

Econ 615 Applied Econometrics

Course Requirement: A Term Paper

Basic Texts:

C. Hsiao (2022), *Analysis of Panel Data*, 4th Edition. Cambridge, University Press.

AC. Cameron and P.K. Trivedi (2005), *Microeconometrics*, Cambridge University Press.

Recommended Texts:

T. Amemiya (1985), *Advanced Econometrics*, Harvard University Press.

M. Intriligator, R. Bodkin and C. Hsiao (1996), *Econometric Models, Techniques and Applications*, 2nd ed., Prentice Hall.

Q. Li and J. S. Racine (2007), *Nonparametric Econometrics*, Princeton: Princeton University Press.

A.C. Cameron and P.K. Trivedi (2020), *Microeconometrics Using Stata*.

1. Machine Learning (ML) and Econometrics – Data Driven vs. Structural Modeling, Fundamental ML Algorithms, Supervised vs. Unsupervised Learning, Single Equation vs. System of Equations. Identification, Moments Estimator vs. Likelihood Estimator, Full Information vs. Limited Information Estimator, Regression Estimator vs. Instrumental Variable Estimator

Recommended Readings:

Taddy, M. (2019), *Business Data Sciences: Combining Machine Learning and Economics to Optimize, Automate and Accelerated Business Decisions*, Mc Graw Hill.

Hood, W.C. and T.C Koopmans, eds. (1953), *Studies in Econometric Method*, Cowles Commission Monograph 14, Wiley.

Anderson, T.W. and H. Rubin (1949), “Estimation of the Parameters of a Single Equation in a Complete System of Stochastic Equations”, *Annals of Mathematical Statistics*, 20.

Athey, S. (2019), “The Impact of Machine Learning on Economics”, in *The Economics of Artificial Intelligence*, ed. By A. Agrawal, University of Chicago Press.

Intriligator, Bodkin and Hsiao (1996), Ch. 9, 10 and 13.

Amemiya (1985), Chapter 7

L. Hansen (1982), “Large Sample Properties of Generalized Method of Moments Estimator”, *Econometrica*, 50, 1029-1054.

Newey, W. and D. McFadden (1994), “Large Sample Estimation and Hypothesis Testing” *Handbook of Econometrics*, vol. 4, Elsevier.

C. Hsiao (1982), “Identification”, *Handbook of Econometrics*, vol. 1, 223-283.

2. Qualitative Choice Models-Linear Probability; Probit; Logit; Single Index Model; Multinomial Probit; Conditional Logit; Nested Logit; Ordered and Sequential Outcomes; MLE; Semiparametric Estimation; Maximum Score; Smoothed Maximum Score; Average Derivative; Specification Tests; Choice based sample, etc.

Basic Reading:

Cameron and Trivedi (2005), ch. 14 and 15.

Recommended Readings:

Amemiya (1985), ch. 9.

Hsiao (2022), ch. 6.

Hauseman, J.A. (1978). “Specification Tests in Econometrics”, *Econometrica*, 46, 1251-71

Manski, C.F. (1975), “Maximum Score Estimation of the Stochastic Utility Model of Choice”, *Journal of Econometrics*, 3, 205-228.

Horowitz, J.L. (1992), “A Smoothed Maximum Score Estimator for the Binary Response Model”, *Econometrica* 60, 505-531.

Hsiao, C. and B.H. Sun (1999), “Modeling Survey Response Bias — With an Application to the Demand for an Advanced Electronic Device”, *Journal of Econometrics* 189, 15-39.

Horowitz, J.L. (1993), “Semiparametric and Nonparametric Estimation of Quantal Response Models”, in *Handbook of Statistics*, vol. 11, ed. by G.S. Maddala, C.R. Rao and H.D. Vinod, Amsterdam: Elsevier.

Powell, J.L., J. Stock, and T. Stoker (1989), “Semiparametric Estimation of Index Coefficients” *Econometrica*, 54, 1435-60.

3. Limited Dependent Models and Sample selection Models – truncated and censored data; MLE; Heckman two-stage estimator; symmetrically trimmed least squares estimator; least absolute deviation estimators; quantile regression; semi-parametric estimation; sample selection models; partial linear regression models; pairwise difference estimator; specification analysis; simultaneous equation models; coherency condition, etc.

Basic Readings:

Cameron and Trivedi (2005), ch. 16.

Hsiao (2022), ch. 7.1.

Recommended Readings:

T. Amemiya (1985, ch. 10).

Nelson, F.D. (1977), "Censored Regressions with Unobserved Stochastic Censoring Thresholds", *Journal of Econometrics*, 6, 309-327.

Ahn, H. and Powell, J.L. (1993), "Semiparametric Estimation of Censored Selection Models with a Nonparametric Selection Mechanism", *Journal of Econometrics*, 58, 3-29.

Robinson, P.M. (1982), "On the Asymptotic Properties of Estimators of Models Containing Limited Dependent Variables", *Econometrica*, 50, 27-41.

Hsiao, C. and C. Kim (1990), "A Statistical Perspective on Insurance Rate-Making", *Journal of Econometrics*, 44, 5-24.

Andrews, D.W.K. and M.M.A. Schafagans (1998), "Semiparametric Estimation of the Intercept of a Sample Selection Model", *Review of Economic Studies*, 65, 497-517.

Chen, S. (1999), "Distribution-Free Estimation of the Random Coefficient Dummy Endogenous Variable Model", *Journal of Econometrics*, 91, 171-199.

Hsiao, C., Y. Shen, B. Wang and G. Weeks (2007), "Evaluating the Impacts of Washington State Repeated Job Search Services on the Earnings of Prim-Age TANF Recipients", *Journal of Applied Econometrics*, 22, 453-475.

Liu, E., C. Hsiao, T. Matsumoto and S. Chou (2009), "Maternal Full-Time Employment and Overweight Children: Parametric, Semi-parametric and Non-parametric Assessment", *Journal of Econometrics*, 152, 61-69.

4. Nonparametric and Semiparametric Methods-Kernel Density Estimation, Conditional Density Estimation, Regression, Sieve Estimation, Single Index Models, Partial Linear Models, Consistent Model Specification Tests.

Basic Readings:

Cameron and Trivedi (2005), ch. 9.

Li and Racine (2007), ch. 1, ch. 5.1, ch. 5.2, ch. 2, ch. 12.1. Ch. 15.

Recommended Readings:

Chen, X. (2007), "Large Sample Sieve Estimation of Semi-nonparametric Models", *Handbook of Econometrics*, vol 6B, Elsevier.

Bierens, J.J. (1990), "A Consistent Conditional Moment Test of Functional Form", *Econometrica*, 58, 1143-1458.

Hong, Y.M. and H.L. White (1995), "Consistent Specification Testing via Nonparametric Series Regression", *Econometrica*, 63, 1133-1159.

5. Program Evaluation- Selection on observables and unobservables; Propensity Score Matching; Difference-in-difference estimator; regression discontinuity; local instrumental variable estimator, panel data approach; synthetic control method; etc.

Basic Readings:

Cameron and Trivedi (2005), ch. 25.

Recommended Readings:

Rosenbaum, P. and D.B. Rubin (1983), "The Central Role of Propensity Score in Observational Studies for Causal Effects".

Imbens, G.W. and T. Lemieux (2008), "Regression Discontinuity Designs: A Guide to Practice", *Journal of Econometrics*, 142, 615-635.

Hsiao, C. (2022), Ch. 12.

Angrist, J.D., G.W. Imbens, and D.B. Rubin (1996), "Identification of Causal Effects Using Instrumental Variables", *Journal of the American Statistical Association*, 91, 444-455.

Dehejia, R.H. and S. Wahba (1999), "Re-evaluating the Evaluation of Training Programs", *Journal of the American Statistical Association*, 94, 1053-1062.

Heckman, J.J. and E.J. Vytlačil (2001), "Local Instrumental Variables", in *Nonlinear Statistical Modeling*, ed. by C. Hsiao, K. Morimune, and J.L. Powell, Cambridge, U.K.: Cambridge University Press.

8. Panel Data Analysis

(a) Introduction – Advantages and Challenges

Hsiao, C. (2007), “Panel Data Analysis – Advantages and Challenges”, *Test*, 16, 1-22.

Hsiao (2022), ch. 1.

Hsiao, C. (2001), “Panel Data Models”, in *Comparison of Econometrics*, edited by B. Baltagi, Oxford: Blackwell, 349-365.

Hsiao, C. (2002), “Economics Panel Data”, in *International Encyclopedia of the Social and Behavioral Sciences- Statistics Section*, edited by J. Kadane and S. Fienberg, Oxford: Elsevier.

(b) Static Variable Intercept Models-Least Squares Dummy Variable Estimation, Error Components Models, Fixed versus Random Effects Specification Analysis.

Hsiao (2022), ch. 2.

Cameron and Trivedi (2005), ch. 21.

(c) Dynamic Models with Variable Intercept – Random Effects Models, Fixed Effects Model, Maximum Likelihood and Transformed Maximum Likelihood Estimators, Generalized Method of Moments Estimators (GMM) Initial Values and Sample Size.

Hsiao (2022), ch. 3.

Ahn, S.C. and P. Schmidt (1995), “Efficient Estimation of Models for Dynamic Panel Data”, *Journal of Econometrics*, 68, 5-27.

Arellano, M. and O. Bover (1995), “Another Look at the Instrumental Variable Estimation of Error-Components Models”, *Journal of Econometrics*, 68, 29-51.

Binder, M., C. Hsiao and M.H. Pesaran (2005), “Estimation and Inference in Short Panel Vector Autoregressions with Unit Roots and Cointegration”, *Econometric Theory*, 21, 795-837.

Hsiao, C., M.H. Pesaran and A.K. Tahmiscioglu (2002), “Maximum Likelihood Estimation of Fixed Effects Dynamic Panel Data Models Covering Short Time Periods”, *Journal of Econometrics*, 107-150.

Hsiao, C. and A.K. Tahmiscioglu (2008), “Estimation of Dynamic Panel Data Models with Both Individual- and Time-Specific Effects”, *Statistical Planning and Inference*, 138, 2698-2721.

Hsiao, C. and J. Zhang (2015), “IV, GMM or QMLE to Estimate Dynamic Panel Data Models”, *Journal of Econometrics*, 187,312-322.

Alvarez, J. and M. Arellano (2003), “The Time Series and Cross-Sectional Asymptotics of Dynamic Panel Data Estimators”, *Econometrica*, 71, 1121-1159.

Hsiao, C. and Zhou, Q.K. (2018), "Incidental Parameters, Initial Conditions and Sample Size in Statistical Inference for Dynamic Panel Data Models", *Journal of Econometrics*, 207, 114-128.

(d) Qualitative Choice Models – Incidental Parameter Issues, Conditional Maximum Likelihood Estimator, Maximum Score Estimator, Bias Adjusted Estimator, Approximate Models, Dynamic Models, True State Dependence vs. Spurious State Dependence.

Required Reading:

Hsiao (2022), ch. 6.

Recommended Readings:

Ahn, S.C., Y.H. Lee and P. Schmidt (2013), "Panel Data Models with Multiple Time-Varying Individual Effects", *Journal of Econometrics*, 174.1-14.

Bartolucci, F., and V. Nigro (2010), "A Dynamic Model for Binary Panel Data with Unobserved Heterogeneity Admitting a Root-n Consistent Conditional Estimation", *Econometrica*, 78, 719-733.
