

**SSCI 586 (35711D and 35713D), GIS Programming
and Customization**

Syllabus

Units: 4

Term Day Time: Fall 2025 - T and TH 10:00-11:50 am PT

Location: AHF 145A and DEN@Dornsife

Instructor: Jennifer N Swift, Ph.D. GISP

Office: AHF B57D

Regular Office Hours: W and TH 11am-12pm PT. Also available most days and times by appointment via email.

Contact Info: jswift@usc.edu, 213-740-5841 (office), see contact page on Brightspace for Zoom Room

Library Help: Andy Rutkowski

Office: LIPA B40-A

Office Hours: Thu 10:00 am – 12:00 pm or by appointment.

Contact Info: arutkows@usc.edu), see contact page on Brightspace for Zoom Room

IT Help: Myron Medalla

Office: AHF B56B

Office: By appointment via email

Contact Info: spatial_support@usc.edu, 213-740-2775

Course Scope and Purpose

Spatial programming skills are now an essential part of the GIS professional's portfolio. Learning to program facilitates an understanding of one's use of geospatial technologies as well as how to interact with others who use geospatial software. Familiarity with a spatial programming language and how it is implemented also provides deeper insight into how other programmers create and use these tools. The goal of this course is to help students become comfortable with coding and to develop and document novel geospatial tools that can be readily shared with others.

This course will use modern software tools and information to build and implement customized GIS mapping applications and geoprocessing functions. The students taking this course will have varying levels of prior programming experience and may be new to spatial programming and customization. The course covers essential practical as well as theoretical concepts of spatial analysis and their translation into geospatial software development and object-oriented programming. In addition, students will learn the Python programming language and its use in developing customized GIS applications directly applicable to one's specific field of interest. Overall, students will gain a deep and solid foundation for interacting with Esri's ArcGIS ecosystem and Jupyter Notebooks.

By both necessity and design, this course serves several different audiences. This course is an elective for the Geographic Information Science & Technology M.S. and Graduate Certificate Programs, the Human Security and Geospatial Intelligence M.S., and the Geospatial Leadership Graduate Certificate Program. This is a required course for the Spatial Data Science M.S. degree.

Learning Outcomes

On completion of this course, students should be able to:

- Employ different programming languages commonly used in GIS customization and describe how to use these technologies to expand upon existing GIS software functionality.
- Perform object-oriented programming tasks using various programming languages, such as Python.
- Analyze procedures and interactions for workflows within ArcGIS and Notebooks.
- Program small-scale GIS-based models in Python, integrated within ArcGIS and Notebooks.
- Recognize and employ general software engineering concepts and suitable programming methods and practices.
- Critically evaluate different methodologies for developing geospatial applications.

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

Prerequisite(s): None

Co-Requisite(s): None

Recommended Preparation: SSCI 582: Spatial Databases

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours).

Diversity and Inclusion – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students’ learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

Course Structure

The course is taught in a hybrid modality (depending on your section) with class meetings split between presentations and discussions of the assigned readings and any questions and related topics that arise from the readings. Depending on your section registration and requirements, students attend class sessions in person or participate in the course remotely/ asynchronously (DEN@Dornsife). There is also directed reading of the textbooks and supplementary readings. Additional readings will be assigned to expand on the text when needed. The course will generally unfold on a multi-weekly basis. When possible, assignments will be given in advance, but usually they will be posted on or before Mondays.

Workload – This is a four credit, one semester course. Students should expect to spend 10-15 hours per week completing the work in this course.

Technological Proficiency and Hardware/Software Required

ArcGIS is provided online via the GIST Server; hence, you do not need to install it on your own computer. Instead, every student must have the following technology requirements:

- A computer with a fast Internet connection.
- A functional webcam and a microphone for all class meetings and presentations.
- An up-to-date web browser to access the Server.

If a student does not have access to any of these, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here:

<https://keep-teaching.usc.edu/students/student-toolkit/>

A limited number of computers with all the necessary software is available in the SSI Suite (AHF B55) during regular business hours, Monday through Friday 9 am to 5 pm. To reserve a computer, please use this link <https://calendly.com/usc-ssi/the-ssi-suite-ahf-b55-student-computers-1>. These computers are available to any student in an SSCI or GSEC course and can be used as a resource if you experience difficulties in accessing the SSI server or using the GIS software on your personal computer.

Brightspace – This course will utilize the Brightspace learning management system which allows students to access course content, upload assignments, participate in discussion forms, among other learning experiences. The Brightspace platform provides flexibility in the learning experience where students can participate in the course residentially or remotely, synchronously (meeting together at the same time) or asynchronously (accessing videos and course content outside of class).

SSI Server and Tech Support – This course utilizes the SSI Server which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at spatial_support@usc.edu, making sure to copy (cc) me on the email.

Communications – All assignments given and all materials to be handed in will be submitted via Brightspace. The instructor will also create and monitor discussion forums through which students can discuss issues and assignments as needed. Students should read all email sent from Brightspace or from course instructor(s) as soon as possible. Also, students who do not regularly use their USC email accounts should double-check to be sure that mail sent from both the Brightspace accounts and the instructor's account (noted above) to your USC account is forwarded to an address used regularly and does not go into junk mail. While I am regularly on-line and will probably respond to emails from students quickly, I will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay.

In the rare case that an instructor is off-line for an extended period of time, an announcement will be posted to the class Brightspace site. Due to the synchronous and asynchronous nature of this course, it is each student's responsibility to stay informed and connected with others in our course. In addition to email, students are expected to login to Brightspace regularly to check for announcements.

Discussion forums – On the Brightspace site, I will post a series of discussion threads relevant to various sections of the course. Discussions provide a key means for student-to-student discussion and collaboration that can replicate the face-to-face contact you may have experienced in traditional classrooms. Here students can provide support to each other while working on your assignments, sharing hints and helpful tips, as you would in a classroom laboratory. Please post your questions about assignments there, as you would ask them publicly in the classroom. I monitor the discussion threads and offer comments when necessary, but more importantly, consider the discussion board a key way to connect with your classmates and share your discoveries.

Required Readings and Supplementary Materials

The required textbooks for this course are:

- Zandbergen, P.A. 2024a. *Python Scripting for ArcGIS Pro*, 3rd Edition. Redlands, CA: Esri Press.
- Zandbergen, P.A. 2024b. *Advanced Python Scripting for ArcGIS Pro*, 2nd Edition. Redlands, CA: Esri Press.

You may purchase these books if you wish to own an eBook or bound copy.

Supplementary readings will be assigned from various sources including:

- Anselin, L. 2023. "Pysal and GeoDa Repositories", *Luke Anselin*, Accessed August 20, 2023, <https://github.com/lanselin>.
- Bebotta, S., S.K. Das, M. Kandpal, R.K. Barik, and H. Dubey. 2020. Geospatial Serverless Computing: Architectures, Tools and Future Directions. *International Journal of Geo-Information* 9(311): 1-26.
- Boeing, G. 2020. The right tools for the job: The case for spatial science tool-building. *Transactions in GIS*, 24, 1299-1314.
- DiBiase, D. 2017. Professional and Practical Ethics of GIS&T. *The Geographic Information Science & Technology Body of Knowledge, 2nd Quarter 2017 ed.* John P. Wilson (ed.).
- Goodchild, M.F. 2018. Big Geodata. In *Comprehensive Geographic Information Systems, GIS Methods and Techniques, 1*, 19-25. Editor in Chief B. Huang. Amsterdam, Netherlands: Elsevier.
- Novo, A., N. Fariñas-Álvarez, J. Martínez-Sánchez, H. González-Jorge, and H. Lorenzo. 2020. Automatic Processing of Aerial LiDAR Data to Detect Vegetation Continuity in the Surroundings of Roads. *Remote Sensing* 12(1677): 1-14.

- Reike, C. 2018. "Essential geospatial Python libraries", Medium.com, Accessed March 15, 2021, <https://medium.com/@chrieke/essential-geospatial-python-libraries-5d82fcc38731>.
- Rey, S.J. 2017. Python for GIS. *The Geographic Information Science & Technology Body of Knowledge, 3rd Quarter 2017 ed.* John P. Wilson (Ed).
- Rey, S.J. 2019. PySAL: the first 10 years. *Spatial Economic Analysis* 14(3): 273-282.
- Ricker, B.A., P.R. Rickles, G.A. Fagg, and M.E. Haklay. 2020. Tool, toolmaker, and scientist: case study experiences using GIS in interdisciplinary research. *Cartography and Geographic Information Science* 47(4): 350-366.
- Shao, H., W.Li, W. Kang, and S.J. Rey. 2020. When Spatial Analytics Meets Cyberinfrastructure: an Interoperable and Replicable Platform for Online Spatial-Statistical-Visual Analytics. *Journal of Geovisualization and Spatial Analysis* 4(17): 1-16.
- Vance, T.C., M. Wengren, E. Burger, D. Hernandez, T. Kearns, E. Medina-Lopez, N. Merati, K. O'Brien, J. O'Neil, J.T. Potemra, R.P. Signell, and K.Wilcox. 2019. From the Oceans to the Cloud: Opportunities and Challenges for Data, Models, Computation and Workflows. *Frontiers in Marine Science* 6:1-18.

As well, for several of the assignments in this course, you will conduct online library research to find articles that apply specific techniques in an application area of your choice.

Description and Assessment of Assignments

Your grade in this course will be determined on the basis of several different assessments.

Resume Assignment - 2 worth 2 points. We require all current students to post and maintain a public resume, short biography, and recent photo on our shared SSI Student Community Blackboard site. Please prepare your resume in the SSI template which will be provided to you. A second resume assignment provides you a chance to add any newly learned tools and project products in this course to your resume. Unless you opt out, your resume will be included in the Spatial Sciences Institute Graduate Programs Resume Book. This resume book is compiled annually and, along with our web presence, is used to promote our programs, and more importantly, your skills, experience and professional aspirations.

Projects - 5 worth a total of 60 points. These assignments require students to complete the basic types of programming projects asked of professional geospatial application developers in real world settings. Prompts will list helpful resources, such as Esri and Python tutorials, for becoming familiar with ways that concepts learned in the course are implemented in various geospatial software packages. The deliverables will be final written summaries of the students' goals, methods, data, and results for each project.

Python Tutorials – 3 worth a total of 6 points. These assignments help students gain familiarity with the Python programming language and different Python coding environments, which they can then use to program their class projects.

Reading and Research Discussions - 3 worth a total of 12 points. These assignments call on students to critically analyze required readings, identify relevant case studies employing the methodologies and concepts we cover in class, and to discuss them with the instructor and their classmates during synchronous meetings and/or online discussion forums via Brightspace.

Comprehensive Exam - 1 worth 20 points. The comprehensive exam will cover all the material learned throughout the semester. It may be mixed format and may consist of multiple choice, short answer, and simple problem questions.

Grading Breakdown

Careful planning and a serious, consistent commitment will be required for students to successfully navigate the deliverables in this and other SSCI courses. The table below summarizes the SSCI 581 course assignments and their point distribution:

| Assessment | Number | Points Each | Total Points |
|----------------------------------|-----------|-------------|--------------|
| Resume Assignment | 2 | 1 | 2 |
| Reading and Research Assignments | 3 | 4 | 12 |
| Tutorials | 3 | 2 | 6 |
| Projects | 5 | 12 | 60 |
| Comprehensive Exam | 1 | 20 | 20 |
| Total | 14 | | 100 |

Grading Scale

Assignments in this and other SSCI courses, are graded on the letter grade scale where A is exemplary, B is very good, C is satisfactory, D is unsatisfactory, and F needs improvement. Final grades use the same letter grade scale with C being the minimum passing grade for credit at the graduate level. The grading scale follows:

| | | | | | |
|----|--------------|----|--------------|----|--------------|
| A | > 93 points | B- | 80-82 points | D+ | 67-69 points |
| A- | 90-92 points | C+ | 77-79 points | D | 63-66 points |
| B+ | 87-89 points | C | 73-76 points | D- | 60-62 points |
| B | 83-86 points | C- | 70-72 points | F | <60 points |

Assignment Submission Policy

Unless otherwise noted, assignments must be submitted via Brightspace by the due dates specified in the Course Schedule below and on the assignment instructions.

Project components have different due dates as indicated on the Course Schedule below. Your attention to on-time assignment submission is essential if I am to meet my goal to return comments on your submitted assignments before the next one is due. Sometimes this is impossible, so I will post a notice on anticipated delays if needed.

Penalties apply for late assignments as follows:

- All assignments will be penalized 2 points up to FOUR days late. No points will be given for submissions more than FOUR days late.
- Additionally, no written work will be accepted for grading after 5 pm PT on the last day of classes.

SSI Policy on the Creation of Original Work and Use of Generative AI

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. Students may not have another person or entity complete any substantive portion of an assignment or reuse work prepare for courses without obtaining written permission from the instructor(s). Developing strong competencies in research, writing, and the technical execution of geospatial technologies are foundational to SSI academic programs that are designed to prepare you for success in the workplace. Therefore, using generative AI tools – unless explicitly specified otherwise – is strictly prohibited in this course, will be identified as plagiarism, and will be reported to the Office of Academic Integrity.

Grading Timeline

My goal is to provide grading and feedback on each course assignment no later than one week after the assignment was submitted.

Course Content Distribution and Synchronous Session Recordings Policies

USC has policies that prohibit recording and distribution of any synchronous and asynchronous course content outside of the learning environment.

Recording a university class without the express permission of the instructor and announcement to the class, or unless conducted pursuant to an Office of Accessibility Services (OSAS) accommodation. Recording can inhibit free discussion in the future, and thus infringe on the academic freedom of other students as well as the instructor. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Distribution or use of notes, recordings, exams, or other intellectual property, based on university classes or lectures without the express permission of the instructor for purposed other than individual or group study is prohibited. This includes but is not limited to providing materials for distribution by services publishing course materials. This restriction on unauthorized use also applies to all information, which has been distributed to students or in any way has been displayed for use in relationship to the class, whether obtained in class, via email, on the internet, or via any other media. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Learning Experience Evaluations

Please note Learning Experience Evaluations for the course take place at the end of the semester and are facilitated by the University. These evaluations provide an important review of student experiences in the course.

Schedule

| Week | Topic | Readings and Assignments | Deliverables: Due Dates |
|---|---|---|---|
| Weeks 1 – 2: Module 1 Introduction to GIS Customization and Python | | | |
| Week 1 1/13 | Introduction to GIS Programming and Customization | Resume Assignment Reading & Research Discussion 1 Project 1 | Resume Assignment 1: Friday, 1/7 Reading & Research Discussion 1 Forum Posts: Tuesday, 1/21 |
| Week 2 1/20 *Monday, 1/20 is university holiday (Labor Day) | Introduction to the Python Language in GIS | Rey (2017) Ricker et al. (2020) Zandbergen (2024a), Ch.1-5 | Project 1 Workflow & Response: Wednesday, 1/22 & Friday, 1/24 |
| Weeks 3 – 4: Module 2 Fundamentals of Programming Python in GIS | | | |
| Week 3 1/27 | Vector Data Manipulation with Python | Project 2 | Project 1 Report: Monday, 1/27 Reading & Research Discussion 1 Response: Tuesday, 1/28 |
| Week 4 2/3 | Raster Data Processing Techniques using Python | Python Tutorial 1 Amos (2020) Novo et al. (2019) Zandbergen (2024a), Ch.6-11 | Python Tutorial 1: Monday, 2/3 Project 2 Workflow & Response: Wednesday, 2/5 & Friday, 2/7 |
| Weeks 5 – 7: Module 3 Programming Spatial Analysis using Python | | | |
| Week 5 2/10 | Essential Python Geospatial Libraries | Project 3 | Project 2 Report: Monday, 2/10 Reading & Research Discussion 2 Forum Posts: Tuesday, 2/18 |
| Week 6 2/17* Monday, 2/17 is a university holiday | Interactive Computational Geospatial Programming | Python Tutorial 2 Reading & Research Discussion 2 Anselin (2021) Bebortta et al. (2020) Reike (2018) | Python Tutorial 2: Wednesday*, 2/19 |

| Week | Topic | Readings and Assignments | Deliverables: Due Dates |
|--|---|--|--|
| Week 7 2/24 | Cloud-Based Computing Trends in Spatial Computing | Rey (2019) Vance et al. (2019) | Reading & Research Discussion 2 Response: Tuesday, 2/25 Project 3 Workflow & Response: Wednesday, 2/26 & Friday, 2/28 |
| Weeks 8 – 10: Module 4 Python Geospatial Modules and Packages | | | |
| Week 8 3/3 | Python Scripting for GIS | Project 4 Python Tutorial 3 Zandbergen (2024b), Ch. 2-7 | Project 3 Report: Monday, 3/3 |
| Week 9 3/10 3/17-3/21 is Spring Recess | Integrating Python ArcGIS Packages with Third-Party Software | | Python Tutorial 3: Monday, 3/10 Project 4 Workflow & Response: Wednesday, 3/12 & Friday, 3/14 |
| Week 10 3/24 | Expanding on Python Scripting into Web GIS using Notebooks | | Project 4 Workflow Files & Testing: Wednesday, 3/26 & Friday, 3/28 |
| Weeks 11 – 15: Module 5 Innovative Geospatial Programming | | | |
| Week 11 3/31 | Open Source VS Commercial Spatial Programming Tools | Project 5 Reading & Research Discussion3 Boeing (2020) DiBiase (2017) Enescu et al. (2019) Goodchild (2018) Shao et al. (2020) Zandbergen (2024b) Ch. 9 | Project 4 Report: Monday, 3/31 Reading & Research Discussion 3 Forum Posts: Tuesday, 4/8 |
| Week 12 4/7 | Real-Time Spatial Data Access and Manipulation | | Project 5 Workflows & Responses: See Forum Posts |
| Week 13 4/14 | Big Spatial Data in an IoT Era & Resume Workshop | | Reading & Research Discussion 3 Response: Tuesday, 4/22 |
| Week 14 4/21 | Future of Spatial Programming and Customization & Work on Project 5 | | Project 5 Report: Monday, 4/28 |
| Week 15 4/28 Friday, 5/2 is the last day of classes | GeoEthics & Comprehensive Exam Review | | Resume Assignment 2: Tuesday, 4/29 |
| Final Exams 5/7-5/14 | Comprehensive Exam | | All assignments must be submitted no later than 5:00 PM PT on Friday, 5/2 |
| | | | Exam: Tuesday, 5/13 11:00 AM – 1:00 PM PT |

Statement on Academic Conduct and Support Systems

Academic Integrity

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, comprises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university's mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others (including AI generated) or "recycle" work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.

The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

For more information about academic integrity see [the student handbook](#) or the [Office of Academic Integrity's website](#), and university policies on [Research and Scholarship Misconduct](#).

Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment, or what information requires citation and/or attribution.

Students and Disability Accommodations:

USC welcomes students with disabilities into all of the University's educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion.

This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

Support Systems:

[Counseling and Mental Health](#) - (213) 740-9355 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

[988 Suicide and Crisis Lifeline](#) - 988 for both calls and text messages – 24/7 on call

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

[Relationship and Sexual Violence Prevention Services \(RSVP\)](#) - (213) 740-9355(WELL) – 24/7 on call

Free and confidential therapy services, workshops, and training for situations related to gender- and power-based harm (including sexual assault, intimate partner violence, and stalking).

[Office for Equity, Equal Opportunity, and Title IX \(EEO-TIX\)](#) - (213) 740-5086

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

[Reporting Incidents of Bias or Harassment](#) - (213) 740-5086 or (213) 821-8298

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

[The Office of Student Accessibility Services \(OSAS\)](#) - (213) 740-0776

OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

[USC Campus Support and Intervention](#) - (213) 740-0411

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

[Diversity, Equity and Inclusion](#) - (213) 740-2101

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

[USC Emergency](#) - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

[USC Department of Public Safety](#) - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call

Non-emergency assistance or information.

[Office of the Ombuds](#) - (213) 821-9556 (UPC) / (323-442-0382 (HSC)

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

[Occupational Therapy Faculty Practice](#) - (323) 442-2850 or otfp@med.usc.edu

Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.

Resources for Online Students

The Course Brightspace page and the SSI Student Hub on Brightspace have many resources available for distance students enrolled in our graduate programs. In addition, all registered students can access electronic library resources through the link <https://libraries.usc.edu/>. Also, the USC Libraries have many important resources available for distance students through the link: <https://libraries.usc.edu/faculty-students/distance-learners>. These include instructional videos, remote access to university resources, and other key contact information for distance students.
