. Through critiques of scholarly literature and contemporary cases students will examine communication technologies in relation to notions of: community, participation, climate crisis, race, gender, identity, journalism, copyright, free speech, reputation, misinformation, big data, algorithms, privacy, surveillance, labor, commodity, gaming, and cities. By the end of the course, students should be able to create and refine complex definitions of “communication” and “technology” that they can draw upon as critical makers and users of communication technologies for years to come.

Student Learning Outcomes
Upon successfully completing the course, students will be able to:
• State their own definitions of “communication” and “technology” and explain those definitions’ groundings

NOTE: THIS IS LAST SPRING’s SYLLABUS
Spring 2023 will be similar, but not exactly the same
• Connect theories of “communication” and “technology” to related concepts – economics and business, power, politics, difference, identity, community, development, labor, etc
• Discuss contemporary examples of communication technologies and current news developments in relation to theoretical concepts.
• Connect course concepts and examples to their envisioned future careers.

Course Notes
• All readings will be provided as PDFs via Blackboard; there are no textbooks to buy.
• All lecture slides will be posted on Blackboard after the lecture is complete and deleted when the course is over.
• Classes will be held on zoom at least until January 24, and in person after that should conditions permit. Please check Blackboard for up-to-date information on our class modality. Selected classes will likely be held on zoom at various points during the semester, in particular to allow visit by distant guest speakers.
• Live zoom class sessions will be recorded and made available to students through Blackboard (including transcriptions). Please remember that USC policy prohibits sharing of any synchronous and asynchronous course content outside of the learning environment. As a student, you are responsible for the appropriate use and handling of these recordings under existing SCampus policies regarding class notes (https://policy.usc.edu/scampus-part-c). These rules will be strictly enforced, and violations will be met with the appropriate disciplinary sanction. In person class sessions will be recorded and shared to the extent possible.
• In a class this large, neither the TAs nor the instructor can “summarize” classes for individual students so, if it is impossible for you to attend classes in real-time, we do expect that you will watch the lecture recording, review the slides, and contact classmates to find out what went on before reaching out to TAs.
• Zoom etiquette: Although you are not obligated to turn your camera on, we highly recommend it (feel free to pick a background of your choice if this makes you feel more comfortable keeping your camera on). Please keep your microphone off except when you’re speaking.

Communication
With a class of this size, **TAs are your best first point of contact** for any logistical or administrative issues. Please email them first, and then me if you still have questions. For the first week or two of class you’re welcome to email any of the four TAs (see first page of syllabus) but, after enrollment settles, I’ll divide up the class evenly into groups with one TA as the primary contact, so you’ll have a dedicated TA as your first point of contact. Be sure to email any question to your TA first.
You are also welcome to email me if you have a question/concern beyond the response the TA has given. I’ll generally answer your email within 48 hours. If I haven’t answered within that time, don’t be shy about resending your email. Keep in mind that I usually don’t answer email on weekends or after 7pm on weekdays (this is the same for the TAs). If it’s an urgent matter (e.g., a personal or medical emergency that will prevent you from completing an assignment or taking an exam), please mark the subject line ‘urgent’ and email me and your TA simultaneously.
If you have a longer question that’s best addressed in a conversation, please visit one of our Zoom office hours (see first page of syllabus and “Syllabus” tab on Blackboard) or email me/TA to make an appointment. More involved questions about course content or personal matters are often best answered individually.
Please note: do not email me or a TA saying something like “I missed class – what happened? Anything important?” First, every class is important; second, the TAs and I can’t summarize whole classes for you. All the materials are posted on Blackboard, all lectures are recorded on Zoom, and you can ask a fellow student for notes.

Technological Proficiency and Hardware/Software Required
You will need an internet-capable device with functional sound and camera to attend the zoom lectures, access Blackboard and online resources, preferably a laptop or desktop computer. A smartphone or tablet will likely not be sufficient. If that will be a problem, please reach out as soon as possible.
Please make sure to update your zoom client application to the latest version. Please also log into zoom with your usc email address – this will be essential for breakout room assignments.

**Required Readings and Supplementary Materials**
All required readings and supplementary materials will be available online, either as an open resource, electronically via the USC library, or in the class’ Blackboard documents collection. Links to required materials will be posted weekly on Blackboard, in the “Content” section.

**Description and Assessment of Assignments**

You will submit all work through Blackboard.

**Preparation for each class:** There will be material to read, watch or listen to in preparation for each class. Make sure you review this before class – the lectures will make a lot more sense that way. In addition, each week you will be asked to complete an activity which is intended to provide context for the lecture. You are asked to post the output from that activity on Blackboard before the start of class – these may be a short writing assignment, a chart, a short recording, or some other product. You will get credit for completing these activities, and two of these will randomly be graded over the course of the semester. There will be 12 such activities through the semester and you may skip 2 of them – complete 10 to receive maximum credit.

**Mid-term Exam:** Approximately half-way through the semester, students will complete a take-home, open-book exam covering material in both lectures and readings up to that point. Students may use any notes, guides, articles, etc., that they like but are not allowed to collaborate or receive outside help. The prompt will be posted on Blackboard at the start of our usual class time, and you will have 24 hours to turn in your answer (similar to a ‘blue book’ in class exam, but you have more time). This mid-term will be geared toward confirming that you have mastered the concepts presented in the first part of the course.

**Two Short Papers:** During the second half of the class, in response to detailed prompts, students will submit 2 short “thematic papers” of 1,500-2,000 words. Each prompt will ask students to reflect on a question, example, or theme connected to that stage of the course. Papers will be evaluated on how well they answer the prompt; offer a compelling and insightful perspective; use evidence to support the argumentation; and use clear, concise, and grammatical language. The paper prompts will be given out at the end of class on a Wednesday, and students will have 12 days to write their answers.

**Breakdown of Grade and Timeline**

Grading Standards

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent; demonstrates extraordinarily high achievement; comprehensive knowledge and understanding of subject matter; all expectations met and exceeded.</td>
</tr>
<tr>
<td>B</td>
<td>Good; moderately broad knowledge and understanding of subject matter; explicitly or implicitly demonstrates good, if not thorough understanding; only minor substantive shortcomings.</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory/Fair; reasonable knowledge and understanding of subject matter; most expectations are met; despite any shortcomings, demonstrates basic level of understanding.</td>
</tr>
<tr>
<td>D</td>
<td>Marginal; minimal knowledge and understanding of subject matter; more than one significant shortcoming; deficiencies indicate only the most rudimentary level of understanding.</td>
</tr>
<tr>
<td>F</td>
<td>Failing; unacceptably low level of knowledge and understanding of subject matter; deficiencies indicate lack of understanding.</td>
</tr>
</tbody>
</table>

Here’s the best way to get an “A” in the course:

• **attend all of the classes / watch all of the lecture videos promptly** (it’s so much easier to have a sense of a topic or the flow of the course if you attend/watch regularly and aren’t trying to play catch up);
• **review all the assigned materials before the class** (doing so will help the lecture make sense and the lectures will draw on the materials);
• **make friends with fellow students**, trade notes, form study groups, and write 3 practice exam questions after each class;
• **leave yourself time to edit and revise your papers** (don’t leave it until the night before to write them);
• **although the mid-term exam is take-home and “open notes,” study for it as if it isn’t** (you won’t have time to learn material or read articles for the first time during the exam – exams will ask you to synthesize and work with concepts, not repeat details);
• **stay in touch with your TA**, participate often and thoughtfully in class, come to my office hours (this will help you stay connected to the course);
• **practice applying the concepts** we discuss in class immediately as you use and encounter new communication technologies.

Grading Timeline
Assignments will be returned within 14 working days of the date students submit them.

Late submission policy
• Weekly preparation activities: Reports on prep activities will only receive the 2 pts credit if they are turned in by the beginning of the class they are assigned for. You may skip 2 of these over the course of the semester and still receive full credit.
• No extensions will be given for the mid-term and the two short papers:
  o 0-24 hours past the deadline: automatic deduction of 20% of the assignment’s value
  o 24-48 hours after the deadline: automatic deduction of 50% of the assignment’s value
48 hours or more after the deadline: no assignments accepted; automatic grade of zero.

Policy on Re-Grading
If you think a grading error has been made, you may submit any piece of work for re-grading, with these rules:
- you must submit the work for regrading between 2-10 days after receiving the grade (we cannot accept any re-grading requests after this point);
- you cannot submit the work for regrading less than 48 hours after receiving the grade (this is a “reflection period” to encourage you to think about the reasons for your request);
- you must submit any regrading request with a paragraph explaining why you are requesting the re-grading;
- your TA will be the first person who re-grades your work;
- if after the TA’s re-grading you still think that a grading error has been made, you can submit it to me (the professor) for regrading but you must explain why you think there has still been an error;
- at any point in the re-grading process your grade may increase – but your grade may also decrease as a result of re-grading.

Course Schedule: A Weekly Breakdown

Important note to students: Be advised that this syllabus is subject to change - and probably will change - based on the progress of the class, events, and/or guest speaker availability, where relevant. The most up-to-date information about each class will be posted on Blackboard, within the “Content” section.

<td></td>
<td>• READ (short: 2 pages): Standard-Bearers</td>
</tr>
</tbody>
</table>

**Government and you:** Think of two ways in which your communication activities are affected by government policy. How so? How different would they be without that intervention? You may want to pick one way you feel is positive, one you feel is negative. Create a 1-page visual that conveys your key observation(s).

**Government:** can be local, state, national, international; US or other country.

**Bonus:** can you think of the reason behind that government intervention??
• What else is new? The New Yorker. Retrieved from https://www.newyorker.com/magazine/2007/05/14/what-else-is-new

Newspapers you read, the broadcast network behind the radio stations you listen to, the post and shipping systems behind the letters and packages you send and receive, etc...

Pick one of them and list the economic actors involved in making it work. You may need to do some research to find out what are the various elements making up that communication infrastructure and who provides them.

Draw a picture showing their interconnection(s).

Some things to think about:
• How are the various parts coordinated?
• Are standards involved? (which?)

Bonus: how do $$ flow between the various parts of that infrastructure?

Bonus #2: is there a role for government in that system?

If you need help understanding what standards are, read the Standard Bearers article assigned for this class. Or you could have a look at this web page on Digital Standards.

Your communication budget: list the companies that provide your communication services. How much do you pay for their services? How are you billed (e.g. flat fees, per-use fee, etc)? How does this affect your communication practices? (you may focus on 2 or 3 comm services if that makes more sense. Try to pick them so they differ

In this short exercise you’ll keep a 2-day diary of your news habits. Specifically, over the course of any two days (you pick), I’d like you to:

1. Notice when you are exposed to “news”. I put this in quotation marks and leave open its definition because I’d like you to consider your current definition of news and notice where you see news using your current definition. You will likely see it in online/internet contexts, but also be open to noticing all possible places and ways you might be seeing news. Be open and creative in your noticing.

2. Keep a log of your news habits, describing them in ways that are meaningful to you. E.g., it could be the publication, the time of day, the type of content, the form (visual, auditory, etc.), the channel/platform that brought it to you, or anything else you think is meaningful. You come up with a diary / note-taking system that works for you.

3. At the end of the two days, look back at your diary, discuss it with a friend/roommate/family member. Talk with them about what you notice. Are
there any patterns in your habits? What do you not see – i.e., what are you not doing, not encountering? What’s it like to discuss the diary with another person? Was two days too long or not long enough? What might have you seen in a 7-day diary? What parts of your diary were similar to or different from the patterns of your friend/roommate/family member? Based on that conversation, how might you have structured your diary differently or what notes do you wish you’d taken?

4. Upload one page of your original diary (from step 2), marked up to show how wish you had kept it differently (from step 4)

The aim of the exercise is three-fold:

a. To encourage you to think about what “news” is as a category of media, to notice and question your assumptions about what the word means.

b. To help you reflect on your own news habits, to see what you’re doing or not doing, and to have the experience of talking about news habits with another person (not something people often do).

c. To help you consider changes that you might make to your news habits – considering what those changes might be and why you’d be making them.

In class, I’ll give a lecture on some of the “big ideas” in journalism and digital journalism but we’ll also be
talking about your experiences keeping and discussing your news diaries.

<table>

<th>Spring Recess: Mar-14; Mar-16</th>
</tr>
</thead>
<tbody>
<tr>
<td>week 10: Mar-21; Mar-23</td>
</tr>
<tr>
<td>Intellectual Property Wed: guest speaker Prof. Aram Sinnreich</td>
</tr>
</tbody>
</table>

For Monday:
Watch these two short TED talks. This will work best if you engage in “active watching” -- i.e. don’t just sit back and let the video play, but take some notes, google the terms you don’t know, think about how what Johanna Blakley says about fashion might also apply to communication, etc. Use what you learn to complete this week’s prep activity.

  https://www.ted.com/talks/johanna_blakley_lessons_from_fashion_s_free_culture
  https://www.ted.com/talks/lawrence_lessig_laws_that_choke_creativity

For Wednesday:
Please read at least one of the following (preferably two):

  https://www.thedailybeast.com/articles/2016/06/18/if-led-zeppelin-goes-down-we-all-burn

Watch:

  https://www.youtube.com/watch?v=XPosZW8JzzM

1. Pick one of your favorite comm technologies.
2. Identify the main elements that make it work: that may include a device, a service, an app, different kinds of software, content, etc.
3. Research whether each of these elements receives some form of intellectual property protection (trademark, patent, copyright, something else, none,...).
4. Draw a picture summarizing your findings.

Note: the various forms of intellectual property protection are referenced in the two videos you are watching in preparation for this week. So, you should watch them before you do this prep activity. You may need to do a bit of research on your own to find out what they are. This will be good preparation for this week’s lecture.
- You’re looking for a summer job and can only use your immediate family’s connections. Write out what jobs your family connections can lead you to. For example, your sibling is a barber for Jay Z’s assistant who can help you get an entry level job at Roc Nation. This prep will force you to think about social networks and the access they provide. Draw a picture showing how your family connections lead you to that summer job. |
|---|---|---|
| week 12: Apr-04; Apr-06 | Digital Inclusion Guest Speaker (Monday) Prof. David Nemer | On Monday, we welcome Prof. David Nemer who will talk about his upcoming book "Technology of the Oppressed". In preparation for his visit, please read the following pieces (really short, since you are busy working on your first paper):  
  Paulo Freire’s classic "Pedagogy of the Oppressed" serves as an essential reference for Prof. Nemer’s work. I of course encourage you to read the whole book when you get a chance, but if you are pressed for time, this short article will give you the highlights and context.  
  This is about Prof Nemer’s last book, and will give you a sense of the way he approaches his research.  
  Optional (in Portuguese with English subtitles):  
- You have been asked to research how well elementary school students have been able to cope with studying on-line during the pandemic. Prepare a one-page flyer that you will distribute to students (and their parents), inviting them to participate in your study. This flyer should give them some sense of the following:  
1. Who is sponsoring the research? – could be the school district, a company selling on-line curriculum, a parent association, etc.  
2. What is the main research question you will be investigating?  
3. What research method will you use?  
4. Will you provide any incentive for participation?  
5. What results do you expect and how will you share them? |

  - Scott, B. (2013, August 28, 2013). Riches beyond belief. Aeon. Retrieved from http://aeon.co/magazine/society/so-you-want-to-invent-your-own-currency/ | Our guest on Monday will be Professor Lana Swartz, from the University of Virginia, who will discuss “New Money: How Payment Became Social Media”. This will not be a formal lecture, but a conversation interspersed with snippets of video where Lana describes specific aspects of the book. In preparation, I am asking you to read one chapter of her book, as assigned below. You are of course encouraged to read the whole book, which is fascinating, but that’s not required. The entire book is available from the USC library at this link (or search the catalog for the title and you’ll find it). Your prep assignment is to submit a one-page visual including:
1. One aspect (or more) of your personal experience with respect to the topic of your assigned chapter. So for example if you are reading Chapter 3, highlight an interesting aspect of how you are paying with new money.
2. One question for our guest speaker, related to the chapter you read. I will pull questions from your submissions in my conversation with Lana, which is why I am asking you to submit this assignment by 10am on Monday 4/12 rather than right before the class starts.

week 15: Apr-25; Apr-27
Perspectives on Technology and Disability Guest Speaker (Monday) – Prof. Meryl Alper

- **Watch** Stella Young’s TED Talk, “I’m not your inspiration, thank you very much”: http://www.ted.com/talks/stella_young_i_m_not_your_inspiration_thank_you_very_much?language=en

For Wednesday – Technology Appropriation

ALTERNATIVE? week 15: Apr-25; Apr-27
Monday, we welcome Matthew Rantanen, Cyber Warrior for Tribal Broadband. Matt will present the Tribal Digital Village Netowrk, a wireless broadband network he helped create for

MONDAY 4/23
- **BROWSE:** the Tribal Digital Village site at https://sctca.net/southern-california-tribal-digital-village/

This prep activity uses the crowd-sourced Map of Native Land (https://native-land.ca), curated by Native Land Digital, a Canadian non-profit. Take a moment to read their “how it works” page, especially the “Technology” section. Then use the map to identify whose Native Land you are zooming in from.
19 Federally recognized Native American Tribal Reservations in Southern California.

WEDNESDAY 4/29: Review

The map includes links and resources that provide more information about local nations. Explore these and submit a one-page visual documenting one (or more) fact that piqued your interest. If you are in the LA region, UCLA's "Mapping Indigenous LA" offers much useful detail. Some of you are taking this class from parts of the world which are not well covered by these resources – feel free to use other resources covering your own areas, or to pick a part of the world that is better covered by the Map of Native Land where you have lived in the past or might live in the future.

STUDY DAYS
Dates: December 4-7
May 09 by 2:00pm – Short paper #2 is due

There is no final exam in COMM309, but had we had a final exam, it would have been scheduled as follows:

FINAL EXAM PERIOD: December 8-15
Class Start Time Examination Day Hour
2 or 2:30 MWF Monday, May 9 2-4 p.m.

That’s why the due date for the second paper is Monday May 9, 2pm

Land Acknowledgement
USC occupies unceded land of the Tongva/Gabrielino peoples. We acknowledge their elders’ past, present, and future. We call attention to the history of settler colonialism in this place, to the ongoing struggles for recognition and justice and to the living culture of the Tongva/Gabrielino peoples. We acknowledge the many indigenous peoples also residing in this place, including other people’s indigenous to the greater Los Angeles area, to California, to the Americas, and the wider world, who share a history of conquest, violence and enslavement. To learn more about the indigenous history of our region go to https://native-land.ca and https://mila.ss.ucla.edu. To connect to on-campus resources and programs for indigenous or interested students go to the Native American Student Union: https://nasu.usc.edu.

Statement on Academic Conduct and Support Systems
a. Academic Conduct

Plagiarism
Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards.” Other forms of academic dishonesty
are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, policy.usc.edu/scientific-misconduct.

The School of Communication maintains a commitment to the highest standards of ethical conduct and academic excellence. Any student found responsible for plagiarism, fabrication, cheating on examinations, or purchasing papers or other assignments will be reported to the Office of Student Judicial Affairs and Community Standards and may be dismissed from the School of Communication. There are no exceptions to the school’s policy.

In addition, it is assumed that the work you submit for this course is work you have produced entirely by yourself, and has not been previously produced by you for submission in another course, without approval of the instructor.
