

# USC Games

## Advanced Games Project Fall 2023

CTIN 491 - Section 18370

CTIN 591 - Section 18371

CSCI 491aL - Section 29989

CSCI 529a - Section 29992

CTIN 491 Directors - Sections 18418, 18422

CTIN 291 - Section 18413 – ONLY for LEAD Producers who have not taken the Intermediate Pre-requisite (CTIN-484)

ITP 180 – ONLY for NON-LEAD Producers who have NOT taken the Intermediate Pre-requisite (CTIN-484)

**Units: 4**

**Fall Semester 2023:** Thursdays from 2:00pm-5:20pm

**Location:** USC Games Studios aka [EGG Building](#) @ 746 West Adams, Los Angeles, CA 90089  
(students will be notified in advance if there is a change of class location)

+

[Kerckhoff Hall](#) for Project Review @ 734 West Adams Blvd, Los Angeles, CA 90007

ALWAYS meet in EGG Building at the Beginning of Class

### **Instructors:**

**Contact Info:** [agp-faculty-2023-2024@googlegroups.com](mailto:agp-faculty-2023-2024@googlegroups.com)

### **Lead Instructor:**

**Andy Nealen (Faculty Lead)**

**Office:** SCI 201N

**Office Hours:** TBA

**Contact Info:** [nealen@usc.edu](mailto:nealen@usc.edu)

### **AGP Instructors w/their Functional Roles:**

Danny Bilson	(Narrative)	<a href="mailto:bilson@usc.edu">bilson@usc.edu</a>
Scott Easley	(Art + Animation)	<a href="mailto:seasley@usc.edu">seasley@usc.edu</a>
Jim Huntley	(Marketing)	<a href="mailto:jbhuntley@usc.edu">jbhuntley@usc.edu</a>
Lesley Mathieson	(Design)	<a href="mailto:lmathies@usc.edu">lmathies@usc.edu</a>
Timothy Lee	(Quality Assurance)	<a href="mailto:lee641@usc.edu">lee641@usc.edu</a>
Matthew Whiting	(Engineering)	<a href="mailto:whitingm@usc.edu">whitingm@usc.edu</a>
Mason Lieberman	(Audio)	<a href="mailto:masonlie@usc.edu">masonlie@usc.edu</a>
David White	(Production)	<a href="mailto:dgmason@usc.edu">dgmason@usc.edu</a>
Jennifer McCormick	(Usability)	<a href="mailto:jm10180@usc.edu">jm10180@usc.edu</a>
Chevon Hicks	(UI/UX)	<a href="mailto:chevonhi@usc.edu">chevonhi@usc.edu</a>

### **Class Student Assistants:**

Samikshya Mohapatra	<a href="mailto:smohapat@usc.edu">smohapat@usc.edu</a>
Nilamadhab Mohanty	<a href="mailto:nmohanty@usc.edu">nmohanty@usc.edu</a>
Yidan Wu	<a href="mailto:vidanwu@usc.edu">vidanwu@usc.edu</a>

**IT Help:** Richard Bennett

**Contact Info:** [rbennett@usc.edu](mailto:rbennett@usc.edu) (213) 740 6564

## **Course Description**

This class is where third- and fourth-year undergraduate and graduate students in Design, Computer Science-Games, and other disciplines from a variety of USC and external partner schools are exposed to working on teams needing both technical skill as well as the emotional maturity to work within a collaborative group. CTIN 491 etc. intentionally models the world of professional game development: the post-graduate workplace we are preparing students for.

The most important feature of this class is that it empowers students to work as a team to execute a collaborative creative vision and have fun in the process.

Advanced Games Projects (AGP) is a capstone class where undergraduates and graduates from Cinema IMGD and Viterbi collaborate on large-team games projects, working with students from departments across the University, including—but not limited to—Thornton, Marshall, Annenberg, and Roski. AGP also partners with complementary Art Schools around the US, with a focus on schools in Southern California to facilitate team in-person meetings and instruction.

This class is where advanced undergraduate/graduate students will need both technical skills and emotional maturity to work within a collaborative group. CTIN 491 intentionally models the world of professional game development- the post-graduate workplace we are preparing students for. The finished product is often used as a key portfolio piece for job seekers.

Before taking the class, students will have learned the core principles of game design, can work in-engine, and have collaborated on smaller teams on projects. In AGP, students will take those skills to the next level, bringing their individual talents into a comparatively large team that will operate like a small development studio. Team members will work collaboratively on one large project for an extended period and incorporate faculty (aka “publishing”) feedback and direction as needed. The full production course covers two semesters from Fall through Spring.

The selection of the slate of AGP projects is made in the year prior through a rigorous pitch process. Key roles on these teams must be staffed by registered class members. Team Leads work closely with instructors and mentors to learn to manage their teams and contribute to a large project, while individual team members participate regularly in workshops to learn about their functional roles and actively work on challenges they are facing during the development of their respective games.

Teams learn to work through sprints and defined goals to meet a larger schedule, regularly presenting their work in class for feedback from their fellow students, instructors, and external industry experts, while working in a professionally modeled production environment. The class culminates as the centerpiece of the annual USC Games Expo presentation at the end of the Spring semester, where students showcase and represent their work to a large community of industry professionals.

Teams will be given odd and even numbering and we will review “odds” and “evens” on alternate weeks to allow enough time for quality feedback.

In addition, there will be the following weekly meetings:

- Game Directors will meet at a to be determined day/time to discuss topics the director role, with a focus on creative process management, team leadership.
- Game Directors will meet on a to be determined day/time to discuss project issues and blockers as well as faculty requests.

### **Learning Objectives**

The goal of the course is for students to work as a team over the course of a school year to design and develop a fully polished, playable 10-30-minute game demo, ready for professional demonstration, prepared for consumer play and faculty evaluation by the end of the school year. This demo will encompass a segment of the game which highlights its core design pillars, has polished art and animation, is fun, intuitive, and fully playable with minimal bugs by the time they achieve “gold master” in May.

AGP offers students a window into their future careers, providing the closest academic experience of working in the Games industry. Before taking the class, students will have learned the key principles of game design, can work in-engine, and have collaborated on smaller teams on projects. In AGP, students will take those skills and operate as a “small studio,” working collaboratively on one large project for an extended period and incorporating faculty direction as needed. Once again, as mentioned above, the finished product is often used as a key portfolio piece for job seekers.

Focused feedback on both process and product from instructors provides a solid foundation to facilitate project-based learning. Lectures and hands-on guidance on project management, design, production, research, and publishing, gives students a taste of the “real world” that they’ll experience as they embark on their careers as professional game creators. Students working in specific “functional areas” will have focused sessions with instructors to learn the skills of their position and troubleshoot the inevitable problems that arise during development. The class will teach all students a better understanding of their roles on larger teams, what everyone does, and how to collaborate as part of a game development process from concept to “ship.”

### **Working Hours**

The standard formula of two hours of work outside class per unit per week is the minimum expectation for hours put into an AGP project. Students are expected to perform at the high levels needed to build quality interactive experiences. Dedication to the team and its shared goals is expected.

### **Key Milestones and Deliverables (minimum requirements)**

*Pre-Mid Term Key Deliverable- First playable, A graybox-only hands-on demonstration of the core mechanic.*

*First Semester Mid Term- GDD Presentation + List of Technical Challenges + 360 Feedback Pilot, A full-class presentation by multiple team members of the “Final” Game Design Document (GDD), Engineering Technical Challenges, and—returning for 2023-24—a limited 360-Feedback Pilot.*

*Fall Semester Final- State of the game.* Roughly five minutes of gameplay featuring one or more of the distinct beats or movements of the game flow and “left-to-go” elements and blockers to get to Alpha when classes resume in January. This will serve as a “stake in the ground” for December.

*Spring Semester Month 1- Alpha Build.* In or around week 3 of the second semester, the teams will deliver their Alpha builds for review.

*Spring Semester Late Mid Term- Beta Build.* Feature complete, version of the demo, final assets incorporated. The Demo at this stage should be “ready to ship, except for a few bugs”

*Spring Semester Final- “Gold Master”/ USC Games Expo.* Roughly 10-30 minutes of highly polished gameplay. Entire build should be distributable for publishing.

**Prerequisite(s):** CTIN 484, CTIN 489

**Co-Requisite (s):** None

**Concurrent Enrollment:** None

**Recommended Preparation:** CTIN 458, CTIN 497

**Course Notes:** Letter Grade

### **Description and Assessment of Assignments**

Assignments are laid out in an [Integrated Milestone Calendar](#) which provides **general direction** on deliverables and due dates. The “Key Milestones” listed above are the priority, but other assignments are due throughout the school year. The Milestone Calendar is regularly updated, as each project has its own unique velocity and faculty will adjust dates as necessary.

**IMPORTANT:** the due dates for non-Key Milestone projects are not rigid or meant to be a “one-size-fits-all” process. Each project is different and has its own production flow. If teams need more time, support, and direction, they can notify the Lead Instructor(s) and appropriate

Functional-Specific Faculty.

Game and Narrative Design Documents

Game Design / Technical Design / Narrative Walkthrough Documents (due week 1)

Final Narrative Story Design (due week 3)

“Final” Team Milestone Dates Set (due week 5)

Marketing Creative Brief Due (due week 10)

Art Bible (due final week of Fall semester)

Game Design “Depository” of documents (due as needed by project, should be shared with team + instructors)

Playable Game Level

Delivered as an executable or application

Must show off and demonstrate the key features of the game

The level must be working software - e.g. not a mockup

The level should include art assets appropriate for your project including SFX, music, animation, HUD/GUI

Zipped project on server

We expect your game to be delivered in a zip file and weekly builds posted on Perforce by 5PM PST every Tuesday.

If your team is running late in “pushing” to Perforce by the deadline, it is the team’s responsibility—via their Creative Director or Lead Producer—to notify the faculty via email.

Project Properly Organized on Server Directory

We expect proper organization and version control of your project on Perforce, following best practices outlined by faculty at the beginning of the year.

**Marketing Deliverables:**

Marketing Content can be developed in a variety of different ways/formats, but the final elements used will be based on consumer feedback/preference determined via research.

Key Art / Game Poster

We expect each team to produce a marketing-style game poster that tells the story and promotes the game.

5-10 Screenshots: Focusing on different stages or features

Focusing on different stages or features Show off the key features of the game

These shots can be used for your website or personal portfolio.

Gameplay Video - edited, 30 seconds-3 minutes in length

We expect you to make a polished video showing off the game, usable to market to festivals, individuals, and others.

Game Microsite/Website

We expect each team to create a marketing website or microsite for your game that incorporates all of the materials described above.

All teams must present and demo at USC Games Expo at the end of school year.

## Grading Breakdown

Assignment	% of Grade	Measure
Project	50	Key Milestone Deliverables
Functional Group	25	Functional Milestone Deliverables
Individual	25	Weekly Task Sheets
<b>TOTAL</b>	100	100

Like a professional industry environment, performance will be measured by a mix of 1) overall project development and deliverable, 2) functional group-specific deliverables, and 3) individual contribution. For grading purposes, all projects start out as a “B+” and move up or down based on the result and development processes used along the way. Evaluation will be based on how well a project realizes the goals the team has set out for itself and the project. Ultimately, this course exists to empower students to work collectively to put an engaging, unique experience into the hands of players.

“**Key Milestone Deliverables**” are outlined in an earlier section. For each Key Milestone Deliverable, a grade will be provided to the team, and grades for aggregated at the end of the semester to determine the Project grade, aka 50% of the individual student’s grade. Much like the professional world, the most important evaluator will be the quality of the experience you help build.

“**Functional Milestone Deliverables**” are deliverables underlined in the Integrated Milestone Calendar and each functional group has 2 due per semester. If there are multiple people in a functional group, they will share the same grade for these deliverables.

“**Individual**” will be determined by the Weekly Task Sheet that Producers are primarily responsible to fill out. The specific methodology will be outlined in the first class and the sheet is reviewed weekly.

Because of the unique needs of each project, it is impossible to dictate a structure that applies to each so exactly that we have a mathematical category for attitude, help, efficacy of code, importance within the project, foresight, insight, honesty, collaborative spirit, and many other amorphous qualities that are crucial to working within a team but divorced from coding. Nonetheless, those are invaluable traits that will directly contribute to the success of your project.

***Important: The faculty of USC IMGD reserves the right to cancel any AGP production due to lack of team performance and reassign the team members to another project.***

### **Assignment Submission Policy**

During class, each team must be ready to present the current state of the game when called upon, and individuals on each team must be prepared to discuss his/her work from the

previous week. Some weeks, there will be presentations, which require the teams to be ready to present the game or an aspect of the game or its production process to the class and instructors. However, **EVERY** week, each team **must** have a playable build, even if it's the prior week's build as backup.

Other assignments are the sprints teams determine for themselves, and area leads are responsible for assigning tasks to their team members as a part of the sprint.

Team members are expected to put in time in the advanced games laboratory to work on their tasks for each sprint.

Team members and leaders are expected to bring the results of sprints and active development problems to the workshop meetings with instructors.

### **Missing an Assignment Deadline, Incompletes:**

The only acceptable excuses for missing a Key Assignment deadline or taking an incomplete in the course are personal illness or a family emergency. Students must inform the instructor **before the assignment due date** and present verifiable evidence for a deadline extension to be granted. Students who wish to take incompletes must also present documentation of the problem to the instructor or student assistant before final grades are due.

For assignments turned in after the assignment deadline without prior permission from the instructor, a penalty will be imposed equal to 10% of the total available points for the assignment, for each day or part of a day that the assignment is late, up to a maximum of seven days.

### **Attendance Policy:**

Punctual attendance at all classes is mandatory. Students arriving more than five minutes late to three classes, more than ten minutes late to a single class, or leaving early, will be marked as having an unexcused absence from class unless prior permission has been obtained from the instructor. The following guidelines are from the Interactive Media & Games Division handbook regarding absences and grading and apply to all students.

Guidelines for absences affecting grading

- Three or more absences: lower grade one full grade point (for example, from A to B)
- Five or more absences: request to withdraw from a course (instructor's discretion)

Social media, including text messaging and internet messaging, are not allowed to be used during class unless explicitly permitted by the instructor. A 0.5% grade reduction will result from each occurrence of a student being found using them.

### **Diversity**

In making games and interactive media in a professional and ethical way, it is important that you consider diversity. When looking at your projects, you should consider who is depicted and how this work will impact others. What kinds of individuals and communities are represented in your work? What point of view does your work express? This class may assist you in learning how to make work that includes diverse viewpoints, and may discuss racial, religious, gender and sexual orientation issues in the context of games and interactive media.

## **Additional Policies**

Add any additional policies that students should be aware of: late assignments, missed classes, attendance expectations, use of technology in the classroom, etc.

## **Course Schedule: A Weekly Breakdown**

- (Please see most-recent [Integrated Milestone Calendar](#) for a week-by-week breakdown). These dates are subject to change based on individual faculty discretion.

## **Statement on Academic Conduct and Support Systems**

### **Academic Conduct**

Plagiarism – presenting someone else’s ideas as your own, either verbatim or recast in your own words – is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism on the OAI website

<https://academicintegrity.usc.edu/>.

Other forms of academic dishonesty are equally unacceptable. See additional information on university policies on scientific misconduct, <https://academicintegrity.usc.edu/>.

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator.

The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation.

The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations, you may contact the Title IX Coordinator directly ([titleix@usc.edu](mailto:titleix@usc.edu) or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

Discrimination, sexual assault, and harassment are not tolerated by the university. You are encouraged to report any incidents to the *Office of Equity and Diversity* <http://equity.usc.edu/> or to the *Department of Public Safety* <https://dps.usc.edu/>. This is important for the safety whole USC community. Another member of the university community – such as a friend, classmate, advisor, or faculty member – can help initiate the report, or can initiate the report on behalf of another person. *Sexual Assault Prevention and Survivor Services* <https://sites.usc.edu/clientservices/> provides 24/7 confidential support, and the sexual assault resource center webpage <https://dps.usc.edu/safety-tips/sexual-assault-and-violence/> describes reporting options and other resources.

### **Support Systems**

Several of USC’s schools provide support for students who need help with scholarly writing. Check with your advisor or program staff to find out more. Students whose primary language is not English should check with the *American Language Institute* <http://dornsife.usc.edu/ali>,

which sponsors courses and workshops specifically for international graduate students.

*The Office of Student Accessibility Services* <https://osas.usc.edu/> provides certification for students with disabilities and helps arrange the relevant accommodations. If an officially declared emergency makes travel to campus infeasible, *USC Emergency Information* <http://emergency.usc.edu/> will provide safety and other updates, including ways in which instruction will be continued by means of blackboard, teleconferencing, and other technology.

**Disruptive Student Behavior:**

Behavior that persistently or grossly interferes with classroom activities is considered disruptive behavior and may be subject to disciplinary action. Such behavior inhibits other students' ability to learn and an instructor's ability to teach. A student responsible for disruptive behavior may be required to leave class pending discussion and resolution of the problem and may be reported to the Office of Student Judicial Affairs for disciplinary action.

**Safer Spaces:**

In this class, we make a commitment to foster a welcoming and supportive environment where students of all identities and backgrounds can flourish. This means that we will issue content warnings as appropriate, use preferred pronouns, and respect self-identifications. While debate and discussion are welcome, please remain aware of the implications of your words and the images that you include in your work. If the instructor or another student points out that something you have said or shared with the group might be offensive, avoid being defensive; this is a valuable opportunity for us to grow and learn together. If you have a concern about any aspect of the class, you are encouraged to speak with the instructor. If you feel uncomfortable speaking with the instructor, you are also welcome to speak with either the undergraduate or graduate advisor for the division, who can discuss the issue with you directly or point you toward other on- and off-campus resources for addressing your concern.

**Syllabus Updates:**

This syllabus is subject to change up to the beginning of class and possibly over the semester. Please check the posted syllabus and [Integrated Milestone Calendar](#) regularly, and note all changes that are shared by the instructor in class.
