

SSCI 600: The Geography of Life and Death

Syllabus

Units: 4

Term Day Time: Fall, 2021, Mondays, 9:00-11:50 a.m.

Location: WPH 204

Office Hours: Mondays, 3:00 to 4:00 p.m. or by
appointment

Contact Info: jpwilson@usc.edu, 213-740-1908

Library Help: Andy Rutkowski

Office: LIPA B40A

Office Hours: By appointment.

Contact Info: arutkows@usc.edu, see contact page on
Blackboard for Zoom Room

Course Scope and Purpose

This course explores the various ways place and space have been invoked and used to improve our understanding of human well-being and the social and environmental determinants of human health during the past several decades. The class will explore these topics from a variety of perspectives, including: (1) examples of exemplary works that connect population, health and place; (2) the theoretical, quantitative, qualitative and spatial approaches used for this type of scientific inquiry; (3) the ways in which place-based human, environmental, and behavioral factors may mediate health-related exposures and human wellbeing; and (5) the role of place in shaping and perpetuating inequality. The class introduces the current state-of-the-art using an assortment of weekly readings and discussions, and a series of individual projects will allow class participants to develop their own proposals for more detailed research.

Learning Outcomes

On completion of this course, students will be able to:

- Describe the various ways place (or space) has been invoked and used to assess human wellbeing and describe the social and environmental determinants of human health.
- Describe the theoretical, quantitative, qualitative, and spatial approaches that are now used for this type of scientific inquiry.
- Discuss some of the ways in which place-based human, environmental, and behavioral factors mediate health-related exposures.
- Discuss the various ways in which we can resolve individual-level exposures and place-based information.
- Discuss how place affects different groups of people in different ways and why place may need to be handled carefully in plans and programs which aim to accomplish meaningful social change.
- Discuss the current approaches, methodological issues, and enduring challenges in work connecting population, health and place.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

Prerequisite(s): None

Co-Requisite (s): None

Concurrent Enrollment: None

Recommended Preparation: Students must be enrolled in an existing USC PhD program

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly

(titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

Diversity and Inclusion – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students’ learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect of others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

Course Structure

The course as an in-person seminar and class meetings will be used to discuss the assigned readings and any questions and related topics that arise from the readings. The learning and teaching strategies are student-centered. They aim to encourage a deep-learning approach by using reflection and self-evaluation. The individual course sessions will be organized around a series of readings that are designed to provide the essential background and framework for study. Students will be required to reflect on their learning through in-class discussions and weekly briefs.

Course Content Distribution

USC has policies that prohibit recording and distribution of any synchronous and asynchronous course content outside of the learning environment.

Recording a university class without the express permission of the instructor and announcement to the class, or unless conducted pursuant to an Office of Accessibility Services (OSAS) accommodation. Recording can inhibit free discussion in the future, and thus infringe on the academic freedom of other students as well as the instructor (Living Our Unifying Values; The USC Student Handbook, page 13).

Distribution or use of notes, recordings, exams, or other intellectual property, based on university classes or lectures without the express permission of the instructor for purposes other than individual or group study is prohibited. This includes but is not limited to providing materials for distribution by services publishing course materials. This restriction on unauthorized use also applies to all information, which has been distributed to students or in any way been displayed for use in relationship to the class, whether obtained in class, via email, on the internet, or via any other media (Living Our Unifying Values; The USC Student Handbook, page 13).

Required Readings and Supplementary Materials

The weekly readings will be accessed via the USC Library’s electronic collections and/or provided by the instructor via Blackboard.

Description and Assessment of Assignments

Students must prepare a seminar, a research paper and presentation, a series of weekly briefs, and participate in class discussion on a regular basis.

Class Participation (10%): A class participation grade will be assigned based upon how actively students engage in the course. Students will be required to read all material outlined for each week of the course, and be prepared to lead and participate in group discussions about the readings in class. Failure to attend, or not be adequately prepared to discuss the readings will lead to the assignment of a lower grade for that week.

Weekly Briefs (36%): Each week students will use the Blackboard Discussion Forum to provide a critique of an article from the class reading list for that week of their own choosing. These electronic commentaries will be shared among the class, and graded based on the overall quality of the contribution. To help simulate discussion, each student will comment on at least one other student's critique each week.

Class Presentations (14%): Each student will present on two of the articles included in this syllabus in consultation with the instructor. The student will prepare a one-page summary that will be distributed in advance of the class itself and make a short 20-minute presentation summarizing the work at hand and its strengths and weaknesses.

Final Project (40%): In the second half of the course, each student will work on a project determined in consultation with the instructor. These projects will focus on a specific health problem or challenge and the final report (25%) and class presentation (15%) will summarize the current understanding of the problem or challenge and the kinds of solutions that have been attempted thus far, as reported in the published literature.

Grading Breakdown

Assignment	No. of Assignments	% of Grade
Class Participation	1	10
Class Presentation	2	14
Final Projects	1	40
Weekly Briefs	12	36
TOTAL	16	100

Assignment Submission Policy

Assignments will be submitted for grading via Blackboard using the due dates specified in the Course Schedule below.

Additional Policies

Students are expected to attend and participate in every class session and to complete and upload all assignments before the deadlines noted in the Course Schedule below. Late work will be assessed a penalty of 10% per day and zero grades will be assigned for work more than one week late.

Course Schedule: A Weekly Breakdown

	Topics/Daily Activities	Readings and Homework	Deliverables/Due Dates
Week 1 8/21	Introduction to Class Brief introductions coupled with a discussion of class goals, projects, and this week's readings.	Abernethy et al. (2022). <i>The Promise of Digital Health: Then, Now, and the Future.</i> Washington, D.C., National Academy of Medicine Discussion Paper. Arnold (2022). Spurred by COVID, public health gets precise. <i>Nature</i> , 601: 18-20. Richardson et al. (2013). Spatial turn in health research. <i>Science</i> 339: 1390-1392. Stamp (1964). <i>The Geography of Life and Death.</i> Ithaca, NY, Cornell University Press. Thompson (2018). Gardening for health: A regular dose of gardening. <i>Clinical Medicine</i> 18(3): 201-205.	No deliverables.
Week 2 8/28	Place The first part of a two-part discussion exploring the various ways in which place has been conceptualized and used to better understand human health determinants and outcomes, with a special focus on the chapters in a recent and influential book.	Kemp (2011). Place, history, memory: Thinking time within place. In Burton et al. (Eds.) <i>Communities, Neighborhoods and Health: Expanding the Boundaries of Place.</i> Berlin, Springer: 3-19. Matthews (2011). Spatial polygamy and the heterogeneity of place: Studying people and place via egocentric methods. In Burton et al. (Eds.) <i>Communities, Neighborhoods and Health: Expanding the Boundaries of Place.</i> Berlin, Springer: 35-55. Gehlert et al. (2011). Placing biology in breast cancer disparities research. In Burton et al. (Eds.) <i>Communities, Neighborhoods and Health: Expanding the Boundaries of Place.</i> Berlin, Springer: 57-72. Leung & Takeuchi (2011). Race, place, and health. In Burton et al. (Eds.) <i>Communities, Neighborhoods and Health: Expanding the Boundaries of Place.</i> Berlin, Springer: 73-88. Stack (2011). Attachment and dislocation: African-American journeys in the USA. In Burton et al. (Eds.) <i>Communities, Neighborhoods and Health: Expanding the Boundaries of Place.</i> Berlin, Springer: 237-247.	Submit briefs on Bb no later than 11:59 p.m. on Thursday, 8/24. Comment on at least one other brief on Bb no later than 8:00 a.m. on Monday, 8/28.
Week 3 9/4	Labor Day Holiday No class.		
Week 4 9/11	Population, Health, and Place The second part of a two-part discussion exploring the various	Meade (2012). The geography of life and death: Deeper, broader, and much more complex. <i>Annals of the Association of American Geographers</i> 102: 1219-1227.	Submit briefs on Bb no later than 11:59 p.m. on Thursday, 9/7.

	ways in which geographers have used place to help frame and clarify the key relationships linking people, health and place in recent decades.	<p>Mennis & Yoo (2018). Geographic information science and the analysis of place and health. <i>Transactions in GIS</i> 22: 842-854.</p> <p>Robertson & Feick (2018). Inference and analysis across spatial supports in the big data era: Uncertain point observations and geographic contexts. <i>Transactions in GIS</i> 22: 455-476.</p> <p>Wang (2020). Why public health needs GIS: A methodological overview. <i>Annals of GIS</i> 26(1): 1-12.</p> <p>Wilson (2019). Connecting population, health and place with geospatial tools and data. In D. Berrigan and N. A. Berger (Eds.), <i>Geospatial approaches to energy balance and breast cancer</i> (pp. 3-28). Berlin, Germany: Springer.</p> <p>Xu et al. (2020). FHIR PIT: An open software application for spatiotemporal integration of clinical data and environmental exposures data. <i>BMC Medical Informatics & Decision Making</i> 20: 53.</p>	Comment on at least one other brief on Bb no later than 8:00 a.m. on Monday, 9/11.
Week 5 9/18	<p>Theory, Methods, and Data</p> <p>An introduction to the various ways in which theory, methods and data are woven together to construct study designs in projects that explore the connections between population, health and place.</p>	<p>Daniel et al. (2008). Framing the biosocial pathways underlying associations between place and cardio-metabolic disease. <i>Health & Place</i> 14: 117-132.</p> <p>Drewnowski et al. (2019). Week 15 11/27	Final Presentations Students will present their final projects, summarizing the insights gathered from their research of the specific problem context they chose.		Students present their projects and answer questions from audience. Students may take up to 30 minutes for their presentations and an additional 15 minutes to field questions and answers.
FINAL 12/4			Final research papers to be uploaded to Blackboard no later than 11:59 p.m. on Monday, 12/4.

Statement on Academic Conduct and Support Systems

Academic Conduct

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, compromises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others (including AI generated) or "recycle" work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.

The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic

Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

Students and Disability Accommodations

USC welcomes students with disabilities into all of the University's educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

Support Systems

Counseling and Mental Health - (213) 740-9355 – 24/7 on call
studenthealth.usc.edu/counseling

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

988 Suicide and Crisis Lifeline – 988 for both calls and text messages – 24/7 on call
988lifeline.org/talk-to-someone-now

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis

Relationship and Sexual Violence Prevention Services (RSVP) - (213) 740-9355(WELL), press "0" after hours – 24/7 on call
studenthealth.usc.edu/sexual-assault

Free and confidential therapy services, workshops, and training for situations related to gender- and power-based harm (including sexual assault, intimate partner violence, and stalking).

Office for Equity, Equal Opportunity, and Title IX (EEO-TIX) - (213) 740-5086
eetix.usc.edu

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

Reporting Incidents of Bias or Harassment - (213) 740-5086 or (213) 821-8298
usc-advocate.symplicity.com/care_report

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

The Office of Student Accessibility Services (OSAS) - (213) 740-0776

This content is protected and may not be shared, uploaded, or distributed.

osas.usc.edu

OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

USC Campus Support and Intervention - (213) 821-4710

campussupport.usc.edu

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

Diversity, Equity, and Inclusion - (213) 740-2101

diversity.usc.edu

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

USC Emergency - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call

dps.usc.edu, emergency.usc.edu

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

USC Department of Public Safety - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call

dps.usc.edu

Non-emergency assistance or information.

Office of the Ombuds - (213) 821-9556 (UPC) / (323) 442-0382 (HSC)

ombuds.usc.edu

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

Occupational Therapy Faculty Practice - (323) 442-3340 or otfp@med.usc.edu

chan.usc.edu/otfp

Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.
