

Abbreviated Course Syllabus

OT 340: Animal and Human Interconnections in Daily Life Fall 2024 (Section 48050)

Class Day: Tuesdays & Thursdays
Class Time: 2:00-3:20 pm
Location: SOS B44

Instructor: Ashley Uyeshiro Simon, OTD, OTR/L
Email: uyeshiro@med.usc.edu
Office: THH B4
Contact me with any questions! I love to chat!

COURSE DESCRIPTION

This course explores the various interconnections between humans and animals in contexts. Many of the occupations (or meaningful activities that *occupy* our time) we do on a daily basis include interactions with nature and animals, including food, entertainment, work and jobs, and health promotion (for humans and/or animals alike).

COURSE HIGHLIGHTS!

- Lots of furry “guests” and human guest speakers
- Main project is a service-based learning project, where you volunteer throughout the semester with an animal welfare-promoting organization! Your final presentation and final reflection are both about your experiences while volunteering.

REQUIRED READING

- 1) All articles/readings are available through the USC library and are posted on Brightspace. There are no required books for this class.

ASSIGNMENTS & GRADE BREAKDOWN

Assignment	% of grade
Weekly Journals Reflecting on how the content for the week applies to your own life.	30%
Student-Facilitated Discussion Create an agenda and facilitate class discussions around a given topic.	20%
Service-based project (completion and presentation) Secure and complete a volunteer project that benefits animals, and present on your project (individually or in small groups)	30%
Final Reflection on service project Culminating reflection on the service project that was completed during the semester.	10%
In-class participation	10%
TOTAL	100%

COURSE SCHEDULE

Week 1	Course introduction and overview What is occupational science, and why is it relevant to human-animal interconnections (HAI)?
Week 2	A history of HAI Field trip: Museum of Natural History
Week 3	One Health: A syndemic approach Bonding to animals: Psychology, psychophysiology, and the role of oxytocin
