SYLLABUS

SAE 549: Systems Architecting  
Fall 2023

Class Session: Monday, 4:00 pm – 6:40 pm, ONLINE

Class Section: 32319D (DEN/Off-campus)

Contact Information:
Instructor: Prof. Azad M. Madni
Office hours: By Appointment Only
Office location: OHE 500T
Office phone: (213)-821-1001
E-mail: Azad.Madni@usc.edu

Teaching Assistant: Shatad Purohit
Office hours: By Appointment Only
Office location: OHE 500T
E-mail: shatadkp@usc.edu

Kindly use online discussion boards (available on D2L) if you have any questions on course materials, midterm, or final paper. The turnaround time for TA to answer questions is 24 hours. The use of email should be limited to emergency situations. The TA will consult with instructor before responding.

Course Learning Objectives:

■ To improve students’ ability to think critically, ask the right questions, and apply the right methods when architecting various types of systems.
■ To improve students’ understanding of the role of system architects and their relationship to systems engineers and transdisciplinary systems engineering.
■ To introduce the students to new, advanced multidisciplinary topics (e.g., systems thinking, systems modeling, psychological principles in systems architecting, biologically-inspired architectures, agent-based modeling, human capabilities and limitations, human behavior modeling) relevant to complex systems architecting.
■ To introduce the students to key concepts associated with trade-off analysis which are important to both systems architecting and engineering.

Readings and Notes:

■ Weekly lecture notes will be posted on the Desire to Learn (http://www.courses.uscden.net)
■ Required Text:
■ Recommended Reading:
  ➢ Madni, A.M. and Augustine, N(Eds.) Handbook of Model Based Systems Engineering, Springer, 2023
Grade
Your grade will be based on one exam (will account for 40% of your final grade) and a final term paper (which will account for the remaining 60% of your final grade). The exam will be administered online through Desire 2 Learn.

Exam
- The exam will consist of multiple questions that will test students’ knowledge about the fundamentals of systems architecting, complex systems, and systems thinking. The exam will be on all the subjects covered in previous lectures and assigned readings. This will be timed exam (2 hours and 40 minutes). The exam will be administered on Monday October 19 2023.
- Collaboration on the exam is forbidden. Violators will receive an automatic F for the course.

Term Paper:
The term paper should address the following problem:
Describe and analyze the architecture of a selected system as a case study. Your analysis should discuss how the architecting process led to the architecture. The architecting process should address the heuristics used, key tradeoffs, questions posed, people involved, options generated, and decisions made, the outcomes and implications for the future.

Submit a maximum 1-page abstract by September 28, 2023 3:30 PM on your chosen topic.

Student must write on a specific system from one of the following categories.

- Autonomous Systems
- Smart phones or smart tablet computers
- Passenger Aircraft
- Space Telescopes
- Robotic Systems
- Manned Space Transport
- Airborne Platforms (e.g., Unmanned Aerial Vehicles)

LENGTH: The term paper should be between 6-8 pages (excluding references and appendices, and cover page), single-spaced, in 12-point type. The term paper is due on or before December 7, 2023 3:30 PM.

DELIVERY: The term paper must be submitted through the Desire to Learn (D2L) system. Links for submitting final paper will be available on D2L (http://courses.uscden.net).

LATENESS: Term papers are due on December 7, 2023 3:30 PM. No late papers will be accepted after the due date and time, and the student will receive an automatic F grade for final paper.

UNIVERSITY LEVEL ISSUES
- Statement for Students with Disabilities:
  Any student requesting academic accommodations based on a disability is required to
register with Disability Services and Programs (DSP) each semester. A letter of verification for approved accommodations can be obtained from DSP. Please be sure the letter is delivered to me (or to TA) as early in the semester as possible. DSP is located in GFS 120 and is open 8:30 a.m.–5:00 p.m., Monday through Friday. The phone number for DSP is (213) 740-0776.

■ Statement on Academic Integrity:
USC seeks to maintain an optimal learning environment. General principles of academic honesty include the concept of respect for the intellectual property of others, the expectation that individual work will be submitted unless otherwise allowed by an instructor, and the obligations both to protect one’s own academic work from misuse by others as well as to avoid using another’s work as one’s own. All students are expected to understand and abide by these principles. Scampus, the Student Guidebook, contains the Student Conduct Code in Section 13.00, while the recommended sanctions are located in Appendix A: https://scampus.usc.edu/university-student-conduct-code/. Students will be referred to the Office of Student Judicial Affairs and Community Standards for further review, should there be any suspicion of academic dishonesty. The Review process can be found at: http://www.usc.edu/student-affairs/SJACS/.
