SSCI 314, Comparative Sustainability Theory and Practice for Geodesign

Syllabus

Units: 2

Term — Day — Time: Spring 2023 -W - 9-10:50 a.m.

Location: AHF 145D

Instructor: Robert O. Vos, Ph.D., GISP
Office: AHF B57B
Regular Office Hours: Mondays and Fridays 9:30 a.m.-10:30 a.m. Also available by appointment via email.
Contact Info: vos@usc.edu, 213-821-1311, see contact page on D2L for Zoom Room

Library Help: Andy Rutkowski
Office: LIPA B40-A
Office Hours: Thu 10am - 12 pm or by appointment.
Contact Info: arutkows@usc.edu

IT Help: Dornsife Technology Services
Office: SHS 260
Contact Info: spatial_support@usc.edu, 213-740-2775
Course Scope and Purpose

This course introduces the comparative theory and practice of sustainability and its important role in geodesign. Sustainability is among the most pressing scientific and social challenges of our time and one of the major goals for the successful practice of geodesign. In spite of official attention from the United Nations in the late 1980’s and several rounds of sustainable development goals since then, local examples of progress have not yet summed to a global equilibrium for planetary ecosystems. Global climate change, ocean degradation, deforestation, habitat loss, and species endangerment continue nearly unabated. Using sustainability theory, this course comparatively interrogates local examples to uncover what hinders efforts and discover what types of geodesign practice in which sorts of places may most rapidly bring closer the goal of a sustainable global environment.

Although much of the theory of sustainability is global, and in some sense thought to be universal, the opportunities to realize sustainability at local levels vary greatly due to divergent histories, cultures, languages, physical geographies, infrastructures, economic resources, and systems of governance. Indeed, because places can be constructed and interpreted in a myriad of ways by different people, the foregoing list is hardly exclusive of the sorts of divergences students may find when investigating specific places.

This course will largely, but not exclusively, focus on cities. In 2008, an important global threshold was reached, with over 50% of people living in cities. According to UN forecasts, by 2050 70% of the Earth’s growing population will be living in urban areas. Yet, as students may find with many aspects of this course, this historic global milestone elides significant local differences in the rate, timing, and general social and physical nature of urbanization.

Learning Outcomes

Upon successful completion of this course, a student should be able to:

- Describe and apply major elements of sustainability theory to urban places;
- Engage with the history and socio-cultural frameworks of places different from ones they are accustomed to;
- Distinguish globally applicable theory from place-specific practice;
- Set and advocate for priorities for geodesign practice;
- Evaluate and choose among geodesign methods in response to priorities for sustainability practice in geodesign; and
- Demonstrate an international awareness of the problems and solutions for sustainability with respect for the diversity of places, individual human rights, and the needs of other species.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.
Prerequisite(s): None
Co-Requisite(s): None
Recommended Preparation: SSCI 201: Principles of Geodesign or SSCI 165Lgw: Sustainability Science in the City.

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours)

Diversity and Inclusion – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students’ learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect of others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

Course Structure

The first four weeks of the course offer an immersion in sustainability theory and its role in geodesign. At the end of this first course module, each student will work with the instructor and classmates to choose a particular urban place in which to investigate and establish priorities for geodesign practice towards sustainability. Each student will choose a different place to study, and the aim is to include, across the students in the class, a wide variety of places at various scales around the world. For lectures throughout the course, the instructor will include examples from cities in the United States, but students will investigate urban places outside the United States.

The second and third modules of the course will cover geodesign practice in physical and social systems of cities. A series of exercises will be provided in homework packets for the second and third modules of the course. Students will prepare the exercises before the class session in
which they are indicated and will contribute to discussions based on the preparation of the exercises. The exercises will culminate in the second and third project reports at the end of the second and third modules of the course.

The course ends with a discussion of governance and scale, comparing successes and failures in regional planning and governance. The various exercises and reports will culminate in a final story map project that will be presented at the final class session and become an important part of each student’s electronic portfolio.

**Technological and Communication Requirements**

ArcGIS is provided online via the SSI Server; hence, you do not need to install it on your own computer. Instead, every student must have the following technology requirements:

- A computer with a fast Internet connection.
- A functional webcam and a microphone for use whenever a presentation or meeting is scheduled.
- An up-to-date web browser to access the Server

If a student does not have access to any of these, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here: [https://keepteaching.usc.edu/students/student-toolkit/](https://keepteaching.usc.edu/students/student-toolkit/)

**SSI Server and Tech Support** – This course utilizes the SSI Server which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at spatial_support@usc.edu, making sure to copy (cc) me on the email.

**Communications** – All materials to be handed in will be submitted via Blackboard. It is each student’s responsibility to stay informed about what is going on in our course. In addition to email about time-sensitive topics, any important announcements will be posted on the Announcement page in Blackboard. Be sure to check these each time you log onto Blackboard.

I will send via email through Blackboard any notices that are time sensitive. Please be sure that you read as soon as possible all email sent from Blackboard or from me. Do not ignore course email until the day before assignments are due. Also double check to be sure that email sent from the USC blackboard account does not go into your junk mail!

While I am usually on-line all day and will probably respond to emails from students very quickly, I will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay. In the rare case when I expect to be off-line for more than 72 hours, I will post an announcement on the Blackboard site.
Required Readings and Supplementary Materials

All of the supplementary readings listed below are available online through USC Libraries or under the tab marked “Readings” on the course Blackboard.

Required Textbook:

Supplemental readings:

- Ruddell, D., A. Brazel, W. Chow, and A. Middel. 2020. The urban heat island effect and sustainability science: Causes, impacts, and solutions. In B. Hagen and K.D. Pijawka (Eds.),

Description and Valuation of Assessments

For this two-unit course, students will participate in 30 hours in the classroom and can expect 60 hours of outside class work over the course of the semester.

This course includes a diversity of assessments that allow students to show mastery of the material in a variety of ways. The different types of assessments are described below and their point value to final grades are listed in the following Grading Breakdown section.

**Exercises and Short Plan – 3 worth a total of 24 points**

A set of 3 exercises is included in Modules 2 and 3. The “hands-on” tasks that comprise these exercises will introduce the tools of scientific inquiry and give students practical experience in implementing spatial tools within geodesign practice. All students must complete the first of these on urban footprints. For the second and third of these, students may choose among the topics covered in Modules 2 and 3, and students will provide the instructor with a short plan worth 1 point indicating their choices and as a basis for discussion before commencing this work.

**Projects – 2 worth a total of 20 points**

Two projects are spread across the course. The first project relates to initial research on and establishing the urban place that the student will work on during the exercises in the course. The second compiles and frames the work to be done for the final story map project as a written proposal.
**Final Story Map Project – 1 worth a total of 25 points**

The final project will set priorities and identify methods for geodesign practice in the urban place that a student has studied throughout the semester. The story map format will allow for students to use data visualizations to put forward a compelling case for geodesign work towards sustainability in a specific place. The story maps will be a basis for lively discussion at the final class session and will be a valuable part of the student’s electronic portfolio.

**Class participation – 1 worth a total of 10 points**

This class is taught in a seminar style and class participation is both expected and assessed. Class participation includes assigned short presentations of readings and raising questions and issues for clarification during lectures and discussions led by the instructor or guest lecturers. Students who stay current with the reading will be best positioned to participate. Assessment of participation will be based on feedback on assigned short presentations and attendance records.

**Final Exam – 1 worth a total of 20 points - and Other Policies**

The final exam is closed book. This exam will cover content learned during lecture as well as in the course readings.

No make-up opportunities will be offered for the final exam, so mark the appropriate date on your calendar! If you have a legitimate conflict, per the USC policy on Final Exam Scheduling, speak with me as soon as possible. In addition, please note that there is **no credit for late assignments**.

**Grading Breakdown**

The table below shows the breakdown of the assessments and their weight in the final grade. The emphasis is on regularly completing a several projects as well as solid performance on the final examination.

**Final Examination (Friday, May 5, 2023, from 8 a.m.- 10 a.m.)**

**Statement on Academic Conduct and Support Systems**

**Academic Integrity:**

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, comprises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university’s mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others or “recycle” work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.
The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

For more information about academic integrity see the student handbook or the Office of Academic Integrity’s website, and university policies on Research and Scholarship Misconduct.

Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment, or what information requires citation and/or attribution.

**Students and Disability Accommodations:**

USC welcomes students with disabilities into all of the University’s educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

**Support Systems:**

*Counseling and Mental Health* - (213) 740-9355 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

*988 Suicide and Crisis Lifeline* - 988 for both calls and text messages – 24/7 on call

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

*Relationship and Sexual Violence Prevention Services (RSVP)* - (213) 740-9355(WELL) – 24/7 on call

Free and confidential therapy services, workshops, and training for situations related to gender-and power-based harm (including sexual assault, intimate partner violence, and stalking).
Office for Equity, Equal Opportunity, and Title IX (EEO-TIX) - (213) 740-5086
Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

Reporting Incidents of Bias or Harassment - (213) 740-5086 or (213) 821-8298
Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

The Office of Student Accessibility Services (OSAS) - (213) 740-0776
OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

USC Campus Support and Intervention - (213) 740-0411
Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity, Equity and Inclusion - (213) 740-2101
Information on events, programs and training, the Provost’s Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call
Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call
Non-emergency assistance or information.

Office of the Ombuds - (213) 821-9556 (UPC) / (323)-442-0382 (HSC)
A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

Occupational Therapy Faculty Practice - (323) 442-2850 or otpf@med.usc.edu
Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.
