

UNIVERSITY OF SOUTHERN CALIFORNIA
School of Engineering
Department of Electrical and Computer Engineering

E.S. Kim

EE 608 (Cross-listed as BME 608), Fall 2024

Wearable Technology

4 Units -- M 5:00 - 5:50pm KAP 147
F 9:00 – 11:50am KAP 145
(total of four lecture hours per week)

Instructor: Prof. Eun Sok Kim
PHE 602, 740-4697, eskim@usc.edu

Office Hours: MF 3:00 - 3:50

Textbook: Lecture notes from <http://brightspace.usc.edu/>

Helpful (Not Mandatory) Prerequisite: EE348 and EE370L

Course Description and Objectives:

This course teaches fundamentals of wearable technology with focus on the following topics:

- (1) sensing, signal processing (analog and digital), RF communication,
- (2) power sources, power management, energy harvesting,
- (3) flexible substrate technology, and
- (4) wearable algorithms.

Course Contents:

Weeks	Topics	Reading Assignment
1	Introduction to Wearable Technology	Lecture Notes on Introduction
2 – 4	Wearable Sensors for Acceleration, Angular Velocity, Ambient Pressure, Audio, Magnetic Field, Infrared Imaging, Vapors, Lab on Skin, etc.	Lecture Notes on Wearable Sensors
5 - 7	Sensing Technologies, Flexible/Stretchable Substrate Technology, RF Communication, Batteries, Energy Harvesting	Lecture Notes on Sensing Technologies
8 - 9	Wearable Algorithms, Feature Extraction, Training and Classification, etc.	Lecture Notes on Wearable Algorithms
10 - 12	Wearable Technology for Healthcare: Heart Rate Sensing, Photoplethysmography, Electrocardiogram, etc.	Lecture Notes on Health Care with Wearable Technology
13 - 14	Analog and Digital Signal Processing, Difference Equation, Convolution, Digital Fourier Transform, etc.	Lecture Notes on Signal Processing for Wearable Technology

Grading: Homework: 20%, Term Paper and Oral Presentation: 40%, and Final Exam: 40%.
