Course Description/Overview

The purpose of this course is to introduce students to GIS technologies and increase their understanding of the many ways spatial data and analysis are leveraged by cities, non-profits and the public sector to advance their missions and inform decision-making. While students will be exposed to various GIS mapping tools, the course will focus on teaching students the fundamentals to use ESRI's ArcGIS Pro, the industry standard. Students will also learn how to download, clean and import data into ArcGIS to create traditional print maps and dynamic digital maps using online tools like ArcGIS StoryMaps. No prior coding or GIS experience is necessary.

Readings

There are two required reading for this course, and two optional books. The books are:

- Brewer, Cynthia (2015). *Designing Better Maps: A Guide for GIS Users*. Redlands, CA: ESRI Press. (optional)
- Gorr, Wilpen and Kurland, Kristen. 2021. *GIS Tutorial for ArcGIS Pro 20.8*. Redlands, CA: ESRI Press. (required)
- Acock, Alan. *A Gentle Introduction to Stata*. College Station, TX: Stata Press. (optional)
- Thomas, Christopher and Humenik-Sappington, Nancy. 2009. *GIS for Decision Support and Public Policy Making*. Redlands, CA: ESRI Press. (required)

Learning Objectives

- ✓ Students will develop skills for organizing and creating ArcGIS StoryMaps that integrate maps to help tell a story of a problem and potential solutions
- ✓ Students will become familiar with data and GIS methods to analyze neighborhoods and other places by collecting and analyzing census data and become competent in using state-of-the-art tools like Social Explorer and ArcGIS Pro.
- ✓ Students will learn how to use maps to create a narrative that describes social phenomena in communities and change over time

- ✓ Students will improve their communication skills through oral and visual presentations of their work.
- ✓ Students will gain marketable skills in the workplace

Prerequisite(s): none

Co-Requisite(s): none

Concurrent Enrollment: none

Recommended Preparation: It is recommended that students come in with some background, experience, or interest in conducting quantitative research, or at least have a broad interest in creating maps and/or learning GIS. The course is multi-disciplinary and intended for students of all concentrations. No prior experience necessary.

Course Notes

Each class will roughly consist of a 60 minute lecture, followed by a 20 minute break, then a 60 minute exercise, then the rest of class will be dedicated to individual/group work. In-class assignments require that students in-class computers in order to conduct research and to complete written assignments. Alternative accommodations can be made with the instructor. Class information will be posted online, including assignments, readings, and lecture slides.

Technological Proficiency and Hardware/Software Required

Lab computers are available for all students during class time. If needed, laptops can be rented out from Leavey Library (see University protocols for COVID-19). Computers at Leavey Library have ArcGIS and State built into them.

Required Readings and Supplementary Materials

All readings and supplemental materials will be provided via Blackboard or DropBox.

Description and Assessment of Assignments

Required assignments will include weekly readings and individual written assignments usually due the week after. All assignments are designed to help students gain skills that will ultimately allow them to finish the final report (i.e., ArcGIS StoryMap).

Grading Breakdown

Assignments will be weighted using the following breakdown:

In-class participation (e.g., attendance, engaged in discussions, presentations)	20%
Individual Assignments	20%
Midterm	20%
Final Project - ArcGIS StoryMap	35%
Pop quizzes	5%
TOTAL	100%

Key Assignments

Weekly readings/assignments: Students must complete assigned readings and review of background materials. This will be evaluated based on participation in class discussions and integration of assigned readings into submitted assignments.

In-class Group assignments: Students are expected to contribute to class discussions during class time. These activities are meant to keep you accountable and help you complete the midterm and final.

Class participation: All students are expected to contribute to class discussions and in-class assignments.

Best Practice/Precedent: Students will conduct a 10-minute presentation on a topic of their choosing using ArcGIS StoryMap to tell a story.

Midterm: Students will present data and analysis they have collected on a specific topic of their choosing. By this point, the research question has been well-defined and students are reporting their major findings.

Final Project: Building off in-class assignments, readings, lectures, and data analysis, students will develop and present their suggestions their final assignment. Students should address social, information, physical and/or political challenges their project may encounter, and provide possible solutions.

Grading Scale

Course final grades will be determined using the following scale:

A	95-100
A-	90-94
