

SSCI 381 (35798R), Statistics for the Spatial Sciences

Syllabus

Units: 4

Term Day Time: Fall 2025, W and F from 10:00-11:50am

Location: SOS B52

Instructor: Katherine Lester, PhD

Office: AHF B55A

Regular Office Hours: Mon and Wed 2:30-3:30 pm PT. Also available by appointment via email.

Contact Info: lesterk@usc.edu, 213-821-0672

Library Help: Andy Rutkowski

Office: LIPA B40-A

Office Hours: Thu 10 am-12 pm

Contact Info: arutkows@usc.edu, see contact page on Brightspace for Zoom Room

IT Help: Spatial Support

Contact Info: spatial_support@usc.edu, 213-740-4415

Course Scope and Purpose

This is an introductory course to statistics and statistical fundamentals in geospatial analysis. The emphasis will be on the theory and applications of spatial statistics as they pertain to analysis and problem solving. Statistics foundations and their spatial counterparts frequently used in spatial analysis will be introduced with real-world use cases. The course is designed to provide statistical principles necessary to conduct and understand fundamental analysis methods in spatial problem solving. This course will build on the fundamentals with use cases from spatial sciences. The topics will include descriptive and inferential statistics, sampling, estimation, and hypothesis testing. Commonly used spatial analysis methodologies such as spatial centrality and spatial regression will be introduced. Methodologies will be applied to case studies ranging from statistically exploring sociodemographic disparities pertinent to the COVID-19 pandemic to modeling earthquake occurrence patterns.

Learning Outcomes

Upon successful completion of this course, a student will be able to:

- Describe mathematical and statistical foundations for spatial statistics
- Identify appropriate spatial statistical methodologies for solving real-world problems
- Explore the strengths and limitations of statistical methodologies that are frequently used in spatial analysis
- Design a solution for a spatial modelling problem using spatial statistics

Students may vary in their competency levels on these abilities. You can expect to acquire these abilities only if you honor all course policies, attend classes regularly, complete all assigned work in good faith and on time, and meet all other course expectations of you as a student.

Prerequisite(s): None

Co-Requisite(s): None

Class Conduct

Harassment, sexual misconduct, interpersonal violence, and stalking are not tolerated by the university. All faculty and most staff are considered Responsible Employees by the university and must forward all information they receive about these types of situations to the Title IX Coordinator. The Title IX Coordinator is responsible for assisting students with supportive accommodations, including academic accommodations, as well as investigating these incidents if the reporting student wants an investigation. The Title IX office is also responsible for coordinating supportive measures for transgender and nonbinary students such as faculty notifications, and more. If you need supportive accommodations you may contact the Title IX Coordinator directly (titleix@usc.edu or 213-821-8298) without sharing any personal information with me. If you would like to speak with a confidential counselor, Relationship and

Sexual Violence Prevention Services (RSVP) provides 24/7 confidential support for students (213-740-9355 (WELL); press 0 after hours)

COVID-19 policy -- Students are expected to comply with all aspects of USC's COVID-19 policy including, but not limited to, vaccination, indoor mask mandate, and daily TrojanCheck. Failure to do so may result in removal from the class and referral to Student Judicial Affairs and Community Standards. Students are recommended to keep safe physical distancing, whenever possible, to prevent any possible transmission. Please contact your instructor if you have any safety concerns.

Diversity and Inclusion – It is my intent that students from all diverse backgrounds and perspectives be well served by this course, that students' learning needs be addressed both in and out of class, and that the diversity that students bring to this class be viewed as a resource, strength and benefit. It is my intent to present materials and activities that are respectful to everyone, and you are also expected to respect of others regardless of their race, ethnicity, gender identity and expressions, cultural beliefs, religion, sexual orientation, national origin, age, abilities, ideas and perspectives, or socioeconomic status. Your suggestions are encouraged and appreciated. Feel free to let me know ways to improve the effectiveness of the course for you personally or for other students.

Course Structure

The main theoretical concepts are provided through a directed reading of the text *Geographic Information Analysis*. The course reader will emerge as a collection of reading notes that provide the basis for an informed review of most chapters. Additional readings will be assigned to expand on the text when needed. The course will generally unfold on a biweekly basis. When possible, assignments will be given in advance, but usually they will be posted on or before Mondays. Practical exercises utilize published tutorial materials using ArcGIS and a final project allows students to demonstrate their ability to apply spatial analytical tools in an appropriate, informed manner.

Workload – This is a four credit, one semester course. Students should expect to spend 10-15 hours per week completing the work in this course.

Technological and Communication Requirements

ArcGIS and SPSS provided online via the GIST Server; hence, you do not need to install it on your own computer. Instead, every student must have the following technology requirements:

- A computer with a fast Internet connection.
- A functional webcam and a microphone for use whenever a presentation or meeting is scheduled.
- An up-to-date web browser to access the Server

Additionally, SPSS can be accessed through USC's Cloud Apps at <https://software.usc.edu/cloudapps-usc-edu/>.

Last Revised on 3/10/25

SSCI 381 Syllabus, Page 3 of 14

This content is protected and may not be shared, uploaded, or distributed.

If a student does not have access to any of these, please speak with the instructor at the start of the semester. Also, see the USC ITS Student Toolkit here:

<https://keepteaching.usc.edu/students/student-toolkit/>

Brightspace – This course will utilize the Brightspace learning management system which allows students to access course content, upload assignments, participate in discussion forms, among other learning experiences.

SSI Server and Tech Support – This course utilizes the SSI Server which is a virtual desktop giving access to many different professional software. If you are unable to connect to the server or experience any type of technical issues, send an email using your USC account to SSI Tech Support at spatial_support@usc.edu, making sure to copy (cc) me on the email.

Communications – All assignments given and all materials to be handed in will be submitted via Brightspace. The instructor will also create and monitor discussion forums through which students can discuss issues and assignments as needed. Students should read all email sent from Brightspace or from course instructor(s) as soon as possible. Also, students who do not regularly use their USC email accounts should double-check to be sure that mail sent from both the Brightspace accounts and the instructor's account (noted above) to your USC account is forwarded to an address used regularly and does not go into junk mail. The instructor will endeavor to respond to all email within 24 hours of receipt, aiming for no more than 72 hours delay. In the rare case that an instructor is off-line for an extended period of time, an announcement will be posted to the class Brightspace site. Due to the synchronous and asynchronous nature of this course, it is each student's responsibility to stay informed and connected with others in our course. In addition to email, students are expected to login to Brightspace regularly to check for announcements.

A limited number of computers with all the necessary software is available in the SSI Suite (AHF B55) during regular business hours, Monday through Friday 9 am to 5 pm. To reserve a computer, please use this link <https://calendly.com/hilaryj-usc/the-ssi-suite-ahf-b55-student-computers>. These computers are available to any student in an SSCI or GSEC course and can be used as a resource if you experience difficulties in accessing the SSI server or using the GIS software on your personal computer."

Required Readings and Supplementary Materials

The required textbooks for this course are:

- Rogerson, Peter A. 2020. *Statistical Methods for Geography: A student's guide (5th Edition)*. Thousand Oaks, CA: Sage Publications.
- Huff, Darrell. 1993. *How to Lie with Statistics*. New York, NY: W.W. Norton and Company. *Note-edition does not matter. If you find one from 1954 it's essentially the same*

Supplementary readings will be assigned from various sources including but not limited to:

- Bivand, R. S., Pebesma, E., and Gómez-Rubio, V. 2013. "Chapter 1: Hello World: Introducing Spatial Data." In *Applied Spatial Data Analysis with R* (2nd ed. 2013). Springer New York.
- Bolin, D., Verendel, V., Berghauer Pont, M., Stavroulaki, I., Ivarsson, O., & Håkansson, E. 2021. "Functional ANOVA modelling of pedestrian counts on streets in three European cities." *Journal of the Royal Statistical Society. Series A, Statistics in Society*, 184(4), 1176–1198.
- Capel, E., Cleal, C. J., Gerrienne, P., Servais, T., & Cascales-Miñana, B. 2021. A factor analysis approach to modelling the early diversification of terrestrial vegetation. *Palaeogeography, Palaeoclimatology, Palaeoecology*. Volume pp. 566, 110170–.
- Cai, J., Kwan, M.-P., Kan, Z., & Huang, J. (2023). Perceiving noise in daily life: How real-time sound characteristics affect personal momentary noise annoyance in various activity microenvironments and times of day. *Health & Place*, 83, 103053–103053.
- Chen, Y., & Baker, J. W. 2019. Spatial correlations in CyberShake physics-based ground-motion simulations. *Bulletin of the Seismological Society of America*, 109(6), 2447–2458.
- Legendre, Pierre. "Spatial autocorrelation: trouble or new paradigm?" *Ecology* 74, no. 6 (1993): 1659-1673.
- Getis, Arthur, and J. Keith Ord. "The analysis of spatial association by use of distance statistics." In *Perspectives on Spatial Data Analysis*, pp. 127-145. Springer, Berlin, Heidelberg, 2010.
- Greenberg, A. J., Haney, D., Blake, K. D., Moser, R. P., & Hesse, B. W. 2018. Differences in Access to and Use of Electronic Personal Health Information Between Rural and Urban Residents in the United States. *The Journal of Rural Health*, 34(S1), s30–s38.
- Jato-Espino, D., Sillanpää, N., Andrés-Doménech, I., & Rodríguez-Hernandez, J. 2018. Flood Risk Assessment in Urban Catchments Using Multiple Regression Analysis. *Journal of Water Resources Planning and Management*, 144(2).
- Kwan, M.-P. 2012. The Uncertain Geographic Context Problem. *Annals of the Association of American Geographers*, 102(5), 958–968.
- Nilsson, Pia. "Natural Amenities in Urban Space – A Geographically Weighted Regression Approach." *Landscape and Urban Planning* 121 (2014): 45–54. <https://doi.org/10.1016/j.landurbplan.2013.08.017>.
- Ripley, Brian D. "Tests of 'randomness' for spatial point patterns." *Journal of the Royal Statistical Society: Series B (Methodological)* 41, no. 3 (1979): 368-374.
- Shearmur, R., Ananian, P., Lachapelle, U., Parra-Lokhorst, M., Paulhiac, F., Tremblay, D.-G., & Wycliffe-Jones, A. 2022. Towards a post-COVID geography of economic activity: Using probability spaces to decipher Montreal’s changing workscapes. *Urban Studies* (Edinburgh, Scotland), 59(10), 2053–2075.
- Guo, Diansheng. "Local entropy map: A nonparametric approach to detecting spatially varying multivariate relationships." *International Journal of Geographical Information Science* 24, no. 9 (2010): 1367-1389.

- Brunsdon, Chris, A. Stewart Fotheringham, and Martin E. Charlton. "Geographically weighted regression: a method for exploring spatial nonstationarity." *Geographical Analysis* 28, no. 4 (1996): 281-298.
- Ruiz, M., López, F., & Páez, A. 2010. Testing for spatial association of qualitative data using symbolic dynamics. *Journal of Geographical Systems*, 12(3), 281–309.

Readings subject to change.

Description and Assessment of Assignments

Weekly Assignments

Your grade in this class will be determined on the basis of several different assessments:

Reading Quizzes: 10 worth 1 point each. Each week you will be responsible for answering a brief quiz covering the readings for the upcoming lectures. The quiz will close at class time on Wednesday. You will only have 5 minutes to complete the questions, so do not assume you can open-book it.

Labs: 10 worth 5 points each. Over the course of the semester you will have 10 labs to give you hands-on experience with the tools and concepts we discuss in class. There is no lab section for this course, so you will be expected to work on your own and attend office hours when necessary.

Writing Assignments: 2 worth 5 points. Twice this semester you will be asked to write and/or edit a long-form narrative essay. The hardest part of statistics is explaining and interpreting the methods clearly, and these assignments are designed to give you that opportunity.

Application Presentations: 2 worth 5 points. As part of the lead-up/review for the midterm and final exam, every student will prepare a brief presentation on a relevant topic (we will assign topics together as a class). You will briefly describe the topic and provide a real world applied example. More details to follow.

Midterm Exam: 1 worth 10 points. A written midterm exam will be given to gauge your understanding of the content covered in the first half of the course. Expect a variety of question types including short answer, diagramming, and mathematical calculations. Students are expected to take the exam on the scheduled day/time.

Final Exam: 1 worth 10 points. A written final will be given to assess your understanding of the content covered after the midterm. Students are expected to take the exam on the scheduled day/time.

Grading Breakdown

Assessment	Number	Points Each	Total Points
Reading Quizzes	10	1	10
Labs	8	5	50
Writing Exercise	2	10	10
Application Presentation	2	5	10
Midterm Examination	1	10	10
Final Examination	1	10	10
Total	26	-	100

Grading Scale

Assignments in this and other SSCI courses, are graded on the letter grade scale where A is exemplary, B is very good, C is satisfactory, D is unsatisfactory, and F needs improvement. Final grades use the same letter grade scale. The grading scale follows:

A	> 93 points		B-	80-82 points		D+	67-69 points
A-	90-92 points		C+	77-79 points		D	63-66 points
B+	87-89 points		C	73-76 points		D-	60-62 points
B	83-86 points		C-	70-72 points		F	<60 points

Assignment Submission Policy

Unless otherwise noted, assignments must be submitted via Brightspace by the due dates specified in the Course Schedule below and on the assignment instructions.

Your attention to on-time assignment submission is essential if I am to meet my goal to return comments on your submitted assignments before the next one is due. Sometimes this is impossible, so I will post a notice on anticipated delays if needed.

Strict penalties apply for late assignments as follows:

- All assignments will be penalized 1 point per day up to FOUR days late. No points will be given for submissions more than FOUR days late. Note that all assignments worth 1 point will receive 0 points if submitted late.
- Additionally, no written work will be accepted for grading after 5 pm PT on the last day of classes.
- Absences from class sessions must be requested by sending an email to the instructor. Excused absences from class sessions will be granted only for valid reasons; please notify me of the reason for your absence in your email.

Grading Timeline

My goal is to provide grading and feedback on each course assignment no later than one week after the assignment was submitted.

Course Content Distribution and Synchronous Session Recordings Policies

USC has policies that prohibit recording and distribution of any synchronous and asynchronous course content outside of the learning environment.

Recording a university class without the express permission of the instructor and announcement to the class, or unless conducted pursuant to an Office of Accessibility Services (OSAS) accommodation. Recording can inhibit free discussion in the future, and thus infringe on the academic freedom of other students as well as the instructor. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Distribution or use of notes, recordings, exams, or other intellectual property, based on university classes or lectures without the express permission of the instructor for purposed other than individual or group study is prohibited. This includes but is not limited to providing materials for distribution by services publishing course materials. This restriction on unauthorized use also applies to all information, which has been distributed to students or in any way has been displayed for use in relationship to the class, whether obtained in class, via email, on the internet, or via any other media. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Learning Experience Evaluations

Please note Learning Experience Evaluations for the course take place at the end of the semester and are facilitated by the University. These evaluations provide an important review of student experiences in the course.

Course Schedule

Week	Topic	Assignments & Readings	Deliverables/Due Dates
Module 1: Introductory Framework			
Week 1 (8/25-8/31)	Wednesday: The Basic Framework	Rogerson Ch.1 Huff and Geis Ch. 1 and 2	
	Friday: Descriptive Statistics	<i>7 Tips to Help You Achieve Academic Success</i> , Penn State	
Week 2 (9/1-9/7)	Wednesday: Intro to Probability	Rogerson Ch. 3 and 4	Reading Quiz #1 9/3 @ 10:00 am
	Friday: Probability Distributions	Huff and Geis Ch. 3 and 4	

Week	Topic	Assignments & Readings	Deliverables/Due Dates
Week 3 (9/8-9/14)	Wednesday: Probability Models	Rogerson Ch. 2 Huff and Geis Ch 5 and 6	Reading Quiz #2 9/10 @ 10:00 am
	Friday: Centrography and Spatial Considerations	<i>An Analytic Approach to Understanding Process Dynamics in Geodesign Studies</i> , Cocco, Jankowski, and Campagna (2019)	Lab #1: Types of Data 9/12 @ Midnight
Module 2: Getting Spatial			
Week 4 (9/15-9/21)	Wednesday: Intro to Inferential Testing	Rogerson Ch. 5 Huff and Geis Ch. 7 and 8	Reading Quiz #3 9/17 @ 10:00 am
	Friday: Advanced Inferential Testing	<i>Unfolding events in space and time: Geospatial insights into covid-19 diffusion in Washington state during the initial stage of the outbreak</i> , Thakar (2020)	Lab #2: Descriptive Statistics 9/19 @ Midnight
Week 5 (9/22-9/28)	Wednesday: Inferential Testing in Space	<i>Temporal Land-Use Pattern Analysis with the Use of Nearest Neighbor and Quadrat Methods</i> , Getis (1964)	Reading Quiz #4 9/24 @ 10:00 am Lab #3: Spatial Decriptives 9/26 @ Midnight
	Friday: Getis-Ord Methods	<i>How Hot Spot Analysis Works</i> (ESRI) <i>How High/Low Clustering Works</i> (ESRI) <i>Thermal summer diurnal hot-spot analysis: The role of local urban features layers</i> , Guerri et al. (2021) Huff and Geis Ch. 9 and 10	
Module 3: Advanced Inferential Statistics			
Week 6 (9/29-10/5)	Wednesday: Intro to Variance Analysis	Rogerson Ch. 6	Reading Quiz #5 10/1 @ 10:00 am Lab #4: Probability Maps and Hot Spots 10/3 @ Midnight
	Friday: Kruskal-Wallace and ANOVA	<i>An analysis of tourist's perceptions toward tourism development: Study of cold desert destination, India</i> , Jangra, Kaushik, and Saini (2021) <i>Spatial difference of transit-based accessibility to hospitals by regions using spatially adjusted ANOVA</i> , Chen et al. (2019)	
Week 7 (10/6-10/12)	Wednesday: Qualitative Statistics	<i>Measuring Ethnic Clustering and Exposure with the Q Statistic...</i> Paez, Lopez, and Logan (2012)	
	*Fall Break, No Class		

Week	Topic	Assignments & Readings	Deliverables/Due Dates
Module 4: Relationships and Dimension Reduction			
Week 8 (10/13-10/19)	Wednesday: Correlation	Rogerson Ch. 7 <i>Use of GIS and Moran's I to support residential solid waste recycling in the city of Annaba, Algeria, Cheniti, Cheniti, and Brahmia (2021)</i>	Reading Quiz #6 10/15 @ 10:00 am
	Friday: Spearman's Rho and Moran's I	<i>Hot Spot Analysis versus Cluster and Outlier Analysis: An enquiry into the grouping of rural accommodation in Extremadura, Sanchez-Martin et al. (2019)</i>	Writing Exercise #1 10/17 @ Midnight
Week 9 (10/20-10/26)	Wednesday: Applications Day #1	None!	Application Presentation 10/22 @ 10:00
	Friday: Midterm		Midterm 10/24 @ 10:00
Week 10 (10/27-11/2)	Wednesday: Factor Analysis	Rogerson Ch. 8 <i>Classification and Clustering, Lamb (2020)</i>	Reading Quiz #7 10/29 @ 10:00 am
	Friday: Cluster Analysis and Regionalization	<i>Built environment typologies prone to risk: A cluster analysis of open spaces in Italian cities, D'amico et al. (2021)</i>	Lab #5: Moran's I and Outlier Analysis 10/31 @ Midnight
Module 5: Regression			
Week 11 (11/3-11/9)	Wednesday: Bivariate Regression	Rogerson Ch. 9 <i>Local Measures of Spatial Association, Livings and Wu (2020)</i>	Reading Quiz #8 11/5 @ 10:00 am
	Friday: Assumption Checking	<i>Differences in Access to and Use of Electronic Personal Health Information Between Rural and Urban Residents in the United States, Greenberg et al. (2018)</i>	Lab #6: Regionalization and Factor Analysis 11/7 @ Midnight
Week 12 (11/10-11/16)	Wednesday: Multivariate Regression	Rogerson Ch. 10 <i>Assessing the Level of Urban Sustainability in the Capital of Pakistan: A Social Analysis</i>	Reading Quiz #9 11/12 @ 10:00 am 11/14 @ Midnight

Week	Topic	Assignments & Readings	Deliverables/Due Dates
	Friday: Variable Types and Common Errors	<i>Applied through Multiple Linear Regression</i> , Aziz and Anwar (2024) <i>Reconstructing cloud-contaminated NDVI images with SAR-Optical fusion using spatio-temporal partitioning and multiple linear regression</i> , Mao, Van Niel, and McVicar (2023)	
Week 13 (11/17-11/23)	Wednesday: Regression and GIS	Rogerson Ch. 11 <i>Geographically Weighted Regression: A Method for Exploring Spatial Nonstationarity</i> , Brunsdon, Fotheringham, and Charlton (1996)	Reading Quiz #10 11/19 @ 10:00 am Lab #7: OLS Regression 11/21 @ Midnight
	Friday: Geographically Weighted Regression	<i>Natural Amenities in Urban Space – A Geographically Weighted Regression Approach</i> , Nilsson (2014)	
Week 14 (11/24-11/30)	* Thanksgiving Break-No Class		
Module 6: Thinking like a Spatial Statistician			
Week 15 (12/1-12/7)	Wednesday: A Geospatial Quagmire?	<i>Conceptual Models of Error and Uncertainty</i> , Couclelis (2020) <i>Epistemological Critiques</i> , Leszynski (2017)	Applications Presentation 12/5 @10:00 Lab #8: GWR 12/5 @ Midnight
	Friday: Applications Day #2	<i>The Uncertain Geographic Context Problem</i> , Kwan (2012) <i>Perceiving noise in daily life: How real-time sound characteristics affect personal momentary noise annoyance in various activity microenvironments and times of day</i> , Cai et al. (2023)	
Final Exam and Writing Assignment #2 – Monday, Dec. 15 @ 8:00-10:00am PST			

Statement on Academic Conduct and Support Systems

Academic Integrity

Last Revised on 3/10/25

SSCI 381 Syllabus, Page 11 of 14

This content is protected and may not be shared, uploaded, or distributed.

The University of Southern California is a learning community committed to developing successful scholars and researchers dedicated to the pursuit of knowledge and the dissemination of ideas. Academic misconduct, which includes any act of dishonesty in the production or submission of academic work, comprises the integrity of the person who commits the act and can impugn the perceived integrity of the entire university community. It stands in opposition to the university's mission to research, educate, and contribute productively to our community and the world.

All students are expected to submit assignments that represent their own original work, and that have been prepared specifically for the course or section for which they have been submitted. You may not submit work written by others or "recycle" work prepared for other courses without obtaining written permission from the instructor(s).

Other violations of academic integrity include, but are not limited to, cheating, plagiarism, fabrication (e.g., falsifying data), collusion, knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage.

The impact of academic dishonesty is far-reaching and is considered a serious offense against the university. All incidences of academic misconduct will be reported to the Office of Academic Integrity and could result in outcomes such as failure on the assignment, failure in the course, suspension, or even expulsion from the university.

For more information about academic integrity see [the student handbook](#) or the [Office of Academic Integrity's website](#), and university policies on [Research and Scholarship Misconduct](#).

Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment, or what information requires citation and/or attribution.

Students and Disability Accommodations:

USC welcomes students with disabilities into all of the University's educational programs. The Office of Student Accessibility Services (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

Support Systems:

[Counseling and Mental Health](#) - (213) 740-9355 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

[988 Suicide and Crisis Lifeline](#) - 988 for both calls and text messages – 24/7 on call

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline is comprised of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

[Relationship and Sexual Violence Prevention Services \(RSVP\)](#) - (213) 740-9355(WELL) – 24/7 on call

Free and confidential therapy services, workshops, and training for situations related to gender- and power-based harm (including sexual assault, intimate partner violence, and stalking).

[Office for Equity, Equal Opportunity, and Title IX \(EEO-TIX\)](#) - (213) 740-5086

Information about how to get help or help someone affected by harassment or discrimination, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

[Reporting Incidents of Bias or Harassment](#) - (213) 740-5086 or (213) 821-8298

Avenue to report incidents of bias, hate crimes, and microaggressions to the Office for Equity, Equal Opportunity, and Title for appropriate investigation, supportive measures, and response.

[The Office of Student Accessibility Services \(OSAS\)](#) - (213) 740-0776

OSAS ensures equal access for students with disabilities through providing academic accommodations and auxiliary aids in accordance with federal laws and university policy.

[USC Campus Support and Intervention](#) - (213) 740-0411

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

[Diversity, Equity and Inclusion](#) - (213) 740-2101

Information on events, programs and training, the Provost's Diversity and Inclusion Council, Diversity Liaisons for each academic school, chronology, participation, and various resources for students.

[USC Emergency](#) - UPC: (213) 740-4321, HSC: (323) 442-1000 – 24/7 on call

Emergency assistance and avenue to report a crime. Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

[USC Department of Public Safety](#) - UPC: (213) 740-6000, HSC: (323) 442-1200 – 24/7 on call

Non-emergency assistance or information.

[Office of the Ombuds](#) - (213) 821-9556 (UPC) / (323-442-0382 (HSC)

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

[Occupational Therapy Faculty Practice](mailto:otfp@med.usc.edu) - (323) 442-2850 or otfp@med.usc.edu

Confidential Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.

Resources for Online Students

The Course D2L page and the SSI Student Hub on D2L have many resources available for distance students enrolled in our graduate programs. In addition, all registered students can access electronic library resources through the link <https://libraries.usc.edu/>. Also, the USC Libraries have many important resources available for distance students through the link: <https://libraries.usc.edu/faculty-students/distance-learners>. These include instructional videos, remote access to university resources, and other key contact information for distance students.
