Instructor: Professor Heidi Houston  
Office: ZHS 101  
Office Hours: Wed 2:30 PM -3:30 PM, Thurs  3:30-4:30 PM  
Contact Info: If you have in-depth questions related to class content, you will probably find it most effective to ask me in person, either immediately after lecture or lab or during office hours held by me or one of our TAs. If you are systematically unavailable during office hours due to a scheduling conflict, I am also available by appointment. If these approaches don’t work, my e-mail is houstonh@usc.edu; please include GEOL105 in the subject.

Course Description  
(Note individual e-text purchase is required, see next page)  
Welcome to GEOL105, “Planet Earth.” This course provides an introduction for non-geologists and non-scientists to the inner workings, origin, and history of our dynamic planet. We will learn how the Earth’s internal heat drives the engine that builds mountains, moves the continents, creates the ocean basins, and produces earthquakes and volcanoes. We examine the way the circulation of the atmosphere and hydrosphere are driven by solar energy, and interact with the solid Earth to produce landscapes, erode and deposit sediment, and create environments for life and evolution. We investigate the techniques by which we can image the Earth’s interior, track plate motion, and infer how the planet has evolved through time. Each step of the way we ask ourselves how we know what we know, what we don’t know, and how we use the scientific method to test and validate hypotheses. This syllabus outlines the contacts, requirements, and schedule for the course. Additional information will be posted on Blackboard as needed.

Learning Objectives  
After taking this course a student will be able to:  
• appreciate the operation of the scientific process from observations to theories  
• describe a variety of different geological processes and structures related to plate tectonics  
• discuss how the major Earth systems interact  
• describe the vast timeline of the Earth and many geologic processes  
• understand climate change, as well as the diverse natural hazards that occur  
• evaluate the nature and limits to natural resources and how they relate to sustainability

Grading  
Student grades are based on the cumulative score across five grade elements: lab section work, quizzes from the Achieve platform, participation via polls during lecture and a few assignments in Blackboard, a mid-term exam, and a final exam. The breakdown of the five grade elements is shown in the table to the right. The exam questions will be similar in style to the questions from the chapter quizzes, which are intended to help prepare you for the mid-term and final exams. Field trip not offered Spring 2024.

Required e-textbook
Course will follow the material in *Understanding Earth* by John Grotzinger and Tom Jordan (W.H. Freeman and Company). Because we will be using new adaptive quizzing technology from Macmillan, only a current e-textbook is acceptable (see next section). They are listed at the USC Bookstore and can be purchased there. They can also be purchased directly from Macmillan at [https://achieve.macmillanlearning.com/start](https://achieve.macmillanlearning.com/start) (use your official USC name and email). Our course ID is hh8b9b. The chapters in *Understanding Earth* that cover the material presented during each lecture are listed in the weekly schedule in this syllabus.

What is the Achieve Read & Practice Platform?
This is a web platform from Macmillan Learning that provides an ebook version of our textbook and also administers adaptive quizzes. **Individual purchase is required.** Please do not sign up for GEOL105 if you do not wish to purchase the ebook (note returns are allowed within 14 days). Only the options which include the ebook and the **Achieve Read & Practice quiz access ($56 [ISBN:9781319059859 or ISBN:9781319059866] or $106 which adds a looseleaf book that you can keep as well) are acceptable.** This can be purchased at USC Bookstore, or for greater convenience directly from Macmillan online. Any financial aid that covers regular textbooks also covers Achieve Read and Practice. To purchase it with financial aid, buy it from the USC Bookstore.

For each chapter assigned, students will receive either full credit for completing the chapter quiz by the assigned due dates or no credit. I estimate that this may take 2 - 2.5 hours for each chapter. The quiz gives hints, and adapts to your previous answers and is thus different for each student.

Should you require assistance with Achieve Read & Practice, due to the fact that they may require specific user information to troubleshoot your issue, please contact their Support Team directly via this form: [https://macmillan.force.com/macmillanlearning/s/contactsupport](https://macmillan.force.com/macmillanlearning/s/contactsupport), or by calling (800) 936-6899.

Attendance Policies
Attendance at lecture is strongly encouraged, but not required. Questions are encouraged. Participation credit will be assessed based on your responding to PollEverywhere questions during lecture (not on a correct response), and can only be earned during class periods. Attendance at Lab section is required (see below).

Lab Sections
Lab sections will start the second week of class. Your TA will provide you the lab syllabus on your first day of lab. Attendance at lab section is required. More than three lab absences will result in an automatic No Pass. To discuss the possibility of changing your lab section, please contact your TA. Note that the Field Trip will not be offered in Spring 2024.

Exams
The two examinations will evaluate student comprehension of material covered in the lectures and textbook. It will be valuable for students to be very familiar with our course materials. The questions that will be asked on the exams will be multiple choice and similar in style to the Achieve quizzes, which should help students prepare for the exams. The exam dates and the material covered are:

- **Midterm exam** will be given in class on Tuesday Feb 27th; it will cover the material presented in lectures and associated textbook chapters from the start of the class through February.
- **Final exam** is scheduled for Thursday May 2nd 2:00PM-4:00PM; the exam will focus more on the second half of the course, but concepts draw on your knowledge from the whole course as USC final exams are expected to be summative assessments.

Doing well in the course
To do well in the course, you are advised to attend class and lab regularly, take notes in class, read the text, complete the Achieve Read and Practice quizzes, and review. pdf versions of the lecture slides will be posted on Blackboard. This survey course is based on an excellent textbook,
which students are advised to become familiar with. The exams will be multiple choice, true/false, or reordering a list of items.

The lab section work and the chapter quizzes in Achieve Read and Practice constitute large parts of your grade, so completion of these activities is key to achieving a good grade.

**Assessment/Grading Policy**

Each student will receive a final grade based on their score out of the total number of points possible. Typically, 90% results in the grade of A- or better, 80% results in B- or better. The grading curve usually ends up similar to the Marshall curve or better, with an approximate distribution of 35% A, 40% B, 20% C. The exact curve will be determined once all exams, quizzes, and lab work have been completed. At least 50% of the total possible points is required to pass the course with a C or better.

**Pass/No Pass:** The cut-off for Pass/No Pass is anything greater or equal to a C- letter grade. Additionally, more than three lab absences will result in an automatic No Pass.

**Make-ups**

If you have to miss an exam because of illness or an academic conflict, you must inform the instructor by email as soon as possible, and provide documentation. Make-ups of examinations will, in general, **not** be permitted except for extraordinary circumstances (e.g., documentable conflicts with other USC-related commitments).

**Student Accessibility Services**

Students requesting academic accommodations based on a disability are required to register with Office of Student Accessibility Services (OSAS) each semester. A letter of verification for approved accommodations can be obtained from OSAS. Please be sure the letter is delivered to me as early in the semester as possible. OSAS is located in Rm 120 Grace Ford Salvatori Hall, and is open 8:30 a.m. - 5:00 p.m., Monday through Friday. The phone number is (213) 740-0776; email is ability@usc.edu. The website is osas.usc.edu.

**Meet Professor Houston**

My research has focused on earthquakes and faults. In particular, I have studied subduction zones where one tectonic plate dives beneath another. These zones are the sites of the largest earthquakes and the most explosive volcanic eruptions, as well as landslides and tsunamis. I have also focused on determining the strength of and stress on faults by integrating different types of earthquake data, studying the San Andreas Fault and the fault responsible for the magnitude 9 2011 Japan quake.

In addition to promoting more understanding of geology and its implications for living sustainably on Planet Earth, I hope to instill a sense of the vast ranges of Earth processes and their timing, for example from a second of fault rupture to million or billions of years of geological evolution of a continent.

I am excited to share this knowledge with you. You can contact me at houstonh@usc.edu or through Blackboard.

Our TAs Naomi and Siyuan are experienced graduate student researchers in the Earth Sciences Department, have TA’d this course before, and will have responsibility for the Lab sections.

</table>

We will cover all or part of every chapter in *Understanding Earth, Ed 8* except Ch 15 & 22.
Academic Misconduct:
Plagiarism - presenting someone else’s ideas as your own, either verbatim or recast in your own words - is a serious academic offense with serious consequences. Please familiarize yourself with the discussion of plagiarism in SCampus in Part B, Section 11, “Behavior Violating University Standards” policy.usc.edu/scampus-part-b. Other forms of academic dishonesty are equally unacceptable. See additional information in SCampus and university policies on scientific misconduct, http://policy.usc.edu/scientific-misconduct.

Support Systems:
Student Counseling Services (SCS) - (213) 740-7711 - 24/7 on call
Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention. engemannshc.usc.edu/counseling

National Suicide Prevention Lifeline - 1 (800) 273-8255
Provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week. www.suicidepreventionlifeline.org

Relationship and Sexual Violence Prevention Services (RSVP) - (213) 740-4900 - 24/7 on call
Free and confidential therapy services, workshops, and training for situations related to gender-based harm. engemannshc.usc.edu/rsvp

Sexual Assault Resource Center
For more information about how to get help or help a survivor, rights, reporting options, and additional resources, visit the website: sarc.usc.edu

Office of Equity and Diversity (OED)/Title IX Compliance - (213) 740-5086
Works with faculty, staff, visitors, applicants, and students around issues of protected class. equity.usc.edu

Bias Assessment Response and Support
Incidents of bias, hate crimes and microaggressions need to be reported allowing for appropriate investigation and response. studentaffairs.usc.edu/bias-assessment-response-support

The Office of Disability Services and Programs
Provides certification for students with disabilities and helps arrange relevant accommodations. dsp.usc.edu

Student Support and Advocacy - (213) 821-4710
Assists students and families in resolving complex issues adversely affecting their success as a student EX: personal, financial, and academic. studentaffairs.usc.edu/ssa

Diversity at USC
Information on events, programs and training, the Diversity Task Force (including representatives for each school), chronology, participation, and various resources for students. diversity.usc.edu

USC Emergency Information
Provides safety and other updates, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible. emergency.usc.edu

USC Department of Public Safety - UPC: (213) 740-4321 - HSC: (323) 442-1000 - 24-hour emergency or to report a crime.
Provides overall safety to USC community. dps.usc.edu
