

# USC Dornsife

Dana and David Dornsife  
College of Letters, Arts and Sciences  
*Spatial Sciences Institute*

## SSCI 572, GIS and Landscape Architecture

### *Syllabus*

**Units:** 2

**Term Day Time:** Fall 2023, Thursdays, 12:00 p.m. to 1:50 p.m. PT.

**Location:** AHF145A

**Instructor:** Guoping Huang, D.Des.

**Office:** AHF B57B

**Office Hours:** Wednesday 1:00 – 3:00 pm or by appointment via email.

**Contact Info:** [guopingh@usc.edu](mailto:guopingh@usc.edu), 213-740-5192 (zoom phone), see contact page on D2L Zoom Room

**Library Help:** Andy Rutkowski

**Office:** LIPA B40-A

**Office Hours:** Thu 10:00 a.m.-12:00 p.m.

**Contact Info:** [arutkows@usc.edu](mailto:arutkows@usc.edu), see contact page on D2L for Zoom Room

**IT Help:** Myron Medalla

**Office:** AHF B56B

**Office:** By appointment via email

**Contact Info:** [spatial\\_support@usc.edu](mailto:spatial_support@usc.edu), 213-740-4415

## Course Description

This course explores the use of geographic information science, systems and services to support landscape architecture projects. The topics covered in this course are organized into three modules. The first will discuss the role of spatial thinking in design, the special characteristics of spatial information, and the vector and raster data models in spatial data representation. Data collection by using GPS, drone, and GIS apps will also be included in this module. The second module will introduce students to spatial analysis . By using a variety of analytical and modeling tools, students are expected to have a deep understanding of the socio-economic, physical, and ecological environments that are critical to landscape architecture. Building on top of the previous two modules, the third module explores the use of GIS in supporting design, especially 3D design of land, urban, and plant forms. Students will become familiar with the interoperability between GIS programs and design programs such as Grasshopper, Rhino, and CAD.

Modern-day GIS (geographic information systems) serve as systems of record, insight, and engagement and as a result, support the profession and practice of landscape architecture. This course will show how all of these systems complement one another and how GIS can promote and provide data-driven spatial analysis and modeling to support the design, approval, implementation, and performance assessment phases of landscape architecture projects that span multiple spatiotemporal scales.

### *Learning Objectives*

Upon successful completion of this course, a student will be able to:

- Understand the iterative loop of evidence-based Geodesign approach.
- Identify the ways in which GIS can be used to support spatial thinking, analysis, modeling and mapping;
- Explain the special characteristics of spatial information and the raster and vector data models that are typically used to represent real-world phenomena;
- Describe the ways in which the built and social environments can be modeled using GIS;
- Describe the ways in which hydrological and ecological systems can be modeled using GIS;
- Use GPS and GIS apps to gather their own spatial information; and
- Employ spatial models and basic cartographic principles to communicate the results of landscape architecture projects and any associated research.
- Choose appropriate tools across a variety of programs to migrate data, maps and drawings for design while keeping spatial integrity.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

**Prerequisite(s):** None

**Co-Requisite(s):** None

## **Class Conduct**

**Harassment, sexual misconduct, interpersonal violence, and stalking** are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly ([titleix@usc.edu](mailto:titleix@usc.edu) or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours)

**COVID-19 policy** -- Students are expected to comply with all aspects of USC's COVID-19 policy including, but not limited to, vaccination, indoor mask mandate, and daily TrojanCheck. Failure to do so may result in removal from the class and referral to Student Judicial Affairs and Community Standards. Students are recommended to keep safe physical distancing, whenever possible, to prevent any possible transmission. Please contact your instructor if you have any safety concerns.

**Diversity and Inclusion** – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect of others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

## **Technological and Communication Requirements**

ArcGIS pro and ArcGIS Online are provided online via the GIST Server; hence, you do not need to install it on your own computer. Instead, every student must have the following technology requirements:

- A computer with a fast Internet connection.
- A functional webcam and a microphone for use whenever a presentation or meeting is scheduled.
- An up-to-date web browser to access the Server

If a student does not have access to any of these, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here:

<https://keep-teaching.usc.edu/students/student-toolkit/>

*Desire2Learn (D2L)* – This course will utilize the Desire2Learn (D2L) learning management system which allows students to access course content, upload assignments, participate in discussion forms, among other learning experiences. The D2L platform provides flexibility in the learning experience where students can participate in the course residentially or remotely, synchronously (meeting together at the same time) or asynchronously (accessing videos and course content outside of class).

*SSI Server and Tech Support* – This course utilizes the SSI Server which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at [spatial\\_support@usc.edu](mailto:spatial_support@usc.edu), making sure to copy (cc) me on the email.

*Communications* – All assignments given and all materials to be handed in will be submitted via D2L. The instructor will also create and monitor discussion forums through which students can discuss issues and assignments as needed. Students should read all email sent from D2L or from course instructor(s) as soon as possible. Also, students who do not regularly use their USC email accounts should double-check to be sure that mail sent from both the D2L accounts and the instructor's account (noted above) to your USC account is forwarded to an address used regularly and does not go into junk mail. The instructor will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay. In the rare case that an instructor is off-line for an extended period of time, an announcement will be posted to the class D2L site. Due to the synchronous and asynchronous nature of this course, it is each student's responsibility to stay informed and connected with others in our course. In addition to email, students are expected to login to D2L regularly to check for announcements.

*Discussion forums* – On the D2L site, I will post a series of discussion threads relevant to various sections of the course. Discussions provide a key means for student-to-student discussion and collaboration that can replicate the face-to-face contact you may have experienced in traditional classrooms. Here students can provide support to each other while working on your assignments, sharing hints and helpful tips, as you would in a classroom laboratory. Please post your questions about assignments there, as you would ask them publically in the classroom. I monitor the discussion threads and offer comments when necessary, but more importantly, consider the discussion board a key way to connect with your classmates and share your discoveries.

## Required Readings and Supplementary Materials

All of the readings listed below are available online through USC Libraries or in the weekly folders on the course D2L. There is no required textbook for this course.

- Bolstad, P. (2019). *GIS fundamentals: A first text on geographic information systems* (6th Ed.). Ann Arbor, MI: XanEdu Publishing [Ch. 2 only].
- Dangermond, J., & Goodchild, M. F. (2020). Building geospatial infrastructure. *Geo-spatial Information Science*, 23
- Miller, W. (2010). Introducing Geodesign: The concept. ESRI white paper, <https://www.esri.com/library/whitepapers/pdfs/introducing-geodesign.pdf>
- Downs, R. M. (1997). The geographic eye: Seeing through GIS? *Transactions in GIS*, 2, 111-121.
- Duckham, M. (2015). GI expertise. *Transactions in GIS*, 19, 499-515.
- Goodchild, M. F. (2010). Towards Geodesign: Repurposing Cartography and GIS?. *Cartographic Perspectives*, (66), 7–22. <https://doi.org/10.14714/CP66.93>
- Huang, G. (2017). Protecting Urban River Views with Geodesign Approach. *Journal of Digital Landscape Architecture*, Vol. 2: 85-93, <http://dx.doi.org/10.14627/537629009>
- Desimini, J., Waldheim, C. (Eds) (2016) *Cartographic Grounds: Projecting the Landscape Imaginary*, Princeton Architectural Press
- Parker, J., & Zingoni de Baro, M. E. (2019). Green infrastructure in the urban environment: A systematic quantitative review. *Sustainability*, 11, 3182.
- Robertson, C., & Feick, R. (2018). Inference and analysis across spatial supports in the big data era: Uncertain point observations and geographic contexts. *Transactions in GIS*, 22, 455-476.
- Stöglehnergernot, G. (2019). Conceptualizing quality in spatial planning. *Spatial Research & Planning*, 77(1), 1-15.

- Zuniga-Teran, A. A., Staddon, C. de Vito, L., Gerlak, A. K., Ward, S. Schoeman, Y., ... Booth, G. (2020). Challenges of mainstreaming green infrastructure in built environment professions. *Journal of Environmental Planning & Management*, 63, 710-732.

## Description and Evaluation of Assessments

This course includes a diversity of assessments that allow students to show their mastery of the material in a variety of ways. The different types of assessments are described below and their point value to final grades are listed in the following Grading Breakdown section.

## ***Assignments***

A set of 8 small assignments is spread across the semester. The tutorials that comprise these assignments will introduce the tools of scientific inquiry and give students practical experience in implementing these tools within the framework of the scientific method and typical landscape architecture settings. The assignments are linked to the lectures and class discussions, but do not duplicate the lecture experience.

The geographic analysis and mapping software and geospatial data required for these assignments will be accessed using virtual computing resources provided by the Spatial Sciences Institute. Please note that there is **no credit for late submissions**.

## ***Mid-term Exam and Other Policies***

The midterm exam is an open-book exam. This exam will cover critical concepts and theories learned during lectures in the first and second modules as well as in the course readings and assignments. **No make-up opportunities will be offered for the exam**, so mark the appropriate date on your calendar! If you have a legitimate conflict, per the USC policy on Final Exam Scheduling, speak with me as soon as possible.

## ***Projects***

Projects are hands-on design exercises for students to accomplish independently without tutorials. Students are expected to use skills and knowledge learned during lectures, choose appropriate programs and tools to create expected outcomes within the Geodesign approach. The final project will be developed in conjunction with the Second Year MLA Studio Arch 542a. Students are expected to use spatial data and analysis to not only contextualize their design, but also strengthen their design thinking and presentation.

## **Grading Breakdown**

The table below shows the breakdown of the assessments and their contributions to the final grade. The emphasis is on regularly completing short assignments, as well as solid performance on the mid-term exam and all the projects.

Assessment	Number	Points Each	Total Points (% of Grade)
Assignments	8	5	40
Mid-term	1	15	15
Projects	2	10	20
Final project	1	25	25
Totals			100

## Schedule

Date	Topics	Readings	Deliverables/Due Dates
<b>Week 1</b> 8/21	Introduction What is GIS? What is Geodesign?	Dangermond & Goodchild (2020) Miller (2010) Goodchild (2010)	Assignment 1
<b>Week 2</b> 8/28	Spatial Data Models and Data Sources	Bolstad (2019), Ch. 2	Assignment 2
<b>Week 3</b> 9/5 *Monday, 9/4 is university holiday (Labor Day)	Characteristics of Spatial data Projection and coordinate system	Milly et al. (2008) Robertson & Feick (2018)	Assignment 3
<b>Week 4</b> 9/11	Cartography and thematic mapping	Desimini & Waldheim (2016)	Assignment 4
<b>Week 5</b> 9/18	Spatial data acquisition: GPS, Lidar, and drone imagery		Assignment 5
<b>Week 6</b> 9/25	What is spatial thinking and spatial analysis? Vector-based spatial analysis	Downs (1997); Duckham (2015)	Assignment 6
<b>Week 7</b> 10/2	Raster-based spatial analysis		Assignment 7
<b>Week 8</b> 10/9 *10/12-10/13 is university holiday (Fall Recess)	Fall recess		
<b>Week 9</b> 10/16	Mid-term		
<b>Week 10</b> 10/23	Land Surface Parameters	Wilson (2018, Ch. 3 &4) Stöglehnergernot (2019)	Assignment 8
<b>Week 11</b> 10/30	Green Infrastructure	Parker & Zingoni de Baro (2019); Perkl (2016); Zuniga-Teran et al. (2020)	Project 1: hydrologic analysis

<b>Week 12</b> 11/6 *Friday, 11/10 is university holiday  (Veterans Day)	3D and urban design	Gorelic et al. (2017)  Huang (2017)	Project 2: Urban design and viewshed analysis
<b>Week 13</b> 11/13	Final project discussion		Final project
<b>Week 14</b> 11/20  *11/22-11/24 is a university holiday (Thanksgiving)	Thanksgiving holiday, no class		
<b>Week 15</b> 11/27  Friday, 12/1 is the last day of class, 12/2- 12/5 study days	Design workshop		Final project
	Final Review		

## Statement on Academic Conduct and Support Systems

### *Academic Integrity*

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, comprises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university's mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others or "recycle" work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.

The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

For more information about academic integrity see [the student handbook](#) or the [Office of Academic Integrity's website](#), and university policies on [Research and Scholarship Misconduct](#).

Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment, or what information requires citation and/or attribution.

### **Students and Disability Accommodations:**

USC welcomes students with disabilities into all of the University's educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at [osas.usc.edu](https://osas.usc.edu). You may contact OSAS at (213) 740-0776 or via email at [osasfrontdesk@usc.edu](mailto:osasfrontdesk@usc.edu).

### **Support Systems:**

[\*Counseling and Mental Health\*](#) - (213) 740-9355 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

[\*988 Suicide and Crisis Lifeline\*](#) - 988 for both calls and text messages – 24/7 on call

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

[\*Relationship and Sexual Violence Prevention Services \(RSVP\)\*](#) - (213) 740-9355(WELL) – 24/7 on call

Free and confidential therapy services, workshops, and training for situations related to gender- and power-based harm (including sexual assault, intimate partner violence, and stalking).

[Office for Equity, Equal Opportunity, and Title IX \(EEO-TIX\)](#) - (213) 740-5086

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

[Reporting Incidents of Bias or Harassment](#) - (213) 740-5086 or (213) 821-8298

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

[The Office of Student Accessibility Services \(OSAS\)](#) - (213) 740-0776

OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

[USC Campus Support and Intervention](#) - (213) 740-0411

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

[Diversity, Equity and Inclusion](#) - (213) 740-2101

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

[USC Emergency](#) - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

[USC Department of Public Safety](#) - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call

Non-emergency assistance or information.

[Office of the Ombuds](#) - (213) 821-9556 (UPC) / (323-442-0382 (HSC)

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

[Occupational Therapy Faculty Practice](#) - (323) 442-2850 or [otfp@med.usc.edu](mailto:otfp@med.usc.edu)

Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.

### ***Resources for Online Students***

The Course D2L page and the SSI Student Hub on D2L have many resources available for distance students enrolled in our graduate programs. In addition, all registered students can access electronic library resources through the link <https://libraries.usc.edu/>. Also, the USC

Libraries have many important resources available for distance students through the link: <https://libraries.usc.edu/faculty-students/distance-learners>. These include instructional videos, remote access to university resources, and other key contact information for distance students.
